NOTE—'Special' means in the case of Imports ; 'Imports for Home Consumption,' in case of Exports, Exports of Domestic Produce and Manufacture. a The figures for Mexico include coin and bullion.

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Custom-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

JERSEY.

LAW ON IMPORT DUES.

(Dated May 12, 1902, and September 7, 1904.)

Art. 1. Every owner or master of a ship or vessel arriving at a port of this island having on board merchandise intended to be landed in the island, shall be required, as soon as called upon to do so and before landing (such merchandise), to deliver to the harbour master or other authorized officer, a declaration signed by him stating :—

1. The name, tonnage and nationality, and the port of lading of the ship;
2. The nature, value, tonnage, weight or measure, according to the rate of freight-ing.

Printed forms shall be delivered on board the said vessel for the purpose.

The harbour master may require the production of the register, the manifest and the bills of lading relative to the said merchandise, and shall have the right of verifying the correctness of the papers communicated to him.

Art. 2. Every importer or consignee of merchandise or other goods landed in the island shall pay, as soon as called upon to do so by the harbour master or other authorized officer, as import dues, two shillings and six pence per ton gross on imported merchandise, with the exception of coal, on which one shilling only shall be paid per ton gross, and also with the exception of the objects and articles enumerated in the schedule annexed to the present law, for which payment shall be made in conformity with the tariff contained in the said schedule.

His Majesty's mails, articles sent by parcel post, war material and stores are exempt from the dues mentioned in this article.

Any bicycle or tricycle, belonging to a passenger and intended for his use, shall be looked upon as part of his luggage and shall be exempt from the dues.

Art. 3. The dues imposed by this law shall be paid at the harbour master's office, and by him remitted to the treasurer of the States to be applied to the States' general purposes.

Art. 4. In every case the dues imposed by the present law shall have preference over any other claim which may be made against the goods subject to such dues.

Art. 5. The harbours' committee is entrusted with the duty of putting the provisions of the present law into execution, and to that effect is authorized to prepare and adopt any special regulations it may consider useful for that purpose. It may also

enter into an agreement with the master or agent of a ship carrying a general cargo, in virtue of which the latter is authorized to receive directly from the consignees of the goods all dues to which such consignees are liable in virtue of this law. The said committee shall appoint and if necessary dismiss the employees and other persons entrusted with the putting into execution of the said law. It shall fix their salaries and receive the amount thereof from the treasurer of the States.

Art. 6. Before commencing to unload any vessel, the master thereof shall give timely notice to the harbour master of his intention to do so, in order that the latter may cause the unloading to be superintended in an efficient manner.

Art. 7. The unloading may not take place on Sundays, or at night between 8 p.m. and 6 a.m., without the written permission of the harbour master, and in no case may the unloading be carried out in places other than those indicated by the harbour master.

Art. 8. The words 'harbour master' include not only the harbour masters of St. Helier, St. Aubin and Rozel, but also persons authorized and appointed to look after the other harbours of the island and to levy the dues imposed by the present law.

Art. 9. Any infringement of an article of the present law shall be punished by a fine of from one to ten pounds sterling, and the case shall be treated before the Court for the Repression of Minor Offences.

Art. 10. Fines imposed by this law shall go to His Majesty.

Schedule or Tariff of Dues to be levied (1), referred to in Article 2 of this Law.

	£	s.	d.
For each horse	0	4	0
For each bull, ox, cow or heifer	0	2	6
For each calf of less than three months, sheep, goat, pig, dog and other animal	0	1	3
For each 4-wheeled vehicle	0	2	6
For each 2-wheeled vehicle	0	1	3
For each bicycle or tricycle	0	1	3
For wood in planks, per 165 cubic feet	0	7	6
For wood in beams, per 150 cubic feet	0	7	6
For unsquared wood, per 120 cubic feet	0	7	6
For paraffin and the like, per barrel of 42 gallons	0	0	6
For wine, beer and other liquids of the same nature, per cask of 200 gallons	0	2	6
For the same in ordinary wine bottles, per 36 dozen	0	2	6

(1) The Law dated May 8 and July 29, 1901 provides for the payment of Harbour Dues, viz. 1 *d.* per ton of tonnage of vessels; 6 *d.* per ton gross on all goods imported with the exception of the undermentioned animals and objects for which the following equivalent dues shall be levied :

	Embarked or disembarked.
For each horse	9 pence.
For each bull, ox, cow or heifer	6 do.
For each sheep, goat, pig, dog and other animal	3 do.
For each four-wheeled vehicle	6 do.
For each two-wheeled vehicle	3 do.
For each bicycle or tricycle	3 do.
For wood, per 40 cubic feet	6 do.
For paraffin and the like, per barrel of 42 gallons	1 penny.
For wine, beer and other liquids of the same nature, per cask of 200 gallons	6 pence.
For the same in ordinary wine bottles, per 36 dozen	6 do.

The harbours' committee is authorized to levy a duty of two shillings and six pence for import dues on each ton of forty cubic feet or on each ton of two thousand and eighty pounds of gross weight, at the discretion of the said committee, on the merchandise not enumerated in this tariff, the minimum duty on a package being fixed at one penny and any fraction of a penny being considered and reckoned as a whole penny.

In case of any disagreement as regards the weight or measurement of the merchandise subject to the dues, it shall be weighed on the public weigh-bridge or measured at the expense of the proprietor or consignee, as the case may be.

LAW ESTABLISHING AN IMPOST ON TOBACCO.

(Dated April 9, 1903, and September 7, 1904.)

Art. 1. All tobacco imported into the island shall be subject to an impost, as follows :—

Tobacco—	£	s.	d.
Leaf, unstemmed	0	0	4
Leaf, stemmed	0	0	8
Cigars	0	1	0

LAW LEVYING AN ADDITIONAL DUTY ON SPIRITUOUS LIQUORS.

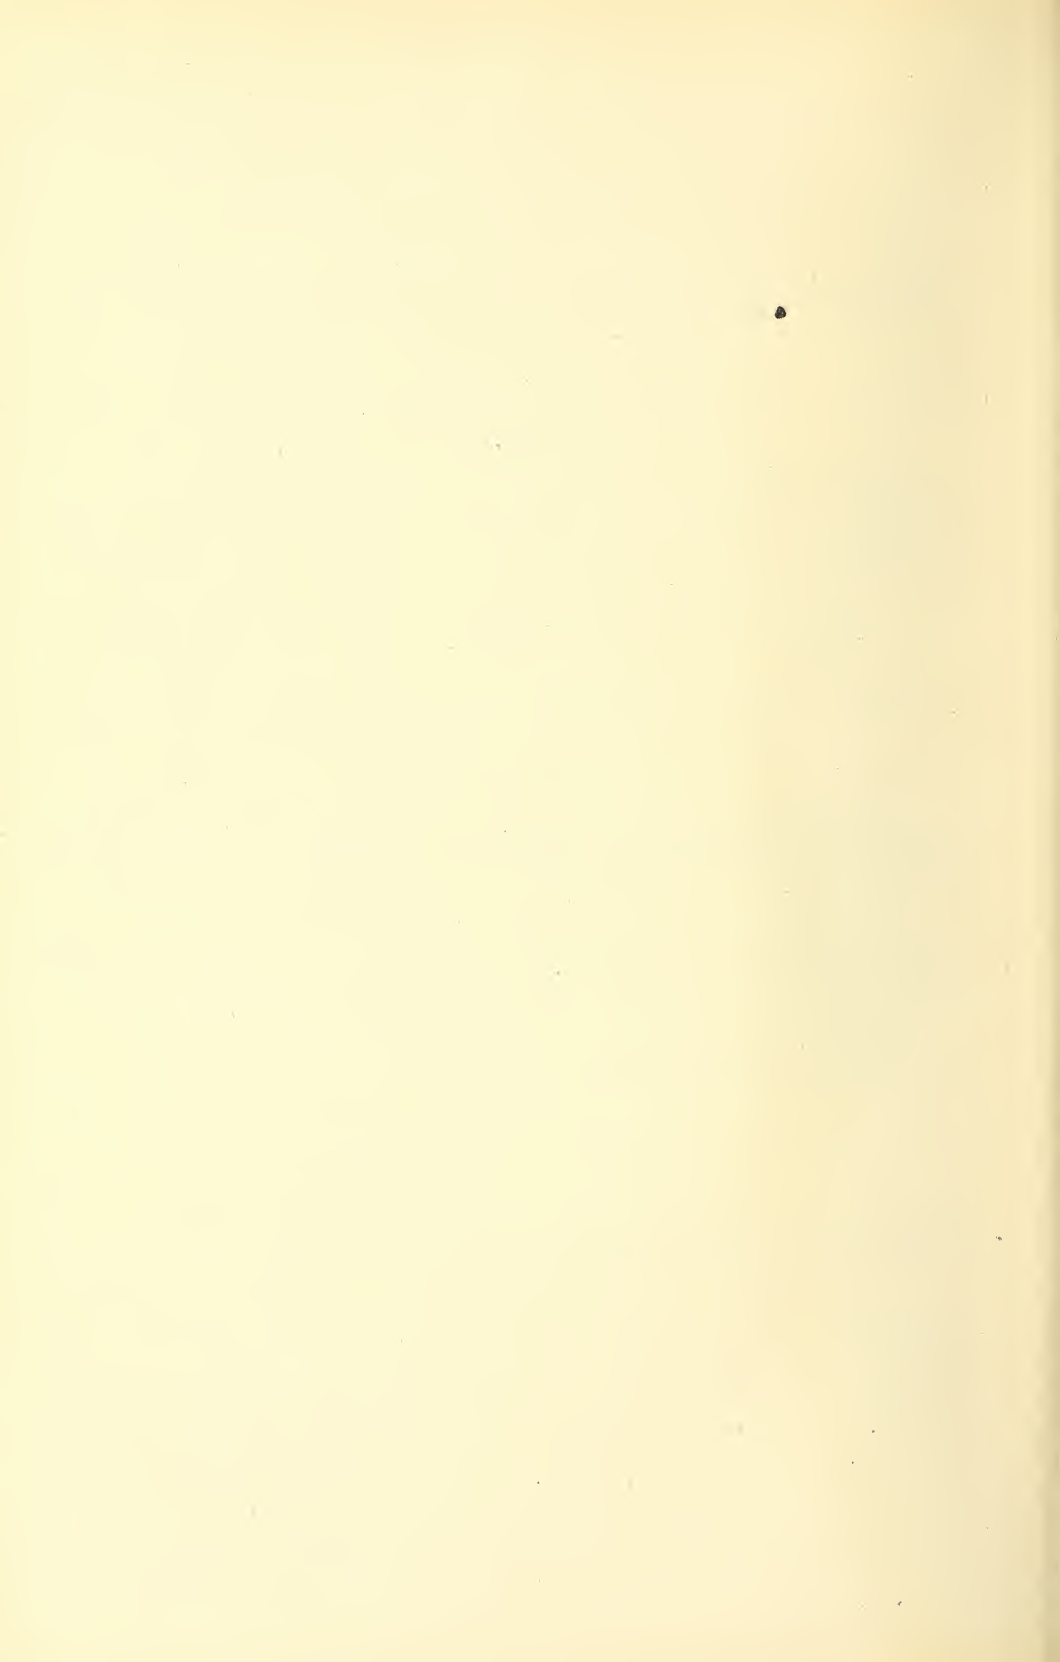

(Dated April 9, 1903.)

Art. 1. From and after September 29, or March 25, whichever first follows the promulgation of the present law, an additional duty at the rate of 28½ pence per pot shall be levied on spirituous liquors whether introduced or distilled in this island.

Art. 2

Art. 3. The rate, both of the impost levied under Royal authority and of the additional tax, shall in future be fixed on liqueur of a strength not exceeding 100 degrees. Liqueur of a strength exceeding 100 degrees shall pay an additional duty in proportion.

Liqueur of less than 100 degrees in strength, imported in cask, shall be entitled to a reduction of duty in proportion.

TARIFF CHANGES

UNITED KINGDOM.

REDUCTION OF DUTY ON TEA.

(General Customs Order No. 32, of April 20, 1905.)

There shall be charged on and after the first day of July, nineteen hundred and five, until the first day of July, nineteen hundred and six, the following customs import duty on tea (that is to say):—

‘Teathe pound Sixpence.’

MONTSERRAT.

I.—AN ORDINANCE TO AMEND THE CUSTOMS TARIFF ORDINANCE, 1896.

(No. 3, assented to 17th June, 1904.)

1. This ordinance may for all purposes be cited as ‘The Customs Tariff Amendment Ordinance, 1904.’

2. Schedule *B* to Ordinance No. 1, of 1896, intituled ‘An Ordinance to grant duties of customs upon certain imported goods,’ is hereby repealed and in place and stead thereof the schedule hereto substituted, and the said ordinance shall henceforth be read and construed accordingly.

SCHEDULE.

1. Animals alive, to include only sheep, goats, hogs, poultry, turtle and all sucking animals.

2. Baggage, personal, of passengers containing apparel and articles of personal use and all professional apparatus and workman’s tools brought by a passenger for his own use.

3. Books printed, whether bound or unbound, pamphlets, newspapers, and printed matter in all languages.

4. Chemicals for agricultural purposes.

5. Consular articles imported for the official use of the consulate of any foreign country or place, provided that a similar privilege in respect of similar articles is accorded by the laws and customs of such foreign country or place to His Majesty’s consulate therein.

6. Eggs.

7. Fertilizers of all kinds, natural and artificial.

8. Fish fresh or in ice.

9. Fruits and vegetables (except potatoes other than sweet potatoes) not being preserved.

10. Furniture in use the property of, and imported by, persons coming to reside in the presidency.

11. Gold and silver coin and bullion.

12. Ice.
13. Insecticides, viz.: Paris green and such other insecticides or fungicides as the Governor in Council may from time to time determine.
14. Maps and charts.
15. Marble and alabaster, in the rough or squared, worked or carved, for building purposes or monuments.
16. Multiple effect machinery for manufacturing sugar and plant and parts thereof and any materials required to erect, enlarge or improve a factory wherein a multiple effect is or is to be installed, provided that such materials are to form an integral part of such factory.
17. Music printed.
18. Naval stores for use of the Admiralty.
19. Oil for use in oil engines as fuel.
20. Packages, viz.: Boxes, barrels, crates, and inner packages of all kinds; also packages and coverings (except butts, puncheons, hogsheds, tierces and trunks) in which goods are actually imported, if usual and proper for the purpose.
21. Pictures and engravings.
22. Plants, shrubs and seeds of all kinds for planting.
23. Public worship and education—Articles specially imported for, viz.: musical instruments of all kinds, lamps, bells, wines, and other furniture and articles to be used in the celebration of divine worship and all goods imported for the use or repair of churches, chapels, and duly certified schoolhouses.
24. Salt.
25. Shipbuilding materials and accessories of all kinds, when imported for the construction, equipment or repair of a specific vessel or boat, except rope and cordage of all kinds, including wire rope.
26. Specimens illustrative of natural history.
27. Steam engines, and steam pipes, boilers and boiler tubes, fire bars, machinery and apparatus, whether stationary or portable, for agriculture, irrigation or mining, and all necessary parts and appliances for the erection or repair thereof or for the communication of motive power thereto, when not imported for sale, including all and every kind or description of machinery or parts of a machine and all and every kind or description of apparatus, to be used in any manner whatsoever for, in or towards the manufacture or preparation for market of agricultural produce when not imported for sale.
28. Stores of every description imported or supplied from bond for the public use of His Majesty's land and sea forces, military uniforms, accoutrements and equipments imported by members of the defence force for their own use; all goods or stores imported by the Board of Health for the public use of the Board; all things imported or supplied from bond for the use of the Governor and all goods or stores imported by the government for the public uses of the presidency, provided that if the Governor purchase any goods in the presidency he may recover from the treasury the actual amount of the duty which may have been paid on the importation of such goods.
29. Surgical instruments and appliances imported for his own use by a medical practitioner in actual practice and not exceeding £100 in value.
30. Telegraph wire, telegraphic, telephonic and electrical apparatus and all appliances of all kinds for communication or illumination thereby.
31. Tombstones, tablets and railings for graves.

II.—AN ORDINANCE TO FURTHER AMEND THE CUSTOMS TARIFF ORDINANCE, 1896.

(No. 2, assented to 23rd January, 1905.)

1. This ordinance may, for all purposes, be cited as 'The Customs Tariff Amendment Ordinance, 1905.'

2. The words and figures

£ s. d.

Bread and biscuit, not fancy or in tin, per barrel not exceeding 100 lbs.	0	1	0
Cornmeal, per barrel.	0	2	0
Fish, dried or smoked, per cwt.	0	1	6
Pickled mackerel, herring and other, per barrel	0	2	6
Flour or wheat, per barrel	0	5	0

appearing under Item 13, Provisions, in Schedule A of the Customs Tariff Ordinance, 1896, and the words and figures

Leaf: if imported in packages containing not less than 500 lbs., per lb. 0 0 9

If imported in packages containing less than 500 lbs., per lb. 0 2 0

appearing under Item 15, Tobacco, in the said Schedule A of the said ordinance, are hereby repealed, and in place and stead thereof the following words and figures substituted, that is to say :—

Bread and biscuit, not fancy or in tin, per barrel not exceeding 100 lbs. 0 1 1

Cornmeal, per barrel 0 2 2½

Fish, dried or smoked, per cwt. 0 1 8

Pickled mackerel, herring and other, per barrel 0 2 9

Flour of wheat, per barrel 0 5 6

Tobacco, leaf: if imported in packages containing not less than 500 lbs., per lb. 0 0 10

If imported in packages containing less than 500 lbs., per lb. 0 2 2½

and the said Schedule A of the said ordinance shall henceforth be read and construed accordingly.

ST. CHRISTOPHER-NEVIS.

I.—THE CUSTOMS TARIFF AMENDMENT ORDINANCE, 1904.

(No. 3, assented to October 28, 1904.)

1.

2. The following subsection shall be added to section 5 of Ordinance No. 11 of 1903 :—

(a) 'Insecticides and fungicides of the kinds, sorts and descriptions certified by the Superintendent of Agriculture as being fit and proper for use in agriculture'—; and the word 'cotton' shall be inserted between the words 'sugar' and 'and' at the end of the fourth paragraph of Schedule C of the said ordinance; and the said section 5 and the said section C shall respectively henceforth be read and construed accordingly.

II.—THE PETROLEUM (FUEL) ORDINANCE, 1904.

(No. 5, assented to December 17, 1904.)

3.

2. Notwithstanding the provisions of ordinance No. 14 of 1892 of this presidency, entitled: 'An ordinance to amend the law relating to the safe-keeping of gunpowder and petroleum,' it shall be lawful at all times hereafter, subject to such rules and regulations as shall from time to time be made by the officer administering the government of this presidency and approved and confirmed by the executive council of the

presidency, to import and land in this presidency any petroleum for use as fuel in or about any oil engine now or hereafter erected in this presidency.

4. All petroleum imported and landed under the provisions of this ordinance shall be free of import duty and wharfage dues, any Act or ordinance to the contrary notwithstanding.

III.—ORDINANCE NO. 7 OF 1904, ENTITLED 'THE EXPORT DUTY CONTINUATION ORDINANCE, 1904,'
MAINTAINING IN FORCE UNTIL 31ST DECEMBER, 1905, THE 'EXPORT
DUTY ORDINANCE, 1898.'

The present ordinance continues in force until December 31, 1905, the 'Export Duty Ordinance, 1898,' levying export duties on sugar and rum. (*See Tariff, p. 8.*)

SEYCHELLES ISLANDS.

I. THE CUSTOMS TARIFF REVISION ORDINANCE, 1903.

(*No. 37, assented to December 4, 1903.*)

This ordinance, which came into force on the 1st January, 1904, repeals ordinance No. 29 of 1900, but save the under-noted alterations, is identical with ordinance 29 aforesaid.

SCHEDULE B.

Description of Goods.

No.

Rate of duty.
Rs. Cts.

23. Wines:—

In casks, per hectolitre 9 0
and a further duty of Rs. 3 per degree or fraction of a degree of alcohol and per hectolitre, above 16 degrees, according to Gay Lussac's alcohometer, contained in wines of the proper strength and nature, whatever be the country of their origin.

In bottles, each bottle not to exceed one litre, per doz. bottles 2 0

In bottles, each bottle not to exceed 5 decilitres, per doz. bottles 1 0

In any vessel whatsoever not being a cask or a bottle of one litre or less, per litre 0 9

And a further duty of R. 0.03 per degree or fraction of a degree of alcohol, and per litre above 16 degrees, according to Gay Lussac's alcohometer, contained in wines of the proper strength and nature, whatever be the country of their origin.

Champagne and other sparkling wines, per bottle exceeding one litre but not exceeding two litres 0 60

Champagne and other sparkling wines, per bottle not exceeding one litre 0 30

Champagne and other sparkling wines, per half bottle not exceeding five decilitres	0 15
24. Articles of millinery (articles de mode, both finished or unfinished, artificial feathers, metal clasps or buckles, ribbon, lace, and all articles made use of by milliners and modistes for purposes of ornamentation, shall be liable to an <i>ad valorem</i> duty of	8%
All goods, wares, and merchandise, not otherwise charged with duty, and not mentioned above or especially exempted, shall be liable to an <i>ad valorem</i> duty of	12½%

SCHEDULE C.

Exemptions.

3. Cancelled, and subsequent numbers altered accordingly down to 28 inclusive.
28. *Medical instruments and appliances.*
Nos. added :
42. *Manure of all sorts.*
43. *The following substances, when imported for the purpose of being used in the manufacture of soap :*
 - (i) *Soda, caustic.*
 - (ii) *Potash, caustic.*
 - (iii) *Silicate of soda.*
 - (iv) *Silicate of potash.*

II.—CONVENTION BETWEEN THE UNITED KINGDOM AND FRANCE RESPECTING COMMERCIAL RELATIONS BETWEEN FRANCE AND THE SEYCHELLES ISLANDS.

(Signed at London, April 16, 1902.—Ratifications exchanged at London, March 27, 1905.)

Art. 1. The following colonial products: coffee, cocoa, pepper, pimento, amomums and cardamoms, cinnamon, cassia lignea, nutmegs, mace, cloves, vanilla, and tea, produce of the Seychelles Islands, shall enjoy, on importation into France, Algeria, French Colonies and possessions, and the Protectorates of Indo-China and Tunis, the lowest customs duties applicable to similar products of any other foreign origin.

Art. 2. Reciprocally, the natural and manufactured products of France, Algeria, French Colonies and possessions, and the Protectorates of Indo-China and Tunis, shall enjoy, without restriction or reserve, on importation into the Seychelles Islands, the lowest customs duties applicable to similar products of other foreign origin.

Further, the duties on wine produced in France, Algeria, French Colonies and possessions, and the Protectorates of Indo-China and Tunis shall be reduced as follows: From 10 to 9 rupees for wine in casks; from 4 to 2 rupees per dozen bottles for wine in bottles. The *ad valorem* duties on articles of clothing and haberdashery produced in France, Algeria, French Colonies and possessions, and the Protectorates of Indo-China and Tunis, shall, on importation into the Seychelles Islands, be reduced from 15 to 12½ per cent.

Art. 3. The certificates of origin which may be required for the admission of goods to the preferential conditions stipulated in the present Treaty shall be *visé* by French Consuls and by British Consuls without levying consular fees.

Art. 4. The present convention shall be ratified by the two governments as soon as possible, and the ratifications shall be exchanged at London. It shall come into effect immediately after the exchange of ratifications, and shall remain in force until the expiration of a year from the day on which one of the high contracting parties shall have announced the intention of terminating it.

SIERRA LEONE.

I. FREE IMPORTATION OF CERTAIN ARTICLES.

Under the orders respectively mentioned below, the following articles are allowed to be imported into the colony free of duty:—

1. Tools, implements and materials imported by miners or prospectors for their *bona fide* use in mining or prospecting. (*Order No. 17, assented to 24th August, 1901.*)

2. Machinery of every description. (*Order No. 10, assented to 14th July, 1903.*)

3. Printing machines and all appliances (except printing paper) used in the process of printing, and printing ink.

All printed literary matter, including scientific and technical works in all languages, and printed music. (*Order of 12th October, 1903, with effect from 1st January, 1904.*)

4. Guns for sporting purposes re-imported, which have previously been stamped, licensed, and duty-paid under the laws of the colony, and have remained in the possession of the original importer. (*Order of 25th January, 1904, with effect from 1st March, 1904.*)

II.—ORDINANCE TO AMEND THE CUSTOMS DUTIES ORDINANCE, 1900.

(*Assented to November 12, 1904.*)

Be it enacted by the Governor of the Colony of Sierra Leone with the advice and consent of the Legislative Council thereof, as follows:—

1. This ordinance may be cited as ‘The Customs Duties Amendment Ordinance, 1904.’

2. In addition to the duties of Customs now payable on spirits, tobacco and wines, there shall, from and after the passing of this ordinance, be raised, levied, collected and paid unto His Majesty, His Heirs, and successors, upon spirits, tobacco and wines imported or brought, whether before or after the passing of this ordinance, into the Colony or Protectorate and landed or transhipped therein for home consumption or for the purpose of being carried up the Sierra Leone river or any other river of the Colony or Protectorate for any use or purpose whatsoever the duties following; that is, to say:—

£ s. d.

Spirits and strong waters of which the degree of strength can be ascertained by Sykes’ hydrometer:

(a) Where the spirit is of less than proof strength by such hydrometer. Per Imperial gallon 0 1 0
(And so in proportion for any greater or less quantity than an Imperial gallon.)

(b) Where the spirit is of proof or of any greater strength by such hydrometer. Per proof gallon . . . 0 1 0
(And so on in proportion for any greater strength than proof and for any greater or less quantity than a gallon.)

(c) Spirits being sweetened or mixed so that the degree of strength cannot be ascertained. Per Imperial gallon 0 1 0

(d) Spirits unenumerated. Per Imperial gallon.. ..	0	1	0
Tobacco unmanufactured. Per lb.	0	0	1
Wine: Claret. Per gallon.	0	1	0
All other wines. Per gallon	0	1	6

3. This ordinance shall not apply to the articles exempted from the payment of duties under the provisions of Section 4 of the Customs Duties Ordinance, 1900, or any ordinance amending the same.

A drawback of the whole of the duties of Customs imposed by this ordinance shall be allowed on all articles which would be exempt from payment of duties of Customs under the provisions of Section 4 of the Customs Duties Ordinance, 1900, if such articles had been in the first instance imported for the use of His Majesty's Army or Navy when the Officer Commanding Troops or the Officer Commanding each of any of His Majesty's Ships for which such articles are required shall certify the receipt thereof and that the same are for the use of His Majesty's Army or Navy.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian Agents will furnish commercial information to those interested as to local trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	{ J. S. Larke,* The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand. D. H. Ross, P.O. Box 140, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.

* Mr. Larke now being in Canada, all correspondence intended for him should be addressed to this department.

JAMAICA.

REPORT OF COMMERCIAL AGENT.

(Mr. G. Eustace Burke.)

KINGSTON, JAMAICA, July 24, 1905.

SMALL CANE MILLS.

As a result of the buoyancy of sugar prices a decided revival of the industry is in evidence in the colony, not only among the large landed proprietors, but also with the peasantry. Hundreds of small cane mills are being imported, from Chattanooga principally, and other sections of the United States. These mills are admitted free of customs duty and sell for £10.10.0 each. Canadian machinists ought to be able to compete in the supply, and I should be glad to furnish any further particulars desired.

COFFEE PULPERS.

With the approaching coffee crops, hand pulpers to some extent are being imported from the United States. I think Canada could successfully compete in this article.

ORANGE BOX SHOOKS.

I have on more than one occasion endeavoured to impress the importance of Canadian lumbermen paying some attention to the capturing of a portion of the supply of the many thousands of orange and pine apple box shooks which are imported every season from United States sources. Some inquiries have been made, and I believe comparatively insignificant importations have arrived of Canadian origin. I again take the opportunity to remind manufacturers that in a couple of months time the orange crop will be at its best, and a serious attempt should be made to supply an appreciable portion of the demand.

The dimensions required are the usual Florida and California standards.

G. EUSTACE BURKE.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS;
EAST PARADE, LEEDS, ENG., July 1905.

CHEESE.

I have a communication from Canada in regard to the weighing of cheese for export, the excess and shortage weights on boxes, and asking generally for information as to how the importers in Great Britain weigh the cheese shipped them from Canada.

It seems from this inquiry that there is a difference in regard to this matter between the large buying firms in Canada and the factorymen there.

RULE LAID DOWN BY BUYERS.

The rule laid down by the buyers as given me is as follows:—

‘If the factoryman sends them 50 cheese, the official weigher at Montreal takes out any 5 of these cheese and weighs each separate. To allow for shrinkage a cheese should weigh a quarter of a pound more than the weight marked on the box. If it is found that 2 cheese weigh less than the weight marked on the box, 2 out of every 5 cheese in the whole consignment are docked a pound a box. This cut is made even if it happens that 2 of the other boxes in the 5 boxes that are weighed were each a pound overweight.’

RULE DEMANDED BY FACTORYMEN.

The rule asked for by the factoryman as given me is as follows:—

‘That 5 boxes of cheese should be weighed together and that the average weight should be secured and applied to the 50 boxes in the shipment. In this way, if any box is overweight, the overweight would be used to offset underweight in other boxes.’

I have gone into this matter with the large cheese-importing houses in this district, and find that they are in entire ignorance as to the custom in Canada, in the weighing of cheese, but in no case do I find that the rule laid down by the buyers in Canada is the one in use by the importers here. The importers here pay full price for the cheese received, and unless the average loss over the whole shipment falls under two per cent they make no claim against the shippers.

VIEWS OF LARGE IMPORTERS.

The following are the results of the interviews with the large importers:—

LEEDS.

‘Taking our own invoices, supposing cheese are full weight or over, they are marked O.K., while some lots of cheese may show a loss of 5 pounds on 5 cheese, sometimes 10 pounds on 5 cheese, and at other times say 8 pounds or 12 pounds on 10 cheese, as the case may be.

‘We have no knowledge as to what is the system on the other side. We average the parcels on arrival here and if there is anything seriously wrong we make a claim in accordance therewith.’

HULL.

‘Our shippers recognize all claims above two per cent on marked weights, we weigh 5 boxes and this averages for the whole parcel. We may say, however, it is very seldom we have to make a claim which is very satisfactory to Canada.’

NEWCASTLE-ON-TYNE.

‘We consider the Canadian factoryman’s contention perfectly fair, viz.: that two or three fives should be weighed together out of every 50-100 boxes cheese from each factory, and the shortage allowed on the lot, this is in fact the custom in Liverpool, here and elsewhere generally now.

‘It must, however, be borne in mind that importers never can get more than the box weights from retail buyers, so that any overweight coming into the average is a loss to the importer.

‘The allowance of a quarter of a pound for shrinkage is in our opinion and long experience much too small, and should in no case be less than half a pound, so that a

cheese marked 90 pounds should really weigh 90½ pounds, which in the long run would be no loss to the factory and would save much labour and trouble.

‘It is customary in the trade here to weigh 5 or 10 cheese representing a lot, and allow average loss on the whole parcel accordingly. This is probably not an absolutely accurate method, but taking it all round it probably works out fairly well for both buyer and seller.

‘As to the method adopted on the other side, we can only say that as a general rule, the box weights of Canadian cheese work out much to the disadvantage of the importer on this side, and he could not be wrong in trying some fresh means of testing the various shipments.

‘We have had this year June cheese showing a loss of as much as 2 pounds per box, and one shipment invoiced as O.K. right throughout when averaged here, lost close on a pound a box all round.

‘The question of overweight is such a mighty rare occurrence that it should not be taken into consideration at all.’

CANADIAN MANUFACTURERS VISIT.

The Canadian Manufacturers’ English tour is now over. They have been received in Sheffield, Leeds, Bradford, and Newcastle, the cities visited in this district, most cordially the glad hand has been extended to them on all occasions as to ‘our kinsman from Canada.’

The different cities visited vied with each other in doing them honour. The enormous crowds upon the streets, particularly in Bradford, who cheered the Canadian party showed that ‘blood is thicker than water,’ and showed the interest taken in Canada and Canadians, and proved conclusively that though oceans divide the mother country from her ‘Dominions beyond the seas’ the feeling is one of kinship, the Empire is one and indivisible.

The manly and outspoken utterances of Mr. George, the president, Mr. Ballantyne, the vice-president, and of Mr. Young, the able and competent secretary of the association, won the respect and admiration of the English people, although they may have differed on the *modus operandi* of working out the best fiscal policy for the whole Empire.

Apart from the information gathered for the association by its officers and by the private members for their own advantage, the visit has been one of great advantage to Canada.

The independent tone of the speakers has done a great deal of good, has corrected many errors, especially the prevalent one that Canada desired to force Great Britain to give Canadian grain a preference in her markets whether she desired it or not, and that this only was the reason why Canada gave the British preference.

The visit has done much to open the eyes of the British capitalist to the vast capabilities for growth and development in manufacturing and commercial lines in Canada, and to the great opportunities for investing there.

BRADFORD’S TRADE WITH UNITED STATES.

The United States Consul at Bradford has just issued his half yearly statement, which shows a net increase over the first half of 1904 of \$3,569,240, the total trade for the past six months being \$9,001,260.

A study of the following table will be useful as showing at a glance the effect of the different American tariffs upon the Bradford trade.

It shows the value of Bradford’s exports to the United States for the first half of the years named under the different tariffs.

UNDER THE 1886 TARIFF.

1887..	\$ 7,927,410
1888..	9,485,075
1889..	11,442,445
1890..	11,556,450

UNDER THE MCKINLEY TARIFF.

1891..	\$ 5,542,290
1892..	6,179,705
1893..	7,195,815
1894..	2,761,510

UNDER THE WILSON TARIFF.

1895..	\$13,447,855
1896..	8,824,050
1897..	19,640,360

UNDER THE DINGLEY TARIFF.

1898..	\$ 3,802,160
1899..	3,821,635
1900..	4,963,880
1901..	2,386,850
1902..	4,363,740
1903..	5,186,530
1904..	5,432,015
1905..	9,001,255

EFFECT OF THE VARIOUS TARIFFS.

The tariff of 1886 was a tariff differing but slightly from the present British preferential tariff with Canada.

Under the McKinley tariff the duties on woollens and worsteds were made very much higher and consequently depreciated the shipments almost one half.

The principal difference between the McKinley and the Wilson tariffs was one of interpretation only, and this resulted in a very much increased export, the tariff being construed in a very liberal way.

This did not suit the American manufacturers, and in 1897 the Dingley tariff was passed, which is very exhaustive in details and allows of no other interpretation of any description. Under this tariff exporters of woollens and worsteds must go entirely by the book, and it is so minute and iron-clad in its provisions that no changes can be made by the consuls. This is the tariff in force at the present time with the United States, and the duty on woollens and worsteds runs from 110 per cent on cheap and low grade goods, to 75 per cent on the high grade goods. The average duty is about 90 per cent.

The enormous shipments in 1897, were caused by the exporters here being aware that the tariff would be materially increased during the autumn of 1897, and merchants availed themselves of getting in large supplies prior to the bringing into force of the Dingley tariff.

BRANDING 'CANADIAN.'

I cannot urge too strongly that all Canadian products should be the branded 'Canadian.'

The sooner our goods such as cheese, butter, bacon, lard, apples, &c., are sold as Canadian the better for our trade. Too often our best goods are sold for English or American, in fact it is seldom in this district that you find the name 'Canadian' dis-

played on the goods in shops, markets, &c. If they were branded as suggested they would have to be sold as such, otherwise the merchant would be liable under section 2 of the Merchandise Marks Act, 1887, for having exposed for sale goods to which a false description had been applied.

DANISH METHODS OF BRANDING.

The Danish government are fully alive to this important fact, that their goods should be sold as 'Danish,' and the Danish agent general prosecutes all offenders exposing for sale Danish goods under any other name.

The infraction of the Act in regard to Canadian goods is very prevalent. I have seen Canadian goods placarded as 'American' or 'English' hundreds of times since I came here, and this custom is almost universal in the northern cities. I think it is full time in the interests of Canada and Canadian trade that such practices should be stopped.

CHILLED BEEF.

The immense increase in the importation of chilled beef and mutton from Argentina this year is one of the surprises in the meat trade. These goods arrive in first-class condition and not only are the carcasses shipped, but also the bye-products, such as kidneys, liver, hearts, &c., which on account of the excellent cold storage provided on the steamers, arrive in the best of condition.

CAUSES OF INCREASE.

The cause of the large increase and development in this trade has been the result of English capitalists taking the matter up and building large abattoir and cold storage plants both in Argentina and Great Britain. I am told that by reason of the lower freights for this class of product as compared with shipping the animals alive, and having them slaughtered here at the ports, the companies interested are able to cut the prices for fresh meat, &c., almost in two.

I referred to this matter in a former report some months ago, since that time I have looked into the matter carefully, and find that the English capitalists would be quite willing to join with the Canadians in inaugurating similar plants and service from Canada. The sea voyage from Canada being so much shorter the prospects for an Anglo-Canadian company along similar lines to the British companies doing business in the Argentine are exceedingly bright.

JNO. B. JACKSON.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B, YOKOHAMA, July 20, 1905.

TRADE FOR JUNE.

Japan's export trade for June, 1905, amounted to \$11,676,195, showing an increase of \$317,790 compared with the corresponding period of 1904; while the imports totalled \$24,109,897, an increase of \$12,424,233 as compared with last year. The excess of imports over exports reached the extraordinary figure of \$12,433,702. This phenomenal

increase is attributed mainly to the anticipation of the increased tariff, which went into force on the 1st of July. Appended are the principal articles of import:—

IMPORTS.		
	June, 1905.	June, 1904.
Raw cotton..	\$4,937,467	\$1,544,679
Cotton yarn..	36,151	7,246
Wool..	293,819	430,898
Flax, hemp, &c..	104,000	57,366

Rice..	2,332,164	1,092,498
Beans, pease and pulse..	736,325	203,973
Flour, wheat..	1,300,344	146,322
Kerosene oil..	1,208,815	876,860
Oil cake (fish manure)..	1,215,725	242,111

THE SAMPLE ROOM SYSTEM.

Public intimation through the press recently drew attention to the policy of the Imperial Department of Commerce and Agriculture, at Tokyo, looking to the advancement of international trade by means of somewhat full sample exhibits of the country's active productions. The intimation was to the effect that the exhibit intended as a display of trade samples at Buenos Ayres would be open to public inspection at the Commercial Museum branch of the department for a few days. I took advantage of the opportunity for inspection.

The exhibit was made up largely of course of that well known miscellany, that in Canada comes under the general name of Japanese goods,—curios, art productions in colour and in metal wares, things decorative and useful. In respect of these things the Japanese have a way of putting a great deal that is valuable and admirable in comparatively little room; but when occasion calls for it, they make a most effective departure, which will doubtless be the case when these goods are laid out for the benefit of the Buenos Ayrean or Argentinian. But the samples were not confined to those lighter manufactures and art goods that are typically Japanese. In natural productions, silks in all the stages of 'raw' and 'manufactured'; teas in variety; camphor, copper, sulphur, cement, tile and brick, plain and decorative; porcelain, and so on through an indefinite list which will fairly represent Japanese industries on the South American continent.

ALEX. MACLEAN.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN, July 12, 1905.

SOUTH AFRICA'S FOOD IMPORTS.

It is now a matter of common knowledge that, despite its apparently illimitable agricultural and pastoral resources, South Africa is, and is likely to remain for an indefinite period, one of the world's largest markets for foodstuffs. In fact, having regard to the size of its white population (for the Kaffir almost entirely supports himself from his native soil), it has no rival in this respect, not even excepting the United Kingdom, for whereas the annual value of foodstuffs imported into the mother country is slightly over £5 per head of the population, that of South Africa is nearer £8, and in some years has approximated to £10.

A FEW DETAILS OF IMPORTS.

The total value of foodstuffs imported into South Africa last year (exclusive of those entering the country through the ports of Delagoa Bay and Beira, for which no figures are available) amounted to £8,355,300. Of this sum, however, £4,242,565 represented purchases of corn, flour, frozen meat, and alcoholic liquors, leaving £4,112,465, which may reasonably be included under the heading of provisions, and comprising edibles of almost endless variety. Dairy products, for instance were represented by butter and its substitutes at £514,282; cheese, £173,707; condensed milk, £152,473; and eggs, £7,778, making a total of £848,240, which, however, would really be much more if the figures for Cape Colony, as well as those for Natal, could be obtained for the last two items. Tea was imported to £204,282, coffee to £306,868, chicory to £11,132, and cocoa and chocolate (Natal figures only) to £14,405—a group total of £536,687. Among preserves, confectionery and jams stood for £217,604, salted and preserved meat, £516,689; and in the case of Natal only, preserved fish, £82,703; preserved fruit, £64,927; pickles and sauces, £15,164, and preserved vegetables, £21,763, or a total of £853,923. Refined sugar was bought to £143,293, unrefined sugar to £594,821, golden syrup (by Natal only) £11,074, and glucose and saccharine, £1,718, or a total of £750,906. Besides these items, there were enumerated articles for which only incomplete returns are obtainable, and a further list of far greater length might be compiled from the items classified officially as 'provisions not otherwise specified,' but standing nevertheless for the very large sum of £1,429,687.

DECREASE OF U. S. TRADE IN SOUTH AFRICA.

The shipments of U. S. goods to British South Africa in February only amounted to £85,580, a decrease of £207,087, when compared with the same month last year. The figures are the lowest for any month since September, 1896.

SOUTH AFRICAN MACHINERY IMPORTS.

Returns just to hand show that the total imports of machinery into South Africa last year, exclusive of that entering through Delagoa Bay and Beira, amounted to £1,705,800, as compared with £2,432,458 in 1903. Of this total, agricultural machinery stood for £151,685, an increase of £24,835; mining machinery, £553,133, against £717,208; and electrical machinery £272,592, in comparison with £282,767.

SOUTH AFRICAN BOOT AND SHOE TRADE.

About four-fifths of the total South African purchases of leather manufactures comprise boots and shoes; and not only is South Africa the largest market for imported footwear in the world, but it is probable also that there is no other country which requires so extensive a range of goods. The demands of the town-dweller, the up-country Boer, the miner, the native and the Asiatic have each their special and widely divergent characteristics, and these classes may be sub-divided indefinitely. For the town trade, for instance, that of Johannesburg, Durban, and Cape Town demands a higher grade of goods than that of the more provincial townships; and the Boer, while still clinging to veldshoen and his vrouw to 'spring-sides' has an increasing leaning towards the smarter but cheaper kinds of footwear sold to their class elsewhere. Generally speaking, the South African requires a cheap boot, so long as it is roomy, of pliable leather, and of fairly good appearance. It is just as true, however, that in the most up-to-date centres the lightest and daintiest footwear made commands a ready sale.

Practically all the styles and makes at present worn in Canada are in vogue in South Africa, and, in addition, many which have become antiquated there, and some which are the special demand of the market.

GOOD OPENING FOR BOX SHOOKS.

South Africa imports a considerable quantity of box shoos for her productions of apples, pears, eggs, bananas, &c. Sweden at present monopolizes the demand, but there is no reason why Canadian manufacturers should not get a share of the trade, if they will adapt themselves to the requirements of the South African importers.

CHAS. M. KITTSOON.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., July 31, 1905.

PROSPECTS FOR CANADIAN APPLES.

My last advices regarding the fruit crop here indicate that apples will, on the whole, be decidedly short, though some districts have survived the late frosts better than was at first anticipated.

CONTINENTAL CROPS.

Indications are that in Holland and Belgium apples will be quite under the average, while in Germany the crop is particularly light.

FALL APPLES.

All the circumstances point to the prospect of a fairly firm demand for early apples from Canada, provided these can be landed in good firm condition. Growers will not lose sight of the fact that to secure these results careful packing of fruit (which should be at least cool), and the free use of cold storage so long as warm weather lasts, are essentials to success. It should also be noted that early and tender varieties carry much better in boxes than in barrels, and that if carefully selected they will well repay the cost of wrapping individually in tissue paper.

INFERIOR FRUIT NOT WANTED.

I cannot too strongly emphasize the fact that no matter how favourable the market conditions may be, no demand will be created for poor, scabby or damaged fruit, of which there is always an abundant supply from nearby sources. To ship inferior fruit simply because of a favourable market is simply to destroy that market for better grades, while at the same time risking entire loss on the poorer qualities.

WINTER APPLES.

It need hardly be stated that if the early demands of the market are intelligently supplied, a firm and improving market will await arrivals of winter fruit. In regard to this again the oft repeated platitude is perhaps in order, namely, that the freight and other incidental charges are as high for third rate fruit as for the best qualities, and that therefore shippers should consult their own interest by confining their shipments as far as possible to the latter.

BRISTOL AS A FRUIT MARKET.

It is quite to be expected, as well as to be desired, that the Liverpool and Manchester markets will reflect the prosperity now attending the cotton trade of Lancashire, and that these markets will show a strong improvement in general tone over last year. Shippers, however, should not overlook the possibility that the very existence of such favourable conditions may attract to these markets an even larger quantity of fruit than they can assimilate at paying prices, and they should be prepared to distribute some of their consignments among other ports. Glasgow and London will always

claim their share, but it is my duty to point out that Bristol is the nearest port for a population of between five and ten millions of people, most of whom undoubtedly now pay higher carriage rates upon their apples than if these were received at the port of Bristol. I venture to recommend that Canadian shippers should at least make a fair trial of Bristol in order to ascertain whether they could not, with profit to themselves, send annually a part of their fruit direct to this port.

DEPARTMENTAL FRUIT COMMITTEE.

I have before me a copy of the report of the Departmental Committee, appointed by the Board of Agriculture and Fisheries to inquire into the fruit industry of Great Britain. This committee was appointed in December, 1903, and found its task both long and complicated. Some of the principal features of the report are given herewith.

EXTENT OF THE INDUSTRY.

According to official figures the total acreage under orchards in 1904 was 243,008, of which 236,705 were in England, 2,490 in Scotland, and 3,813 in Wales. These figures refer to orchards only, not to small fruit, though in many cases there would be small fruit under the orchard trees; no account is taken of orchards in any holdings of less than an acre in extent, nor of isolated trees. The total acreage of small fruit in 1904 was 77,947, 70,612 being in England, 6,072 in Scotland, and 1,263 in Wales. Of this total the county of Kent has 22,549 acres. Middlesex is next with 4,700 acres, and only five other counties have as much as 2,000 acres. As small fruit is often grown in orchards, especially when the trees are young, the same land would in many cases be reported under the heading of orchards as well as under that of small fruit, and it is, therefore, impossible to have absolutely correct figures of the total acreage under fruit of both kinds; the committee, however, estimates that this is not exceeding 300,000.

PROGRESS OF THE INDUSTRY.

The committee emphasise the great increase which it has observed in fruit growing throughout the country. From 148,221 acres in 1873, orchards have been extended to cover 243,008 acres in 1904, an increase of 63·9 per cent in 31 years; since 1897 small fruit has increased from 69,792 to 77,947 acres in 1904, or 11·7 per cent in seven years.

CAUSES OF INCREASE.

The committee attribute this increase largely to the fact that fruit has become more and more a regular article of diet for all classes, so that the home supply has not kept pace with the demand. The committee anticipate that both the demand and supply will continue to increase; and they note also a growing demand for preserved fruit and jam.

CIDER.

In the case of cider there was a falling off for many years, principally due to the fact that the 'great vintage orchards in the west of England were rapidly becoming worn out, many of them having been planted in the 17th century, and very little re-planting have taken place since.' The last ten years, however, have witnessed a decided improvement in this industry, and there are increased plantings of cider apples, especially in Herefordshire.

A BENEFIT TO THE COUNTRY.

The committee report most emphatically that they consider the extension of the fruit industry to be a decided gain to Great Britain, partly because this branch of farming has come to the relief of those who found wheat-growing no longer profitable, and partly because of the greatly increased value of fruit lands, as compared with ordinary farm lands. The committee look for important results from the fruit industry in bringing people 'back to the land.' Additional work is provided for labourers

in many branches of the trade, such as fruit picking, cider making, jam making, and basket making.

PRESENT DIFFICULTIES OF THE INDUSTRY.

The disadvantages at present complained of are classified as follows:—

1. Insufficiency of knowledge regarding
 - (a) The right kinds and varieties of fruit to plant.
 - (b) The character of the soil.
 - (c) Pruning and general treatment of fruit trees.
 - (d) Diseases and insect pests.
 - (e) Packing and grading.
2. Land tenure—the difficulty of obtaining land for the cultivation of fruit, and the adjustment of interests of landlord and tenant.
3. Burdensome taxation.
4. Railway grievances; excessive and preferential rates, unpunctual deliveries, bad handling, pilfering, and refusing to pay claims.
5. Foreign competition—tariffs hostile to British fruit.
6. Insufficient inspection—especially of foreign fruit.
7. Difficulty of obtaining labour.
8. Insufficiency of markets, and other market grievances.
9. Ravages of birds.
10. The increased price of sugar, affecting the jam industry.

A FRUIT SUB-DEPARTMENT.

The committee recommend ‘that a fruit sub-department of the Board of Agriculture be established, to deal with horticulture and pomology. Similar departments exist at the present moment in several British colonies and in foreign countries.’ This recommendation is coupled with one for the establishment of a Government Experimental Station, and is very strongly urged upon the Board of Agriculture.

OTHER MATTERS REPORTED UPON.

The questions of land tenure, compensation for improvements, rating assessments, and railway rates, are fully dealt with. In connection with railway problems most serious exception is taken to the use of ‘the ordinary low wagon with the black sheets pressing on the fruit, and with no ventilation.’ The committee mention certain new ventilated cars introduced by the Midland Railway, and also what are called ‘sheet supporters,’ which keep the sheets used to cover ordinary cars away from the fruit, and allow a current of air to pass over the latter.

FOREIGN COMPETITION.

The committee report that many witnesses complain of the unfairness of the present fiscal system, which admits of ruinous competition of foreign fruit, while British fruit is excluded from foreign markets. One remedy suggested was the imposition of duties on imported competitive fruit (though some witnesses expressly excluded fruit from the colonies from such duties). Another was a power of retaliation, to enable the government to secure the same treatment from foreigners as is accorded them in Great Britain.

INSPECTION OF FOREIGN FRUIT.

The committee recommend that in addition to inspection by local health officers, there should be government inspection of all perishable food at the port of entry. They express the opinion that ‘if this had been done in the past much foreign fruit

which has found its way to some of the jam factories would have been destroyed as being unsound, with great advantage to the British fruit grower and to the public generally.'

LABOUR DIFFICULTIES.

It would appear that the absence of cottages in country districts, and the scarcity of pickers, are two of the chief causes of complaint; and that neither of these difficulties is found to be serious in the older and larger fruit districts, since arrangements have been made in these districts for securing regular supplies of help.

GENERAL SUGGESTIONS.

The committee recommend:—

1. That a special sub-department of the Board of Agriculture be established, with two branches: (a) a bureau of information, (b) an experimental fruit farm.
2. A better and more reliable system of securing returns of land fruit, and other statistics.
3. The securing and publication of 'information as to the probable crops of fruit in foreign countries, and as to the magnitude and date of arrival of large consignments of fruit from abroad.'
4. The making of measures to prevent the introduction of pests and diseases detrimental to fruit, and all diseased nursery stock.
5. The simplification and consolidation of the Agricultural Holdings Acts so far as they affect fruit growers.
6. The extension of the telephone in country districts, under government supervision.
7. The investigation of cold storage as a means of preventing gluts of fruit.
8. That horticulture be taught in elementary schools in country districts, with school gardens attached.
9. That a Bill should be passed for facilitating the purchase of small holdings by tenants with assistance from public funds.
10. That a simple and uniform system of rates for fruit be introduced by the railway companies.
11. That the so-called 'owner's risk' rates be abolished.
12. That jam made wholly or in part from foreign fruit be so labelled.
13. That the government should undertake inspection of imported fruit and fruit pulp.
14. That fruit growers should pay some attention to the careful grading and packing of the better class of fruit, and to the importance of growing fewer varieties, especially of apples.
15. That the establishment of co-operative societies for the disposal of fruit and other purposes would be beneficial.
16. That it would be an advantage to fruit growers if they kept bees.

WEIGHING CHEESE AND BUTTER.

In response to Canadian inquiries, I have secured from the president of the Bristol Wholesale Provision Trades Association the following information regarding the custom of the trade here in checking weights of goods imported from Montreal:—

Supposing 1,000 boxes of cheese are received, the weights as marked on each individual box are noted, together with the total. Then 10 cheese are taken at random from every 100, weighed in fives, and the total weight of such 10 cheese is noted and compared with the total of the weights marked on such 10 boxes. The weight lost by these 10 as compared with their marked weights is treated as if it had been found to occur in every 10 of the 100. In other words, the shortage on the 10 is estimated to be the average shortage on the 100 in question. If the lot consisted of 50, 5 cheese would be taken—that is to say 10 per cent would be weighed and treated as a fair sample of the lot.

Three points should be noticed in connection with this method:—

BOXES NOT WEIGHED SINGLY.

1. The weights of individual cheese are not taken account of in the process of weighing 10 per cent, but only the total weight of such number of cheese as may constitute ten per cent. This method allows the excess in one cheese to offset the shortage in another, should the two happen to be found in the same sample 5 or 10 cheese, as the case may be.

TEN PER CENT DECIDES THE SHORTAGE.

2. A shortage in any give sample lot of 5 or 10 is treated absolutely and finally as a shortage extending through the entire lot (50 or 100) from which the sample cheese were taken. Such shortage cannot be made good or offset by any excess which may be found in another sample 5 or 10.

EXCESS NOT COUNTED.

3. Where there is an excess, the marked weights are taken as if correct; in other words, only the shortages are taken account of.

CHEESE RESOLD ON SAME BASIS.

4. In selling, the same system is followed to determine the weights.

A SHORTAGE THE GENERAL RULE.

The president assures me that the cheese show an average loss of from 2 to 5 pounds per 5 boxes, as compared with invoice figures from Montreal.

LOSS NOW BORNE BY IMPORTER.

This loss the importer bears, and is prepared to stand, under present conditions; but should the method of weighing at Montreal, or other conditions be so altered as to produce a greater average discrepancy than that mentioned, the president states that fresh adjustments would have to be made, so as to shift the additional loss either upon the Canadian exporter or upon the British buyer and consumer.

A CONCRETE EXAMPLE.

The following figures were taken from the books of Messrs. Pullin, Thomas & Slade, of Bristol, and show results of weighing five samples of ten boxes each, taken from five hundred cheese just received from Alexander & Co., Montreal, ex SS. *Montcalm*:

	{ 5 boxes were 4 lbs. short of marked weight.				
1.....	{ 5	"	5	"	"
2.....	{ 5	"	3	"	"
	{ 5	"	3	"	"
3.....	{ 5	"	2	"	"
	{ 5	"	2	"	"
4.....	{ 5	"	2	"	"
	{ 5	"	3	"	"
5.....	{ 5	"	4	"	"
	{ 5	"	7	"	"

Average shortage: 3½ lbs. per 5 boxes, or 70 lbs. per 100 boxes.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., August 1, 1905.

OPINIONS WITH REFERENCE TO CHEESE WEIGHTS.

In addition to my report *re* cheese, published in July Monthly Report, page 108, I have to add the following interviews thereto :—

NEWCASTLE-ON-TYNE.

‘We think the factorymen do not allow quite sufficient to allow for shrinkage. Some of them are more liberal than others in this respect, but it would be rather difficult to advise as to what overweight they should allow, as all depends upon how the cheese are manipulated in the make, pressing, &c.

‘The usual method we adopt in a shipment say of 50 cheese (and which we think is a very reasonable one) is to weigh 5 cheese out of the shipment altogether, should there be a loss of 2 pounds on the 5 this would mean 20 pounds in the 50. Should, however, the loss be excessive we should weigh other 5 cheese, and if these showed a gain the gain would be placed against the loss, and an average struck upon the 10.

‘A shipment of 50, however, is a very small one, and our usual custom is to weigh 10 cheese (5 at a time) from every factory in the shipment, no matter what quantity there may be in a factory, as some shipments consist of various factories. In some cases we have found cheese gain weight during transit, due no doubt to atmosphere conditions, but in the majority of cases a loss of weight occurs.’

LEEDS.

‘The method adopted by us in a shipment of Canadian cheese is to weigh 5 cheese of a shipment; should there be no loss or less than 2 per cent on these 5, the shipment would be taken to be O.K. If, on the other hand, a loss appeared of 5 pounds or more, then other 5 cheese would be weighed, or perhaps 10, according to the size of the shipment, and an average struck over the whole shipment.’

These interviews are with very large and influential dealers.

J. B. JACKSON.

MEXICO.

REPORT OF COMMERCIAL AGENT.

(Mr. A. W. Donly.)

APARTADO, 2029,
MEXICO CITY, MEX., August 5, 1905.

NEW TARIFF BILL.

The new tariff law, to take effect on the first day of September, shows an increased duty, on nearly all dutiable articles, over the present schedule. The bulk of the articles at present on the free list remain there. Although some articles show a considerable increase over the old rate, the great majority show but a slight one.

When it is taken into account that the present actual duty collected is, on account of fluctuations in the rate of exchange previous to the adoption of the gold standard, surcharged with a minimum of 11½ per cent over the rate of duty as shown in the tariff, and as by the new tariff the maximum additional, for municipal and other taxes, will be 2 per cent over this duty as shown in the new tariff, it will be found that in the majority of cases the new duty will, in reality, be very little, if any more, than the present rate.

CHANGES ON ARTICLES EXPORTED FROM CANADA.

Below will be found a list of those articles affected by the new tariff which are already being exported from Canada to Mexico, or for which there might be found a market here. Articles which do not undergo any change in the new tariff have been omitted.

The abbreviations used in the table signify as follows: K.G., gross kilogram; K.L., legal kilogram; K.N., net kilogram. A kilogram is equivalent, approximately, to 2·2 English pounds, and a dollar Mexican money to fifty cents Canadian currency.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA, AND TASMANIA.

(Mr. D. H. Ross.)

P. O. Box 140, MELBOURNE, July 10, 1905.

CHANGE IN COMMONWEALTH GOVERNMENT.

The Reid-McLean ministry, composed of a coalition of free traders and protectionists, were recently defeated through the action of the majority of the protectionists withdrawing their support. The new Prime Minister is the Honourable Alfred Deakin, an ardent supporter of a high customs tariff, and the principal Australian advocate of preferential trade. The present government has the general support of the Labour party. It is doubtful if the tariff will be altered in any way until after the next general elections, which take place at the end of 1906.

AUSTRALASIAN WOOL EXPORTS.

The Australasian wool statistics for the year ended on June 30 are just available. The oversea shipments show an increase of 228,792 bales over the previous season. A comparison for the last two seasons is as follows:—

	1903-04. Bales.	1904-05. Bales.
Australasian states.	994,796	1,218,969
New Zealand.	372,146	376,765
	<hr/>	<hr/>
Australasia.	1,366,942	1,595,734

To the total increase for the past season Victoria has contributed an increase of 66,798 bales, New South Wales an increase of 118,089 bales, Queensland an increase of 31,642 bales, and South Australia an increase of 10,354 bales.

FLOCKS OF AUSTRALASIA IN 1904.

The flocks of Australia during 1904 increased by 8,227,764. From a reliable source the returns of sheep held in Australia and New Zealand compare thus:—

	1904—No.	1903—No.
Australian states.	65,038,712	56,810,947
New Zealand.	18,280,805	18,954,553
	<hr/>	<hr/>
Australasia.	83,319,517	75,765,500

The principal increase took place in New South Wales, being more than 5,800,000 over 1903. There is every probability of the flocks of Australia increasing to close on 75,000,000 in 1905. The outlook for the pastoral industry is now most promising. Grass is plentiful, the flocks are increasing rapidly, and moreover the values ruling for wool are high and very profitable.

CANADIAN TRADE WITH AUSTRALIA.*

The Commonwealth Statist has recently published the returns of the Australian imports from and exports to Canada during the calendar year of 1904. At the first glance the figures are undoubtedly disappointing, but they are capable of a more or less satisfactory explanation.

As pointed out in previous reports, while New York continues to be the chief port of shipment of Canadian goods to Australia, a considerable proportion of the shipments are credited to the United States as the country of origin. I wrote to an agent for one line of Canadian goods in another state, giving the customs valuation of his particular goods, and he replied: 'While it is impossible to give the exact 1904 figures, you can safely state that the import returns do not represent two-thirds of the actual imports. It is the old story; goods shipped from Canada through New York are either bunched into United States invoices, or the Australian importers in making out the entries for goods received ex a New York steamer give the entire credit to the United States.'

* To illustrate Mr. Ross' contention in this paragraph, foot comments are made in the following pages showing the figures from Canadian returns. Australia's fiscal year ends on December 31, so the figures in each case from Canadian returns are for the same period, viz., twelve months, ending December 31.

DECREASE IN IMPORTS OF CANADIAN GOODS.

The Commonwealth customs returns show a very marked decrease in the Australian importations of Canadian goods in 1904. (a) The figures are given as follows:—

Australian imports from Canada, 1903.	£352,939=	\$1,717,636
Australian imports from Canada, 1904.	222,064=	1,080,712
<hr/>		
Apparent decrease.	£130,875=	\$636,924
<hr/>		

This enormous decrease is attributable to the reduction in the imports of flour and cereals the value of which was over £129,000 less in 1904 than the previous year. Australia has recently been a very large exporter of cereals owing to improved seasons. The next most important feature in the returns is the apparently serious falling off in the values of the imports of Canadian agricultural implements, reapers and binders, &c. (b) I have taken special pains to test the accuracy of these figures and have no hesitation in stating that they are distinctly misleading. Canada is credited with having exported £26,926=£131,040 worth of agricultural implements in 1904 to the whole of the Commonwealth. In 1904 Victoria alone imported Canadian implements to the value of nearly £40,000, and in New South Wales the importations would likely be larger, to say nothing of the other states. I have compiled this data from authentic sources, and these figures should cause Canadian exporters not to judge in a pessimistic way the trade being done by inaccurate statistical returns.

CANADIAN FURNITURE, ETC.

The imports of Canadian furniture into Australia for 1904 are given as £722 in the customs figures. (c) To my personal knowledge, one Melbourne importing concern

(a) Canadian exports to Australia, year ended December 31, 1903 (from Canadian returns)	\$2,919,277
Canadian exports to Australia, year ended December 31, 1904 (from Canadian returns)	2,628,492
Decrease.	<u>\$290,785</u>
(b) Agricultural implements imported into Australia from Canada, year ended December 31, 1904 (from Australian returns)	\$ 131,040
Agricultural implements exported from Canada to Australia, year ended December 31, 1904 (from Canadian returns)	1,025,765
Apparent discrepancy.	<u>\$894,725</u>
Agricultural implements imported into Australia from United States, year ended December 31, 1904 (from Australian returns)	\$2,188,710
Agricultural implements exported from United States to Australia, year ended December 31, 1904 (from United States returns)	1,436,121
Apparent discrepancy.	<u>\$752,589</u>

This discrepancy of \$752,589 is doubtless the amount of Canadian agricultural implements exported to Australia via United States ports.

(c) From Canadian returns for the twelve months ending December 31, 1904, the exports from Canada to Australia were \$42,558, a difference of about \$39,044.

last year landed furniture manufactured at one Ontario factory the value of which exceeded £1,000, and this by no means represented their purchases from other sources of supply in the Dominion.

Australian exports to Canada, 1903	24,837=	120,873
Apparent increase	£4,515=	\$21,973

AUSTRALIAN EXPORTS TO CANADA.

The Commonwealth returns for 1904 show a modest increase of £4,515 in the value of Australian exports to Canada in comparison with the previous year. Probably all these goods and products were shipped to Vancouver. It is more than likely these figures would be increased if the values of Australian wool purchased in London and Boston by Canadian mills could be ascertained. Through other indirect channels, a few staple lines of Australian origin may find their way to the Dominion.

TASMANIAN APPLE EXPORTERS CO-OPERATE.

A scheme of co-operation initiated in Tasmania should be of particular interest to apple growers in Nova Scotia as well as in other Canadian provinces. A Hobart

(a) Australian imports into Canada, year ended December 31, 1904	
(from Canadian returns)	\$125,596
Australian imports into Canada, year ended December 31, 1903	113,123
Increase	\$12,473

firm, largely interested in the trade, has made a special effort to place the business upon a sound basis, and thus avoid the heavy losses made on shipments to London during the last two years. The co-operation of the principal growers has been secured, and arrangements have been made by the firm in question to ship over 600,000 cases of apples to London next season.

REDUCTION IN FREIGHTS.

With such an enormous quantity at their disposal, they have been able to obtain substantial concessions as regards freight, and the basis agreed upon by the shipping companies is 2s. (48 cents) per case, which means a reduction of over 33½ per cent on the best freight rates hitherto ruling. On the export of 600,000 cases fruit exporters will save at least £30,000 on the item of freight alone.

COOL STORAGE FOR TASMANIAN APPLES.

Properly regulated distribution of Tasmanian apples will be provided for through the medium of cold storage in London. This will obviate slaughtering the fruit at ruinous prices when the metropolitan or provincial markets may be glutted. Special terms are being arranged with brokers for the sale of the fruit, and the London office will have the power to fix and regulate the reserve prices. If a 'knock out' occurs the apples will be withdrawn from sale.

RESULTS EXPECTED BY TASMANIAN FRUIT EXPORTERS.

Tasmanian apple exporters freely admit that they look forward to the success of their co-operative scheme in greatly reducing all charges and incidental expenses, which will enable them to accept a lesser price to meet the competition in the British markets from Canada and the United States. Great stress is laid upon improved distribution which is being thoroughly reorganized, so that towns outside London will receive their supplies direct per railway from the dock instead of through Covent Garden. Regular sales will take place in Manchester, Liverpool and other centres at reserved prices, which in past seasons it was impracticable to insist upon.

GOLD AT 4,200 FEET DEPTH.

Within the last week payable gold has been struck at a depth of 4,200 feet on the celebrated Bendigo gold fields, which are reached by a few hours' railway journey from Melbourne. This is considered a highly important development, which will give an indefinite lease of life to that famous field.

VICTORIAN GOVERNMENT ASSISTANCE TO GOLD MINING.

The Victorian state government advanced, during the last twelve months, £20,685 to assist gold mining companies and co-operative parties. £5,000 of this has gone towards assisting the company which has the deepest shaft at Ballarat, to enable that shaft to be sunk to a depth of 3,000 feet and to test the quartz lodes at that level. A further sum of £5,000 has been advanced to another company, which has already spent £45,000 in trying to open up a new lead that has been proved by the departmental bores to extend for twenty-three miles.

Arrangements have been completed with the Melbourne University whereby the highest scientific knowledge on mining matters can be attained by the sons of the poorest miner in the state practically free of charge.

COMMONWEALTH PROCLAMATION REGARDING CORN SACKS.

For some years past serious complaints have been made concerning the inferior quality of corn sacks sold in Australia. It was not an uncommon thing for supposed 'standard sacks' to burst when filled with wheat or oats, thus entailing heavy losses

to growers of cereals. To protect the farmers, the Commonwealth government has prohibited the importation of inferior corn sacks as from September 1, 1905, except under the conditions prescribed by the authorities.

From the *Commonwealth of Australia Gazette*, No. 31, of June 17, I submit the following extract from the proclamation dealing with this matter, which may be of interest to Canadian farmers:—

‘From and after the first day of September, 1905, the importation of corn sacks into Australia shall be subject to the following conditions and restrictions, namely, that in the case of standard corn sacks, that is, corn sacks which comply with the standard hereinafter set out, the bales containing those corn sacks shall be plainly branded or marked with the trade name, measurement, weight, porter, and shot of the cornsacks therein contained, and that in the case of corn sacks other than standard corn sacks, each corn sack shall be plainly branded or marked with its trade name (if any), its measurement, weight, porter and shot. And I hereby declare that the standard for standard corn sacks shall be as follows:—

‘Size. 44 inches by 26½ inches.
 ‘Weight when baled. 2¾ pounds.
 ‘Substance. 8 porter, 9 shot.

‘And I declare that the importation of corn sacks into Australia contrary to the conditions and restrictions contained in this proclamation shall be prohibited.

‘A. McLEAN,
 ‘Minister of Trade and Customs.’

COMMONWEALTH IMMIGRATION RESTRICTION ACT.

A return giving details of persons who came under the operations of the Immigration Restriction Act in 1904, has been printed. It shows that during the year 117 persons were refused admission to the Commonwealth. All these failed to pass the education test.

The number of persons admitted without being asked to pass the test was 47,940, 39,026 being British, 2,076 French, 930 Austrians, 847 Chinese, and 823 Germans. Only 10,185 of the British came from Great Britain, the greatest number being from New Zealand, whence came 18,253. From South Africa 3,464 British came, from France 1,130, from the South Sea Islands 1,053, from Germany 692, from Canada 576, from Italy 418, from the United States 609, from China 378, from Japan 160.

WESTERN AUSTRALIA'S GOVERNMENT HOTEL.

In some of the national parks throughout Australia the state governments have built accommodation houses, which are conducted upon temperance principles at a moderate outlay to visitors. It remained for the government of Western Australia to demonstrate to the people of this continent, that the state could successfully conduct an up-to-date hotel upon model lines. About 500 miles inland from Perth is located the ‘Sons of Gwalia gold mine’ where employment is given to nearly 600 men. A number of applications for hotel licenses had been refused in this vicinity, as it is the policy of the state not to grant a license for the sale of liquor outside of a government township, owing to the absence of police supervision. To get over the difficulty of sly grog-selling, and to protect the miners from the effects of inferior beer and spirits, the Western Australian government decided to try the experiment of erecting and conducting an hotel to suit the requirements of the district and the travelling public.

THE GWALIA ‘STATE HOTEL.’

The state hotel was erected at Gwalia at a cost—including furniture—of £6,915, and in May, 1903, the hotel was opened. It is almost needless to state that the provisions of the Licensing Act as to closing hours and Sunday trading are strictly enforced—1916—9

forced. During the thirteen months ending June 30, 1904, the state hotel showed a profit of £589, being at the rate of $8\frac{1}{2}$ per cent on the capital value of the property. The general opinion of the travelling public is that the management of the hotel leaves nothing to be desired, while the verdict of the residents frequenting the hotel, who are principally employed on the neighbouring mine, as well as that of the mine manager, is in favour of state control. It is claimed that this hotel supplies the best liquor and beer, and that the manager is instructed to prevent excessive drinking. There is a fine billiard room provided for the recreation of the miners at a merely nominal cost per game. No inducement is held out for men to drink to excess, and every comfort being provided tends towards sobriety, and consequently a great reduction in the money usually spent in ordinary hotels.

AUSTRALIAN TRADE OUTLOOK.

The trading outlook is satisfactory, prospects favouring a large increase in production in this and the other states, which should be reflected to a considerable extent in Australian commerce. The crops are making splendid progress, wheat promises to yield heavily and the dairying prospects are excellent. The wool clip of 1905-1906 will likely exceed that of last year, and profitable prices are anticipated. The sugar yield of Queensland is expected to exceed 160,000 tons, which quantity will nearly supply the requirements of Australia. The output of gold has been slightly contracted in comparison with last year, but there has been a satisfactory expansion in the exports of lead, tin and copper. Taking everything into consideration the Australian outlook is more encouraging than for many years past.

D. H. ROSS.

CITY TRADE BRANCH.

REPORT BY CANADIAN REPRESENTATIVE.

(*Mr. Harrison Watson.*)

78 BASINGHALL STREET,
LONDON E.C., ENG., August 3, 1905.

CANADIAN MALT.

A large firm in Canada has been making inquiries as to the best means of developing trade in this country in Canadian malt.

We have given the matter some considerable attention, and have made inquiries, and although we are not sanguine that a profitable trade can be established, we have been able to interest several firms in the matter, most of whom have promised to communicate direct with the firm making the inquiry.

TRADE IN HANDS OF MALT FACTORS.

As far as we know, apart from the brewers who manufacture their own malt, the trade is in the hands of merchants designated 'Malt factors.' Most of the import trade in this country is conducted by merchant houses, and not by actual consumers. It would appear that a great many attempts have been made by foreign houses, and more particularly by the Germans, to export malt to the United Kingdom. These endeavours, we are informed, have never been successful, and most of the factors regard it as unlikely that malt can be profitably imported into this country.

TRANSPORTATION AN OBSTACLE.

The main obstacle is the question of transportation. Malt is a most delicate article and readily absorbs moisture, even to the extent that it sustains damage from this cause during a short railway journey. We are informed by several authorities that buyers of malt would refuse shipments which contained more than say two per cent of moisture, and in order to obviate this it would be necessary to pack malt in air-tight tanks—a source of considerable expense to the shipper.

PREFER HOME-MADE MALT.

In fact, apart from the preference which most brewers have for home-made malt, the necessity of providing air-tight packages has so far made it impossible for foreign malt to be laid down in this country at a price to compete with home-made malt, which would leave a profit to shippers. Several of our correspondents, who include the most important houses in the trade, have, however, stated their willingness to take up the matter with any Canadian firms interested and will furnish them with samples of the malt in demand in this country, and to examine the samples and consider the prices which may be submitted.

CANADIAN BARLEY.

The general impression is that a much better opening exists for Canadian barley, which is not subject to the difficulties of transportation indicated. Indeed we understand that owing to the demand from other sources for the varieties of barley which formerly came only to the United Kingdom, the existing supplies of suitable barley is insufficient to meet the demand by the trade.

HARRISON WATSON.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, July 11, 1905.
P.O. Box 1232.

MARKET FOR 20,000 BARRELS OF CANADIAN APPLES.

South Africa at certain times is a good market for the sale of Canadian apples. During the months of October, November and December the locally grown fruit is out of season, as is also Australian fruit, which country usually ships large quantities of apples and other fruits to South Africa. At this particular time Canada could, with advantage, step in and supply the South African consumer with apples, which would meet with a ready demand.

VARIETIES TO SHIP.

The apples most favoured by the consumer are those of any large red variety. Apples without much colour will not meet with a ready demand, and would probably have to be disposed of at reduced prices.

INFERIOR FRUIT.

Shippers are advised that no inferior fruit will fetch anything like a remunerative price.

STYLE OF PACKING.

Apples for South Africa may be packed in boxes containing about one-third of a barrel, or in barrels.

WARNING.

All fruit shipped to South Africa must be free from scale or black spot. If otherwise, the fruit will be destroyed by the South African governments, without compensation to the shippers.

CHAS. M. KITTSON.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, August 2, 1905.

EXPERIMENTS WITH CANADIAN LOGS GROUND TO PULP IN NORWAY.

A short time ago there arrived from Canada a shipment of thirty standard logs, which have been made into pulp at one of the Norwegian mills. This was an experiment to find out whether the reason that the Norwegian pulp has been considered of a finer quality than Canadian pulp lies in the quality of the wood or in the grinding.

The result has shown that the pulp made from the Canadian logs is of excellent quality. This is of considerable importance for the Norwegian pulp industry, the Canadian raw material being much cheaper than the Norwegian, and when the quality is equally good, if ground in the same way, it is feared that the Norwegian pulp industry will get a very strong competitor in the Canadian pulp.

SHIPMENTS TO NORWAY AND SWEDEN.

Since the political controversies came up between Norway and Sweden, there has come to my notice instances where Canadian firms have hesitated in making shipments to Norway and Sweden for fear that the two countries should get into war with each other, and that on this account it should not be safe at present to have any dealings with the importers in these countries.

There is no reason whatever for entertaining such fear, as it is the earnest wish of both countries to avoid any war, and it is my opinion that shipments may safely be made on same terms as before. It is not noticed that English or German exporters are making any changes in their terms on the above account, and business is going its usual course both in Norway and Sweden, although possibly the importers are not placing quite as large orders as usual. It is to be noted that also the value of Norwegian and Swedish state bonds remains unchanged.

C. E. SONTUM.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. Ball.)*39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., August 10, 1905.

WEIGHING CHEESE.

Birmingham really is not a centre for direct importation of cheese, although large quantities are consumed here, and there are prominent houses in the trade, but purchases are nearly all made through Liverpool, London or Bristol.

In a purchase of say 100 boxes, 10 boxes are taken indiscriminately; these 10 are weighed, and the other 90 carry the same proportion, the 10 being taken as a fair average of the lot. Shortages only are taken into account. Should there be an excess, the marked weights are taken as correct.

LOSS IN WEIGHT PER CHEESE.

In going over a shipment of cheese I found that the average loss of weight on 5 boxes in a shipment of 50 boxes was about 21 pounds 11 ounces per cheese between the marked and the actual weight.

FURTHER REPORT ON A SEPTEMBER SHIPMENT.

I will send a further report about September 10, as a lot of 1,000 cheese is coming to a firm here, and I intend to see the whole shipment weighed, and turned out, so that I can give a fair estimate as to how the matter stands on a quantity of this amount.

P. B. BALL.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. MacNamara.)*CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., August 15, 1905.

EVOLUTION OF THE PORT OF MANCHESTER.

The creation and development of the port of Manchester forms an object lesson of real grit and determination on the part of a business community to break away from conditions which prevented a proper expansion of trade, and to secure the advantages which are to be derived by direct connection with over-sea ports.

Twenty years ago Manchester, although then a thriving city as the natural centre of the northern manufacturing and cotton area, was not lacking, in the opinion of those most competent to judge, in signs that a decay was imminent. The city and adjacent districts were gradually being strangled by the heavy cost of transporting traffic to and from the sea-board, combined with the port expenses at Liverpool.

CONCEPTION OF THE CANAL.

For long commercial leaders debated, and ultimately concluded that the salvation of Manchester and the surrounding commercial area must take the form of a waterway, which would enable ocean-going vessels to load and unload produce at Manchester—35½ miles inland from Liverpool.

The most strenuous opposition was encountered from railway companies and other vested interests during the passing of the Ship Canal Bill through parliament, but eventually the Bill was sanctioned by parliament in 1885. The construction of the canal was commenced on November 11, 1887. The original estimated cost was £8,000,000 sterling, but the actual amount expended has been about £15,000,000 sterling, of which £5,000,000 was loaned to the Ship Canal Company by the Manchester corporation.

The canal was opened for traffic in January, 1894. Vessels enter the ship canal from the River Mersey at Eastham, about five miles from the Liverpool landing stage, and five sets of locks are passed through on the way to Manchester. The large lock at Eastham is 600 feet long and 80 feet wide, and at the other places the locks are 600 feet by 65 feet. Smaller locks have also been provided for the passage of moderate sized vessels.

AREA OF MANCHESTER DOCKS.

The Manchester docks cover an area of 406 acres, including a water space of 120 acres and quays 6½ miles in length and 286½ acres in extent. There are nine docks, and the latest dock was officially opened on July 13 last. The new dock is one of the largest in Europe, being 2,700 feet in length by 250 feet in width.

RAILWAY CONNECTIONS.

The docks at Manchester are connected with all the principal railways, and are equipped with the most modern arrangements for handling traffic, and special accommodation is provided for various trades, including foreign animals wharves and lairages for live cattle imported from Canada and other foreign countries, grain elevators, cold air stores, tanks for oil storage, lumber yards, &c.

LARGE SURROUNDING POPULATION.

There is a very large consumption of all kinds of produce, both in food and raw materials for manufacture, with a short carting distance of the Manchester docks, the population in that area amounting to 2,000,000. The port is not, however, dependent alone on local traffic, for as a great distributing centre it stands unrivalled. The district nearer to Manchester than to any other steamship port has a population of no less than 7,500,000, and traffic is distributed with a minimum of handling and cost because of the fact that all the principal railways run their cars direct alongside steamers in the Manchester docks, and the mileage covered as between ship and consumer is considerably reduced as compared with Liverpool.

SAVING IN FREIGHT CHARGES.

The canal has undoubtedly proved a boon to traders, who by importing traffic direct effect savings averaging from three to six shillings per ton in the cost of transporting goods. For instance: The saving in transportation charges on a miscellaneous

cargo weighing 6,258 tons which recently arrived at Manchester from Montreal averaged 5·19 cents per 100 pounds, the total saving in transit charges on the whole cargo as compared with the cost which would have been incurred in delivering from Liverpool to the same destinations being £1,506 or \$7,229.

DIRECT COMMUNICATION WITH CANADA.

Manchester has direct connection with Canadian ports by means of the steamers of the Manchester Liners, Limited, which convey considerable quantities of live stock, grain, lumber, provisions, starch, apples, wood pulp, cereal foods, hay, &c., from Montreal and Quebec.

CANADIANS SHOULD INTEREST THEMSELVES.

Regular steamship lines are now operated between Manchester and the principal ports of the world. Canadian manufacturers and shippers on the lookout for new markets for their produce would do well to bear in mind Manchester and the thickly-populated district of which it is the centre. There are reliable firms located at Manchester who would be willing to enter into communication with shippers in Canada, with a view to business relationship, and the commercial agent will be very pleased to connect parties who are desirous of opening up new business in the manner suggested.

FRUIT CROP PROSPECTS.

It is conceded that small fruit throughout England has been damaged by weather conditions, and in consequence there should be a greater demand for Canadian canned fruit, and that prices would rule higher. It is essentially necessary that Canadian fruit should be put up in packages and quantity to suit the trade of this country, and packers are urged to study this phase of the question, and by conforming as nearly as possible will be rewarded by increased orders and proportionately better prices.

APPLES.

Put up in gallon tins six pounds in each. The fruit must be absolutely sound and not bruised, and cut in quarters. Packed in cases of six tins each. Cases containing twelve do not find sale so readily.

EVAPORATED APPLES.

Cut in rings, and of as light colour as possible, and packed in boxes to contain twenty-five pounds, which will find a better sale than if packed in boxes containing fifty pounds.

EVAPORATED WHOLE-CORED APPLES.

The Pippin variety is the most popular, and it must be of exceptional choice quality and of a light colour. The price realizable will be amply commensurate.

FRUITS IN GLASS.

Strawberries, raspberries and peaches are in great demand, put up in pint size. Quarts are too large. Pears must be of an absolutely good quality, and not too hard.

FRUIT IN TINS.

Strawberries, raspberries, peaches and pears put up in one pound tins are also in good demand.

P. B. MACNAMARA.

JAPAN

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, August 8, 1905.

HALF-YEAR CANADIAN TRADE.

The trade between Canada and Japan during the half-year ended June 30 last, as compared with the corresponding period of last year, was as follows:—

	1905.		1904.	
	Export into Canada.	Import into Japan.	Export into Canada.	Import into Japan.
	\$	\$	\$	\$
January	114,079	95,003	62,614	49,408
February.....	100,802	9,525	85,474	24,639
March	75,022	25,770	92,705	14,267
April	122,619	31,275	129,259	85,488
May	129,382	10,948	132,524	9,780
June.....	140,482	12,734	191,871	10,398
	682,386	185,255	694,447	193,980

As will be seen from the above, there is some increase in the exports into Canada, while a slight decrease is noticeable in the imports into Japan.

DECREASE IN FLOUR IMPORTS.

The import of flour during the first six months of this year amounted in value to \$35,128, which as against \$60,299 during the corresponding period of last year shows a decrease of \$25,000. The marked decline in February and April, though large enough to turn the scale against this half-year, is not significant enough to be traced to other causes than casually unfavourable market conditions. As will be observed, the decline in flour for those two months, accounts for nearly three times the decline on the half-year.

SMALL DECREASE IN TRADE WITH CANADA.

There was reason to anticipate for the past half-year a falling off in the importation of flour, owing mainly to the high price maintained throughout the term for the Canadian article, compared with corresponding grades from the United States. When there is not the inducement of equality in price, the sales are bound to decline, especially when there is lacking also activity and energy behind the product in the

market. This situation goes to indicate that there was no surplus of Canadian flour obliged to seek a market in this direction. In this review I am sustained by correspondence from western Canada. One usually enterprising and sanguine correspondent wrote nearly two months ago as follows:—

‘I can do nothing in cheap flour at present. It is a singular coincidence that the price in Canada for the greater part of the last two years has been too high for export to the Orient. Some of the large millers (giving names) will not even quote for export, saying that they can sell for higher prices at the mills. I should think that the conditions which obtain in Canada would operate in the States. There they have always had the lead in the export of cereal products across the Pacific.’

It is in this case a mistake to think that the ‘conditions which obtain in Canada would necessarily operate in the United States.’ The conditions are widely different. It may be said that the Pacific slope of the United States is an old agricultural country, especially a great wheat and flour producing country, besides dairy products, fruit, coarse grain, lumber, live stock, &c., in fact producing largely in excess of home requirements the many things which Canada, tributary to the Pacific, must also produce, but of which as yet she has no surplus that must conform in the matter of price to the market in the Orient. If British Columbia were producing to the extent practically that Washington, Oregon and California are, then the conditions would be equal; and no doubt the respective performances more nearly equal also.

CANADIAN PRODUCTS BETTER.

There is this to be said for Canadian products, without exception, that they are better than those of the United States, that is, as a general proposition. The flour, the coarse grains, the lumber, the butter, the fruit, and the live stock, all are better, hence their higher price and their tendency towards the trans-Atlantic market rather than towards the trans-Pacific.

Because of this better quality some jump to the conclusion that if Canadian products were better, the quality would compensate for the higher price. That conclusion would be reached without reference to the conditions here. This is a market where high prices will not assuredly overcome objections by the plea of high quality. Moreover, the inference is not intended that the quality of those productions which the United States markets export so largely here is not good, for it is good, and United States trade comes here backed by the earnestness that is born of the necessity of finding a market and meeting its requirements, and of paying intelligent attention to it when you have it. I am not aware of any country aspiring to the advantages of this market, excepting Canada, that does not take at least ordinary business methods to promote trade.

IMPORTING AUSTRALIAN MUTTON.

The recent extraordinary advances in price of butcher meat prompted the customers of the Kobe butchers to combine in the form of the Kobe Meat Club. The *Kobe Chronicle* is now drawing public attention to ‘the mutton and lamb which has been imported from Australia, and which can be had on application’ to the Kobe Meat Club. The *Chronicle* says: ‘As the result of personal experience, we can assert that the quality of the meat brought across all these thousands of miles in a refrigerating chamber is excellent, one good judge asserting that it is the best mutton and lamb he had ever tasted in Japan,’ all of which ‘seems to settle the question of cold storage so far as the palatableness of the refrigerated article is concerned,’ and to assure us of ‘what mutton tastes like when fed upon the succulent Australian grasses.’

There are at least equally succulent grasses in the valleys, uplands and foothills of British Columbia, and stretching for fifteen hundred miles eastward from the Pacific coast into the Canadian interior, but there is no suggestion of Canadian mutton in Japan. The difficulties that are overcome by Australian enterprise are, say two

thousand miles greater distance and the tropical voyage, against the comparatively short and cool route from Vancouver to Japanese ports.

FISHERIES OF SAGHALIEN.

The Japanese are busy discussing the industrial prospects of the Saghalien island. Saghalien is described as being full of mineral and forest wealth, but in as much as it will require time to develop these resources, the attention of the Japanese is for the present centred on the fisheries. The principal fish caught are salmon and herring, while the gathering of edible sea-weed also forms quite a lucrative industry. The Japanese government is now considering the ways of developing the fisheries.

Under Russian administration the whole littoral was divided into more than 200 fishing grounds, which were leased for payment of a certain sum or royalty. The leases, except those for a long term, were renewed every year. The Japanese authorities, it is believed, will, on the whole, adopt the system in vogue under the Russian management. Some of the fishing grounds were sub-let to Japanese fishermen by the Russian lessees, and the Japanese derived satisfactory profits from the employment. Should, therefore, Saghalien come under Japanese administration, it is expected that they will make the most of the industry and the revenue-producing capabilities of the island.

QUOTATIONS, IMPORTED MERCHANDISE.

The quotations of the various imported merchandise that ruled in the Yokohama market at the beginning of August were as follows:—

Cotton Piece Goods.

			Per Yard.
Cotton shirting.	$\left\{ \begin{array}{l} 40 \text{ yds., } 36 \text{ in.} \\ 50 \text{ yds., } 36 \text{ in.} \end{array} \right\}$	\$	0 10 to \$ 0 18

ALEX. MACLEAN.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(*Mr. W. A. MacKinnon.*)

BRISTOL, ENG., August 15, 1905.

PLANS FOR PALACE OF PEACE.

It has been announced that the programme of the competition for plans for the palace of peace at the Hague are now being issued. The first article of the programme states that the competition is open to all nations. It has occurred to me, therefore, that leading Canadian architects should not fail to submit plans, and if possible to secure the enviable distinction for themselves, and the honour for Canada, which will result if some one of them is successful.

FULL PARTICULARS AT OTTAWA.

I am, therefore, securing from the Hague a copy of the official programme with full instructions to competitors, plans of site, and photographs from two different points of view. This programme accompanies the present report to the Department of Trade and Commerce, Ottawa, where interested architects will no doubt communicate immediately.

TWO IMPORTANT POINTS.

It should be carefully observed that all plans must be in possession of the Board of Directors of the Carnegie Foundation at the Hague exactly as directed, within seven months of the date of the programme (August 15). It should also be observed that the cost is stipulated at 1,600,000 guilders (\$640,000 in round numbers).

W. A. MacKINNON.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, July 31, 1905.
P.O. Box 1232.

MARKET FOR HAY AND FODDER.

Although South Africa in certain sections produces large quantities of forage, yet the quantity produced is much below her requirements, consequently there is at times a considerable demand for products of this description from outside sources.

QUANTITIES IMPORTED DURING 1904.

During the twelve months ending December 31, 1904, Natal imported forage to the extent of 39,685,627 lbs., valued at about £55,490, and Cape Colony 40,000,000 lbs., valued at £56,000, making a total for South Africa of 79,685,627 lbs., valued at £111,490 (\$541,881), of this total South America probably supplied about $\frac{1}{3}$, of £97,553 worth.

VARIETIES IMPORTED.

The total imports consist chiefly of three varieties (1) Alfalfa (Lucerne) semi-compressed, (2) Oat-hay (compressed), (3) Fodder (compressed). Of these three varieties by far the largest proportion is Alfalfa from South America, although some business is done in parcels of compressed Oat-hay and fodder from Australia.

SHIPPING MEASUREMENTS.

Alfalfa measures about 40 cubic feet to the ton of 2,240 lbs., and compressed Oat-hay and fodder about 30 cubic feet per ton.

PRESENT QUOTATIONS OF SUPPLIERS.

South American semi-compressed Alfalfa is quoted at present at £4.11.0 per ton of 2,240 lbs., c.i.f., Cape Town, but this quotation is an unusually high one and a fair average c.i.f. quotation would be £4.5.0 per sailer with steamer parcels 3/ higher, although it has been sold for as low as £3.19.0.

Australian compressed Oat-hay is quoted at £3.15.0 per 2,240 lbs., c.i.f. South African ports, and Australian compressed fodder £4.0.0, c.i.f. per steamer.

SOUTH AFRICAN CUSTOMS DUTY.

Chaff, hay, Lucerne, Oat-hay and other fodder not otherwise described, but not including bran, pays duty at the rate of 24 cents per 100 lbs.

LOW STEAMER FREIGHTS FROM SOUTH AMERICA.

Steamer freight on Alfalfa from South America to Cape Town is quoted at 33/6, and per sailer 30/ per 2,240 lbs.

Freight per sailer for wheat is quoted at 12/ per 2,240 lbs. Buenos Ayres or Rosario to Cape Town.

SOUTH AMERICA HAS THE MARKET.

It will thus be seen that South America monopolizes about seven-eighths of the South African fodder importations, supplying Alfalfa (Lucerne) at an average c.i.f. Cape Town price of £4.5.0 (20.80) per ton of 2,240 lbs.

INCREASE OF TRANSVAAL IMPORTS.

Imports into the Transvaal during the first quarter of the year valued at £3,662,714, as compared with £3,527,213 in the corresponding period of last year, showing, therefore, an increase of £135,501. The goods entering through Natal were valued at £1,609,804, an advance of £38,772; those through Delagoa Bay, £818,242, an increment of £163,928; and those through the Cape Colony, £1,234,668, a decline of £77,199. The exports amounted to £5,369,875, against £4,086,007.

MARKET FOR WIRE DOORS AND WINDOW SCREENS.

South Africa, owing to the fact that she has at certain seasons many insect pests, offers a peculiarly suitable market for the exploitation of wire window screens (adjustable variety), and wire screen doors, neither of these articles have up to the present received the attention which the possibilities of the market deserves.

C. M. KITTSOON.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, Aug. 7, 1905.
P. O. Box 1232.

DUTY ON FROZEN MEATS.

The Colony of Natal has placed a duty of 1d. per lb., on all meats frozen or tinned, entering that colony for consumption.

The Natal Government has thus acted on the wishes and recommendation of the agricultural portion of their population, and it is generally believed that the agricultural interests of the various other colonies forming the South African Customs Convention will endeavour, and will probably succeed in causing their respective governments to follow suit.

CHS. M. KITTSOON.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. Ball.)*39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., August 24, 1905.

SEWAGE DISPOSAL.

As considerable attention must be devoted by all municipalities to the problem of effectually disposing of their sewage, I thought Canadians would be interested in a report on Birmingham's Sewage Farm, which is probably the largest in the world. The disposal of Birmingham and district's sewage is dealt with by the Birmingham Tame and Rea District Drainage Board, and the area affected includes a population of 850,000 people.

EXTENT OF BIRMINGHAM'S SEWAGE FARM.

The total area of the Joint Board's land is 2,830 acres, of which 1,784 are used for irrigation, 229 acres are occupied by roads, streams, plantations, buildings, cottage gardens, &c., and 782 acres all above gravitation level, are reserved solely for agricultural purposes.

METHODS OF TREATMENT.

On the arrival of the sewage at the farm it is discharged into five precipitation tanks. The solids and heavy matter in suspension sink to the bottom in the upper portion of the tank; and in the lower half the precipitated matter is of a slimy organic substance. Once a week the tanks are cleaned out, and what is technically termed 'sludge' is pumped by powerful machinery into a sludge tank, which is so constructed as to fill an ejector by gravitation. By a pneumatic process the sludge is forced along a cast-iron main three and a-half miles in length. The main is provided with junction chambers containing sluice valves, and the sludge is forced through the main and branch pipes until it reaches the trenches on the surface of the land, which have been prepared for its reception. When the trenches have been filled, they are covered with earth. In order to minimize the smell in summer the whole process does not occupy more than 24 hours. The liquid sewage passes from the precipitation tanks into large 'receiving bay,' and goes forward into the septic tanks.

THE SEPTIC TANKS.

The septic tanks—the receptacles of the sewage after the precipitation of the detritus and the sludge—is the place where the sewage undergoes a process of fermentation, thus diminishing the organic matter. The marsh gas given off rises to the surface and forms a thick scum, which in course of time becomes covered with patches of grass.

The liquid is distributed over the whole area by means of a main sewer. A system of culverts—technically termed 'carriers'—are fed from the main sewer, and in turn distribute the sewage over the surface of the soil. The land is laid out in squares with a view to facilitating the work of ploughing which is done by steam power.

COST OF CONSTRUCTION AND MAINTENANCE.

The initial cost of construction was \$5,630,000 (approximately), and the annual cost of maintenance, approximately, \$350,000, and the annual return is about \$56,000.

MUNICIPALITIES REQUIRING INFORMATION, SHOULD WRITE.

Of course, as there is in Canada no dearth of cheap land like there is in Great Britain, the process adopted by Birmingham could be effectually adopted in Canada, and if any of the cities or municipalities wish to write me on the subject, I will see that they are furnished with all information as to construction, costs, &c.

P. B. BALL.

TRADE OF BRITISH HONDURAS.

The following extract from a Report by Mr H. B. Walcott, Treasurer of British Honduras, dated March 14, 1905, on the Imports, Exports, Shipping and Excise of that Colony, has been received at this department through the office of the Secretary of State for the Colonies :—

“The United States would appear to be supplying from year to year a larger proportion of articles which in former years were obtained principally from the United Kingdom, such as—

	1895.	1904.	Increase + Decrease — from U.K.	Increase + Decrease — from U.S.
	\$	\$	\$	\$
Cotton goods—				
United Kingdom	91,284	126,247	+ 34,963	
United States	45,725	165,046		+ 119,321
Drugs and chemicals—				
United Kingdom	4,046	3,207	— 839	
United States	8,869	23,675		+ 14,806
Hardware and cutlery—				
United Kingdom	28,100	24,045	— 4,055	
United States	15,832	36,534		+ 20,702
Provisions (tinned)—				
United Kingdom	37,648	74,166	+ 36,518	
United States	49,194	90,485		+ 41,291
Rope and twine—				
United Kingdom	5,280	3,817	— 1,463	
United States	2,713	11,502		+ 8,789

“This I believe is largely due to the frequent visits to the colony of agents of manufacturing and other firms in the United States, and to their willingness to supply a grade of goods suitable to local demands.

“Very little trade is done with Canada and other British colonies, owing to the want of direct communication, the consequence being that the colony obtains from the United States the whole of its food supply, which might be supplied to a large extent by Canada.”

TARIFF CHANGES

GOLD COAST COLONY.

AN ORDINANCE TO AMEND 'THE CUSTOMS TARIFF ORDINANCE, 1904.'

(No. 3, dated and assented to April 24, 1905.)

1. This ordinance may be cited as 'The Customs Tariff (Amendment) Ordinance, 1905,' and shall be read and construed with 'The Customs Tariff Ordinance, 1904,' hereinafter referred to as the principal ordinance.

2. Items 4 (a) and (b) in the first schedule to the principal ordinance are hereby repealed, and the following duties are substituted therefor :— £ s. d.

'4 (a) On brandy, gin, rum, liqueurs and miscellaneous spirits or strong waters, not being sweetened or mixed with any article so that the degree of strength cannot be ascertained by Sykes' hydrometer, not exceeding the strength of twelve and a half degrees under proof, the Imperial gallon or part thereof... 0 4 6

(b) And for every degree or part of a degree over the strength of twelve and a half degrees under proof, an additional duty the Imperial gallon or part thereof.. 0 0 2'

3. This ordinance shall not apply to spirits, liqueurs or strong waters ordered before the commencement of this ordinance, and shipped to the colony at any time before the expiration of fourteen days next after the date of the publication of this ordinance in the *Gazette*, but such spirits, liqueurs or strong waters shall be charged duty at the rates heretofore imposed by the principal ordinance.

The burden of proof as to the date of order shall lie on the importer.

SAINT LUCIA.

ADDITIONS TO THE TABLE OF EXEMPTIONS FROM CUSTOMS DUTIES.

Under the provisions of section four of the Customs Tariff Ordinance, 1895, Amendment Ordinance, 1903, the Governor-in-Council has been pleased to make the following additions to the table of exemptions from customs duties, viz. :—

'Insecticide ingredients, and apparatus for the application thereof (subject to approval of Governor-in-Council).' (Order in Council of August 13, 1904.)

'Surgical instruments.' (Order in Council of May 25, 1905.)

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian Agents will furnish commercial information to those interested as to local trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	J. S. Larke,* The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
France.....	D. H. Ross, P.O. Box 140, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.

	Bruce Walker, 52 St. Enoch Square, Glasgow, Scotland.
	John Webster, 14 Westmoreland Street, Dublin, Ireland.
	Edward O'Kelly, 13 Queen's Square, Belfast, Ireland.
	H. M. Murray, Western Mail Building, Cardiff, Wales.

* Mr. Larke now being in Canada, all correspondence intended for him should be addressed to this department.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(*Mr. D. H. Ross.*)

P. O. Box 140, MELBOURNE, August 7, 1905.

IMPORTANT COMMONWEALTH CUSTOMS' RULING.

On July 28 the Australian Department of Trade and Customs issued instructions that on and after August 1, 1905, the provisions of section 154 (a) of the Customs Act in regard to the assessment of goods for duty are to be strictly complied with. The following charges are to be included in arriving at the free-on-board value:—

Cost of labour and materials (except outside packages) used in packing.

All cost of conveying the goods from the place of sale and placing them on board the exporting ship;

Except the following charges which are to be excluded:—

Stamp duty, including bills of lading.

Buying Commission.

Brokerage.

These instructions apply to goods imported from all countries.

EXTRACT FROM COMMONWEALTH CUSTOMS ACT.

The particular section of the Commonwealth Customs Act, now being enforced, is as follows:—

No. 154 (a).—‘The value shall be taken to be the fair market value of the goods in the principal markets of the country whence the same were exported in the usual and ordinary commercial acceptation of the term, and free on board at the port of export in such country and a further addition of ten per cent on such market value.’

SPECIAL CUSTOMS RULING IN REGARD TO CANADIAN GOODS.

If the Commonwealth customs added to the free-on-board value ‘all cost of conveying the goods from the place of sale and placing them on board the exporting ship,’ this would mean that duty would be demanded upon the entire cost of inland railway transportation from factory point to, say, New York, at which port the bulk of the Canadian shipments for Australia are made. I interviewed the Minister for Trade and Customs on behalf of Canadian exporters, and under date of August 2 I received the following letter from the comptroller General, which is of great importance to Canadian shippers:—

‘Referring to your call at this office this morning, I am directed by the Minister for Trade and Customs to inform you that in cases where goods exported from Canada to Australia are forwarded via the United States the f.o.b. value of such goods will be taken at their f.o.b. value at the Canadian border.’

INVOICES MUST SHOW COST OF FREIGHT TO BORDER.

It will be observed, by reference to the preceding paragraph, that the cost of freight from factory point to the Canadian border (only) will be added to consignments of Canadian goods sent to New York for shipment to Australia. As an example: Shipments of implements from (say) Toronto will require to have added to each invoice the exact cost of railway transportation to the bridge, Niagara Falls.

HOW TO INVOICE CANADIAN GOODS FOR AUSTRALIA.

Canadian exporters will greatly facilitate their Australian customers' interests by carefully complying with the Commonwealth customs regulations, which are strictly enforced. The following procedure should be adopted in making invoices:—

(a.) Add to the invoice the cost of labour and materials (except outside packages) used in packing.

(b.) In making shipment—via New York, or other United States ports—add to the invoice the exact cost of railway (or other) transportation from factory point to the Canadian border, Niagara Falls, or other frontier port as the case may be.

(c.) In every instance each invoice must be 'certified correct,' and signed by the manufacturer.

Canadian shippers, therefore, should, in this and every other way, consider the interests of their clients by giving most careful attention to the important question of invoicing goods accurately, showing every detail demanded by the Australian customs.

BRITISH COLUMBIA SALMON.

The proposed action of the Vancouver Board of Trade with reference to salmon labels has caused a good deal of comment locally. Some of the canners, it appears, contend that the term Skeena River should be used and recognized more as a description of the standard of quality than of any particular river. It is admitted that salmon in almost all canneries is labelled to order for purchasers, according to their instructions, and here divergence comes in. While some firms will on no account put Skeena River labels on fish that cannot be thus correctly designated, other firms put on whatever labels may be ordered, irrespective of the source of supply or designation.

IMPORTANCE OF LABELS.

The honest intention of the label should be to describe the locality of production. False labelling is a fraud on the consumer, no matter how the practice may be explained away. The Vancouver Canners' Association asserts that for several years, especially of late, inferior fish had been sent to Australia in large and small lots under Skeena River labels. These labels were owned in Australia and other places outside British Columbia, and the use of them was detrimental to the business done by those who supplied the genuine Skeena River fish. One thing is certain, Australia does not want inferior fish to be palmed off on consumers as prime, and hence, if assistance can be given to the Vancouver Board of Trade to put a stop to this practice of improper labelling, it should be warmly accorded here.

CANADIAN EXPORT HOUSE IN MELBOURNE.

In Monthly Report, June, 1904, page 1578, I wrote as follows:—

'Small Canadian manufacturers particularly require a commission house to promptly reimburse them for shipments, and to effect economies in transportation of their goods. It will never pay them to direct shipments, for they cannot be expected to know the export business; they are manufacturers, not shippers. Therefore, it is essential that not only the small, but the large manufacturers as well, should have the assistance of a shipping house, which would pay accounts, arrange freights and insurances, and make drafts upon Australian buyers in settlement of their account.'

It now affords me pleasure to report that the Imperial Export Company, of Toronto, has recently established its Australian headquarters in Melbourne, under exceedingly capable management. A few days ago I visited the company's offices and commodious show rooms, in which are displayed a wide range of samples of Canadian manufactures. Other collections were being opened up, for the most part Canadian goods quite new to this country, and the entire display constituted an eloquent illustration of the manufacturing advances made in the Dominion during recent years. The office of the company is fitted with handsome Canadian furniture—in itself a

striking advertisement—and hundredes of catalogues and price lists are classified in such a manner as to be readily accessible for reference. From Melbourne, the company purpose sending out commercial travellers to all the principal importing centres in the Commonwealth.

AUSTRALASIAN TELEGRAPH SERVICE.

The telegraph service throughout Australia and New Zealand has been state-owned since its inception. The development of telegraphic communication has been more rapid in Australasia than in any other country in the world. In 1903 the telegraph stations open in Australia numbered 3,129 and in New Zealand 1,153, making a grand total of 4,282. Taking Australasia as a whole, there are only four countries which possess a greater extent of telegraph lines, and only seven in which a larger number of messages is actually sent.

COST OF SENDING TELEGRAMS IN AUSTRALASIA.

For ordinary telegrams, not exceeding sixteen words, including the address and signature, the charge for all Australia is one shilling (24 cents), and for each additional word an extra charge of one-penny (2 cents) is made. In the towns and suburbs the charge is six-pence (12 cents), or within fifteen miles of the sending station the charge is nine-pence (18 cents) per message. It is possible to send a telegram of sixteen words at a greater distance than 4,000 miles in Australia for 24 cents, which is probably the cheapest rate in the world. In New Zealand a charge of six-pence (12 cents) is made for the first twelve words, including address and signature, with an extra penny (2 cents) for each additional word. Urgent telegrams cost double the ordinary rates, but these messages take precedence of all others.

TELEPHONE OFFICES IN AUSTRALIA.

The telephone systems throughout the Commonwealth are administered by the Postmaster-General's Department. The extension of the telephone service in Australia has, according to recent returns, been very rapid. By direct lines, or through the adaptation of telegraphic wires for telephonic purposes by means of the condenser, there are now over 1,800 telephone offices in Australia, of which number 385 were connected between January 1 and June 30 of this year. The number of telephones in use at the end of 1903 was given at 34,056, but (while the exact number at the present time cannot be ascertained) there has been in the interval a large increase. New Zealand had over 12,105 telephones in use in 1903, this making the entire number in Australasia, at that date, 46,161.

COST OF TELEPHONES IN AUSTRALIA AND NEW ZEALAND.

The annual rates charged for telephonic connection varies throughout the States and New Zealand. The charge has been reduced in recent years, particularly to encourage the use of telephones in private residences. The country and suburban rates are generally a matter of arrangement with the nearest exchange. The following is a comparison in regard to the variation in charges :—

	Annual Business Rate.		Annual Residence Rate.		Maximum distance from Exchange.
	£	\$ cts.	£	\$ cts.	Miles.
Victoria.....	9	= 43 80	5	= 24 33	1
New South Wales.....	9	= 43 80	5	= 24 33	1
South Australia.....	10	= 48 66	5	= 24 33	1
Western Australia.....	7	= 34 06	5	= 24 33	1
Queensland.....	6	= 29 20	6	= 29 20	$\frac{1}{2}$
Tasmania.....	6	= 29 20	4 10	= 21 90	1
New Zealand.....	7	= 34 06	5	= 24 33	$\frac{1}{2}$

The average maximum radius covered by the annual charge is within one mile of the exchange, but this rule is not strictly observed in the cities or towns. In all the city and suburban post and telegraph offices, railway stations, and also in many large stores, 'slot telephones' are installed for the convenience of the public.

HANDS EMPLOYED IN AUSTRALIAN FACTORIES.

Comparing 1903 with 1899, because last year's are not yet available, it is found that in all descriptions of factories and works in Australia the increase in the male hands employed was only 7,000, while the increase in the female hands employed was 14,000, and the bulk of the increase in the male hands was due to gas-making, printing and other industries not affected by the tariff. The employment of cheap female labour in the Commonwealth has undoubtedly expanded under federation, as the following table discloses:—

1899—males, 136,126; females, 31,352. 1903—males, 143,223; females, 45,457.

MELBOURNE LUMBER MARKET.

The importations of lumber into this market for the year which ended on June 30 last have been 89,662,000 super. feet, being an increase of 22,475,000 feet on those of 1903-04. The total consumption of imported lumber for the past twelve months is 83,397,000 feet, being an increase of 12,291,000 feet, but off this must be deducted 2,500,000 feet destroyed by fire, which reduces the increase in trading to 9,791,000 feet. Local prices are generally lower than previous records, and the enlarged consumption during the last year has not been accompanied by an improvement in profits. There is a strong demand for American hardwoods, and prices are high, with a likelihood of further advances. Spruce deals 9 x 3 have been selling freely. Shipments of staves recently landed are in good demand.

STOCKS AND CONSUMPTION OF LUMBER IN MELBOURNE.

Stocks of lumber held in Melbourne on June 30 were 49,254,000 feet, as compared with 42,989,000 feet a year ago. The following are the details for the last two years ending on June 30:—

	Consumption.		Stocks.	
	1905.	1904.	1905.	1904.
Red deals	4,160,000	3,063,000	4,905,000	5,699,000
Flooring	29,632,000	22,945,000	11,113,000	13,219,000
Spruce	6,595,000	5,456,000	6,378,000	2,597,000
Oregon	16,619,000	14,626,000	11,119,000	5,370,000
Redwood	4,821,000	3,890,000	3,887,000	5,517,000
Yellow pine	3,129,000	2,558,000	3,786,000	4,628,000
Shelving	679,000	972,000	1,011,000	624,000
Kauri	9,984,000	9,278,000	3,574,000	4,242,000
White pine	7,729,000	8,190,000	3,200,000	899,000
Clear pine	49,000	128,000	281,000	194,000
	83,397,000	71,106,000	49,254,000	42,989,000

D. H. ROSS.

JAMAICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. G. Eustace Burke.*)

KINGSTON, JAMAICA, August 28, 1905.

SCOTCH OATS REPLACING THE CANADIAN ARTICLE.

‘The Canadian oat crops having entirely failed, we have arranged to stock Scotch oats, which we sell at lowest possible price.’

The above forms part of an advertisement which is now appearing daily in the city papers of one of the principal importers of Canadian oats.

While I am hardly in a position to deny or confirm the statement that the Canadian oat crops have entirely failed, yet, seeing that the cables from Halifax quote the article at 53 cents a bushel, it does seem that even if there be a shortage (of which undoubtedly there is) if some effort be made by those who should be most concerned to place the exact situation before local importers the trade need not be altogether lost even for the present season.

It may be mentioned that there is an appreciable advance on 53 cents per bushel in the matter of acceptable quality Scotch oats. Why then should it be allowed to go forth that Canada cannot supply this market at present as formerly?

‘CANADIAN OATS’ NOT CANADIAN.

It has also been brought to my notice that an inferior description of oats represented as the product of Canada, but clearly of United States growth, is being shipped to this market. To facilitate the deception, the customary Canadian bag is employed, with the usual branding ‘entered for drawback.’ This, however, argues nothing for the genuineness of the oats, as the ‘entered for drawback’ might have reference to the empty bags alone originally imported from Canada, and then filled (or refilled) with the American product.

That the above inovation will materially affect the high reputation of Canadian oats in this market goes without saying, and some measures ought certainly to be attempted to counteract this unscrupulous trading.

OATMEAL AND BARLEY.

It is certainly surprising that those engaged in the oatmeal and barley industries do not endeavour to make a serious bid for a portion of the trade. The quantities imported from European sources is by no means insignificant, and some efforts should be made to capture a fair share of the consumption. Imports of both commodities are received in kegs of 100 pounds net, and tins and packets of 1, 2 and 7 pounds each.

ORANGE WRAPPING PAPER.

In a recent dispatch (see Monthly Report, July, 1905, page 108), I pointed out that Canada could well supply this market with all the orange box shooks required. I now beg to direct attention to the question of orange wrapping paper; as also printing paper. The sizes in demand are as follows, viz.:—

Yellow wrapping	12 x 16
Tissue	10 x 10
“	11 x 11
“	11 x 12

Also fancy coloured wrapping.

Demy printing paper.	20 lbs. per ream
“ “	24 “
Double demy printing paper.	40 “
“ “	48 “

White demy is principally in demand, but coloured is also imported.

BEEF AND MUTTON IMPORTATIONS.

Recently published government returns disclose the fact that during the past year appreciable quantities of fresh beef and mutton have been imported into the colony from the United States and Great Britain, the average cost of the former being 12½ cents, and the latter 14 cents.

In connection with the above subject, it is to be observed that the Kingston Ice Company have added to their plant two up-to-date cold storage rooms capable of an average temperature of 28 degrees Fahrenheit. This circumstance will no doubt facilitate further importations referred to above, and other perishable articles generally. For the present, however, it may be said that Canada is fairly ‘out of it’ for the want of ample cold storage transportation.

THE TARIFF PREFERENCE ON SUGAR.

Notwithstanding I took the necessary steps to give the fullest publicity to departmental dispatch intimating that the Tariff Commission would fully inquire into the question of the refiners absorbing the entire amount of the 33½ per cent preference, with a view of rectifying if possible any injustice, the community in general and the sugar interests in particular are much exercised over what they consider and term the ‘unreasonable greed of the Canadian refiners.’

G. EUSTACE BURKE.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, August 18, 1905.

JAPAN'S FOREIGN TRADE.

Japan's export trade for July, 1905, amounted to \$12,124,196, showing an increase of \$37,367 compared with the corresponding month of 1904, while the imports totalled \$83,508,173, an increase of \$3,588,493 compared with the same term last year.

IMPORTS.

The figures for the principal articles imported are as follows :—

	July, 1905.	July, 1904.
Cotton, raw	\$4,926,176	\$1,011,341
Cotton yarn	49,462	2,002
Wool	505,060	505,147
Flax, hemp, jute, &c.	161,287	57,415
Iron nails	89,484	55,709
Rails	31,567	151,902

	July, 1905.	July, 1904.
Iron, bar and rod	312,169	184,898
Iron pipes and tubes	96,139	55,189
Other iron and steel	816,842	314,263
Indigo, dry	130,884	29,885
Paper	309,837	116,642
Leather, sole and other	831,505	103,649
Machinery and engines	979,827	428,137
Locomotive engines	240,307	149,967
Steam vessels	118,376	342,762
Mousseline-de-laine	113,837	65,823
Wool cloths	178,957	33,710
Shirtings and cotton prints	362,992	112,934
Cotton satins and cotton velvets.	104,423	29,613
Sugar, white and brown	544,307	246,053
Rice	107,137	1,414,492
Beans, peas and pulse	289,862	464,145
Flour, wheat	279,565	271,466
Kerosene oil	64,270	870,703
Oil-cake (fertilizer)	585,269	286,653

PRODUCTION OF COTTON GOODS IN OSAKA.

According to returns published by the Japan Cotton Spinners' Association of Osaka, which is the centre of the cotton spinning industry in Japan, the total production of cotton textile goods during the first half of this year by ten spinning mills, which are also engaged in weaving, amounted to 52,343,742 yards. The aggregate number of the weaving looms in operation in the period mentioned was 5,711. The returns of the past two and a half years give the following result :—

Year.	Looms in operation.	Production in yards.
1903 :—		
First half.	4,747	39,662,016
Second half.	4,533	37,040,197
1904 :—		
First half.	5,034	40,842,358
Second half.	4,747	40,105,010
1905 :—		
First half.	5,711	52,345,742

BANKING LEGISLATION.

The Japan *Times* gives currency to the report that an amendment to the Banking Act is contemplated which will give the government power, in cases where unlawful acts are officially alleged against any bank, to direct temporary suspension, and to order the adoption of the necessary measures for the readjustment of the bank's business, and if expedient, to withdraw the charter.

BOYCOTT OF AMERICAN GOODS.

In sympathy with their compatriots in China, the Chinese in Yokohama in meeting assembled decided to boycott not only United States goods, but also banks, insur-

ance companies, shippers, and Chinese who adhered to their employment with American firms. At a subsequent meeting, after conference with their countrymen of Shanghai, they decided to restrict their boycott so as to prohibit only the buying of American goods.

ALEX. MacLEAN.

No. 14, BUND, ROOM B., YOKOHAMA, August 30, 1905.

THE PEACH IN JAPAN.

The peach-growing industry in Japan has developed in a remarkable way within recent years. Scientific attention more than anything else has promoted this advance. Foreign nurseries have been explored with the view of obtaining the best strain of plant, and specialty has been aimed at in cultivation, so that it is now possible to obtain a first-class peach that would not be distinguishable from fruit grown in the Niagara district.

The frequency with which fruit shops occur along the streets in the native quarter proves the absurdity of the impression that the Japanese don't eat fruit, and are not likely to. The difficulty of getting good fruit is evident, and should be an inviting circumstance to the Canadian fruit trade.

THE RICE CROP.

Late in July the forecast with regard to the rice crop was hopeful in tone; now, a month later, it may almost be described as hopeless. The weather requisite to fruitful growth during this interval is very much that of blazing sunshine; instead, there has been at least daily, if not continuous rain. The temperature throughout the rice-growing season has been abnormally low, which adds to the untoward conditions. While there was yet time for the recovery of lost ground the common estimate put the prospective crop at from ten to twenty per cent below the average, and now agricultural expert opinion confirms the apprehension of an unusually short crop.

COLD STORAGE TRANSPORTATION.

For some time there have been cold storage facilities supplied by the shipping lines plying upon the routes which have their northern termini at Japanese ports and their southern at Sydney or Melbourne. The foundation is thus being laid for a dead meat, fruit and dairy produce trade, which in these lines with the energy and enterprise of several Australian commercial houses may soon become well established. The trade is on the increase, and in order to keep up to it the Eastern and Asiatic Steamship Company, of which Messrs. Cornes & Company are the agents in Japan, are having one of their ship's cold storage capacity increased to five hundred tons measurement, provision being made for foreign meat, butter, fruit and vegetables in separate chambers. There is no cold storage transportation between the American continent and the Orient.

COTTON SPINNING IN JAPAN.

Returns compiled by the Japan Cotton Spinners' Association show the total consumption of raw cotton by the spinning mills of the country during the first half of this year to have been 208,264,406 pounds. This is an increase of some 37 per cent compared with the figures for the corresponding period of last year, and of about 8.7 for those of the first six months of 1903. Of the total raw cotton consumed during the half year ended June last, 50 per cent was Indian, 34 per cent Chinese, 11 per cent American and 3 per cent Egyptian cotton. The consumption of American cotton showed a remarkable increase, being more than double the figures for last year.

Returns made at the end of June last show that the number of cotton spinning mills in the country was 51, their authorized capital aggregating \$19,231,450, of which \$17,425,800 has been paid up. The spindles numbered 1,304,786 ring and 83,060 mules, in addition to 124,310 twisting spindles and 6,443 weaving looms. At the corresponding period of last year the number of mills was 49, having an aggregate authorized capital of \$18,927,700, of which \$16,733,685 was paid up, with reserves amounting to \$2,802,196.

THE FISHERIES.

The salted salmon market was struck by a marked depression some days after the occupation of Saghalien by the Japanese expeditionary force. The extent of the fisheries around this acquired territory was enlarged upon, and as usual in such cases, unduly magnified. The succeeding uncertainty as to the Japanese retention of the Island, and the recollection that the Saghalien fisheries could not under any circumstances this season yield its quota to this market, tended to a settled recovery, and prices are much as they were, being between \$45 and \$50 per ton with duties and charges paid. The second thought recalls, too, that the Saghalien fisheries have for some time been in greater part operated by Japanese, and that the trade accrued largely to Japan. The current value of these fisheries in the hands of Japanese is put at two million dollars per annum, and the chief officer of the Marine Products Bureau thinks there is not likely to be any material increase in value. He holds, however, that increased profits might be made by improved methods of curing, by introduction of canning, and by treating the herring as a comestible rather than as the raw material for farm manure.

PRODUCTIONS OF SAGHALIEN.

The annual value in productions of Japan's newly acquired territory of Karafuto, roughly estimated, is:—

	Roubles.
Agricultural.	1,387,308
Marine.	2,819,316
Mineral.	478,485
Miscellaneous.	105,000
Total.	4,790,109

NOTE.—Rouble = 51½ cents.

It may be remarked that this estimate puts the marine value lower than that of the Japanese official bureau, which is likely to be the more nearly accurate. Petroleum and timber, which products are not included in the above returns, are described as being apparently plentiful, but an approximate estimate of value cannot be made at present.

ALEX. MacLEAN.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., August 31, 1905.

CANADIAN FRUIT TO BRISTOL DIRECT.

The following communication has been received from one of the leading fruit firms of Bristol :—

‘We regret that this market of late years has not been sufficiently supplied with direct imports of this article, and we are continually buying in London and Liverpool. This means double handling and increased expense for railway carriage, &c.

‘We should be in a position here to supply the Midlands, as the railway rates are lower to Birmingham (which is a large centre for distribution) than from Liverpool, also working expenses from ship, and selling charges are less than the other ports.

‘We trust you may be able to use your influence to alter this, and we shall be pleased at all times to give you any information you may require.’

BRISTOL A PROMISING MARKET.

I believe that if good sound fruit is sent regularly to Bristol, for local sale, the prices realized should prove entirely satisfactory, as compared with those ruling in London or Liverpool.

COMPLETION OF THE NEW BRISTOL DOCKS.

The Bristol Docks Committee, having brought the new Royal Edward dock nearly to completion, are looking to Canada for a large proportion of the trade which they hope to attract by the excellent modern facilities at the Avonmouth docks will shortly offer. It is expected that there will be an annual addition of 1,040,000 tons to the present traffic, after the Royal Edward dock is completed.

A SPECIAL ENVOY TO CANADA.

With a view to making the Canadian shipping public more thoroughly acquainted with the Bristol route, the Docks Committee have decided to send their assistant general manager, Mr. A. Harvey, to Canada early in September. This gentleman will visit the chief ports and leading manufacturing centres of Canada, will confer with manufacturers and exporters, and endeavour to convince them that all goods destined for the large district served by Bristol can be more economically shipped via this port, than in any other way. The saving to be effected by shipping fruit and other products destined for Birmingham and other points within a radius of 75 or 100 miles of Bristol is very considerable, and will be quite as advantageous to Canada as to the corporation of Bristol, which owns the docks.

MARKET TRAIN FROM BIRMINGHAM.

The president of the Bristol Wholesale Provision Trades Association, Mr. C. H. Slade, is making efforts to arrange with the Midland Railway for a weekly market train from Birmingham to Bristol. It is understood that a fast train calling at Wor-

cester, Cheltenham and Gloucester, would be provided, and cheap tickets issued, if merchants from Birmingham and the other places named will heartily patronize the service. The important object of course is to induce Birmingham purchasers of Canadian products, notably cheese, butter, meat, and fruit, to secure their supplies from the nearer port of Bristol, rather than from the more distant one of Liverpool, which is already provided with a market train. I understand that the project is likely to be carried through successfully, and in that event there should soon be a substantial increase in the quantity of Canadian products imported to Bristol.

COOL STORAGE FOR CHEESE.

The same gentleman is also negotiating for the storage of Canadian cheese at Avonmouth docks, at a temperature of say 50 degrees. It is hoped that the trade generally will adopt this system as soon as arrangements are complete, instead of leaving the cheese at various depots under conditions which must involve more or less deterioration.

SERIOUS CHARGE AGAINST CHEESE SHIPPERS.

I regret being obliged to report two cases, the first which have come to my notice, of complaints regarding Canadian cheese.

The first complaint dealt with twenty cheese recently received by a Bristol house from Montreal. All of these, which have been tested, are stated to have contained at the centre, a lump of hard unmaturred curd, absolutely useless to the consumer, and entirely foreign to the remainder of the cheese. The weight of this lump is estimated to average four or five pounds.

PERSONAL EXPLANATION.

In order not to be dependent on hearsay evidence, I examined five cheese of my own selection, from among the twenty which constituted the shipment. The president of the Bristol Wholesale Provision Trade Association accompanied me, and we found some of this valueless substance in each of the five; two cheese were cut open, exposing a white granular filling, which was quite distinct from the remainder of the cheese.

VIEWED BY DAIRY COMMISSIONER.

As Mr. J. A. Ruddick, Canadian Dairy Commissioner, was expected in Bristol shortly after this complaint reached me, I had certain boxes of cheese reserved for this inspection. Mr. Ruddick came to the conclusion, after examining the samples that the maker, having made a complete failure of one or more cheese, which would have been entirely worthless in the market, cut them up and distributed them amongst other cheese which he made subsequently.

SWELLED CHEESE.

The second complaint is by no means so clear, either as to the origin of the trouble or to the amount of blame which may lie with the makers. Among a total of nearly two hundred cheese ex. ss. *Manxman*, a large percentage were found to be swelling; many of them had forced the lids off the boxes, and one cheese which I measured had risen two and three-quarter inches above the top of the box, upon which the cover presumably rested when the cheese was first made. This swelling appears to have been caused by the formation of gas, which has been found to have altered the texture of the cheese, forming small holes similar to those in Gruyère, but irregular. In one case the cheese had swelled sideways, had cracked open, and had burst the side of the box completely away.

PROBABLE CAUSE.

Mr. Ruddick is inclined to think that a lack of acidity was the cause of this particular phenomenon, which is entirely new in his experience, and in that of the trade here. As the cheese was kept in a reasonably cool temperature (though not ideal), the damage cannot be due to overheating.

ANNUAL AREAS OF FARM CROPS IN GREAT BRITAIN, 1895-1905.

Year.	Wheat.	Barley.	Oats.	Cereals.
	Acres.	Acres.	Acres.	Acres.
1895.....	1,417,483	2,166,279	3,296,063	6,879,825

W. A. MacKINNON.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, September 5, 1905.

TRADE VALUES OF NORWAY.

The trade values of Norway for the month of June and the six months' period, January-June, 1905, compare as follows with the trade values for the same periods in 1904 :—

	Imports.	Exports.
June, 1905.	\$ 5,776,100	\$ 4,100,000
“ 1904.	7,800,000	3,881,000
January-June, 1905	37,846,700	23,600,000
“ “ 1904	40,380,000	22,635,000

NORWEGIAN BUSINESS IN GENERAL.

Norwegian business in general has been conducted as usual during the union crisis, but it is only what might be expected, that new and extensive undertakings have not been started as long as the future was uncertain. If the dissolution of the union can be effected quickly and peacefully, business may be expected to revive in this country, the more so as farmers expect a good harvest. The supply of money is plentiful and a revival of the freight market may reasonably be expected now when the peace between Russia and Japan is concluded.

THE WOOD-PULP MARKET.

The market for cellulose is still very firm, both for delivery this year and the next year. There are only a few mills which have small lots left to sell for this year, and many mills have already sold out the whole of their next year's production. There are, however, several new cellulose mills building both in Norway and Sweden, and when they begin to operate, it will undoubtedly exercise a strong influence upon the market.

THE NORTH SEA MACKEREL FISHERIES.

The North Sea mackerel fishery is a success this year, the return up to August 19 being 4,678 barrels, against 1,093 and 393 barrels up to the corresponding dates of 1904 and 1903 respectively. As a general remark, it may be said that the mackerel goes further north this year than usual, mackerel being observed in places where it has rarely been observed before.

THE NEW NORWEGIAN TARIFF.

The new custom tariff of Norway went into force about the middle of August. It is based upon the principle laid down in 1897, when the Norwegian custom tariff, which had for more than a generation been a free-trade tariff, was changed into a protective tariff, though of a moderate kind as compared, for instance, with the German and

American tariffs. The tariff just passed by the Norwegian Storting (parliament), though more protective than the tariff of 1897, may also be said to be fairly moderate. It is expected to increase the tariff incomes by about three million kroner (£167,000) a year. I shall with my next report send in a comparative list of the old and new tariff rates of such articles that are of particular interest to Canadian exporters.

INTERESTING EXPERIMENT WITH ELECTRIC LOCOMOTIVE.

In these days, when the question of electric railroads is up in all countries that have the natural conditions for them, the following comparing experiments with steam and electric locomotives may be of interest to Canadian companies:—

On the wide track road which runs from Sannesund up to Hafslund station, in the southern part of Norway, and which has a grade of 1·30 metres, with a smallest radius of 1·60 metres, there are run both electric and steam locomotives, and the company operating the road has had the following experience: A steam locomotive of 90 tons weight pulls only with the greatest difficulty two freight cars loaded with 10 tons up the hills, and when the rails are wet from rain the locomotive frequently has to back up and make a new start to go up. On the other hand, the electric locomotive of only 22 tons weight, pulls six such loaded freight cars easily up the hills, even when the rails are wet, and on a side-track with a rise of 1·26 metres, the electric locomotive pulls four loaded cars. When the steam locomotive with its cars has come to a stop on the above-mentioned grade, its ability to get a new start discontinues, as the wheels slide on the rails, but the electric locomotive, after such a stop, has no difficulty in getting a start with its full-loaded freight cars. The experience obtained on this road thus confirms the ability of electric locomotives to go up heavy grades, and they should therefore to a large extent be practical for helping steam locomotives with larger trains up grade.

P. B. MACNAMARA.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.
(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, August 22, 1905.
P.O. Box 1232.

BUTTER IMPORTS.

During the year 1904 South Africa imported butter to the extent of eleven and a half million pounds, of a value of £479,752 (\$2,344,761).

SOURCE OF SUPPLIES.

The bulk of the South African butter demand is taken care of by Australia and South America (Argentine) who supply a high grade of butter containing a very little salt or colour, packed in one pound bricks, paper-wrapped, 52 to 54 pounds net per wooden box.

PRESENT QUOTATIONS.

Argentine butter is at present quoted at 21. cents per pound, c.i.f., Cape Town, but this figure is an unusually low one, 22 cents per pound being nearly the average price to wholesalers under ordinary conditions.

BEST TIME TO SHIP.

During the months of June, July, August and part of September, Australian butter is out of season, consequently, this would be the most favourable time of Canadian butter exporters to attempt to get in on this market.

IMPORTERS OF BUTTER.

The following are the largest butter importers in South Africa:—

- African and United Colonies Cold Supply and Storage Co., Ltd., Woodstock, Cape Colony, Johannesburg, Transvaal.
- Arctic Cold Storage Co., Durban, Natal.
- Cape Cold Storage and Supply Co., Chiappini St., Cape Town.
- Colonial Co-operative C. C. Co., Ltd., Pietermaritzburg Natal.
- Durban Cold Storage Co., Smith street, Durban, Natal.
- East London C. S. and Supply Co., East London, C.C.
- Federal Supply and C. S. Co. of S.A., Ltd., Cape Town (and branches).
- Imperial C. S. Co., Dock Road, Cape Town (and branches).
- Rhodesia Cold Storage Co., Ltd., Durban, Natal.
- Transvaal Cold Storage Co., Ltd., Durban, Natal.
- Sparks & Young, Durban, Natal.
- Wilson, R., Son & Co., St. George's street, Cape Town.
- Brown, Lawrence & Co., Ltd., Barrack street, Cape Town.

POTATO IMPORTS.

South Africa at certain seasons imports considerable quantities of potatoes for table use, also for seeding purposes, France, Great Britain and the Canary Islands at

present practically monopolize the demand with the well-known 'Early Rose' potato at an average approximate quotation of 99 cents per box of 66 pounds net c.i.f., Cape Town, per slow steamer, and \$1.32 per mail boat, boxes of 75 pounds net are quoted 9½ cents higher. French exporters always guarantee that should a fall in prices take place prior to date of shipment, they will refund the difference to the purchaser.

STYLE OF PACKING.

Potatoes for the South African market are hand-picked and packed in well ventilated iron-hooped boxes of 66 pounds and 75 pounds net.

BEST TIME TO SHIP.

Canadian potatoes arriving in South Africa during September, October and part of November, and in some localities as late as December, would meet with a healthy market.

IMPORTS DURING 1904.

During the year 1904, Cape Colony imported potatoes to the extent of 13,715,001 pounds, valued at £36,050, and Natal, 9,699,200 pounds, valued at £23,797, forming a total of 23,414,200 pounds, of a value of £59,847.

SOUTH AFRICAN POTATO IMPORTERS.

The following are the names of a few of the principal South African potato importers :—

Schmidt, H., & Co., Ltd., Kimberley.
 Ayres, C., St. Georges St., Cape Town.
 Bisseker, J., East London.
 Burman, I., Durban, Natal.
 Cohen Bros., 677 Main Rd., Fordsburg, Johannesburg.
 Deane, S., Durban, Natal.
 Mason, R., & Son, Durban, Natal.
 Ries & Co., East London.
 Shepherd, James, 151 Commissioner St., Johannesburg.
 Daverin, J., & Co., Port Elizabeth.

CUSTOMS DUTY AND PREFERENCE.

Importers of Canadian potatoes would only have to pay a duty of 7½ per cent *ad valorem* as against 10 per cent payable on the French product. The Canadian article, therefore, has a customs preference of 2½ per cent.

ONIONS.

There is a small demand in South Africa for onions of a medium brown variety, to arrive during the months of August, September and October.

Under ordinary circumstances an average c.i.f. price of \$1.80 per iron-hooped case of 75 pounds net, would get business.

Onions must be hard and well cured or they will not carry.

C. M. KITTSOON.

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(Mr. Edgar Tripp.)

PORT OF SPAIN, TRINIDAD, September 6, 1905.

POST OFFICE REMITTANCES TO CANADA.

By the report of the Postmaster General for year ending March 31, I observe that there has been a substantial increase in the remittances through the post office to Canada since the direct money order convention was established in 1902, the figures being :—

1902-3.....	£ 266 12 0
1903-4	882 15 6
1904-5.....	1,384 2 6

PARCEL POST CONVENTION WITH CANADA PROBABLE.

The report also states that application had been made during the year for the establishment of a direct parcel post convention with Canada, but although the Canadian postal authorities were willing to accede to the request, they had not yet furnished the draft convention under which they proposed to work the system.

IMPERIAL GOVERNMENT CONTRACT WITH ROYAL MAIL STEAM PACKET CO. NOT RENEWED.

The contract between the Imperial government and the Royal Mail Steam Packet Company for the West Indian mail service, which has existed for over fifty years, was not renewed at the expiration of its last term, on June 30, but the company is continuing the regular service pending arrangements which it is proposed to make with the colonies independently.

TRINIDAD CHAMBER OF COMMERCE RECOMMENDS SUBSIDY OF £15,000.

The Chamber of Commerce has recommended that Trinidad should pay an annual subsidy of £15,000, in consideration of this being made the headquarters and transfer station of the line.

ROYAL MAIL STAFF REMOVED TO PORT OF SPAIN.

Anticipating that this proposal will receive the sanction of the Secretary of State, the company have already transferred their staff from Barbados, and the ocean steamers now meet the intercolonial boats at Port of Spain instead of Bridgetown, a change which must inevitably bring further business and prosperity to this colony, as the distributing centre of the West Indies.

PROPOSED CHANGE OF ROUTE.

The Royal Mail Company's terminal port was formerly Colon, but they now propose after leaving Trinidad to pass at La Guayra, Savanilla, Colon, Jamaica, and thence to New York, returning the same way.

DIRECT CANADIAN STEAMSHIP SERVICE WILL SUFFER.

The establishment of this high-class line of steamers between here and New York will still further facilitate and encourage commercial interest with the republic, and render competition via Canada more severe.

ROYAL MAIL LINE TO BE PROVIDED WITH COLD STORAGE.

All the royal mail boats on the mail line will be provided with proper cold storage for the fruit trade, which gives signs of assuming large proportions in the near future.

EDGAR TRIPP.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., September 15, 1905.

DENMARK'S EGG INDUSTRY.

The great increase of the egg industry in Denmark is most remarkable for so small a country. Not many years ago but few fowls were kept on the Danish farms, and they received but little if any attention, and prior to 1867 all the eggs were consumed within the country. Lately, through the organization of the Egg Export Association, both the number and price of eggs have been increased. The value exported in 1895 was \$2,000,000, in 1896, \$3,500,000, representing 20,000,000 dozen. Each succeeding year has shown a marked increase in production, and in 1903 Denmark shipped to England 38,000,000 dozen eggs, value \$7,785,600.

ENGLAND'S DECLINING WHEAT AREA.

The alarming rate at which land in the United Kingdom is going out of cultivation is shown in a striking manner in the report of the Board of Agriculture in the returns for 1904 recently issued.

In the last two years the amount of arable land has decreased by 366,000 acres, the total area having fallen from 19,344,000 acres in 1902 to 18,978,000 acres in 1904. The falling-off in the principal crops will be seen from the following table:—

	1902.	1904.	Decrease.
	Acres.	Acres.	Acres.
Corn crops.....	8,517,000	8,258,000	259 000
Green crops.....	4,241,000	4,109,000	132,000
Clover and grasses.....	6,108,000	5,997,000	111,000
Flax.....	51,000	45,000	6,000

HOPS.

While the area under hops remained stationary at 48,000 acres, that devoted to small fruit increased from 80,000 to 83,000 acres. The bare fallow land, however, in-

creased to an ominous extent from 299,000 acres in 1902 to 438,000 acres in 1904.

The decrease of the wheat area of Great Britain in 1904 compared with the previous year amounted to as much as 13 per cent, the acreage under this cereal falling to 1,375,284 acres, which is the smallest area ever recorded. The lowest point to which the cultivation of wheat has been previously reduced was in 1895, when 1,417,483 acres were returned.

The estimated total produce of the wheat crop of the United Kingdom in 1904, as shown by the Board of Trade returns, was 4,740,000 imperial quarters, or 37,920,000 bushels. The total quantity of wheat imported into the United Kingdom from foreign countries during the same period amounted to 12,924,567 imperial quarters, or 103,396,536 bushels, of which the amount imported from British colonies and possessions was 9,981,350 imperial quarters, or 79,130,800 bushels.

GOOD HOP CROP.

After many years, in which blight has done much damage, hop growers in England are at last able to report a successful hop harvest. The report of those interested in the growth of hops states that they hardly remember a crop grown with less vermin. Very little washing or sulphuring has been done, so the crop has grown naturally without the usual trouble and difficulties. It is stated that the German government has instituted an inquiry for the purpose of ascertaining in what manner and to what extent the export of hops to the United Kingdom might be assisted. From 1890 to 1901 the sales of German hops in England, it is said, steadily grew, but since 1902 they have remained stationary, even if they have not declined. This is presumed to be in consequence of exports from other countries, notably Hungary and the United States. Hence the action of the German government.

COBALT.

The reports from Canada concerning cobalt mining has caused inquiries to be made here regarding it. A chemical company wishes to obtain an approximate analysis of the ore, quantities, price per gross ton and terms. They are of opinion that large quantities could be placed in Great Britain in the crude state. If their view is correct (freight rates not being prohibitive), the excessive charges for smelting will be averted, and better profits will result to the shippers.

WHAT CONSTITUTES A TON WEIGHT?

My attention has been called recently to a complaint addressed to the Secretary, Manchester Chamber of Commerce, made by an importer of chemicals from Canada, as to what he considered an injustice in the matter of a ton weight. He bought at a price per ton, and as 2,240 pounds constitute a ton in Great Britain, he expected to receive that weight from the Canadian seller, but as he received 2,000 pounds for a ton, the recognized weight in Canada, he feels he has a grievance. Would it not be well to quote 2,000 pounds for a ton and avoid friction?

P. B. MACNAMARA.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT,

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN, August 28, 1905.

MILLING INDUSTRY.

The output of South Africa's milling industries fluctuates in sympathy with the causes affecting its agricultural productivity, for although flour and meal in normal years are largely ground from imported corn, the oversea articles, despite duties, are in greater evidence in those years when the failure of colonial crops makes necessary the import in quantity of grain and corn. To a large extent, therefore, South Africa's productivity, agricultural and industrial, in any given year, is the barometer of the demand which may be expected, not alone for all lines of grainstuffs, but for those completed articles which are the manufactures of oversea milling industries.

OUTPUT OF MILLING INDUSTRY.

On a rough estimate, South African mills may be assumed to be equal in a normal year to an output of £3,250,000, as against an average consumption of £4,100,000, the balance having to be supplied from oversea. South Africa is, therefore, dependent on oversea mills to the extent in normal years, of about three-quarters of a million sterling for flour, meal, &c., the catering for its requirements is shared by a great number of countries. Flour, although the most important, is also not the sole item of the milled imports which comprise besides a variety of grainstuffs which have to be subjected to artificial treatment in order to be used as foodstuff.

The following table exhibits in detail the extent and character of these requirements for the year 1903, with the shares in full contributed by the two principal contributors, all items being in the normal volume of imports save those of flour, crushed maize, and maize meal :—

Imports of.	From United Kingdom.	From United States.	From other Countries.	Total.
	£	£	£	£
Barley, pearled, crushed or flaked	4,904	504	5,408
Flour, wheaten or meal.....	27,911	495,035	86,826	609,772
Maize, mealie meal.....	45	54,475	3,062	57,582
Maize, crushed, or samp.....	1,861	107,180	3,022	112,063
Maizena	2,279	7,020	26	9,325
Oats, crushed.....	3	2,542	183	2,728
Oatmeal.	19,895	34,688	1,391	55,974
Other meal and pollard	417	81	180	678
Peas, split.....	1,408	1,977	1,531	4,916
Peas and beans, crushed	1,746	701	2,447
Sago, macaroni, &c.	7,119	951	2,504	10,574
Semolina	585	585
Total.....	68,173	703,949	99,930	872,052
Percental share.....	7·8	80·7	11·4

As will be seen, the percental share of the United States is preponderating, but chiefly marked in flour, crushed maize, and maize meal; Canada coming next to it in flour with £67,027 of imports. It is anticipated that when the figures for 1904-05 imports are issued, it will be found that Australia has captured a large portion of the United States flour trade with South Africa.

INCREASE OF CANADIAN TRADE.

The figures given below will serve to show the very large increase in Canadian exports to South Africa since Canada inaugurated the direct line of steamers from Canada to South Africa in 1902:—

Year.	Cape.	Natal.	Total.
	\$	\$	\$
1898.....	17,963		17,963
1899.....	66,547		66,547
1900.....	22,319	3,436	25,755
1901.....	25,214	1,601	26,815
1902.....	218,169	81,205	299,674
1903.....	1,190,902	1,037,705	2,228,607
1904.....	1,034,420	873,542	1,907,962

DEMAND FOR OAK STAVES.

A considerable business could be worked up with South African wine merchants in oak staves for use in the manufacture of hogsheads, &c.

The sizes of lumber at present imported for this purpose are as follows:

1. Oak pipe stave with straight grain for splitting purposes, 54 inches long and upwards.
2. Prime white oak extra heavy hogshead staves for splitting purposes, straight grain, 45 inches long and upwards.
3. Dressed oak hogshead staves, 44 inches long.

SAMPLES ON VIEW.

Samples of the varieties above mentioned may be viewed at the Department of Trade and Commerce, Ottawa. All staves must be well seasoned and free from worm holes.

QUOTATIONS AND TERMS.

Quotations must be c.i.f., Table Bay; terms, draft at four months from date of arrival of staves, with three months' interest added at current bank rate. Some of the local importers of these articles insist on all orders given for staves being subject to their inspection and approval on arrival.

NAMES OF IMPORTERS.

The following are the names and addresses of the largest users of staves in South Africa:—

Sedgwick, J., & Co., Cape Town.

Green, E. K., & Co., Ltd., Cape Town.

Van Ryn Wine and Spirit Co., Cape Town.
 Collison, H. C., & Co., Cape Town.
 Bosman, Powis & Co., Cape Town.
 Paarl Wine and Brandy Co., Ltd., Paarl, Cape Colony.
 Western Wine, Brandy and Spirit Co., Ltd., Worcester, Cape Colony.
 Castle Wine and Brandy Co., Cape Town.

SURPLUS OF AGRICULTURAL IMPLEMENTS.

A Pretoria firm who purchased large quantities of agricultural implements, principally ploughs and harrows, at ridiculously low prices from the British Government Repatriation Department shortly after the close of the late war, have found the supply to be greatly in excess of any local demand for a long time to come. This firm is at present exporting these implements to points as far away as South America.

WIRE FENCING.

Hitherto South African farmers have not as a rule been in the habit of fencing their farms, but recently the desirability of doing so has become apparent, consequently Canadian manufacturers of wire fencing material are advised to give more attention to this market, in view of the probable large increase in the future demand for this description of material.

PUMPS AND PUMPING MACHINERY.

Owing to the long periodical droughts and the general uncertainty of rain falling in a good many districts, the deep boring to establish a supply of water when needed is considerably on the increase. Such being the case, the demand for all appliances for this purpose will greatly increase in the future.

C. M. KITTSOON.

JAPAN.

REPORT OF COMMERCIAL AGENT,

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, Sept. 15, 1905

AN INJUSTICE TO CANADA.

A veteran cause of complaint, in the interest of Canadian export, still lives, and has made a recent impressive appearance here.

A leading native newspaper gave an interesting notice of Mr. Kozu's importation of dairy cattle for breeding purposes, summing up in these words:—

'Altogether Mr. Kozu brought to Japan, 28 Jersey, 4 Canadian Jersey, and 13 Ayrshire cattle, which arrived in Yokohama in excellent condition.'

I had this summary translated and retranslated with the hope of making something more explicit out of it, but with no substantial improvement. I then had reference to the custom house, but with less satisfactory results. The only information they could give there was that all Mr. Kozu's cattle were entered as from the United States. The inference from this is, although the customs returns have separate columns for

Canadian and United States entries, that Canadian products coming through the United States ports (Portland, Ore., in this case) are entered as from the United States. It does not seem possible to discover to what extent this injustice to Canada is operative.

Mr. Kozu has since furnished me with full particulars of his purchase, which may be summarized as follows : 3 bulls and 14 cows from Canada; 4 bulls and 24 cows from the United States.

He speaks in terms of the highest appreciation of the attention and assistance which he received from the Minister of Agriculture and the officers of the department, and freely confesses to a very high estimate of Canadian methods and their results.

LUMBER.

For a year past or longer there has been practically no market in Japan for foreign lumber. Some flooring for an occasional foreign style building, and dimension timber for railway, shipbuilding and dock works, can be hunted up if one goes to search for it; but there is no movement of such lumber or timber to indicate anything like a market. The revival of interest lately is shown by inquiries that evidently have for their motive the idea of renewing a lost grip. I have had several casual or incidental inquiries lately, which, like not a few other like things, would seem to have some relation to the consummation of peace. Disturbances at the centres of population and trade, although having a trade-depressing effect, are regarded as being merely ephemeral.

THE RICE CROP.

Owing to warmer and more settled weather since the beginning of September, the shortage of the rice crop, which was at one time estimated at about 20 per cent, will be materially decreased. According to investigations made by the Department of Agriculture and Commerce, the rice crop throughout the country this year is estimated at 40,292,653 koku (one koku nearly five bushels), which shows a decrease of 9·2 per cent, compared with an average year. It is, however, yet premature to form an estimate nearly accurate.

A. MacLEAN.

INQUIRIES RELATING TO CANADIAN TRADE.

Since the publication of the last monthly report there have been received the following inquiries relating to Canadian trade. The names of the firms making these inquiries, with their addresses, can be obtained upon application to: 'SUPT. OF COMMERCIAL AGENCIES, THE DEPARTMENT OF TRADE AND COMMERCE, OTTAWA.'

Please Quote the Reference Number when Requesting Addresses.

968. A firm of Belgium **Aniline Dye** and **Ultramarine Blue** manufacturers desire to come into touch with a commercial house in the Dominion open to undertake their agency. Only a firm knowing the articles well, and in a position to influence business with the industries using dyes need apply.

969. A firm in Rotterdam, Holland, asks for the addresses of Canadian **Exporters of Oak Wood** and **Oak Wood Staves**.

970. A Cardiff Produce merchant would be pleased to receive quotations c.i.f. Cardiff, from Canadian shippers of **Hay**.

971. A Japanese firm engaged in the manufacture of **chip braids**, **cotton crepe**, and **linen collars** for ladies, and **linen drawn work**, wishes to be put in correspondence with Canadian merchants, with a view to importing same into Canada.

972. A Japanese firm engaged in the export of **sulphur** and **manganese** wishes to be put in communication with Canadian merchants, with a view to importing same into Canada.

973. A Japanese exporting firm wishes to be put in communication with Canadian merchants, with a view to exporting to Canada Japanese **copying paper**, **paper napkins**, and other kinds of **Japanese paper**.

974. A Manchester firm desires specifications and prices c.i.f. Manchester, from Canadian manufacturers of **doors** and **dowels**, and prices of **spruce lumber** from Canadian shippers of same.

975. A Manchester firm wishes to obtain prices and descriptions of **garden lattice** from Canadian manufacturers of same.

976. A Lancashire firm now obtaining supplies from the Baltic, desires prices from Canadian shippers of **sawn spruce** and **pine laths** c.i.f. Manchester, in bundles of 500 feet, sizes $1\frac{1}{2}$ in. x 3-16 in., 1 in. x 3-16 in., and $1\frac{1}{4}$ in. x 3-16 in., lengths of 3 ft. 6 in., 4 ft. and 4 ft. 6 in.

977. A Manchester firm is desirous of corresponding with Canadian shippers of **mica**.

978. A Manchester firm now obtaining supplies from the United States wishes to obtain prices of **carriage nuts** and **bolts** from Canadian manufacturers of same.

979. A Manchester firm desires to represent Canadian manufacturers of **electrical** and **mechanical appliances**.

980. A Manchester firm intimately connected with the textile manufacturing trade of Great Britain, desires to correspond with Canadian importers who have no resident agent in England.

981. One of the largest South African importers of lumber and builders' supplies, is desirous of dealing direct with a Canadian manufacturer of **church furniture** in fumed oak, &c.

982. A Belfast merchant with large business experience and extensive connections, desires the names of Canadian firms, preferably those not already represented in the United Kingdom, with a view to becoming their representative. This gentle-

man can handle **canned salmon**; **canned fruits and vegetables**; **canned meats and tongues**; **cheese**; **butter**; **apples and other fruits**.

983. A London firm who are exporters of a well-known **anti-friction metal**, and who are also able to manufacture **anti-friction metals** to any given specification, desire to correspond with a responsible house in Canada, with a view to having their products thoroughly marketed in that country.

984. Inquiry is made by a London firm for the names of Canadian firms manufacturing **binder twine and rope**.

985. A firm of engineers have asked to be placed in communication with manufacturers of **wood handles** in Canada.

986. Inquiry is made for the names of Canadian exporters of **laths or battens** for packing oakum bales. The sizes of the laths required are 25½ in. long by 1½ in. wide by ¾ of an inch thick. Quantity: 100,000 a year, in four lots of 25,000 per lot. Made up in bundles of 100 to the bundle.

987. A firm in Hereford wishes to get in communication with a Canadian firm open to ship **calcium carbide**.

988. A commission agent in West Bromwich wishes to represent a Canadian shipper of **flour**.

989. A Birmingham firm inquires for Canadian manufacturers of all kinds of **turned wooden goods**, particularly **handles**.

990. A Birmingham commission agent wishes to represent firms in Canada handling **hams, bacon, lard, tongues, &c.**

991. A Birmingham firm wishes to be put in touch with Canadian shippers of **potash**.

992. A commission agent in Birmingham would like to hear from firms in Canada in a position to supply **veneer seatings, fancy roofing, &c.**, used in connection with the building of electric cars and railway carriages.

993. A firm in Nuneaton would like to hear from Canadian shippers of **hay**.

994. A Cannock firm is in a position to handle large quantities of **round timber**.

995. A Birmingham firm wishes to be put in touch with Canadian manufacturers of **excelsior**.

996. A firm in West Bromwich is open to appoint an agent for the sale of **builders' hardware**.

997. A Birmingham firm wishes to find a market for **builders' hardware**.

998. A London firm would like to be put in communication with Canadian firms open to purchase **gas fittings and accessories**.

999. A Birmingham firm is open to appoint an agent for the sale of their **paints, varnishes, &c.**

1000. A Birmingham firm wishes to find a market for **leather sample cases**.

1001. A Birmingham firm would like to find a market in Canada for their **pearls, pearl handles, and Japanese handles**.

1002. A large Birmingham firm wishes to place **brass and copper tubes** on the Canadian market.

1003. A Birmingham firm would like to appoint an agent for the sale of **electrical conduit tubes and fittings**.

1004. A Wednesfield firm wishes to get in touch with Canadian buyers of **carriage fittings**.

1005. A Walsall firm wishes to find a market for **carriage fittings**.

1006. A large Birmingham firm is open to appoint an agent in Canada to handle a line of **buttons**.

1007. A Birmingham firm is open to sell large quantities of **cotton waste**.

1008. A Birmingham firm inquires for Canadian buyers of **castors and hinges**.

1009. A Birmingham firm is in a position to supply Canadian buyers with **coach brass foundry**.

1010. A Birmingham firm would like to be put in touch with handlers of **brass socket and screw castors**.

1011. A large Birmingham firm is in a position to place **cast and stamped brass foundry**.

1012. A West Bromwich firm wishes to find a market in Canada for all kinds of **springs**.

1013. A Coventry firm is looking for buyers of **woven address shirt bands, mantle labels and hangers, coat and boot loops, shirt tabs, &c.**

1014. A Birmingham firm is open to appoint an agent for the sale of **stationers' sundries**.

1015. A Birmingham firm wishes to get in communication with buyers of **whips**.

1016. A Birmingham firm wishes to find a market in Canada for **riding saddle bars, leaping heads, &c.** Would appoint an agent.

1017. A London firm wishes to develop trade in Canada in **cotton, woollen, jute, flax, hemp and linen goods**.

1018. A Lancashire manufacturer of **polishing cloths, printed and finished complete**, would like to do business in Canada.

1019. A Lancashire firm manufacturing a **special boiler fluid** and other **specialties**, wishes to get into touch with Canadian importers who can handle the material.

1020. A correspondent would like to hear from Canadian manufacturers of **log huts and bungalows**.

1021. A Midlands manufacturer of **fish hooks and tackle** would like to do business in British Columbia, and is prepared to appoint suitable resident agent.

1022. A Midlands manufacturer of **dubbin and boot polishes, saddle soap and similar lines**, would like to do business in Canada.

1023. A Leicester manufacturer of **boot and shoe laces** wishes to extend business with Canada.

1024. A Cape Town and Johannesburg firm of commission agents desires to represent a Canadian manufacturer of **school furniture**.

1025. A Cape Town commission agent desires to represent on commission a Canadian exporter of **butter and cheese**.

1026. A Pittsburg, U.S., firm is desirous of obtaining the names of Canadian exporters of **honey in comb**.

1027. A North England cement manufacturer desires to appoint an agent in Canada for the sale of **Portland cement**.

1028. A well known and long established **Sheffield cutlery** manufacturer (all descriptions) with valuable trade marks, desires to appoint an agent for Canada, Montreal preferred; references required.

1029. A Yorkshire worsted spinner desires to get into communication with Canadian manufacturers requiring **worsted yarns, warp and weft**, either on **tubes, in hanks or bundles**.

1030. A Hull, Eng., manufacturer of **binder twine, hemp sackings and hemp yarn** of every description, desires communication with Canadian buyers, and will appoint an agent for Canada.

1031. A Yorkshire manufacturer of **fancy tweeds and coatings** desires to extend his trade in Canada.

1032. A large Cape Town firm of lumber merchants desires to get into communication with a Canadian manufacturer of **school furniture and oak panelling**.

1033. A Copenhagen (Denmark) firm of building material merchants desire to extend the sale in Canada of '**compo-board**' which they manufacture, and for this purpose have asked to be placed in touch with likely importers.

1034. Inquiry is made by a person with life-long experience in the **provision** trade with a view to obtaining an appointment as representative, buyer or English manager for a Canadian exporting house.

1035. A London firm manufacturing **warm woollen hosiery** have requested to be placed in communication with Canadian buyers of such goods.

1036. A firm of English, colonial and foreign agents and representatives are desirous of securing the agency for the United Kingdom of actual producers and packers

of Canadian produce, particularly **canned and preserved provisions, fruit, fish, vegetables, &c.**

1037. Inquiry has been made by an Italian firm for the addresses of first-class firms in Canada importing **men's hats (woollen and fur)**.

1038. The names of manufacturers in Canada of **coin-in-the-slot machines, advertising novelties, talking machines, cash registers, &c.**, are asked for by a London agent open to represent such firms.

1039. An English firm of manufacturers of **table delicacies** wish to communicate with Canadian packers of **canned fruits** with a view to handling a special brand in the United Kingdom.

CANADIAN BUTTER AND CHEESE.

(Extract from 'W. Weddel & Co's Colonial Dairy Produce Review,' London, England, for the year ended June 30, 1905.)

CANADIAN BUTTER IMPORTS.

The supplies of butter received from Canada are very irregular in quantity from year to year, and, while showing nearly 11,000 tons increase in the past decade, exhibit an increase of less than 1,900 tons for the last six years. No doubt the fluctuations in the price of cheese influence the export of Canadian butter, and, for the year recently concluded, owing to the low price of cheese last year, the export of butter increased by 8,000 tons, the total amount being 12,847 tons, which has only once been exceeded, viz., in 1903, when it reached 13,238 tons. Unlike Australia, which can export all the year round, Canada can make butter for export only during the summer, the climatic conditions rendering winter dairying as yet unprofitable.

QUALITY.

The year ended June, 1905, was not free from complaints of Canadian butter being far inferior to Australian and New Zealand, while there are no natural conditions that make this necessarily so. It is the fault largely of customs and habits, and defective organization, compared with the colonies of the Southern Hemisphere. Of course, the private separator and the bad practice of churning 'collected' cream of different ages are in use in Canada as in some other countries, and the inferior quality of Canadian butter is too often traceable to this source. The Canadian authorities now raise no objection to the reasonable use of preservatives in butter, and if the butter-makers would use only the best of these, and not those of the lowest price, it would be an improvement.

PRICES.

The arrivals of Canadian butter are usually small in June and increase in bulk until August and September, from which a gradual decline occurs until the end of the year, when arrivals are so small that they are not quotable on this market. Prices during the past year averaged, in July, for 'choicest' salt butter, 88s. per cwt.; in August they rose to 94s. 6d., in September to 97s., and in October the highest value for the year was realized, viz., 100s. In November prices declined to 97s., when the quotation ceased. The new season opened in June, 1905, with an average of 97s. 8d., and in July the average was 104s., or 16s. per cwt. above the corresponding month of 1904.

CANADIAN CHEESE IMPORTS.

Canada, from a variety of causes, is far and away the greatest cheese producing colony in the world, and during the past decade has increased its supplies to our markets by 32,985 tons, and during the last six years by 21,759 tons. It is difficult to ascertain exactly the amount of Canadian cheese imported into the United Kingdom, as during the winter months shipments are made via United States ports, and though our customs returns are excellent, and compiled with great care, yet there is no doubt that large arrivals of cheese are consequently credited to the United States which ought to be entered as Canadian.

QUALITY.

The quality of Canadian cheese, and the condition in which it arrived during the year ending June, 1905, were most satisfactory. The depreciation in the general quality of cheese for the previous year was mainly due to the large proportion made before the cows were turned out to grass, and while they were still being fed on dry fodder. During the year just ended the quantity of fodder cheese imported was very much reduced, and its quality was also proportionately improved. The more satisfactory arrangements made by the shipping companies for carrying cheese at lower and more suitable temperatures by means of cool air chambers greatly assisted in both the superior condition and the better quality which was found on arrival during the year. The Dairy Commissioner for Canada deserves great credit in his labours in educating the cheese-makers of the colony into turning out an improved article, and one more suitable to the requirements of our markets, as well as for his endeavours to reduce the damage to the cheese in transit. There are still, however, opportunities for both him and the cheese-makers for preventing the damage, and also avoiding the monetary loss, which occurs through 'heated' cheese.

PRICES.

The year which closed with June, 1905, showed a slight decline in values compared with its immediate predecessor. At the beginning of the year prices were 40s. per cwt., which was lower by about 9s. than it had been since 1899, and though the average for the year was the lowest since that date, an improvement took place later on which left the yearly average (50s. 5d.) at less than sevenpence per cwt. below 1904, and tenpence below the average of the past ten years. From July, 1904, until June, 1905, with the exception of a fall of sixpence per cwt. in February, a steady advance in price took place, the value in May, 1905, being 16s. 3d. above July, 1904. In the last month of the year a decline of 3s. 3d. occurred. In July, 1904, the average top price in London was 40s. per cwt.; in August, 42s. 3d.; in September, 45s.; in October, 45s. 6d.; in November, 48s. 9d.; in December, 51s. 2d.; in January, 1905, 54s.; in February, 53s. 6d.; in March, 57s.; in April, 59s.; in May, 56s. 3d., and in June, 53s.

NEW ZEALAND INTERNATIONAL EXHIBITION.

Official notice has been received at this department of the New Zealand International Exhibition, which is to be held at Hagley Park, Christchurch, Canterbury, New Zealand, during the months of November and December, 1906, and January, February, March and April of 1907. Intending exhibitors should address the Secretary of Local Committee, New Zealand International Exhibition, Christchurch, New Zealand.

TRADE MARK REGISTRATION IN ARGENTINE REPUBLIC.

The department has received an official communication from the Right Honourable the Secretary of State for the Colonies, under date of August 31, stating that the matter of registration in the Argentine Republic of trade marks is not understood or appreciated by British merchants either in the United Kingdom or in the colonies. According to the Argentine law it is permissible for anyone to register in the republic a trade mark for any number of different classes of goods, provided that mark is not already registered in that country. The cost of registration, including agents' fees, is about £10, and the time necessary to obtain registration is about six weeks. Such registration gives protection for ten years.

The full text of the Colonial Secretary's communication can be obtained upon communication with the Department of Trade and Commerce.

TRADE OF BERMUDA.

NOTE.—'Special' means, in the case of Imports, 'Imports for Home Consumption,' in case of Exports, Exports of Domestic Produce and Manufacture. (a) The figures for Mexico include Coin and Bullion.

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Customs-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

GUERNSEY.

I.—ORDINANCE OF THE ROYAL COURT DATED MAY 1, 1905.

SECTION I.

General Regulations for the Harbours.

1. Every master of a ship arriving in this island having on board goods for the island, shall within twenty-four hours of arrival, and before breaking bulk, deliver at the office of the Supervisor of the Harbour a declaration in writing, under his signature dated the day of delivery, stating:

The name of the ship and the nation to which it belongs.

The nature, marks, tonnage (weight or measurement according to the tariff) of the goods, with a separate designation of each consignment.

The name of the consignees.

Every master of a ship arriving in this island, not having on board goods for this island, but which remains here more than twelve hours, shall within twenty-four hours of arrival, deliver at the office of the Supervisor of the Harbour, a declaration in writing, under his signature, dated the day of delivery, stating the name of the ship, her tonnage and the port to which she belongs as well as the name of the agent of the said ship.

The whole under a penalty of a fine on the said master or the owner of such ship, of not less than ten shillings sterling or more than £2 2s. 10d. sterling.

2. Every master or agent of a ship, excepting ships belonging to the London and South-Western Railway Company and the Great Western Railway Company, arriving in this island having on board goods for this island, the duty on which shall not amount to one shilling and eight pence for a single individual or house of business, shall within 48 hours from the unloading of such goods, pay the dues thereon to the Supervisor of the Harbour, after a deduction of 10 per cent which the said master or agent of a ship is authorized to keep for his trouble and time given, under a penalty on the said master or agent of not less than 10 shillings sterling or more than £2 2s. 10d. sterling, without prejudice to the claim of the said master or ship agent against the owner or consignee of such goods for the reimbursement of the dues so advanced.

3. The Supervisor shall have the power of requiring from the master of every vessel arriving in this island with goods on board for the said island, the production of the manifest and bills of lading of the said goods; and any master refusing to produce the said manifesto and bills of lading, when required, shall be liable to a fine at the discretion of the court, of not less than 10 shillings sterling or more than £2 2s. 10d. sterling.

4. Every proprietor or consignee of goods imported into this island shall pay the dues thereon to the Supervisor of the Harbour within eight days of the arrival of the said goods, otherwise he shall be liable, besides paying the said dues, to a fine of not less than 10 shillings or more than £2 2s. 10d. sterling.

5. The Supervisor shall have the right of causing to be measured all foreign ships arriving in this island, and every master of a ship resisting the persons employed by the said Supervisor to make the said measurement, shall be liable to a fine of not less than 10 shillings sterling or more than £2 2s. 10d. sterling.

6. The Supervisor of the Harbour shall have the right of demanding from every master of a ship in this island the production of the register of the said ship, and every master refusing to produce the said register, when so required, shall be liable to a fine of not less than 10 shillings sterling or more than £2 2s. 10d. sterling.

7. All dues chargeable on a ship shall be paid before the departure of such ship under a penalty of a fine on the master or agent of such ship, which fine shall not be less than 10 shillings sterling or more than £2 2s. 10d. sterling.

8. The Harbour Master at St. Sampson's shall have the right to exact from the master of every ship in the said harbour, previous to her leaving port, the production of the receipt from the Supervisor of the Harbour for the dues and payments required on the said ship as per tariff and to prevent the departure of the said ship until the said receipt be shown to him.

9. Every proprietor or consignee of goods of not less than twenty tons of the same kind, imported into the island for the purpose of re-exportation, shall within twenty-four hours of arrival of the said goods and before they are discharged, deliver to the Supervisor of the Harbour a declaration in writing, under his signature, dated the day of delivery, specifying that the said goods have been imported with the intention of being re-exported, and stating:

The name of the ship which has brought the goods.

The nature, marks and tonnage (weight or measurement according to the tariff) of the goods.

The place where it is intended to keep the goods.

Failing which the said goods shall be deemed to be imported into the island and shall pay according to Section II. of this ordinance without right to reimbursement.

10. Every person re-exporting goods which shall have been imported in accordance with article 9, and who desires to be reimbursed the duty on the said goods, shall deliver at the Supervisor's office, before the said goods are loaded, a solemn declaration made before the Royal Court by two witnesses, stating:

The name of the ship which brought the goods to the island.

The date of the declaration made in accordance with article 9.

The name of the ship upon which the goods have to be loaded and her destination.

The nature, marks and tonnage (by weight or measurement according to the tariff) of the said goods.

And specifying that the said goods are in the same state and in the same packages as they were when imported into the island.

Failing which the duty on the said goods shall not be reimbursed.

11. The words 'Supervisor of the Harbour' employed in this ordinance, will apply as well to the said Supervisor as to the Assistant-Supervisor, the Harbour-Master, the Assistant Harbour-Master and all persons employed in the Supervisor's office for the collection of the revenue of the harbour of St. Peter-Port.

SECTION II.

Tariff of duties on goods imported into the Island.

	Schedule B of 1858. S. D.		Schedule X of 1905. S. D.		Total Duties. S D.	
1. All goods imported into this island, per ton of 2,000 lbs. gross weight.	0	6	1	2	1	8
with the exception of lime-stone and cement, which shall pay nothing.						
And the items, enumerated below, which shall pay as follows:—						
2. Clay, per ton.	0	6		0	6
3. Anthracite coal, per ton.	0	6	0	6	1	0
4. Horses.	2	6	0	6	3	0
5. Bulls, oxen, cows, heifers.	0	6	1	2	1	8
6. Calves under three months and other cattle of any sort.	0	1	0	2½	0	3½
7. Corn, peas, and grain of all sorts, per Imperial quarter.	0	1½		0	1½
8. Corn, peas, and grain of all sorts, per ton.		1	2	1	2
9. Fir or pine wood, according to 'Petersburg standard,' estimated as follows:—						
For wood, in planks, 165 cubic feet.	1	6	3	6	5	0
" in beams, 150 cubic feet.						
" unsquared (round timber), 120 c. ft. }						
10. Oak and joiner's woods, per load of 40 feet.	0	6	1	2	1	8
In all cases the cubic measure of unsquared (round) wood shall be calculated according to the custom of the trade.						
11. Liquids by the tun of 210 gallons, local measure.	0	6	1	2	1	8

N.B.—For liquids in bottles, the tun shall be reckoned at the rate of 36 dozen wine bottles of ordinary size.

All other goods paying freight not according to weight but by measure or by the number of articles to the ton in accordance with trade customs, shall also pay duty in the same manner.

When a cargo contains goods belonging to different individuals who are not associated, the duty shall be calculated separately on the whole of the goods belonging to each individual.

Whenever a fraction of a penny occurs in the calculated amount of duty payable by an individual for his goods, that fraction shall be reckoned as a penny.

In all cases where the amount of duty payable by an individual for his goods shall not amount to one shilling and eight pence, the master of the vessel shall be liable for the payment of the said duty, without prejudice to his right to demand reimbursement from the consignee of the goods.

N.B.—The whole of the duty shall be refunded to the proprietor of any goods (other than cattle) imported with the declared intention of their re-exportation, on condition that such goods be re-exported in the same state and in the same packages as when imported and that they be in quantities of 20 tons at least of the same goods.

When an importer shall declare his goods for exportation, a certificate of the declaration shall be delivered to him, for which he shall pay one shilling, which shilling shall form part of the harbour revenue.

Goods being the produce of the island of Sark, brought to Guernsey, are not liable to duty.

* * * * *

II.—EXTRACT FROM PROVISIONAL ORDINANCE DATED OCTOBER 5, 1903, REGULATING THE COLLECTION OF THE TOBACCO DUTY.

11. There shall be paid to the collector of taxes, both on tobacco and cigars now in this island on which the duty has not been paid, and on tobacco and cigars hereafter introduced into the island:

	£	s.	d.
On all leaf tobacco, unstemmed.	Lb.	0	0 4
On all leaf tobacco, stemmed or manufactured	"	0	0 8
On cigars.	"	0	1 0

III.—ORDER IN COUNCIL OF AUGUST 10, 1903, RESPECTING THE DUTY ON SPIRITUOUS LIQUORS, WINES AND SUGAR.

The states of the island of Guernsey are authorized to increase:

- (1) The duty on spirituous liquors consumed in the island from five shillings to six shillings per gallon for the same period and on the same terms and conditions as were specified in Her late Majesty's Order in Council of the 6th day of September, 1880*;
- (2) The duty on all wines consumed in the island from one shilling to one shilling and sixpence;

and further to authorize the states to levy an impôt or duty not exceeding four shillings currency per hundredweight on all sugar consumed in the island, provided that this duty shall not be levied until the states shall have passed at some future sitting a resolution directing the levying of such duty.

IV.—PROVISIONAL SUPPLEMENTARY ORDINANCE OF AUGUST 22, 1903, RELATIVE TO THE LEVYING OF THE SPIRIT TAX.

1. From and after August 10, 1903, there shall be paid to the collector of taxes, on all spirituous liquors not testing more than 90 degrees in strength a duty at the rate of six shillings sterling per gallon, being an increase of one shilling per gallon on the existing duty, and in the like proportion for spirituous liquors exceeding that strength. Liquors imported after that date shall be delivered to the owners subject to payment of the tax, provided that it will be optional for them, instead of paying said tax and taking possession of their liquors, to deposit same in one of the warehouses of the states with the approval of the tax collector. The storage shall be effected at the expense and risk of such owners and the liquors shall lie at their expense and risk as long as they remain in the warehouses of the states. There shall be paid on cordials a tax of 3 shillings per gallon.

2. There shall be paid to the collector of taxes on all spirituous liquors testing 90 degrees in strength, now belonging to dealers and retailers, a duty at the rate of one shilling per gallon and in the like proportion for liquors of greater or less strength. The said shilling per gallon shall be payable from and after August 10, 1903, provided that the Supervisor of the Harbour is empowered to allow a term of three months for payment of said shilling per gallon, on receiving proper and sufficient bond; and in case of re-exportation within the above-named period of three months, the refunds shall be credited to the owner.

* All beer imported into the island is subject to a duty of 2d. per gallon.

3. Refunds of the tax in accordance with article 3 of Ordinance dated October 28, 1899, shall be effected from and after August 10, 1903, at the rate of six shillings per gallon on spirituous liquors testing 90 degrees in strength, and in the like proportion for liquors of greater or less strength. As to cordials, the refund shall be made at the rate of three shillings per gallon.

V.—ORDER IN COUNCIL OF NOVEMBER 14, 1904, RATIFYING THE LAW RELATING TO THE SALE
OF TOBACCO.

.
Under this Order in Council it is provided *inter alia* that the importation into the island of stem tobacco without leaf, unless the same has first been denatured, shall be prohibited under a penalty not exceeding £50.

TARIFF CHANGES.

BAHAMAS.

THE TARIFF AMENDEMENT (BREED IMPROVEMENT) ACT, 1905.

(Assented to April 18, 1905.)

Notwithstanding anything contained in the Tariff Acts, 1895 to 1900, all stallions, bulls, rams and poultry shall be hereafter exempted from duty under the said Acts and shall be included and read in the Table of Exemptions set out in the Tariff Act, 1895.

BRITISH CENTRAL AFRICA.

I.—CONVENTION BETWEEN THE UNITED KINGDOM AND FRANCE RESPECTING COMMERCIAL RELATIONS BETWEEN THE BRITISH PROTECTORATES OF EAST AFRICA, CENTRAL AFRICA AND UGANDA, AND FRANCE.

(Signed at London, February 23, 1903,—Ratifications exchanged at London, March 27, 1905.)

ART. 1.—The following colonial products: Coffee, cocoa, pepper, pimento, amomums and cardamoms, cinnamon, cassia lignea, nutmegs, mace, cloves, vanilla, and tea, produce of the said British Protectorates, (*i.e.*, *East Africa, Central Africa, and Uganda*) shall enjoy, on importation into France, Algeria, French Colonies and possessions, and the Protectorates of Indo-China and Tunis, the lowest customs duties applicable to similar products of any other foreign origin.

ART. 2.—Reciprocally, the natural and manufactured products of France, Algeria, French Colonies and possessions, and the Protectorates of Indo-China and Tunis, shall enjoy, without restriction or reserve, on importation into the said British Protectorates, the lowest customs duties applicable to similar products of other foreign origin.

ART. 3.—The certificates of origin which may be required for the admission of goods to the preferential conditions stipulated in the present convention shall be *visé* by French Consuls and by British Consuls without levying consular fees.

ART. 4.—The present convention shall be ratified by the two governments as soon as possible, and the ratifications shall be exchanged at London. It shall come into effect immediately after the exchange of ratifications, and shall remain in force until the expiration of a year from the day on which one of the High Contracting Parties shall have announced the intention of terminating it.

II.—ORDINANCE NO. 6 OF DECEMBER 31, 1904, RELATING TO DISTILLED AND ALCOHOLIC LIQUORS.

(*The British Central Africa Gazette of December 31, 1904.*)

1. This ordinance may be cited as 'The British Central Africa Liquor Ordinance, 1904.'

2. From and after the date hereof, no distilled or alcoholic liquors shall be imported into, or sold, or dealt in within the protectorate otherwise than in accordance with this ordinance.

3. Distilled or alcoholic liquors may be admitted for the use of the non-native population only.

4. No person shall import distilled or alcoholic liquors into the protectorate for the purposes of sale without a license.

5. (1) Licenses to import distilled or alcoholic liquors into the protectorate for sale may be granted by the commissioner upon such terms and conditions as he may from time to time, by rules or otherwise, prescribe, provided that the fee for such license for the period of one year shall not exceed £100.

(2) Every application for such license shall be in writing, and shall specify the maximum quantity intended to be imported under such license.

(3) A license may be refused at the discretion of the commissioner without cause assigned.

6. Distilled and alcoholic liquors may be imported into the protectorate without license for the purpose of being consumed by the importer; but in the event of any question being raised as to the character of any importation of such liquors, it shall be deemed to be an importation for the purposes of sale unless and until the contrary is proved.

7. From and after the date of this ordinance, a duty at the rate of 12s. per gallon proof spirit as ascertained by the Sykes hydrometer, and so in proportion for any greater or less degree of strength, or any greater or less quantity, shall be paid on all distilled liquors which are imported for sale, consumption, or use in the protectorate.

Provided that all such liquors consigned to importers in the protectorate, and actually in transit at the date of this ordinance coming into force, shall be admitted at the rates and in the manner previously existing.

8. The duty upon wines, beers and other fermented alcoholic liquors, shall be payable at the rate of 10 per cent *ad valorem*.

9. (1) The commissioner may make rules for the bonding of any distilled or alcoholic liquors, and for the testing of any distilled liquors imported into the protectorate.

(2) No liquor shall be removed from bond without the permit of the commissioner or of a customs officer by him thereto duly authorized.

.

III.—ORDINANCE NO. 3, OF MARCH 31, 1905, FURTHER RELATING TO DISTILLED AND ALCOHOLIC LIQUORS.

(*The British Central Africa Gazette of March 31, 1905.*)

1. This ordinance may be cited as 'The British Central Africa Liquor (Amending) Ordinance, 1905.'

2. From and after the date hereof the duty payable under 'The British Central Africa Liquor Ordinance, 1904'* on all distilled liquors which are imported for sale, consumption or use in the protectorate, shall be at the rate of fifteen shillings per gallon proof spirit as ascertained by the Sykes hydrometer, and so in proportion for any greater or less degree of strength, or any greater or less quantity, instead of at the rate of twelve shillings as provided by section 7 of the said ordinance.

* See Ch. II. above.

BRITISH EAST AFRICA PROTECTORATE.

CONVENTION BETWEEN THE UNITED KINGDOM AND FRANCE RESPECTING COMMERCIAL RELATIONS BETWEEN THE BRITISH PROTECTORATES OF EAST AFRICA, CENTRAL AFRICA, AND UGANDA, AND FRANCE.

(Signed at London, February 23, 1903.—Ratifications exchanged at London, March 27, 1905.)

ART. 1.—The following colonial products: coffee, cocoa, pepper, pimento, amomums and cardamoms, cinnamon, cassia lignea, nutmegs, mace, cloves, vanilla and tea, produce of the said British Protectorates (*i.e.*, *East Africa, Central Africa, and Uganda*) shall enjoy, on importation into France, Algeria, French Colonies and possessions, and the Protectorates of Indo-China and Tunis the lowest customs duties applicable to similar products of any other foreign origin.

ART. 2.—Reciprocally, the natural and manufactured products of France, Algeria, French Colonies and possessions, and the Protectorate of Indo-China, Tunis, shall enjoy, without restriction or reserve, on importation into the said British Protectorates, the lowest customs duties applicable to similar products of other foreign origin.

ART. 3.—The certificates of origin which may be required for the admission of goods to the preferential conditions stipulated in the present convention shall be *visé* by French Consuls and by British Consuls without levying consular fees.

ART. 4.—The present convention shall be ratified by the two governments as soon as possible, and the ratifications shall be exchanged at London. It shall come into effect immediately after the exchange of ratifications, and shall remain in force until the expiration of a year from the day on which one of the High Contracting Parties shall have announced the intention of terminating it.

CEYLON.

I.—CONVENTION BETWEEN THE UNITED KINGDOM AND FRANCE RESPECTING COMMERCIAL RELATIONS BETWEEN CEYLON AND FRANCE.

(Signed at London, February 9, 1903.—Ratifications exchanged at London, March 27, 1905.)

ART. 1.—The following colonial products: coffee, cocoa, pepper, pimento, amomums and cardamoms, cinnamon, cassia lignea, nutmegs, mace, cloves, vanilla and tea, produce of the island of Ceylon, shall enjoy, on importation into France, Algeria, French colonies and possessions, and the Protectorates of Indo-China and Tunis, the lowest customs duties applicable to similar products of any other foreign origin.

ART. 2.—Reciprocally, the natural and manufactured products of France, Algeria, French colonies and possessions, and the Protectorates of Indo-China and Tunis, shall enjoy, without restriction or reserve, on importation into the island of Ceylon, the lowest customs duties applicable to similar products of other foreign origin.

Further, the duties on vinegar in casks and copperas produced in France, Algeria, French colonies and possessions, and the Protectorates of Indo-China and Tunis, and imported into Ceylon, shall be reduced by 50 per cent.

ART. 3.—The certificates of origin which may be required for the admission of goods to the preferential conditions stipulated in the present treaty shall be *visé* by French Consuls and by British Consuls without levying consular fees.

ART. 4.—The present convention shall be ratified by the two governments as soon as possible, and the ratifications shall be exchanged at London. It shall come into effect immediately after the exchange of ratifications, and shall remain in force until the expiration of a year from the day on which one of the High Contracting Parties shall have announced the intention of terminating it.

II.—REDUCTION OF CUSTOMS DUTIES ON CERTAIN GOODS.

(*'Ceylon Government Gazette,' No. 5924, of May 29, 1903.*)

It is hereby notified that the Governor in Council, in exercise of the powers vested in him by subsection (a) of section 2 of Ordinance No. 2 of 1903, has exempted, as from the 1st day of June, 1903, the following goods, namely:—

(1) Vinegar in casks, and

(2) Green copperas.

from 50 per cent of the customs duty now leviable upon their importation into the island.

UGANDA PROTECTORATE.

CONVENTION BETWEEN THE UNITED KINGDOM AND FRANCE RESPECTING COMMERCIAL RELATIONS BETWEEN THE BRITISH PROTECTORATES OF EAST AFRICA, CENTRAL AFRICA, AND UGANDA, AND FRANCE.

(*Signed at London, February 23, 1903.—Ratifications exchanged at London, March 27, 1905.*)

ART. 1.—The following colonial products: coffee, cocoa, pepper, pimento, amomums and cardamoms, cinnamon, cassia lignea, nutmegs, mace, cloves, vanilla and tea, produce of the said British Protectorates (*i.e., East Africa, Central Africa and Uganda*) shall enjoy, on importation into France, Algeria, French colonies and possessions, and the Protectorates of Indo-China and Tunis, the lowest customs duties applicable to similar products of any other foreign origin.

ART. 2.—Reciprocally, the natural and manufactured products of France, Algeria, French colonies and possessions, and the Protectorates of Indo-China and Tunis, shall enjoy without restriction or reserve, on importation into the said British Protectorates, the lowest customs duties applicable to similar products of other foreign origin.

ART. 3.—The certificates of origin which may be required for the admission of goods to the preferential conditions stipulated in the present convention shall be *visé* by French Consuls and by British Consuls without levying consular fees.

ART. 4.—The present convention shall be ratified by the two governments as soon as possible, and the ratifications shall be exchanged at London. It shall come into effect immediately after the exchange of ratifications, and shall remain in force until the expiration of a year from the day on which one of the High Contracting Parties shall have announced the intention of terminating it.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian Agents will furnish commercial information to those interested as to local trade requirements in the districts they represent.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., September 30, 1905.

ANNUAL REPORT OF LABOUR DEPARTMENT.

The annual report of the Labour Department of the Board of Trade is before me, which contains information regarding changes in rates of wages and hours of labour in the United Kingdom during the year 1904, together with comparative statistics from 1895 to 1903. As some of the facts and figures contained therein may be of interest in Canada, I reproduce the following extracts:—

INDUSTRIES AFFECTED.

'The decline in wages which characterized the years 1901-3 continued in 1904. The industries principally affected were coal mining, iron mining, iron and steel manufacture, shipbuilding, glass bottle making and building. In the other trades covered the changes on the whole were unimportant. The net fall in the building trades is the first which has taken place since these changes were first recorded in 1893.'

AMOUNTS OF VARIATIONS.

'So far as could be ascertained by the department, nearly 801,000 workpeople had their rates of wages changed during the year. Of these, nearly 785,000 sustained decreases amounting to about £40,400 (\$196,596.50) per week, while about 16,000 obtained advances amounting to about £1,200 (\$5,839.50) per week. The net result of all the changes was a decrease, therefore, of about £39,200 (\$190,757.25) per week.'

NUMBERS AFFECTED.

'In the following table the total number of workpeople affected by changes in rates of wages, and the total computed weekly amount of such changes, distinguishing net increases from net decreases, are shown for each of the years 1895-1904:—

Year.	Net increases.		Net Decreases.		Total.	
	Workpeople affected.	Total weekly amount.	Workpeople affected.	Total weekly amount.	Workpeople affected.*	Net increase (+) or decrease (-) as compared with each preceding year.
		£		£		£
1895.....	80,107	6,159	349,645	34,284	434,708	— 28,125
1896.....	379,975	33,648	167,357	7,129	605,404	+ 26,519
1897.....	560,707	32,861	13,855	1,354	597,444	+ 31,507
1898.....	1,000,240	81,500	11,865	787	1,012,119	+ 80,713
1899.....	1,170,937	90,418	1,132	104	1,172,069	+ 90,314
1900.....	1,108,284	211,412	23,010	2,822	1,132,386	+ 208,590
1901.....	429,715	40,790	489,318	117,377	928,926	— 76,587
1902.....	91,812	5,326	789,891	77,921	887,206	— 72,595
1903.....	21,327	1,541	874,721	39,868	896,598	— 38,327
1904.....	16,054	1,202	784,604	40,432	800,658	— 39,230

*Including workpeople affected by changes during the year, but whose wages stood at the same level at the end as at the beginning.'

'The number whose wage-changes resulted in net decreases in 1904 was smaller than in either of the years 1903 and 1902, though larger than in any of the years 1895-1901, while the number of workpeople who obtained net increases in 1904 was smaller than in any of the previous years included in the table. Of the years under review, 1895 and 1901-04 were years of falling wages, while in the other years net increases were recorded. The aggregate of these increases was considerably greater than that of the decreases, the net amount of increases being approximately £182,800 per week.'

THE COAL INDUSTRY PREDOMINANT.

'The changes in the coal mining industry were the predominant factor in the changes of each year. Thus, of the total number of workpeople affected in 1904, 82 per cent, were coal miners. In 1903 the proportion was 84 per cent, in 1902, 83 per cent, and in 1901, 76 per cent. In this industry the decrease in weekly wages in 1904 was about the same as in 1903, but only about one-half of that in 1902 and 1901. The number affected was less, no changes having taken place in Scotland during 1904, whereas in the three preceding years practically every coal field was affected.'

THE PLUM CROP.

It is now reported that plums are considerably more plentiful than earlier estimates indicated. In fact, it is stated, that plums have been 'found' or 'discovered' where they had not been previously reported as abundant or even satisfactory. This phenomenon of the 'finding' of fruit is not unfamiliar in connection with the Canadian and American apple trades, but it is well to mention it, so that any who have been figuring on an unusual shortage should make quite sure of the condition of the market before undertaking any serious enterprises in connection with plum pulp.

RATES ON APPLES.

The following are the charges on apples consigned from Montreal to Birmingham via Avonmouth:—

	Per barrel.	
	s.	d.
Ocean freight.	2	6
Dock dues		1 $\frac{3}{4}$
Quay rate.		1 $\frac{1}{2}$
Railway rate.		10 $\frac{1}{2}$
Total charges.	3	7 $\frac{3}{4}$

I am credibly informed that the total charges for the same service on fruit shipped via Liverpool amount to 4s. 0 $\frac{1}{2}$ d., a difference of over 4d. (8 cents) per barrel in favour of the Avonmouth route. This difference is chiefly due to the cheaper railway rate from Bristol to Birmingham, 10 $\frac{1}{2}$ d. (21 cents), as compared with 1s. 3d. (30 cents) from Liverpool.

BRISTOL GARDEN SUBURBS.

A plan which has been agitated for some time has now taken definite shape in the formation of a local syndicate for the purpose of providing simple, healthful and attractive suburban residences at reasonable terms.

THE PRESENT OBJECTIONABLE CONDITIONS.

Serious and unhealthful overcrowding in the residential parts of Bristol, as in other cities, has resulted from the operations of speculative builders, whose object has

been to secure as many house-rents as possible from a minimum of land, entailing upon them a minimum of ground-rent. Rows and rows of houses have accordingly been built with little more ground than that which the buildings themselves occupy.

AN IDEAL SUBURB.

The present syndicate has secured options on land adjoining one of the most accessible suburban railway stations, which land it proposes to cut up into building lots of not less than one-eighth of an acre. In no case are there to be more than eight houses to the acre, and in some there will be only three or four. Aid will be afforded purchasers in building their houses, and the plan is to be financed with a view to very small profits for members of the syndicate—the real object being to enable persons of moderate means to have a fair amount of fresh air, and a small garden of their own, while still remaining within easy reach of their place of business.

SUCCESSFUL PRECEDENTS.

It may be mentioned that in Birmingham and elsewhere, usually under the patronage of some wealthy citizen, similar schemes have been carried out with marked success.

W. A. MacKINNON.

SOUTH AFRICA.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, September 11, 1905.
P.O. Box 1232.

CATTLE, HORSES AND SWINE.

South Africa offers a market for cattle, horses and swine worthy of more attention from Canadian breeders and shippers than it has in the past received, but it is the general opinion that the present market has little or no use for animals of poor quality.

IMPORTS DURING 1904.

The following figures show the total South African imports of horses, cattle and swine during the year 1904:—

	Bulls and Oxen.		Cows and Calves.		Horses.		Swine.	
	No.	Value.	No.	Value.	No.	Value.	No.	Value.
		£		£		£		£
Cape Colony....	1,194	22,248	660	11,250	6,122	131,856	49	311
Natal.....	29	1,163	232	3,698	961	12,432	66	588
Total.....	1,223	23,411	892	14,948	7,083	144,288	115	899
					Animals.	Value.		
Grand total.....					9,313	\$892,942 00		

DEMAND FOR CATTLE.

Different localities have different demands for cattle. Cape Town, for instance, is a likely point for good quality milch cows of any mixed breed, and in addition the Holstein variety is a strong favourite with the Dutch agricultural community. Port Elizabeth and East London, on the other hand, having a leaning towards the Ayrshire and Shorthorn breeds.

HORSES.

At the moment the only demand for horses is at Cape Town for well matched pairs of carriage horses of good action and appearance, but not necessarily thoroughbred, at present this class of horse is somewhat scarce, and pairs having the above qualifications would probably fetch from \$750 to \$1,000.

SWINE.

Swine fever has been rather prevalent lately, and has somewhat lessened the number of swine in the colony, and there exists an opening for pedigreed stock for breeding purposes of the Berkshire, Yorkshire and Tamworth varieties. The most favourable locality for the sale of such is Port Elizabeth, as the local regulations regarding the handling of swine are less stringent there than at other ports.

SHEEP.

The only demand for sheep is of the Merino variety.

AGRICULTURAL SHOWS.

The two principal South African agricultural shows are held annually in Rosebank (near Cape Town) and Port Elizabeth during the first week in February and April respectively. I would suggest that it would probably prove advantageous to Canadian shippers if they were to exhibit stock intended for sale at these shows.

CATALOGUES.

Canadian manufacturers are requested to keep this office better supplied with catalogues and price lists.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,

BIRMINGHAM, ENG., October 4, 1905.

BUTTER CONTROL IN HOLLAND.

In the 'Times' of October 2, a special article is published on 'Butter Control in Holland,' which should be of great interest to Canadian dairymen. The writer says:

'Holland is one of the many countries, European and other, which export dairy produce to Great Britain. About a quarter of a century has passed away since the dairy farmers of the Netherlands, recognizing the necessity of keeping abreast of modern developments, decided upon a profound change, namely, the transfer of the butter-making industry from the farm to the factory. The effect was that, instead of butter, and cheese as well, being separately made at all of the individual dairy farms, the milk was transferred to a central place or factory, and there utilized for the making of butter, or cheese as the case may be. Uniformity of quality, a most important market consideration, was thereby secured. It was in the year 1879, and at Leyden, that the first dairy factory was established, and soon after that another was erected at Delft. In Friesland the first butter factory was opened in 1882, and was speedily followed by two larger factories, and later by a number of others. The success in Friesland was such that, in the course of a few years, similar factories became quite common in other provinces of Holland. By the beginning of last year the Netherlands possessed nearly a thousand butter factories, with an annual output exceeding thirty million kilos of butter.

'GOVERNMENT AID.

'The transfer of the industry of making butter from the farm to the factory led to a marked improvement in the quality of Dutch butter; but the matter was not allowed to rest there, for the government rendered assistance and saw that all instruction and information should be forthcoming.

'FRESH BUTTER AND SALT BUTTER EXPORTED.

'Both fresh butter and salt butter are exported from Holland. France and Belgium take almost exclusively fresh, Germany chiefly fresh, but Great Britain receives principally salt butter. The Friesland butter comes mostly to England. It should be noted that, notwithstanding the growing increase in the number of butter factories, a considerable quantity is still made on the farms. It may be said that, at a rough computation, for every 15 kilos of butter in the factory, 13 kilos are made on the farm.

'CLEANLINESS AND NON-ADULTERATION.

'The virtue of cleanliness, for which the Dutch people are so deservedly famed, is nowhere better exemplified than in their butter factories, and the success of these must be largely attributed to this circumstance. To produce a pure article, however, is one thing; to ensure it against adulteration is another. The latter point has not been lost sight of; for the first Butter Act of the Netherlands was passed in 1889 and

was rendered more stringent in the following year. Infringements of the Act are punishable by imprisonment for a period not exceeding three months, or a fine of 300 guilders; also by imprisonment not exceeding six months, or a fine of 600 guilders. If the infringement relates to goods intended for export to other countries, the penalty is doubled.

' A RIGID INSPECTION.

'To enforce the provisions of this Act a separate service has been brought into operation, comprising an inspector and a number of visiting inspectors. Samples taken by these officials, or by the police, of any article resembling butter, and not marked according to law, are examined by qualified analysts. These examinations used to take place at the government experimental stations; but, by a Royal decree of February, 1903, the work was transferred to a government dairy station, for the establishment of which at Leyden the same decree made provision. This dairy station acts for the whole of Holland. It exercises supervision over all the stations known as "butter control" stations, which have been established by agricultural societies and dairy associations. They are partly under the supervision of non-interested persons, including usually members of the provincial governments; the first was that of the Friesland Agricultural Society. The control stations now open, and acting for their respective provinces, are at Leyden, Deventer, Leeuwarden, Assen, Groningen, Eindhoven, Maastricht and Goes. The director of each station is a chemist, and he is assisted by a staff of analysts. Inspectors, who are instructed by the director, travel about to take samples of butter in factories and other places in which butter is made, as well as in the shops or sale-rooms of factories, and of persons who have submitted to the control. The inspector is also empowered to take samples of butter made in his presence in factories or elsewhere. By comparing the analyses of different samples taken from the same factory any fraud, however small, is liable to discovery. Moreover, sustained and stringent supervision is exercised in order to make sure that in the factories no fats are stored which might serve for the adulteration of butter.

' GOVERNMENT CONTROL GIVES BUTTER AN OFFICIAL CHARACTER.

'The Netherlands government, appreciating the high importance of these control stations, in connection with the reputation of Dutch butter on the markets of the world, has given them an official character and rendered them financial assistance under such conditions as may be imposed. Butter that has been produced under control, and the genuine character of which is beyond doubt, is entitled to bear a mark of guarantee to this effect. This mark is the same for every control station under government supervision. It consists of the arms of the Netherlands, with the printed word "Nederlandsche" above, and the word "Botercontrole" (butter control) below; also, lower down, in smaller characters, "onder Rijkstoezicht" (under government supervision). By the side of this mark some further indication has to be made in writing of the control station concerned, and of the factory or place where the butter was made. This is all on white tissue paper, with the arms and printed characters in pale blue. The label is laid upon the substance of the butter, and is so impressed that it cannot be removed without tearing, when it is valueless. As performed at the control stations, the process of labelling is seen to be at once a clean and dainty operation, besides being ingenious. In whatever country butter thus labelled is found, it carries with it the guarantee of the Netherlands government as to its purity. If, moreover, any inquiry should be deemed necessary, it is possible by means of details given on the label to trace the butter back to where it was made.

' HOLLAND'S BUTTER EXPORTS TO UNITED KINGDOM.

'The competition amongst butter-exporting countries is severe, and the system of control adopted by the Netherlands government is directed to the object of advancing the reputation of Dutch butter in foreign markets. So far as the United Kingdom

is concerned, it may be stated that we receive annually from Holland upwards of 300,000 cwt. of butter, the average of the five years, 1900 to 1904, working out at 314,200 cwt. The average annual value is about £1,570,000, so that the trade in butter between the Netherlands and the United Kingdom represents one and a-half million pounds sterling per annum.'

P. B. BALL.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, October 4, 1905.

NEW CUSTOMS TARIFF FOR NORWAY.

I give below a list of the previous and present customs duty on some articles, particularly of interest to Canadian exporters:—

Articles.	Previous Duty.	Present Duty.
Corned beef, including boxes..... per kilo.	5·33 cents.	8·00 cents.
Extract of beef, including jars..... "	10 67 "	13·33 "
Beef, smoked..... "	8·00 "	10·67 "
Beef, not smoked..... "	5·33 "	8·00 "
Hams, smoked..... "	8·00 "	10·67 "
Hams, not smoked..... "	5·33 "	8·00 "
Mess pork and dry salty pork..... "	2·67 "	4·00 "
Oats, whole..... per 100 kilo.	Free.	10·67 "
Oats, cut or rolled..... "	16·00 "	26·67 "
Pearl barley..... "	13·33 "	16·00 "
Rye flour..... "	8·00 "	13·33 "
Starch and potato flour..... per kilo.	2·67 "	3·47 "
Motors of all kinds..... ad. val.	5 p.c.	10·00 "
Machinery for industrial, technical or farm use..... "	Free.	10 p.c. ad. val.
Automobiles..... per kilo.	4·00 "	12 "

FURTHER INCREASE IN NORWEGIAN TARIFF.

At a special meeting of the Norwegian Storting (parliament) on September 29, the duty was increased on the following articles:—

Articles.	Previous Duty.	Present Duty.
Cocoa, powdery, sweetened, cocoa-pulp in cakes, blocks, &c., and chocolate, all including nearest packing..... per kilo.	12·08 cents.	14·67 cents.
Milk, condensed..... "	3 30 "	4·27 "
Sugar, all kinds..... "	5·33 "	8·00 "
Candies, all kinds..... "	13·33 "	14·67 "

The above change takes effect immediately (although subject to a final decision), but it is considered that the new rates of duty will come into force unaltered. Such

sudden changes without previous discussion are made in order to prevent the importers from speculating in the higher rates.

NICKEL.

From a recent issue of the 'Canadian Grocer' I note, it is suggested, that Canada should adopt pure nickel as a coin metal. This brought me to think that possibly in a near future both Norway and Sweden will be issuing new coins, on which the Canadian nickel companies ought to have their attention in time. So far in the Scandinavian countries nickel has not been used for coin, but as the advantage is apparent, it might be considered, and if interested parties in Canada will correspond with me, I shall be pleased to be of service to them in case there should be question about introducing nickel coin here.

PATENT FERTILIZER.

A Norwegian manufacturer of a patent fertilizer for nursery and house plants desires to enter into connection with a firm in Canada that might be willing to take up the handling of this article for Canada.

The patent consists in the fertilizer being made into small sticks, which are to be put into the earth in the flower-pots. The sticks are slowly absorbed by the earth, thereby fertilizing the same, the advantage being that it is not necessary to dissolve the fertilizer in water.

C. E. SONTUM.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kiltson.*)

RHODES BUILDING, CAPE TOWN, September 15, 1905.
P. O. Box 1232.

DEMAND FOR RAILWAY TIES.

The Cape Colony and the Natal governments annually import very large numbers of ties or sleepers for use on their respective railway systems; these ties of two distinct varieties, the hardwood variety. and the soft, the former are at present supplied by Australia and Java, the latter come from Baltic ports. Canada is not considered able to supply the former, but should be in a position to successfully compete for the supply of the soft wood variety.

MEASUREMENTS.

The Natal government requires soft wood ties or sleepers measuring 7 feet 3 inches x 9 inches x 4½ inches; the Cape government on the other hand requires a measurement of 7 feet x 10 inches x 5 inches.

CREOSOTING PROCESS.

Both the Natal and Cape Colony governments require all ties and sleepers of the soft wood variety to be thoroughly treated by creosote by suppliers previous to shipment.

PRESENT QUOTATION OF BALTIC SUPPLIERS.

Baltic suppliers of soft wood (pine) ties or sleepers measuring 7 feet 3 inches x 9 inches x $4\frac{1}{2}$ inches creosoted are at present quoting 3s. 9d. (90 cents) per tie c.i.f., Natal, per sailer.

NAMES AND ADDRESSES OF BUYERS' AGENTS.

Canadian lumber firms desiring to tender for the supply of ties to the governments of Cape Colony and Natal are advised to communicate with the London, Eng., Agents General of the above colonies, who are purchasing agents for this article, namely:—

T. E. Fuller, Esq., Agent General for Cape Colony, Victoria street, S.W. London, England.

Sir Wm. Arbuckle, Agent General for Natal, Victoria street, S.W. London, England.

PIANOS AND ORGANS.

In answer to a recent inquiry as to the possibility of working up a trade in South Africa in Canadian pianos and organs, I wish to advise that at the moment business in these articles is in a decidedly quiet condition, especially so in the cases of pianos.

PIANOS.

The bulk of the demand is for a cheap, showy upright piano fitted with two candle holders and imitation ivory keys. German manufacturers turn out an instrument embodying the above characteristics, which they quote at £17 (\$82.73) f.o.b., Hamburg; this article the retailers sell locally at £45 (\$219). The largest Cape Town importer of pianos states that the ordinary Canadian article was much too good an instrument for the South African market, and consequently too high a price.

PACKING.

All pianos for shipment to South Africa should be packed in tin lined cases.

REED ORGANS.

Canadian manufacturers of reed organs will find their closest competitors in the United States manufacturers, the latter are making a reed organ for school purposes at the low figure of £7 (\$34.07), and make better qualities for use in private houses at prices ranging from £9 (\$43.80) to £50 (\$243.33) f.o.b., New York.

GERMAN PAPER.

Canadian paper manufacturers are advised that continental paper for wrapping and printing purposes, is obtaining an increasing foothold in the South African market, principally through aggressive business tactics.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., October 11, 1905.

BRADFORD TRADE.

The increase in the value of Bradford's exports to the United States during the first nine months of the year amounts to no less a sum than \$5,900,000. Although the greatest contributor to this enhancement is raw wool, yet the details show there has been a very much larger business done in exports which have found employment for machinery in the Bradford district.

The increase of \$1,483,060 in stuff dress goods speaks volumes for the ability and enterprise of the manufacturers in that district. The following table shows the principal articles of export during the nine months, as well as the aggregation of all articles for the same period:—

Articles.	1905.	1904.	Increase.	Decrease.
	\$	\$	\$	\$
Wool	4,691,230	2,448,375	2,248,350	
Sheep skins	529,035	198,875	330,155	
Silk noils, &c.	60,205	74,085		13,880
Noils	16,040	2,465	13,575	
Alpaca hair	22,955	46,600		23,605
Stuffs—				
Dress goods	3,502,905	2,019,845	1,483,060	
Linings	1,078,525	778,480	300,045	
Cotton cloths—				
Dress goods	225,180	213,370	12,810	
Linings	2,665,590	1,177,470	1,488,120	
Worsted coatings	205,160	227,755		22,595
Woollen cloths	29,500	20,810	8,690	
Silk goods—				
Silk and silk and cotton piece goods	14,930	24,655		9,720
Plushes, &c.	10,060	24,115		14,050
Yarns—				
Cotton	194,520	131,580	62,935	
Silk	249,860	133,545	116,315	
Carpets and rugs	68,420	61,455	6,965	
Jute and linens	11,360	8,840	2,835	
Worsted and mohair	15,890	18,350		2,460
Machinery	308,590	262,030		46,560

The total for the first nine months of this year being \$14,286,380, is \$5,902,050 in excess of the value exported from Bradford district to the United States in any corresponding period under the Dingley tariff, and is far above the volume of business done, whilst the McKinley tariff was in operation, 1891 to 1894. The largest volume of business in nine months during those years under the McKinley tariff was done in 1892—\$10,269,570. The smallest in 1894—\$4,610,945.

BRADFORD EXPORTS TO UNITED STATES.

The following is the statement showing the value of the declared exports to the United States from Bradford district for the month of September, 1905:—

Articles.	Sept. 1905.	Sept. 1904.
	\$	\$
Cotton goods—		
Dress goods.....	26,875	20,705
Linings.....	433,600	133,420
Stuffs—		
Dress goods.....	295,220	204,565
Linings.....	163,805	101,285
Wool.....	358,200	333,635
Sheep skins.....	75,305	23,365
Yarns—		
Cotton.....	28,845	10,140
Silk.....	17,215	14,635
Worsted and mohair.....	2,965	805
Jute and linen.....	2,975	2,085
Worsted coatings.....	38,760	10,215
Machinery.....	30,555	53,715
Leather—		
Hides.....	10,685	6,005
Belting.....	1,405	
Iron, steel, &c.—		
Wire.....	9,620	14,555
Bar.....		205
Carpet and rugs.....	9,460	5,960
Wool waste.....	8,010	135
Card clothing.....	3,840	6,560
Silk noils and waste.....	3,410	10,730
Woollen cloths.....	3,130	2,170
Cow and goat hair.....	2,165	
Silk goods—		
Silk and silk and cotton piece goods.....	1,300	405
Silk seals, plushes, &c.....	530	1,400
Paper.....	1,770	2,145
Rags.....	1,320	
Tape, braid, &c.....	730	905
Linens.....	570	
Mohair, goat's hair.....	485	
Household effects.....	475	150
Miscellaneous.....	305	1,480
Cotton waste.....	390	
Spindle bands.....	345	295
Chemicals.....	200	
Confectionery.....		1,810
Stone.....		710
Grease, &c.....		675
Noils.....		625
Hemp bagging.....		470
Cotton.....		285
Clocks.....		65

This shows an increase during September, 1905, over September, 1904, of about \$568,155.

LEEDS MEAT SUPPLY.

About 5,500 beeves, sheep, calves, lambs, and pigs are slaughtered in Leeds every week, for home consumption, weighing in the neighbourhood of 800,000 pounds.

In addition to this, about 180,000 pounds of imported meats is sold here every week.

The consensus of opinion among the members of the meat trade here is that the people of Leeds are not the large meat-eaters they used to be. The quantity of beef and mutton consumed per head of the population is considerably less than it was formerly, and it is said that the cheapening of fish, rabbits and game during recent years, together with an increased supply, is responsible for this change.

An increase of one cent per pound on the price of meat would cost the meat-eating population of Leeds about \$500,000 per year.

The following is a very fair estimate of the provisions imported into and consumed in Leeds weekly: 150,000 eggs, 125,000 pounds of butter, 400,000 pounds bacon, shoulders and hams, 100,000 pounds cheese, 112,000 pounds lard, 12,000 pounds margarine.

CATTLE EMBARGO.

The following extract from the *Leeds Mercury* of October 11, 1905, voices the prevailing opinion here on this much-vexed subject :—

‘Whilst the government regards the depressed state of agriculture as influenced by the restrictions regarding the importation of Canadian live stock with equanimity, the farmer must of necessity survey the future with feelings of the profoundest misapprehension.

‘A well-known Otley agriculturist with whom I had a chat the other day on this point, was most bitter in his expressions of disgust—crusted, honest, old Tory that he is—at the toleration by small farmers of the present state of affairs. “Look,” he said, “at our exportation laws regarding cattle. The foreigner comes over here and buys the best breeding animal in the country. Naturally, he won’t trouble to look at anything that is not sound, and the result is that slowly but surely we are accumulating what in a few years will be nothing but a collection of ‘crooks.’ Why does the government refuse to allow us to import fresh blood? Surely any man can see the reasonableness, as well as the necessity, of the demand for ‘raw material.’”

‘In brief, the conclusions advanced by my informant were that the present embargo was not only decreasing agricultural employment, but turning land out of cultivation. So much for some of the disabilities under which the farmer suffers.

BRITISH RETURNS FOR SEPTEMBER.

The monthly statistics issued by the Board of Trade, shows that the imports into the United Kingdom for the month of September, were of the value of \$238,663,240, an increase over the corresponding period of last year of \$13,301,210, or 6·17 per cent.

The exports for the same period were valued \$146,752,300, being \$17,109,005, or 13·19 per cent more than September, 1904.

The total amount paid for wheat was \$16,730,000, of which Argentina received \$5,664,500, as against \$2,970,000 in September, 1904.

The total amount of wheat received from Argentina since January 1, 1905, is \$36,645,000; from India, \$35,013,500; from Russia, \$34,650,000, and from the United States, \$6,640,000.

WOOL.

The total amount of wool imported from Australia since January 1, 1905, is 183,700,288 pounds, and from New Zealand, 133,360,000 pounds, and the total amount exported to Canada during the same period is 956,100 pounds, and to the United States, 17,796,100 pounds.

WOOLLEN TISSUES AND WORSTEDS.

Six million one hundred and fifty-five thousand two hundred yards of woollen tissues were exported to Canada during the same period, as against 6,106,500 yards in 1904, and 4,232,400 yards in 1903. Eight million three hundred thousand yards of worsteds, as compared with 9,538,000 yards in 1904, and 9,705,800 in 1893.

JNO. B. JACKSON.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

*(Mr. C. M. Kittson.)*RHODES BUILDING, CAPE TOWN, September 26, 1905.
P.O. Box 1232.

GOODS ON CONSIGNMENT.

Canadian exporters are advised that in most cases, shipping goods on consignment is a mode of doing business that is both dangerous and unsatisfactory—to the shipper, who, assumes all the risk of transportation and markets, and as some recent cases have demonstrated, realizes at a loss of 50 per cent or more.

HANDLES FOR PICK-AXES, ETC.

An opening exists for supplying the trade with hickory or other suitable hard wood handles for pick-axes, hatchets and hammers. United States manufacturers at present supply this demand.

ARTICLES WHICH CANADA MIGHT SUPPLY.

Among the many articles imported by the various South African colonies, the following are called to the notice of Canadian manufacturers as being suitable for their attention: Doors, windows and sashes, shutters, wood butter boats, chair seats (round and square), wood mantel pieces (ornamented hard wood), brooms (cheap quality), washboards (all wood), wagon spokes, wheelbarrows (all wood, and wood and iron), sole leather, horse and mule shoes (machine made), park seats (wood and iron), wire netting and fencing material.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. Ball.)*39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., October 7, 1905.

SCIENTIFIC CIDER-MAKING.

The popularity of cider as a beverage in Great Britain is increasing every year, and considerable attention is now being devoted by the laboratory to its production. Hitherto, the consumption of cider has been almost restricted to the area of its production, but it is now being consumed in districts far removed from the Midlands, the chief centre of manufacture in Great Britain. Until within the last few years, I am

informed that the blending of the fruit has been regulated according to individual taste, it having received little or nothing in the way of guidance from scientific discovery, either in relation to blending, or as to the varieties of apples best calculated to produce a nice, light, palatable cider. But now various qualities of 'cider' drinks, some largely influenced by chemical productions, have made their appearance on the market.

ORIGIN OF EXPERIMENTAL WORK.

For ten years experimental work has been carried out under the auspices of the Bath and West of England Agricultural Society, which society received an annual grant from the Board of Agriculture. From this small beginning there has sprung the National Fruit and Cider Institute, at Long Ashton, Somersetshire, which has just completed its first year's working. Many important investigations have been made during the last twelve months in regard to complex problems affecting the cider-making industry. At this institute opportunity is afforded by which members may send their sons to receive instruction, scientific and practical, not only in cider and perry-making, but also in the growth of fruit and the culture of fruit trees. The movement is regarded so important that the Board of Agriculture and Fisheries has made an annual grant of £300 for the maintenance of the institution. It also receives yearly grants of £100 from six county councils.

OBJECT OF THE INSTITUTION.

The institute has been fitted up with a well-equipped laboratory, which contains an American mill and press of special design. Individual analytical tests have been made in respect to a number of distinct varieties of locally grown fruit. The object is that the blending may be carried on with a definite idea as to the relative compositions of the different kinds of apples employed. Many points of interest are watched, such as the amount of juice yielded by the same weights of different varieties, the chemical composition of the juice, especially in regard to the content of sugar, acid, and tannin, and the nature and rate of fermentation. In a single twelve months the institute has produced and investigated more than fifty distinct kinds of cider and perry. The institute attaches much importance to blending, and this part of the business is carried on with great care.

SOME EXPERIMENTS.

At the request of the Board of Agriculture, the institute also endeavours to supply information with regard to diseases of fruits and fruit trees. Adjoining the buildings there are orchards, a nursery, and a plantation, all of which are for experimental work in relation to the cider and perry making industry, or that of fruit-growing. In the new orchard trees of specially selected varieties of apples and pears have been planted. The young trees are fixed according to various approved methods, so that they may serve as a demonstration to farmers who desire information as to the most effective means of protecting against the possible damage resulting from stock allowed to graze in the orchard. Experiments on those trees are being conducted with a view to ascertaining the influence of budding or grafting on the quality of the fruit. There are two systems of grafting, the Herefordshire system and the Somersetshire system. In the Herefordshire system the 'stocks' are budded or grafted close to the ground, so that in the adult trees the stem is a product of the growth of the bud or graft (*i.e.*, of the desired variety). In the Somersetshire system, the 'stock' is allowed to grow until the stem is about six feet in height, and has produced what is technically known as a good head with proper training. It is then budded or grafted at the head with the desired variety, so that the stem is a product of the original stock. The effects of these methods are to be investigated, and also the influence, if any, of the variety of the 'stock' on the

quality of the fruit of the budded or grafted variety. Farmers who have received instruction since the experimental work was started, so I am told, have greatly improved the quality of their ciders, as well as the prices, which in many cases have advanced from 4d. to 1s. per gallon.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., October 14, 1905.

HOPS.

In a former report, I referred to hops, and the opportunity Canadian growers had of securing a share of this great market. The returns just issued by the Board of Agriculture showed the estimated total production of hops this season as 695,943 cwt. as against 282,330 cwt. last year, being an average estimated yield of 14.21 cwt. per acre this season as against 5.91 cwt. per acre last year. The total imports for 1904 amounted to 265,425 cwt., of the value of \$7,064,454.

CANADIAN APPLES.

Liverpool reports that the total arrivals of Canadian apples this season to October 7, numbered 95,528 barrels, as against 127,650 barrels last season. The prices now being obtained for Canadian apples are vastly in advance of last year, yet if the comparative failure of the English crop, and the decrease in foreign arrivals are considered, it might have been expected that a higher range of prices would prevail. I attended the apple salesroom this week, and saw the contents of many barrels dumped into baskets for inspection of the buyers, and am pleased to be able to state that the packing and grading were right, and that the condition of the fruit was excellent. Fairly high prices were obtained, and as much as twenty-five shillings per barrel, or \$6.07, was realized for 20 barrels of 3X Baxters.

P. B. MACNAMARA.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(*Mr. D. H. Ross.*)

P. O. Box 140, MELBOURNE, September 9, 1905.

CANADIAN CARRIAGE EXHIBIT.

The annual show of the Royal Agricultural Society of Victoria closed today. Interspersed with exhibits of local and intercolonial manufacture were to be seen splendid specimens of carriages built by leading Canadian makers, which were shown by local importers. The popularity of this section of the exhibition is evidenced by the fact that nearly half the vehicles shown were sold to visitors from the country.

HIGH CLASS CANADIAN FURNITURE EXHIBITED.

A leading furniture warehouse in Melbourne made a magnificent exhibit of Canadian furniture which attracted great attention. Five furnished rooms were shown which gave an adequate idea of the requirements of a modern villa residence. The dining room was probably the most effective, as it was furnished throughout in fumed oak, and comprised the sideboard, dinner wagon, dining table and ten chairs upholstered in buffalo hide. The drawing room contained a Chippendale suite of inlaid rosewood covered with rich silk, an inlaid rosewood cabinet of exquisite design, overmantle and occasional tables all perfectly matched, and reflecting a practical illustration of the excellence of high class Canadian furniture.

AGRICULTURAL IMPLEMENTS.

The principal importers of Canadian and United States agricultural implements did not make an exhibit at the Melbourne annual show, but their warehouses in the city attracted many of the farming community who are now enjoying excellent seasons. The local agents of a well-known firm of St. George, Ontario, implement manufacturers exhibited several leading lines—some quite new to this country—which attracted considerable attention. As these implements have been successfully introduced into New Zealand where they enjoy an increasing demand there is every prospect of business being done in Victoria, particularly as the goods have excellent representation.

PETERBOROUGH FARMING IMPLEMENTS.

Through catalogues forwarded to this Canadian Commercial Agency, an order has recently been forwarded from Melbourne to a Peterborough, Ontario, company for a sample shipment of farming implements built to Australian specifications. The manufacturers have the advantage of expert representation at this end and, if the initial sample shipment turns out satisfactory, permanent business is assured.

CANADIAN CHAIRS.

The direct representative of one of the largest chair manufacturing industries in Canada had just completed his Australian itinerary and, this week, sailed from Hobart to New Zealand. The extent of the orders secured for Canadian chairs in the principal Australian importing centres was little short of phenomenal and far exceeded

the most sanguine expectations. In securing this gratifying result two essential qualifications were necessary ; the comprehensive range and value of the goods, and the undoubted ability and shrewdness of the salesman. With a tariff preference in New Zealand it can be readily assumed that one Canadian industry will be more than satisfied with their enterprise in so thoroughly exploiting the Australian trade.

RUBBER SHOES.

The orders recently obtained in Victoria, South Australia and Tasmania for Canadian rubbers and sand shoes have been of a very satisfactory nature in volume. This business is likely to increase to large proportions, which result is attributable to the excellent quality of the goods and the improved representation the line is receiving.

RUBBER MECHANICAL GOODS.

Owing to the competition of German manufacturers and to the development of the Australian industry, it is rather difficult to secure orders for Canadian mechanical rubber goods. There is always a demand for standard qualities of British make, which were first introduced, and for many years practically held the entire trade, but it appears that rather inferior grades now satisfy the chief Australian demand. The quality of Canadian rubber belting offered in Melbourne is excellent, and much superior to anything produced in Australia, and by continued persistence an increase in this business is looked for by the local agents.

AUSTRALIAN WOOL.

In many parts of Australia shearing is now in full swing, and in South Australia the new clip is being warehoused. The first of the new series of wool sales will take place at Adelaide on the 28th instant. The first Melbourne sale is fixed for October 17, and the mail closes with a prospect of large and satisfactory business being done. In July and August the exports of Australian wool comprised 31,974 bales, and New Zealand exported 17,139 bales, making a grand total of 49,113 bales from Australasia.

AUSTRALIAN WHEAT AND FLOUR.

The exports of wheat and flour from the Commonwealth for the season of 1904-05 are estimated to represent, to date, the equivalent of 28,812,000 bushels, being over 8,000,000 bushels less than the previous season. The surplus available for export is estimated at 28,000,000, but these figures are not official. To-day's quotation for prime milling and shipping wheat is about 3s. 7d. (87 cents) per bushel at ship's side, Melbourne. Medium wheat is quoted at 3s. 6d. (85 cents).

AUSTRALIAN TRADE WITH JAPAN.

With the termination of the war between Russia and Japan, the question of the possibilities of trade between Japan and Australia again arises. Australian imports from and exports to Japan for the past five years (exclusive of specie) are stated as follows:—

	Imports.	Exports.
1904.	£421,153	£581,214
1903.	330,121	115,992
1902.	354,321	111,803
1901.	288,216	114,685
1900.	250,555	155,473

The considerable increase in exports to Japan in 1904 was mainly due to wool, which amounted to 4,525,635 pounds, of the value of £332,602, against 1,093,439

pounds, value at £71,582, for 1903. Next in importance were grain, flour and fodder, the exports of which, in 1904, were as follows:—

	Quantity.	Value.
Wheat (bushels)	300,705	£46,509
Flour (tons)	730	5,092
Barley (bushels)	551,885	63,983
Oats (bushels)	20,451	1,723
Fodder (cwt.)	135,465	23,608

The other principal items of Australian exports to Japan are comprised in tallow, leather, hides, piglead, manures, butter and horses. Since Australia has not acceded to the Anglo-Japan treaty, Australian goods do not enjoy the benefit of the conventional tariff, but are subject to the full rates of the Japanese general tariff.

D. H. ROSS.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, October 4, 1905.

THE RICE CROP PROSPECT.

The advent of more settled and warmer weather, which set in at the beginning of August, seems to have greatly improved the prospects of the rice crop. At one time it was estimated that the crop would suffer a diminution of 20 per cent compared with last year, or 10 per cent as against the harvest of normal years. It is now reported that owing to the return of seasonable weather, and the passing over safely of the critical days, together with the careful prevention of injurious insects, the middle and later varieties of rice are growing excellently. It is as yet premature to attempt to arrive at anything like an accurate estimate, but it is confidently asserted by the authorities that, barring serious meteorological disturbances in the near future, this year's rice crop will not fall below that of ordinary years.

Later.—The second official report on the rice crop this year was made public today. According to the fresh estimates, this year's rice crop will not show such a shortage as previously reported, the deficit being put at 19·9 per cent as compared with last year, and 7·2 per cent as compared with the average year.

CONDENSED MILK.

There is inquiry for condensed milk samples. The explanation is that, although the tariff on this item stands as 6 is to 36 against Canada, there is an impression that this is shortly to be equalized, and that it will be well to be ahead, with quality selected and agency in prospect by the time the change for the better takes place. I am notifying condensed milk interests to this effect by concurrent mail. One firm remarks that if the tariff movement is under way it cannot be much too soon to prepare to take advantage of the situation; and if nothing comes of it no harm will have been done. Another thinks that if Canada can supply condensed milk of such quality as 'Eagle' or 'Milkmaid' brand, at like prices, a very large trade may be built up.

Since the preceding paragraph was written, the agent here of a Seattle exporting house called to inquire as to the prospect of improved tariff conditions with Canada

in respect of condensed milk, and requested to have information at the earliest possible date.

FERTILIZERS' TRADE.

The demand for various kinds of imported fertilizers in Japan has been steadily on the increase of late years, though the production and supply were somewhat unfavourably affected last year, as an incident of the war. Lately, with the assurance of peace, the market has been very active; the importation of the various fertilizers has so far been larger than last year, and is likely to go on increasing. The returns of import, made up to the end of July, compared with 1904, are as follows:—

Value for the first Seven Months of 1905.

	1905.	1904.
Ammonium, sulphate.. . . .	\$ 868,737	\$549,628
Bone, animal.. . . .	147,884	127,498
Oil-cake—Beans.. . . .	3,080,667	710,649
“ Cotton seed.. . . .	199,359	90,266
“ Fishes.. . . .	91,433	9,251
“ Rape seed.. . . .	296,617	195,761
“ Others.. . . .	14,479	11,714
Phosphorites.. . . .	808,804	219,152
Phosphate manure, other.. . . .	5,126	156,344
Sardine, dried.. . . .	36,764	47,854
Soda, nitrate of.. . . .	538,614	220,115
Others.. . . .	449,694	540,308
	<hr/>	<hr/>
	\$6,538,178	\$2,878,540

As will be seen from the preceding, the total amount of fertilizers imported up to the end of July had reached more than six million dollars, having nearly trebled as compared with the corresponding period of last year. Bean oil-cake shows a most noticeable increase. This may be accounted for by the resumption of trade with Newchwang, which was practically stopped last year owing to the war. Increase is shown as well in the other kinds of fertilizers, more especially in phosphorites. The partial failure of the manufacture of dried fish manure in the Hokkaido district since last year is believed to be the cause of a large increase in importation. Present appearances seem to indicate a further demand for foreign manure as well as for the home article.

If Canada possesses a surplus supply of some fertilizers suitable to this market, a profitable trade may be built up. The importation of oil-cake from Canada for the year up to the end of August last had amounted to \$17,000. Fish manure, so-called, is wanted by the shipload.

JAPAN'S COTTON SPINNING INDUSTRY.

The prosperity of the cotton spinning industry during the first six months of the current year is described as having been unprecedented. The demand for cotton yarn had largely increased with the requirements of the army, but the activity of the export trade finds its expression in the extraordinary prosperity of the industry. The profits of the spinning companies have been augmented all the more by the fact that low prices for the raw material and high for the manufactured article ran together. One company has declared a dividend for the half year at the rate of 36 per cent per annum, while five others have all shown dividends amounting to more than 30 per cent. All the other spinner companies have declared dividends from 10 to 20 per cent. The average rate of dividend on the total paid-up capital of all the cotton spinning companies in Japan during the first half of this year corresponds to 17 per cent, which as

compared with 6·6 per cent for the first half, and 8·5 per cent for the second half of last year, is more than double.

At the end of June last the number of cotton spinning companies throughout the country was 37, with aggregate paid-up capital of \$10,453,500. As to the number of spindles, there were 1,304,786 rings and 83,060 miles. The total consumption of raw cotton during the period under review aggregated 25,191,200 kwamme (one kwamme is equal to 8·281 pounds).

The total quantity of yarn manufactured during the half year amounted to 452,362 bales of 400 pounds each. Out of this, 314,955 bales were absorbed by domestic consumption, while 138,746 bales were exported. In other words, about 70 per cent of the total production was taken up for domestic use, while 30 per cent was available for export.

ALEX. MacLEAN.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., October 16, 1905.

REVIEW OF HULL MARKETS.

The following are the aggregates imported into the port of Hull from January 1 to October 1, 1905, as compared with same period in 1904.

	1904.	1905.
Wheat (bush.)	29,804,028	25,796,488
Flour (cwt.)	112,704	217,558
Barley (bush.)	3,219,304	4,281,680
Oats (bush.)	2,297,680	1,375,640
Peas (bush.)	525,228	433,896
Linseed (bush.)	5,188,296	8,010,800
Timber hewn (loads)	192,990	246,253
Deals (loads)	376,372	395,676

WHEAT.

The trade continues very firm with fair demand at fully late rates price from \$8 to \$8.75 per 480 pounds.

BARLEY.

Foreign malting of good quality is unusually scarce, and fresh arrivals are readily bought at advanced prices. Price, \$5.25 to \$5.50 per 448 pounds.

BUTTER.

Canadian butter in excellent demand. The following are the ruling prices :—

Danish	\$29 50 to \$30 25 per cwt.
Irish	27 00 to 28 00 "
Canadian	26 00 to 27 00 "
Australian	26 50 to 27 50 "

CHEESE.

Prices quite firm but demand rather slow.

Canadian	\$12 28 to \$13 25 per cwt.
Finest English Cheddar	17 03 to 17 75 “

BACON.

Canadian much inquired for :—

Canadian, No. 1 and 2	\$13 60 to \$14 50 per cwt.
American	12 40 to 13 50 “

HAMS.

Canadian (long green)	\$12 20 to \$13 50 per cwt.
American (long green)	10 75 to 13 50 “

JNO. B. JACKSON.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, October 2, 1905.
P.O. Box 1232.

NOTICE TO APPLE EXPORTERS.

Those interested in the shipment of apples, pears and quinces, to South Africa are advised that the Cape Colony Government will shortly issue a proclamation entirely prohibiting the importation of the above-named fruits into most of the territory known as the Eastern Province, including the port of East London, but not Port Elizabeth.

COMMERCIAL LICENSES IN SOUTH AFRICA.

As most are aware, travellers for oversea houses have to pay at the present time £25 for an annual license in the Cape Colony, the same amount for the Orange River Colony, £10 for Natal, £30 in Rhodesia, £10 for British Bechuanaland, and £10 per Mozambique—a total of £110, which is no inconsiderable import on commercial operations.

THE NEW TRANSVAAL ORDINANCE.

The following are extracts from the new Transvaal schedule, detailing certain license duties payable: Every agent or representative of a foreign manufacturing or trading establishment, £20 per annum, or £11 for six months; broker or general agent, £5 and £3; general dealer, aggregate sales not exceeding £2,500, £5 and £3; exceeding £2,500, not exceeding £10,000, £10 and £6; exceeding £10,000, but not exceeding £25,000, £20 and £11; exceeding £25,000, but not exceeding £50,000, £30 and £16.10; exceeding £50,000, £40 and £22. For every board of executors or company of like kind, or for every branch, the duties are £50 and £27.10.

CANADIAN GOODS SHIPPED FROM UNITED STATES PORTS.

It has been decided by a majority of the parties to the South African Customs Union that a rebate of duty under the preferential tariff shall only be allowed to Canadian products shipped from United States ports to South Africa when such shipments are accompanied by, in addition to a certificate of origin, a certified copy of the through Bill of Lading, or a certified copy of the inland Bill of Lading, or a stamped certificate from the Canadian Customs Department showing the numbers and marks of the packages upon which a rebate of duty is sought.

SHIPMENTS FROM CANADIAN PORTS.

Shipments of Canadian products from Canadian ports to South Africa entitled to a customs preference, will, to secure the preference, only require the prescribed certificate of origin, filled in by the manufacturer or shipper thereof.

CAUSE OF ADDITIONAL REGULATIONS.

The above additional regulations have been framed with the desire of confining the customs preference to Canadian products, as certain manufacturers in the United States have been marking their products 'made in Canada,' with the idea of thereby obtaining the customs preference.

C. M. KITTSON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(*Mr. D. H. Ross.*)

P. O. Box 140, MELBOURNE.

AUSTRALIAN CUSTOMS REGULATIONS.

The Commonwealth Customs regulations regarding foreign invoices are very rigidly enforced, and frequently importers of undoubted repute are fined through errors caused by manufacturers—or shippers—in not making out invoices in accordance with the prescribed directions (appended herewith). Canadian exporters of goods to Australia should carefully consider the interests of their clients, by giving minute attention to the question of invoicing goods accurately, showing every detail which the customs in this country demand.

NUMBERING AND INVOICING CONTENTS OF EACH CASE.

In some instances much inconvenience and annoyance has been caused to Australian importers by Canadian manufacturers not distinctly numbering each case, and invoicing the exact contents. The separate 'packing sheet' showing the contents of each package is very unpopular and—with the exception of large shipments of leading lines—should be discontinued. Therefore, each case or package should be numbered, and upon the invoice the number, gross weight and measurement, and the exact contents must be clearly stated. This is absolutely essential for custom house purposes, as well as for the convenience of wholesale importers who often sell the goods without opening original packages.

ADVERTISING MATTER INCLOSED IN CASES.

If any printed matter, such as catalogues, price lists or show cards, should be inclosed in the cases, the net weight of such advertising matter must be distinctly stated

upon the invoice for customs requirements. Importers are frequently fined through the examination of goods disclosing catalogues, &c., of which no advices had been received.

COST OF 'OUTSIDE' CASES—NOT DUTIABLE.

The cost of 'outside' packages, cases, &c., must be clearly stated upon the invoices, although this charge is not dutiable in Australia, the customs authorities require the cost to be invoiced.

CHARGES EXCLUDED FROM AUSTRALIAN CUSTOMS DUTY.

In addition to 'outside cases' the following charges are excluded from Australian Customs duty-stamp duty, including bills of lading, buying commission and brokerage.

LABOUR IN PACKING AND MATERIALS USED IN 'INSIDE PACKING.'

According to a recent decision of the Commonwealth Customs, the cost of labour in packing the cases and the materials used in 'inside' packing (i.e. packing the contents of cases), must be separately stated, as these charges are dutiable at equivalent tariff rates to the goods.

F.O.B. VALUE OF CANADIAN GOODS SHIPPED AT U.S. PORTS.

The 'free on board' value of Canadian goods shipped at United States ports has been decided by the Commonwealth Customs as being the value at the Canadian border, whence shipment is made. Therefore, in shipping goods, via New York, San Francisco, or any other United States port, Canadian exporters must show upon the invoice the exact cost (or the proportion) of the railway (or other) freight from factory point to the Canadian border—Niagara Falls, &c.—from which the goods pass into the United States. The freight to the Canadian border is added to the invoice value of the goods, in computing the customs duty. The Australian Customs, however, do not add to the invoice value of Canadian goods the cost of freight incurred in transportation through United States territory.

F.O.B. VALUE OF CANADIAN GOODS SHIPPED AT VANCOUVER.

In making shipment at Vancouver, the exporters must state upon the invoice the exact cost of the railway transportation from factory point to Vancouver. This railway freight is added, by the Australian Customs, to the invoice cost of the goods, and is dutiable at equivalent tariff rates. When 'through' bills of lading are issued by the Canadian Pacific Railway Company for shipments, via Vancouver, to Australian port of destination (say Montreal to Melbourne) the exact proportion of the railway freight must be stated upon the invoice. The 'free on board' value of such shipments for Australian Customs purposes is understood to be the value on board the steamer at Vancouver. There is no Australian duty upon the cost of the steamer freight from Vancouver or elsewhere.

CANADIAN GOODS QUOTED F.O.B. NEW YORK.

Australian importers have become accustomed to United States goods being quoted upon the basis of 'free on board steamer' New York, and many Canadian manufacturers have wisely followed that practice. There is now a slight difficulty for Canadian exporters to make correct calculations, upon the basis of f.o.b. steamer New York, owing to the new regulations imposed by the Commonwealth Customs. The Australian importer, in giving an order for goods, almost invariably estimates the landed cost, therefore, if the goods are quoted f.o.b. New York by the Canadian manufacturer, the duty has to be paid upon the entire railway freight from, say Toronto to New York,

whereas, the Australian duty is calculated upon the cost of the railway carriage to the border only, which considerably reduces the importing charges.

ILLUSTRATION OF HOW TO QUOTE F.O.B. NEW YORK.

In order that Canadian goods may land in Australia at the minimum importing charges, it is suggested, in computing quotations upon the ‘f.o.b steamer, New York, basis,’ that quotations should be made as follows, as an example:—

10 Organs.	\$400 00
Outside cases.	30 00
Labour in packing and inside packing of cases.	10 00
Railway carriage to Canadian border.	10 00
Railway carriage, border to New York.	35 00
<hr/>	
F.O.B. New York.	\$485 00

If invoiced and quoted as above the Australian importer will save the customs duty on \$35, being the amount of railway freight from the Canadian border to New York. In giving quotations for heavy lines (not ‘free’ in the Australian tariff), it is obvious that Canadian exporters must exercise care, so that their goods can land in Australia at the lowest cost, thus ensuring repeat orders.

DECLARATIONS UPON INVOICES.

The Australian Customs Act does not demand any declaration as to values, &c., being made upon British or foreign invoices, but it is considered that the Act will be amended whereby such a provision will be carried into effect. In the meantime Canadian manufacturers and exporters are urged to follow the practice of many over-sea shippers in endorsing at the foot of the invoice the words ‘certified correct’ and signing the firm’s name thus:—

Certified correct,
John Smith & Co.

This practice is favoured by the Australian Customs authorities as some guarantee of the invoice representing the correct valuation of the goods.

SUGGESTED DECLARATION AT FOOT OF CANADIAN INVOICES.

- (a) The actual cost of outside packages containing the above goods is \$
 - (b) The actual cost of labour in packing and inside packing of the above goods is \$
 - In invoicing goods shipped via New York or San Francisco, add to clauses *a* and *b*:
 - (c) The actual cost of railway freight from (say Guelph) to the Canadian border at (say Niagara), on the above goods is \$
 - In invoicing goods quoted f.o.b. New York, add to clauses *a* and *b*:
 - (d) The above amount \$. (the net amount of invoice), includes the cost of delivering the goods to New York, of which the sum of \$. comprises the railway freight to the Canadian border and the sum of \$. the freight from the border to New York.
 - In invoicing goods shipped via Vancouver, add to clauses *a* and *b*:
 - (e) The actual cost of railway freight from (say Guelph) to Vancouver on the above goods is \$.
- Each invoice, after completion of above clauses, should be certified correct, and signed by the shipping firm thus:—

Certified correct,
John Smith & Co.
D. H. ROSS.

FRANCE.

REPORT OF COMMERCIAL AGENT.

(Mr. A. Poindron.)

101 RUE REAUMER, PARIS.

NO SPECIAL FORM.

I have the honour to report that in fact no special approved form of declaration of origin exists in France. Despite this, I beg to send you a form (appended hereto), which the French Custom's Department would rather consider suitable for the purpose for Canada, as I have previously ascertained their full concurrence on the subject.

Outside of the mayors, magistrates or justices of peace mentioned on the specimen form, the signatures of presidents of chambers of commerce may also be accepted. The signatures of all the above officials must be certified by the French consular agent in the district.

Declarations might also be delivered by the customs officials in Canada, and would not be subject to certification on behalf of French consular agents, provided they would be delivered under the usual seal of the Customs Department in Canada, and provided further the custom's authorities in Canada would maintain the same treatment to certificates delivered by the French custom's officials under seal.

This last form would rather appear as the nearest at hand, and the quickest one for Canadian exporters.

GOODS REQUIRING CERTIFICATES.

The Canadian goods liable to certificates or declarations of origin when entering into France, Algeria and French colonies, are the only ones entitled to minimum duty as per the Franco-Canadian treaty in force, i.e.:—

Canned meats.

Condensed milk, pure.

Eels.

Fresh lobsters and craw fish preserved in their natural forms.

Table and cider apples and pears, fresh, dried or compressed.

Other preserved fruits.

Building timber and lumber, whether in the rough, square or sawn.

Wood pavement.

Staves.

Wood pulp.

Tanning extracts of plants.

Common machine made paper.

Prepared skins, tanned only, polished or dressed, other in the whole.

Boots and shoes.

Common wood seats.

Common heavy wood furniture other than chairs, except bent wood.

Flooring of soft wood.

Wooden ships.

A. POINDRON.

CERTIFICAT D'ORIGINE.

ST. KITTS, NEVIS AND VIRGIN ISLANDS.

REPORT OF COMMERCIAL AGENT.

(Mr. S. L. Horsford.)

ST. KITTS.

CUSTOMS REGULATIONS SIMPLE.

The Customs regulations here in regard to imports are very simple, and involve the minimum of inconvenience to foreign exporters. Section 23 of the Trade and Revenue Consolidation Ordinance, 1902, enacts as follows:—
'Before any goods are landed or transhipped from any vessel the importer shall make perfect entry by delivering to the treasurer a bill of entry thereof in duplicate, and such bill of entry shall be in such form and containing such particulars as the treasurer shall direct, and the importer shall make and subscribe a declaration to the truth of the particulars contained therein, and shall produce to the treasurer, if required, the invoice, bill of lading and other documents relating to the goods, and shall at the same time, except in the case of goods intended to be warehoused or exported, pay down any duties which may be payable thereon, and the treasurer shall thereupon grant his warrant for the landing of the same.'
I append a copy of a warrant or bill of entry, with the form of declaration in regard to the invoices to be produced and the value of the goods entered, which speak for themselves.

S. L. HORSFORD.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY.

As to any forms for customs purposes, declarations, &c., it may be necessary for a Canadian exporter to fill out in exporting goods to Norway, Sweden and Denmark, I have made inquiries at the Norwegian Department of Customs and Finance, the Danish Export Association and the Swedish General Export Association. According to the information received no special forms or declarations are necessary for the above mentioned purpose in exporting goods to any of these countries. All that is needed is that the Canadian exporters should send invoices and bills of sale to their customers in Norway, Sweden or Denmark.

C. E. SONTUM.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B, YOKOHAMA.

INVOICES ONLY REQUIRED.

I beg to state that invoices in duplicate are the only documents or formalities required by the customs at Japanese ports for the admittance of foreign goods.

Differences or disputes, arising because of the action of the collector, are adjusted upon the claim of the importer submitted to the Superintendent of Customs, from whose decision there is appeal to the Minister of Finance, whose decision is final.

A. MACLEAN.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

*(Mr. C. M. Kittson.)*RHODES BUILDING, CAPE TOWN,
P. O. Box 1232.

I beg to forward herewith copies of forms of certificates prescribed to obtain a rebate of customs duties on goods and articles the growth, produce or manufacture of the Dominion of Canada, when entering a South African Customs Union port, and certain other regulations with reference thereto.

CHS. M. KITTSON.

FORM OF CERTIFICATE prescribed to obtain a rebate of customs duties on goods and articles, the growth, produce or manufacture of the Dominion of Canada, when made and signed by an individual manufacturer or supplier personally.

I, [*Full name of manufacturer or producer*], the manufacturer (producer) of the articles included in this invoice, have the means of knowing, and do hereby certify that said invoice being from myself [*Name of party or parties to whom articles invoiced*], and amounting to [*Insert in words at length total value of invoice*], is true and correct; that all the articles included in the said invoice are *bona fide* the growth, produce or manufacture of the Dominion of Canada, and that a substantial portion of the labour of that country has entered into the production of every manufactured article included in the said invoice to the extent in each article of not less than one-fourth of the value of every such article in its present condition ready for export to the Cape Colony.

(Signed)

Dated at, this day of, 19..

FORM OF CERTIFICATE prescribed to obtain a rebate of customs duties on goods and articles, the growth, produce or manufacture of the Dominion of Canada, when made and signed by a person other than an individual manufacturer or supplier.

I, [*Name of person signing the certificate*], hereby certify that I am [*Insert the words partner, manager, chief clerk or principal official, giving rank, as the case may be*], of [*Name and address of manufacturer(s) or supplier(s)*], the manufacturer(s) or supplier(s) of the articles included in this invoice, and that I am duly authorized to make and sign this certificate on behalf of the said supplier(s) or manufacturer(s). I have the means of knowing, and I do hereby certify that this invoice from the said [*Name of manufacturer(s) or supplier(s)*], to [*Name of party or parties to whom articles are invoiced*], amounting to [*Insert in words at length the total value of the invoice*] is true and correct, and that all the articles included in the said invoice are *bona fide* the growth, produce or manufacture of the Dominion of Canada, and that a substantial portion of the labour of that country has entered into the production of every manufactured article included in the said invoice, to the extent in each article of not less than one-fourth of the value of every such article in its present condition ready for export to the Cape Colony.

(Signed)

Date. this day of, 19..

With reference to the 20th clause of Government Notice No. 717 of customs duties on goods and articles the growth, produce or manufacture of the Dominion of Canada, His Excellency the Governor, with the advice of the executive council, has been pleased, under section 4 of Act 5 of 1903, to make the following additional regulations:—

1. The certificate therein referred to shall be written, printed or stamped on the invoice, or attached thereto.

2. If the certificate is not written, printed or stamped on the invoice, full particulars of the goods must be shown on such certificate.

3. The certificate will be waived in the case of postal packages not exceeding £10 in value, if the contents of such packages are not merchandize for sale, provided, however, that such packages shall have endorsed on them a certificate in the form attached thereto, which certificate shall be signed in the presence of a postal officer of the country whence the package was shipped direct to the Cape Colony.

4. These requirements will be strictly enforced from December 1 next.

Certificate to be endorsed on postal packages not exceeding £10 in value, the contents of which are not merchandize for sale.

Every article herein to the extent of at least one-fourth of its present value is *bona fide* the produce or manufacture of the Dominion of Canada.

Dated at 190.. Signature of Sender

In the presence of

Postal Officer.

INQUIRIES RELATING TO CANADIAN TRADE.

Since the publication of the last monthly report there have been received the following inquiries relating to Canadian trade. The names of the firms making these inquiries, with their addresses, can be obtained upon application to: 'SUPT. OF COMMERCIAL AGENCIES, THE DEPARTMENT OF TRADE AND COMMERCE, OTTAWA.'

Please Quote the Reference Number when Requesting Addresses.

1040. A firm in Durban, Natal, would be pleased to represent **Canadian Manufacturers and shippers** wishing to do business in Natal and the Transvaal.

1041. A Glasgow firm would like to find a market in Canada for **white lead, tar products, oils and chemicals**.

1042. A company in the Midlands manufacturing **drain pipes, enamelled sinks, lavatories, and fire bricks and fire clay** would like to obtain a share of Canadian trade.

1043. A London Company engaged in the exportation of **building stone** inquires if there is any opening in Canada for **bath stone**, and would like to hear from Canadian importers of **building materials**.

1044. Four goods firms in Epernay, Bordeaux and Cognac want representatives to sell in Canada, **champagne, clarets and brandies**.

1045. Two French houses of **olive oil** wish agents to introduce their products in Canada.

1046. An exporting house of preserved **pine-apples** wants a good representative in this country.

1047. A French manufacturer of **hosiery** desires an active agent in Canada.

1048. A French manufacturer of **boots**, well appreciated on English markets, wants to be put in touch with Canadian buyers.

1049. A Parisian manufacturer of **artificial flowers** wishes buyers in Canada.

1050. A French house of **cards for photos** desires to be put in touch with Canadian buyers.

1051. A French editor of **illustrated post cards** desires an agent in Canada.

1052. A manufacturer of **printing ink** asks a representative in this country.

1053. A large Australian firm of **shoe importers** desires the names of reliable **Canadian exporters**, one to make lower grade women's goods, and another a medium and better class. Goods must be stylish at popular prices. Copy of specifications required can be had by applying to the Department of Trade and Commerce.

1054. A Manchester manufacturer of **leather cloth** wishes to get in touch with Canadian users of his goods, and would appoint an agent for sale of same in Ontario.

1055. A Lancashire chemical company will gladly enter into correspondence with Canadian shippers of **crude or refined cobalt**.

1056. A Manchester firm manufacturers of **bevelled and silver plate glass and looking glasses** desire to place their goods in Canada, and would welcome correspondence from furniture manufacturers and others using plate glass mirrors.

1057. A Lancashire firm of lead manufacturers would welcome inquiries and specifications for **lead piping for water and gas** purposes from Canadian firms using same.

1058. A Manchester firm now dealing through brokers wishes to buy direct from Canadian manufacturers of **oak heads** in sizes 20½-inch diameter by ¾-inch thick.

1059. A Manchester manufacturer of **rope and twine** (with patent twine holder) wishes to correspond with Canadian wholesale dealers in same.

1060. A Manchester firm desires prices and description of **spokes, hubs and splash-boards** from Canadian manufacturers of same.

1061. A large Yorkshire manufacturer of **steam and electric cranes, lifting machinery and overhead travellers** of every description desires communication with buyers in Canada.

1062. A Yorkshire shipping firm of all kinds of **woollen and cotton wastes**, desires communication with Canadian buyers.

1063. A London firm manufacturing **sizes, enamels** and other specialties of interest to the paint trade, also **glues and gelatine** wishes to get into touch with Canadian importers.

1064. A Midlands Company manufacturing **fire brick and fire clay goods** is prepared to appoint a suitable Canadian resident agent for the sale of their goods in Canada.

1065. A British manufacturer of **webbing** as used by the upholstery and saddlery trades wishes to do business in these lines in Canada, and would be pleased to hear from importers.

1066. A Dundee house manufacturing **jute yarns** for rope making, **jute cloth** in the loom state and **jute goods generally** wishes to be placed in communication with Canadian buyers.

1067. A Macclesfield firm manufacturing **boot laces and braids** and **hatters' silk braids and cords**, would like to get into touch with Canadian importing firms prepared to handle their goods.

1068. A Leith manufacturers' agent can offer considerable business to Canadian manufacturers of **wood pulp**, and would be pleased to hear from those interested.

1069. A Yorkshire Company manufacturing **trolleys, trucks, hand carts** and similar lines would like to find a sale for these goods in Canada.

1070. An English firm handling **seeds** wishes to get into touch with Canadian importers.

1071. Inquiry is made respecting the opening in Canada for the sale of **water meters** by a firm manufacturing these goods.

1072. A firm of **whisky, ale and stout bottlers** are seeking to extend their Canadian connection, and have made inquiry to this end.

1073. A London firm manufacturing **glues, varnishes, sizes, paint removers, &c.**, desires to be placed in touch with Canadian houses handling such goods.

1074. An English house producing **perfumery** of good quality wish to be placed in communication with parties in Canada in a position to handle such goods in bulk and made up for sale.

1075. A correspondent at Turin, Italy, has asked to be placed in touch with **Canadian exporters**; as he is seeking to extend the trade between Italy and the Dominion.

1076. A London firm manufacturing **camel hair brushes and hog hair, paint, varnish and enamel brushes**, desires to get into touch with wholesale buyers of such goods in Canada.

1077. A South African firm of commission agents in Cape Town with branches at Durban, East London and Johannesburg, are desirous of representing on commission Canadian **manufacturers and exporters**.

1078. A company at Bath wishes to place orders for 1 to 2,000 **pine doors**. Sizes from 6 feet 4 inches by 2 feet 4 inches, 1½ inches, to 6 feet 10 inches by 2 feet 10 inches, 2 inches, third quality, with not more than 10 knots showing on either side. Firm round knots are not objected to—the usual percentage of sap in this grade, and desires to receive quotations direct from Canadian manufacturers with whom arrangements could be made for regular supplies of doors and also of mouldings.

1079. A London manufacturer of **pianofortes** asks to be put into communication with Canadian importers.

1080. A London timber house invites correspondence from Canadian importers of **mahogany**.

1081. A Welsh firm would like to sell **roofing slates** to Canadian importers of building materials.

1082. A Yorkshire manufacturer of **woollen goods** of all descriptions desires to increase his Canadian trade, and asks to be put in communication with buyers.

1083. A Cape Town commission agent desires quotations for **hickory** or other suitable hardwood **pick, hammer** and **axe handles**.

1084. A German **agency and commission** house is open to correspondence with Canadian firms to act as buying or selling agent on commission. Can furnish good references.

1085. The manufacturer of a **patented tobacco cutting machine** would like to arrange with a Canadian firm to handle same.

1086. A Midlands manufacturer of **boots** and **shoes** would like to be placed in touch with Canadian importers.

1087. A London and Calcutta **tea** firm would like to get into correspondence with Canadian **tea** houses prepared to import supplies direct from **Calcutta**.

1088. A large South African Produce Importing Company is open to purchase **Canadian Cheddar Cheese** (in loaves of about 10 pounds each) **butter, eggs, &c.**

1089. A South African commission agent desires to represent a Canadian manufacturer of **machine-made horse and mule shoes**.

1090. A Melbourne Company, with branches throughout Australia, making a specialty of **engineers' supplies**, desires to receive catalogues, small samples and lowest wholesale prices f.o.b. New York, for Canadian asbestos goods of every description.

1091. A Melbourne firm is desirous of receiving lowest wholesale quotations for high-class **undressed furs**, with the heads, legs and tails complete. Such skins as sable, buam-marten, fisher-marten, fitch, mink, marmot, &c., and other high-class Canadian furs are particularly wanted in fairly large quantities. This inquiry offers an exceptional opportunity for Canadian dealers in undressed furs to open up a valuable business connection.

1092. A Melbourne hardware and sporting supplies firm request catalogues, lowest wholesale export prices f.o.b. New York, and full particulars of the most popular makes of **Canadian ice skates**. Payment can be arranged in Canada against shipping documents. Should manufacturers desire to send sample pairs of leading lines by parcel post, via Vancouver, account sales will be rendered or they will be returned. A 'cable' code word for each design, plain and plated, is suggested in replies to this inquiry.

1093. An Australian sandalwood oil distillery is anxious to receive inquiries from Canadian wholesale druggists for **sandalwood oil** of superior quality. The oil is packed in 14 pound cans, 8 cans to the case, and can be quoted c.i.f. New York or British ports.

NEW ZEALAND RECIPROCAL TRADE ACT.

The following regulation was published officially in June, 1904, and is still in force:—

‘Without in any way limiting the requirements of “The Preferential and Reciprocal Trade Act, 1903,” that, in order to escape the full duty thereby imposed on the articles mentioned in the Schedule to that Act, the articles must be the *bona fide* produce or manufacture of some part of the British Dominions, it is hereby declared that no manufactured article will be so regarded unless a substantial portion of the labour of one or more specified parts of the said Dominions has entered into the production thereof, to the extent in the case of each article of not less than one-fourth the value of the article in the condition in which it is ready for export to New Zealand.’

SCHEDULE.

No. 1.

FORM OF CERTIFICATE prescribed to be written or printed on invoices of all articles, except tea, for entry under the Preferential Tariff of New Zealand, when made and signed by an individual exporter personally.

I, [*Full name of exporter*], the exporter of the articles included in this invoice, have the means of knowing, and do hereby certify, that the said invoice, being from myself to [*Name of party or parties to whom articles invoiced*], and amounting to [*Insert in words at length total value of invoice*], is true and correct; that all the articles included in the said invoice are *bona fide* the produce or manufacture of one or more of the following countries, viz.: [*Names of countries, being in every case part of the British Dominions*]; and that a substantial portion of the labour of one or more of such countries has entered into the production of every manufactured article included in the said invoice, to the extent in each article of not less than one-fourth of the value of every such article in its present condition, ready for export to New Zealand.

(Signed)

Dated at....., this..... day of....., 190...

NOTE.—Exporters are carefully to observe the above instructions in italics when making their certificates on invoices.

No. 2.

FORM OF CERTIFICATE prescribed to be written or printed on invoices of all articles, except tea, for entry under the Preferential Tariff of New Zealand, when made and signed by a person other than an individual exporter.

I, [*Full name of person signing certificate*], hereby certify that I am [*Insert the words ‘partner,’ ‘manager,’ ‘chief clerk,’ or ‘principal official,’ giving rank, as the case may be*], of [*Name and address of exporter or exporters*], the exporter(s) of the articles included in this invoice, and that I am duly authorized to make and sign this certificate on behalf of the said exporter(s).

I have the means of knowing, and I do hereby certify, that this invoice from the said [*Name of exporter or exporters*] to [*Name of party or parties to whom articles invoiced*], amounting to [*Insert in words at length total value of invoice*], is true and correct; that all the articles included in the said invoice are *bona fide* the produce or manufacture of one or more of the following countries, viz.: [*Names of countries, being in every case part of the British Dominions*]; and that a substantial portion of the labour of one or more of such countries has entered into the production of every manufactured article included in the said invoice to the extent in each article of not less than one-fourth of the value of every such article in its present condition ready for export to New Zealand.

(Signed)

Dated at, this day of, 190...

NOTE.—Exporters are carefully to observe the above instructions in italics when making their certificates on invoices.

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Customs-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

VIRGIN ISLANDS.

AN ORDINANCE TO GRANT CERTAIN IMPORT AND EXPORT DUTIES.

No. 1 of 1905, proclaimed April 1, 1905.

Be it ordained by the Governor of the Leeward Islands as follows:—

1. This ordinance may be cited as 'The Tariff Ordinance, 1905.'

2. The ordinances set out in Schedule D hereto are hereby repealed.

3. In this ordinance, except where and so far as the subject matter or the context otherwise requires, the term 'goods' includes wares, merchandise, animals, articles and things; and the term 'duty' means import duty.

4 (1.) From and after the commencement of this ordinance the sums specified in Schedule A to this ordinance shall be paid into the treasury for the use of this Presidency as import and export duties respectively upon goods of the respective classes, kinds and descriptions mentioned in that schedule, when first imported into, or exported from, this Presidency; and proportionate sums shall be so paid upon the first importation into, or exportation from, this Presidency of any greater or less quantities of such goods than those mentioned in the said schedule.

(2.) Until the contrary is proved to the satisfaction of the treasurer, every importation and exportation of goods shall be deemed to be the first importation and exportation thereof respectively.

5 (1.) The following goods shall be admitted free of duty into this Presidency, that is to say, all samples, not of saleable value, of manufactured and other goods and all articles intended for exhibition only, and not for sale, which the treasurer, in his discretion, and subject to any rules made as hereinafter mentioned shall allow to be imported free of duty.

(2.) It shall be lawful for the governor to make rules for the guidance of the treasurer in the exercise of the powers given to the latter by this section.

(3.) Any person who shall sell or dispose for value of any article admitted free of duty under this section shall be liable, on summary conviction, to pay a penalty not exceeding one hundred pounds.

6. Goods of the classes, kinds and descriptions specified in Schedule B to this ordinance shall be admitted free of duty into this Presidency.

7. The goods described in Schedule C to this ordinance shall be admitted free of duty into this Presidency; provided that the person importing the same shall produce to the treasurer at the time of the importation thereof a certificate signed by the treasurer of the island or Presidency from which the same are imported, stating that

the same are exempt from duty under this section and the ground of such exemption; provided also that nothing in this section contained shall be deemed to exempt any rum within the meaning of any Excise Ordinance or Rum Duty Ordinance for the time being in force in this Presidency from any liability to excise duty; and provided, moreover, that, where the amount of duty already paid in any Presidency shall be less than the amount which, but for this section, would be payable in this Presidency, the exemption created by this section shall not extend to the difference between such amounts.

8. Where any question arises whether any imported or exported goods come within any of the classes, kinds and descriptions specified in the schedules to this ordinance, such question shall be referred to the treasurer, whose decision thereon shall be final.

9. It shall be lawful for the governor to permit articles liable to duty to be used in bond, subject to such conditions and regulations as to the governor may seem expedient.

10. This ordinance shall come into operation on the 1st day of April, 1905.
Made by the governor this 28th day of March, 1905.

SCHEDULE A.

44. Tan bark of all kinds whole or ground.

45. Telegraph wire, telegraphic, telephonic and electric apparatus and appliances of all kinds for communication or illumination thereby.

46. Trees, plants, vines and seeds and grains of all kinds for propagation or cultivation.

47. Water pipes of all classes, materials and dimensions.

48. Wire for fences, with the hooks, staples, nails and like appliances for fastening the same.

49. Wood, cedar and pine shingles, cypress and wallaba shingles, hoops, staves, shocks, pitch pine, white pine, spruce and all hard woods.

Stores of every description imported or supplied for the use of His Majesty's land and sea forces and all things imported or supplied for the use of the governor.

If any goods on which duty has been paid at the time of importation be subsequently supplied as above mentioned the amount of duty upon the goods so supplied shall be repaid out of the treasury on the warrant of the governor.

SCHEDULE C.

Goods being the growth, produce or manufacture of, or raised in, any of the islands composing the colony of the Leeward Islands, and goods upon which duty shall have already been paid in any Presidency of the said colony, except Dominica.

SCHEDULE D.

No. 2 of 1897. An ordinance to grant certain import and export duties.

No. 2 of 1898. An ordinance to amend the Tariff Ordinance, 1897.

No. 3 of 1902. An ordinance to amend Ordinance No. 2 of 1897, intituled 'An Ordinance to grant certain import and export duties.'

No. 3 of 1903. An ordinance to reduce the import duties on sugar and all other analogous products containing, in a notable proportion, sugar artificially incorporated.

TARIFF CHANGES.

ANTIGUA.

ORDINANCE NO. 6 OF 1905, TO AMEND THE CUSTOMS TARIFF ORDINANCE NO. 10 OF 1904.

(Assented to May 31 1905.)

1. This ordinance may be cited as the 'Customs Tariff Amendment Ordinance, 1905.'

2. In the sixth line of the paragraph commencing with the word 'Stores' in Schedule B to Ordinance No. 10 of 1904, there shall be inserted after the words 'of the' the words 'governor and all goods imported by the' and the said schedule shall be read and construed as if the words hereby inserted had originally appeared therein.

3. The following proviso shall be added to the said Schedule B, that is to say: 'Furniture and household effects for owners' use, the property of persons coming to reside for the first time in the Presidency, which are imported by them for their personal use and which have been in their use for not less than one year previously to the importation thereof—provided that such furniture and household effects be imported within one year after the owner has come to reside in the Presidency.'

4. The following proviso shall also be added to the said Schedule B, that is to say: 'Shipbuilding materials and accessories of all kinds, when imported for the construction, equipment or repair of a specific vessel above five tons burden, except rope and cordage of all kinds.'

5. The word 'dogs' shall be added to and included in the list of animals mentioned in Schedule A to the said Ordinance No. 10 of 1904, and the duty upon every dog imported, of whatever age, shall be 5s.

BAHAMAS.

THE TARIFF AMENDMENT (BREED IMPROVEMENT) ACT, 1905.

(Assented to April 18, 1905.)

Notwithstanding anything contained in the Tariff Acts, 1895 to 1900, all stallions, bulls, rams and poultry shall be hereafter exempted from duty under the said Acts and shall be included and read in the table of exemptions set out in the Tariff Act, 1895.

BRITISH GUIANA.

BRITISH INDIA.

CONVENTION BETWEEN THE UNITED KINGDOM AND FRANCE RESPECTING COMMERCIAL RELATIONS
BETWEEN INDIA AND FRANCE.

(Signed at London, February 19, 1903.—Ratifications exchanged at London,
March 27, 1905.)—

Art. 1. The following colonial products: coffee, cocoa, pepper, pimento, amomums and cardamoms, cinnamon, cassia lignea, nutmegs, mace, cloves, vanilla, and tea, produce of India, shall enjoy, on importation into France, Algeria, French colonies and possessions, and the protectorates of Indo-China and Tunis, the lowest customs duties applicable to similar products of any other foreign origin.

Art. 2. Reciprocally the natural and manufactured products of France, Algeria, French colonies and possessions, and the protectorates of Indo-China and Tunis, shall enjoy, without restriction or reserve, on importation into India, the lowest customs duties applicable to similar products of other foreign origin.

Further, the duties on vinegar in casks and copperas produced in France, Algeria, French colonies and possessions, and the protectorates of Indo-China and Tunis, and imported into India, shall not exceed $2\frac{1}{2}$ per cent *ad valorem*.

Art. 3. The certificates of origin which may be required for the admission of goods to the preferential conditions stipulated in the present treaty shall be *visé* by French consuls and by British consuls without levying consular fees.

Art. 4. The privileges and engagements comprised in this convention shall extend to native states of India which, by treaty with His Britannic Majesty or otherwise, may be entitled to be placed with regard to the stipulations of the convention on the same footing as British India.

His Majesty's government will communicate from time to time to the government of the Republic a list of these states.

Art. 5. The present convention shall be ratified by the two governments as soon as possible, and the ratifications shall be exchanged at London. It shall come into effect immediately after the exchange of ratifications, and shall remain in force until the expiration of a year from the day on which one of the high contracting parties shall have announced the intention of terminating it.

JAMAICA.

I.—THE SUGAR CONVENTION LAW, 1904.

(No. 10, dated April 21, 1904).

Whereas His Majesty the King and divers foreign powers have entered into a convention signed the fifth day of March, nineteen hundred and two, in relation to sugar;

And whereas provision is made under Article III., of the convention for the establishment of a permanent commission, with permanent bureau attached to it, charged with watching the execution of the provisions of the convention, in this law referred to as the permanent commission;

And whereas it is expedient to make provisions giving effect to the said convention, in so far as the same affects this island:

Be it enacted by the governor and legislative council of Jamaica, as follows, that is to say:

1. Where it is reported by the permanent commission that any direct or indirect bounty is granted in any foreign country on the production or export of sugars, the governor in Privy Council, may make a prohibition order, that is to say, an order prohibiting sugar from that country to be imported or brought into this island.

2. While a prohibition order is in force, the laws relating to customs shall apply as if the sugar in respect of which the order is made, was specified in the list of goods absolutely prohibited to be imported into this island by section 37 of the Customs Consolidation Law, 1877, (Law 18 of 1877).

3. The Governor in Privy Council may make such regulations as appear to him necessary in relation to any order under this Law, and may by these regulations in particular, require the origin of all sugar imported or brought into this island, whether in transit or otherwise, to be proved by certificate or other evidence, as may be provided in the order.

4. An order made under this law shall not apply to molasses, nor glucose, nor, except as expressly mentioned in this law, to sugar in transit.

5. The governor in Privy Council, may by order, revoke, alter or add to any order made under this law.

II. NOTIFICATION NO. 237, DATED JUNE 7, 1904, RELATING TO THE FOREGOING SUGAR CONVENTION LAW.

(*'Jamaica Gazette' of June 9, 1904*).

In the case of sugar imported from a British colony which has been decided by the Brussels convention to give bounties, such as Canada, and re-exported to a contracting state, or to the colony of a contracting state, it will be necessary to see that such sugar is accompanied by a certificate of origin.

III.—EXTRACT FROM 'THE JAMAICA RUM PROTECTION' LAW, 1904.

(*No. 26 dated September 1, 1904*).

2. For the purposes of this law there shall be raised, levied, and paid into the treasury, to an account to be called 'The Jamaica Rum Protection Account,' an export duty of ten pence on every puncheon of rum, the produce of this island, exported from this island, which duty shall become due at the time of exportation, and be levied, recovered and received by His Majesty's officers of customs under the powers of the Customs Consolidation Law (18 of 1877), and any laws amending the same, and paid over to the treasurer at the same times and in the same manner as other duties of customs collected under Acts of this island imposing duties of customs; and the duties hereby provided shall be levied at the port of shipment, and shall be paid by the person exporting such rum, at the port of shipment, prior to the exportation of such rum.

8. This law shall remain in force for a period not exceeding 5 years from the first day of August, 1904.

IV.—THE TARIFF LAW 1899, AMENDMENT LAW, 1905.

(*No. 2, dated March 14, 1905*).

Be it enacted by the governor and legislative council of Jamaica, as follows:

1. The first schedule to the tariff law, 1899 (Law 20 of 1899) is hereby amended, by adding to the list of articles therein mentioned, after Article 77, the words following, that is to say:

'78. Crude petroleum, when admitted with the sanction
of the governor in Privy Council per gallon..... £ 0 0 1'

2. The governor in Privy Council is hereby authorised to sanction the admission of crude petroleum on the payment of an import duty of one penny per gallon, subject to such terms and conditions as the governor in Privy Council may think fit.

3. In this law, and in the Tariff Law 20 of 1899, as hereby amended, the expression 'crude petroleum' means natural petroleum which has not been steamed nor refined in any way.

4. The First Schedule to the Tariff Law, 1899 (Law 20 of 1899) is hereby further amended, by deleting therefrom the figures, letters and words following, that is to say:

'40. Matches, lucifers and others, per gross of 12 dozen
boxes each box to contain 100 sticks, and boxes containing any greater or lesser quantity to be charged
in proportion. £ 0 3 0'

And substituting therefor the following:

'40. Matches, lucifers and others, per gross of 12 dozen
boxes, each box to contain 50 sticks or less, and
boxes containing any greater quantity to be charged
in proportion. 0 1 9'

5. This law is hereby incorporated and shall be read as one with 'The Tariff Law, 1899' (Law 20 of 1899).

V.—LAW TO INCREASE TEMPORARILY THE IMPORT DUTIES IMPOSED BY THE TARIFF LAW, 1899.

(No. 3, dated March 16, 1905).

Be it enacted by the governor and legislative council of Jamaica, as follows:

1. This law shall be construed and read as one with the Tariff Law, 1899—No. 20 of 1899—referred to hereinafter as the principal law, and as one with any law amending the same.

2. On and after the coming into operation of this law, there shall be raised, levied, collected and paid unto His Majesty the King, his heirs and successors, for the use of the government of this colony, in addition to the import duties imposed by the principal law and any law amending the same, a surtax upon such import duties, at and after the rate of six pounds upon every one hundred pounds of the amount of such duties, that is to say: the import duty upon all goods upon which special rates of duty are charged, and the duty charged upon the value of goods subject to such *ad valorem* duty shall, upon importation into this colony, be increased to the extent and after the rate of six pounds upon every one hundred pounds of the amount of such import duties, and so in proportion upon every greater or less amount of such duties.

3. Unless previously repealed this law shall continue in force until and including the thirty-first day of March in the year 1906.

SOUTHERN NIGERIA.

I.—PROCLAMATION NO. 2, DATED FEBRUARY 13, 1905, RELATING TO THE EXPORTATION OF COTTON SEED.

In virtue of this proclamation, the exportation of cotton seed from the protectorate of Southern Nigeria, is prohibited as from March 1, 1905.

II.—PROCLAMATION NO. 3, ENACTED ON FEBRUARY 27, 1905, BY H. B. M. HIGH COMMISSIONER FOR THE PROTECTORATE OF SOUTHERN NIGERIA.

1. This proclamation may be cited as 'The Customs Tariff Proclamation, 1905,' and shall be read and construed as one with 'The Customs Tariff Proclamation, 1904,' which is hereinafter referred to as the principal proclamation.

2. Section 5 of the principal proclamation is hereby amended by omitting the words 'by inland navigation or overland carriage' from the last paragraph thereof.

3. The first schedule to the principal proclamation is hereby amended as follows:

(1) Paragraph 1 is repealed and the following substituted therefor:

£ s. d.

(i.) On brandy, gin, rum, liqueurs, perfumed, medicated and miscellaneous spirits or strong waters, not being sweetened or mixed with any article so that the degree of strength cannot be ascertained by Sykes' hydrometer, for every imperial gallon not exceeding the strength of twelve and one-half degrees under proof by such hydrometer. 0 3 6

And for every degree or part of a degree in excess of twelve and one-half degrees under proof by such hydrometer, an additional duty per imperial gallon of one half-penny. 0 0 0½

Provided that it shall be lawful for the High Commissioner, by order, to provide that from and after a date being not less than three months from the date of the said order the strength of the said spirits shall be ascertained by Tralles' hydrometer in place of a Sykes' hydrometer as aforesaid—a strength of fifty per centum by the said Tralles' hydrometer being considered as equivalent to a strength of twelve and one-half degrees under proof by the said Sykes' hydrometer, and other strengths in proportion— and to give all directions necessary and consequential thereto.

(ii.) Paragraph 2 is amended by substituting a duty of four shillings for the duty of three shillings as therein provided.

4. The second schedule to the principal proclamation is hereby amended as follows:

(i.) Paragraph 1 is amended by omitting the words 'by land navigation or overland carriage' therefrom.

(ii.) Paragraph 16 is amended by omitting therefrom all the words following the word 'establishments.'

(iii.) Paragraph 26 is repealed and the following substituted therefor:

Patterns, samples, show-cards and advertisements passed as such by the Collector of Customs and subject to any regulations in that behalf made by the High Commissioner.

(iv.) Paragraph 28 is repealed and the following substituted therefor:

Bona fide produce natural or mineral products of West Africa.

(v.) The following paragraph is inserted after paragraph 23:

23a. Oil of any kind imported *bona fide* for use as a motor power for engines or machinery of any kind and not for lighting purposes, and subject to any regulations in that behalf made by the High Commissioner.

3. This proclamation shall commence and come into force on the first day of March, in the year of our Lord one thousand nine hundred and five.

SOUTH AFRICAN CUSTOMS UNION.

I.—SOUTHERN RHODESIA GOVERNMENT NOTICE NO. 200, DATED AUGUST 11, 1904, RELATING TO THE REBATE OF CUSTOMS DUTY ON RE-EXPORTED GOODS.

It is hereby notified for public information that His Honour the Administrator has, by virtue of the powers conferred upon him by Section 15 of the 'Customs Ordinance, 1903,' been pleased to order that government notice No. 202 of 1903 shall on

the 12th instant be cancelled, and that in lieu of the provisions thereof a rebate of the whole of the Customs duty shall be allowed on goods imported or warehoused on importation into this territory, whenever such goods shall be exported to places outside the Customs Union in accordance with the regulations from time to time prescribed in that behalf, provided always that:

In respect of the following goods entered on or after August 12, 1904, for export to Barotziland, North Western Rhodesia, viz.:

Tariff Item.

- 1 Ale, beer and cider.
- 4 Beads, known as 'Kaffir Beads.'
- 30 and Section 7 (of the said ordinance) spirits.
- 33 Tobacco.
- 35 Wine.
- 37 Blankets and sheets, or rugs, cotton or woollen, or manufactures of cotton and wool, commonly used as cotton or woollen blankets or rugs, the single article, in pairs or in the piece; and coats, jackets, or other apparel made of blanketing or baize.
- 47 Shawls.
- 144 All goods customarily imported for native trade; a rebate of only one-fourth of the Customs Duty shall be refunded or allowed to the owners of such goods.

II.—TREASURY (CAPE TOWN) NOTICE NO. 231, OF FEBRUARY 27, 1905, RESPECTING CUSTOMS REGULATIONS IN REGARD TO THE IMPORTATION OF SUGAR INTO CAPE COLONY.

(*The Cape of Good Hope Government Gazette of February 28, 1905.*)

1. On and after September 1, 1903 (being the date of the coming into operation of the convention signed at Brussels on March 5, 1902, between Great Britain and divers foreign powers for the suppression of bounties granted on the production and export of sugar), a special additional duty equivalent to the bounties granted on sugar from certain countries, which are not parties to the Brussels sugar convention, shall be levied and collected on importation into this colony of such sugar.

This special surtax has been provisionally fixed for the following countries at the undermentioned rates:

		Raw Sugars.		Refined Sugars.	
		s.	d.	s.	d.
Denmark..	per 100 lb.	0	7½	1	3
Spain..	"	9	8½	9	8½
Japan (candied)..	"	—	—	0	11¼
Japan (others)..	"	—	—	—	—
Argentine Republic..	"	18	0	18	0
Roumania..	"	6	4½	8	1
Russia..	"	2	2¾	2	11¼
Chili..	"	2	1¾	4	9

2. In order to secure the carrying out of the preceding regulations any person importing into this colony any sugar for consumption, refining, or manufacture, must produce to the proper officers of Customs, at the election of the latter:

- a. A signed statement by the suppliers on the invoice or otherwise;
- b. A certificate of origin duly signed by the producers or manufacturers; or
- c. Such other or further evidence as such officers of Customs may require; proving the country of origin or manufacture of the said sugar.

3. In the event of the sugar coming under the head of refined sugar, originating from a factory established in a non-contracting state, the evidence must show that such

sugar is manufactured in a factory not utilizing sugar originating from a state liable to the special duty.

4. If the evidence required by the preceding regulations is not forthcoming at the time of importation, the goods must be immediately re-exported under the supervision of the Customs officers, or deposited, under detention, in an approved Customs warehouse until such evidence is obtained.

Form of certificate prescribed to obtain admission of sugar from states not granting bounties on sugar, without being subject to the special duty imposed under Article 5 of the Customs Union convention and Section 7 of Act 5 of 1903:

(¹) I,, the manufacturer (or producer) (or supplier) of the sugar mentioned in this invoice, have the means of knowing, and do hereby certify that the said sugar is the produce or manufacture of (²) (and I hereby certify that said sugar was manufactured in a factory not utilizing sugar originating from a state liable to the special duty) (³).
Signed.

III.—NATAL GOVERNMENT NOTICE NO. 55, OF 1905, RESPECTING CUSTOMS REGULATIONS IN REGARD TO THE IMPORTATION OF SUGAR INTO NATAL.

The Regulations relative to the importation of sugar into the colony of Natal are identical with those framed for Cape Colony (See Ch. II., above).

IV.—EXTRACT FROM ACT NO. 26, PROMULGATED JUNE 2, 1905, INTITULED ‘ACT TO IMPOSE AN EXCISE DUTY ON FOREIGN SPIRITS, AND TO CONTINUE PART II. OF THE ADDITIONAL TAXATION ACT, 1904.’

(The Cape of Good Hope Government Gazette of June 2, 1905.)

1. From and after June 15, 1905, there shall be payable to the colonial revenue upon every gallon of foreign spirits sold, removed, or disposed of by a retail dealer, or sold, removed or disposed of by a wholesale dealer to any person other than a licensed dealer in spirits, and on every gallon of foreign spirits, in excess of 5 gallons, in the custody or possession of any person other than a wholesale or retail dealer on that date, and on every gallon which may thereafter come into the possession of such other person, and in respect of which the duty hereby imposed has not been paid, a duty of excise at the rate of six shillings per gallon, if the spirits do not exceed the strength of proof with a proportionate increase in case the spirits be of greater strength.

2. The term foreign spirits as defined in Section 2, Part I., of the Additional Taxation Act No. 36 of 1904, shall not include for the purposes of this Act spirits manufactured in any colony or territory in the Customs Union, from the growth or produce of such colony or territory.

V.—TREASURY (CAPE TOWN) NOTICE NO. 914, OF AUGUST 25, 1905, AMENDING THE CUSTOMS REGULATIONS IN REGARD TO SUGAR IMPORTED FROM THE ARGENTINE REPUBLIC INTO CAPE COLONY.

(The Cape of Good Hope Government Gazette of August 29, 1905.)

On and after July 1, 1905, the following shall be the special surtax payable on sugars imported into this colony from the Argentine Republic:

	s.	d.
Refined sugar. per 100 lb.	7	2
Unrefined sugar. “	5	5
Sugar candy. “	5	9

(¹) Full name.

(²) Name of country in which the sugar was made or produced.

(³) This further certificate is to be given when such sugar emanates from a factory established in a non-contracting state.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B, YOKAHAMA, October 4, 1905.

GINSENG AND ITS USES.

United States Consul Miller, at Niuchwang, China (now at Yokahama), in a report last year, describes ginseng as 'the most important and valuable of all the medicinal plants grown in Manchuria.'

WHERE CULTIVATED.

In Japan ginseng is chiefly cultivated in the north-eastern parts of the country. The greater part of the produce is exported to China; the remainder being used for home consumption for medicinal purposes.

VALUE EXPORTED.

The value of ginseng exported from Japan during recent years was as follows:—

1904..	\$203,797
1903..	187,464
1902..	184,754
1901..	226,462
1900..	203,835
1899..	238,434
1898..	211,919
1897..	242,113
1896..	217,630
1895..	186,824

THE MORE VALUABLE.

The wild ginseng, or that which matures in an entirely wild state, is more valued than the cultivated root, because it is believed to be more efficacious. The wild root generally brings the higher prices. The transplanting of the wild root and its culture or nursing to maturity distinguish the second quality. The greater part of the Japanese and Manchurian product is grown from the seed, and is, therefore, the wholly cultivated plant, which constitutes the third grade in value. Ginseng is widely used in China, and wherever used it is as medicine, tonic, or stimulant. The trade is not regarded as being objectionable in any way, but quite legitimate. The Chinese class the American product generally as inferior in quality.

THE ROOT PREPARED.

The preparation of the root for the market is somewhat elaborate, and is also somewhat varied according to the fancy or taste of the particular market catered for. Scope is also found for the proverbial ingenuity of the 'childlike and bland' amongst the Orientals, in the making of the worse appear the better quality; which, however, is not exclusively an Oriental development. The best example of the facility with

which the Chinaman can take advantage of opportunity is given by Mr. Consul Miller. It appears that a series of fine, parallel, horizontal wrinkles or indentations in the head of a ginseng root stamp it as of the greater value in the eyes of the connoisseur, as indicative of age, the older being the more valuable. But a counterfeit high quality, Mr. Miller says, is produced by the Chinese in Manchuria by winding the head around with thread, so that when the steaming process, to which it is subjected, causes the head to swell, the thread produces the required wrinkles, which remain after the subsequent drying. But the subtle Chinese mind may rest upon the plea that the heinousness of the minor fraud is wholly mitigated by that of the relative major one. If ginseng, as a medicinal agency, is itself a fraud, then perhaps upon the principle that the greater includes the less, a bill of indictment should hardly lie against the author of the thread-produced wrinkles.

ITS PECULIAR WRINKLES.

A gentleman connected with the British administrative service in China for years, informs me in substance that the virtue of ginseng as a medicinal agency is not undisputed; that the best that can be said for it is that it is possibly harmless; and that scientific medical authority scouts what is regarded as its chief claim, that of therapeutic usefulness. That it is efficacious in preserving or restoring to old age the virility of youth, a virtue which is claimed more especially for the wild variety, though authoritatively stamped as a popular delusion, is yet a prevalent idea, and so long as it prevails will probably insure to ginseng the repute of a valuable commodity, and therefore an important commercial status.

VALUE OF GINSENG.

Referring again to Mr. Consul Miller's report, dated in February, 1904, it says:—

'It is impossible to state even approximately the value of ginseng, for the real wild root has been known to realize a thousand times its own weight in silver, while ordinary cultivated ginseng may be purchased in the market for \$1.70 a catty of 1½ lbs. Like most things in China, the sentiment of age adds much to its value. Specimens from 40 to 50 years old have been known to sell at fabulous prices.

'The price varies according to the size of pieces, and locality from which they come. The present prices (February, 1904) are as follows:—

' Wild, per ounce.	\$37 08
' Cultivated, from Kirin, per catty (1½ lbs.)	0 61
' " Tao Tou Kiang, per catty (1½ lbs.)	0 43
' " Wang Shing, mountain near Mukden per catty (1½ lbs.)	1 73
' " Shih Ku Tsu, Chang Shau mountain, per catty (1½ lbs.)	1 05
' 45 pieces to the catty	1 05
' 25 pieces to the catty.	2 60

'The value is governed by the number of pieces required to make a catty, the largest being considered the more valuable.'

THE EXPORTING COUNTRIES.

The countries of export to China are the United States, Japan and Korea. In 1899 there was imported into China from Korea 180 piculs of 133 lbs. each, valued at \$299,426; in 1902 importation amounted to 544 piculs, valued at \$663,350. All Korean ginseng is cultivated. The very large increase of export within the above three years may be due to cultivation stimulated by monopoly, since about that time a leading Japanese financial and commercial corporation secured and now enjoys the exclusive control of the Korean product.

SURVIVES THE COLD.

The climate in Manchuria and Korea, where ginseng is grown, is comparatively dry and cold, that grown in the mountain districts of Manchuria being subject to a winter temperature casually of 30° and 40° F. below zero.

CARE IN PREPARATION.

Another recent consular report says, 'the demand for a market for American ginseng in China still continues. I am in receipt by every mail from all parts of the United States asking for market quotations for ginseng, and for the names of buyers here. . . . It is absolutely necessary for the buyers here (China) to be shown the stuff before they will buy. The purchaser will not take the word of another as to quality or condition. Chinese buy their ginseng after carefully sorting it themselves, and would no more purchase at a distance than we would buy a horse with our eyes blindfolded. Even the largest transactions in ginseng are effected only after thorough inspection.'

ACTIVE DEMAND.

From a report by Mr. Consul-General Rublee at Hong Kong, date, January, 1902, the following particulars are in substance taken:—

The sale of ginseng root grown in America is very considerable at Hong Kong, and the demand is so great that much more could be disposed of advantageously. The ginseng root is as indispensable to the well-to-do Chinese as is their rice. They attribute all sorts of medicinal virtues to the root, especially using it as a stimulant. The growth of the ginseng trade, especially during the last three years, has been marked and higher prices are now being paid than ever before. Growers of ginseng may confidently expect a steadily increasing market in Hong Kong, which is largely a distributing centre. The root is prepared in this city. The average value of American ginseng annually received at Hong Kong is from \$1,700,000 to \$1,800,000, Mexican silver. The importation of Korean ginseng is valued at about \$800,000, Mexican, and there is a small importation of the Chinese product at Hong Kong (a British port) amounting to about \$45,000 gold, but 'though the quantity is small, its value is computed at twenty to forty times its weight in silver.'

CLASSIFICATION.

The wild dried American root, as imported into Hong Kong, may be classified into three grades, generally known to the trade as fair, good and extra; and the present value of these grades respectively, in American currency, may be put at \$4.05, \$5.25 and \$6.18 per pound. Little cultivated root from the United States has as yet been imported into Hong Kong. The value of a few small shipments averaged \$1,426.80, American currency, per 133 lbs. The consul remarks that 'the American cultivated root was much liked by the native buyers, and its cultivation ought to be pushed with energy in the United States.' By all means the growers should be careful to learn and to conform to the requirements of the Chinese market. Mr. F. J. V. Jorge, 24 Bank Buildings, Hong Kong, is mentioned by the consul as having handled American ginseng for over twenty years, and as being a most experienced merchant in that line, and one whom inquirers should communicate with.

ALEX. MACLEAN.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(*Mr. D. H. Ross.*)

P. O. Box 140, MELBOURNE, October 2, 1905.

LARGE SHIPMENTS FROM NEW YORK TO AUSTRALIA.

Considerable interest was aroused in the recent arrival at Port Melbourne of the ss. *Cufic*, of the White Star line, with the largest cargo—in quantity and value—which ever left New York direct for Australia. The *Cufic* brought to Fremantle, Melbourne and Sydney over 12,000 tons of general freight to the value of over \$1,500,000. Included in the cargo were some 48,000 cases kerosene oil, 3,000 cases benzine, and 4,889 packages of lubricating oil and grease. The balance comprised the usual miscellaneous assortment of goods and raw materials as produced in the United States and Canada.

ADVANCE IN FREIGHT RATES FROM NEW YORK.

The recent advance in freight rates from New York to Australia is influencing the local markets in heavy and bulky lines, such as rosin, plaster, special lumber and metal goods in which freight constitutes an important proportion of the cost of importation. Under existing conditions it is more than ever imperative that Canadian exporters should secure the lowest inland railway freight from factory point upon shipments made at New York.

HIGH CLASS CANADIAN UNDRESSED FURS.

Owing to climatic conditions, fur garments are more worn in the State of Victoria than elsewhere in Australia. There is, therefore, a demand in Melbourne for high class Canadian undressed furs, with the heads, legs and tails complete. A special inquiry (Trade Inquiry, No. 1091) has been forwarded to the Department of Trade and Commerce, Ottawa, on behalf of Melbourne wholesale buyers, which offers an exceptional opportunity for Canadian dealers in undressed furs to open up a valuable business connection. There is no customs duty on undressed furs. Orders will be supported by a letter of credit, so there is absolutely no element of risk to the sellers once the buyers are assured that the values and qualities can be depended upon.

AUSTRALIAN FURRED SKINS.

With a view of assisting the increase of reciprocal trade between Canada and Australia, I shall, upon application, be pleased to forward to Canadian furriers particulars of the fur skins exported from this country to England and elsewhere. Such furs as Australian wallaby, opossum, omeo, kangaroo and the better class of rabbit skins should, if properly introduced, find an increasing sale in Canada, where there is a constant demand for fur garments in varied character and qualities.

ICE SKATING RINKS IN AUSTRALIA.

In Australia, where the thermometer, at its coldest inhabited point, rarely falls to freezing point, ice skating is indeed an attractive novelty. The great financial

success achieved by the only ice skating rink in the commonwealth, at Adelaide, has induced the promoters to shortly establish rinks at Melbourne and Sydney, and at other populous centres later on. A convenient site has been secured in Melbourne, the necessary refrigerating machinery has been ordered, and within six months it is contemplated the rink will be in full operation.

MARKET FOR CANADIAN SKATES.

The skates used at the Adelaide rink are mostly of an inferior and nondescript character. There will be an undoubted demand in Melbourne for a superior article, in ordinary steel as well as plated. Canadian manufacturers of improved skates should, without delay, forward several sets of catalogues, illustrations, and price lists for wholesale quantities to this Canadian Commercial Agency, in order that firms contemplating stocking the line may have full particulars submitted to them. There is sure to be competition from other sources of supply, so it is essential that no obsolete goods should be offered or 'fancy prices' quoted. In case samples may be required it would be advisable to have a code word for each line, and the manufacturers should also indicate their cable address. An inquiry (Trade Inquiry, No. 1092) from a Melbourne firm, for Canadian skates is being forwarded by this mail to the Department of Trade and Commerce, Ottawa.

METAL CEILINGS AND ART STEEL GOODS.

A tender was accepted last week for the erection of a new railway station at Melbourne, the expenditure being estimated at nearly \$550,000, exclusive of the cost of the foundations. It is stated that metal ceilings and art steel goods to the value of about \$60,000 will be required in the completion of this fine block of buildings. Owing to the absence of the contractor from this city, the specifications could not be seen, nor the conditions ascertained prior to the closing of this mail. There are three companies manufacturing steel ceilings in Australia, one being a fairly large concern, but Canadian manufacturers of this line of goods will be fully advised by next mail, if they can submit estimates, designs, &c., and all the conditions in regard thereto.

CONTRACT FOR COPPER WIRE.

The necessary votes having been passed by the Commonwealth Parliament, tenders will be shortly invited by the postal authorities for the supply of about 500 tons of copper wire—of a quality weighing 600 lbs. to the mile—which will be required for the construction of the telephone line between Melbourne and Sydney.

DEVELOPMENT OF AUSTRALIAN FLOUR EXPORTS.

A development of some importance in Australian trade during the past two years has been the increased export of flour to outside destinations, in addition to the exports of wheat. During 1900 and 1901, a certain amount of progress was made, the value of exports beyond the Commonwealth in 1900 being £430,313, while in 1901 it was £589,604. A falling off took place in the two following years, to be succeeded by a recovery in 1904 to £792,772. This year still further progress has been made, and during the past nine months a total value of about £930,000 has been reached. The development is an important one, and it has taken place under open competitive conditions. Almost every week large shipments of flour are made at Melbourne for South African ports.

AUSTRALIAN BUTTER PRODUCTS.

The shipments of Australian butter for London are now steadily increasing as the season advances. The total shipments to England since July 1 to date exceeds

2,700 tons, being an increase of about 500 tons over the corresponding period of last year. The prices realized are higher than for some time past, as some specially choice Victorian butter was sold last week in London at £5 14s. per 112 lbs., or a fraction over 24 cents per lb. The dairying industry throughout all the states is enjoying wonderful prosperity.

AUSTRALIAN SANDALWOOD OIL.

Western Australia is noted for its exports of sandalwood, particularly to the east. A sandalwood oil distillery has recently been established in that state, and the proprietors are anxious to secure a portion of the Canadian business in their line. An inquiry (Trade Inquiry, No. 1093) has been forwarded to the Department of Trade and Commerce, Ottawa, from whom the address of the manufacturers is available.

CANADIAN TRADE NOTES.

The representative of a number of Canadian manufacturers is this week making his first trip to South Australia, from whence he proceeds to Western Australia, with a varied collection of samples. This traveller has recently completed a tour of Tasmania with satisfactory results. Orders for Canadian carriages—built strictly to Australian specifications—are being regularly sent forward in increasing volume. Owing to improved representation in Australia, there has been recently, to my personal knowledge, a very substantial increase in the value, as well as in variety, of goods ordered from Canadian sources of supply.

D. H. ROSS.

CHICAGO.

REPORT OF COMMERCIAL AGENT.

(*Mr. E. D. Arnaud.*)

CHICAGO, PULLMAN BUILDINGS, November 1, 1905.

NATIONAL DAIRY SHOW.

Official notification has been received at this agency of the National Dairy Show, which is to be held at the Coliseum, Chicago, February 15 to 24, 1906, inclusive, in connection with the twelfth annual convention of the National Creamery Butter Makers' Association, under the management of the National Dairy Show Association. A limited number of printed forms of contract for floor space, together with the plan of the building, can be had upon application to the Department of Trade and Commerce, or by addressing the secretary of the National Dairy Show Association, Chicago.

FREE SPACE FOR CANADIANS.

Arrangements have been made with the secretary of the Dairy Show, whereby any exhibit made through this agency will be given free space. It is hoped that Canada will make a good exhibit, and if so, the committee of management will advertise that section. Canadian exhibitors must be prepared to pay expenses of erecting the necessary platform, and for the payment of wages for the care of the exhibit during the ten days' show.

SHOULD GIVE AWAY SAMPLES.

It would also be well for exhibitors to inform me how much of their exhibit they would be willing to allow the attendants to give away as samples, as I would suggest a small portion of biscuits and cheese should be given free to visitors. The secretary also suggests that the exhibition might include biscuits or crackers suitable to be eaten with cheese.

I may repeat what I have already said that I am of opinion there is a good market here for the finer varieties of Canadian Stilton cheese, if properly introduced, and at the present time Canadian cheese put up in jars can be purchased at many of the retail stores in this city.

A considerable quantity of English Stilton is annually consumed in the leading clubs and hotels, showing that there is a demand for an article of superior quality of this kind.

E. D. ARNAUD.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(*Mr. W. A. MacKinnon.*)

BRISTOL, ENG., October 31, 1905.

WELSH ANTHRACITE FOR CANADA.

A recent visit to Swansea and Cardiff revealed the fact that Welsh coal exporters are still looking for new markets, and are anxious to give eastern Canada a fair trial with their best grades of anthracite. Several firms have expressed their intention of endeavouring to supplement previous occasional shipments by regular cargoes of from one to three thousand tons.

THE FREIGHT QUESTION.

It has been thought hitherto that the freight rates on outward cargoes would be prohibitive, as against any efforts to compete with Pennsylvanian coal in the Canadian market; but owing to relatively high prices now prevailing in Quebec and Montreal, it is thought that the freight rate and other expenses can be successfully met, if only the highest grade of coal is shipped.

BREAKING DOWN IN TRANSIT.

A serious difficulty in the way of accepting orders for the smaller sizes of coal, such as egg and nut, is that if such sizes are loaded at Swansea, they will on arrival in Canada show a considerable proportion of 'small' and dust, owing to the grinding caused by the ship's motion. Leading exporters, in discussing this matter, made a suggestion that orders should be given for large coal, and that the Canadian importers should arrange to break it into the desired size, and to screen it at the port of delivery. This method would, of course, mean a considerable reduction in the price to be paid here, which reduction most of those interviewed estimated at or about four shillings a ton.

SUPERIOR ANALYSIS OF WELSH COAL.

The samples of Pennsylvanian coal, furnished by the Manufacturers' Association to show the various sorts with which the Welsh trade would have to compete, have been inspected by the Cardiff and Swansea exporters. These have been analyzed by an expert and the results made known. Members of the trade in Swansea are absolutely of one mind, to the effect that the best grades of local anthracite far outclass in economic value the samples submitted. If their contention is correct, and can be borne out by experience, Canadian consumers should be in a position to benefit by a material improvement in the quality of the coal offered them; and unless estimates of cost are very far wrong they should be able to procure the higher quality of coal from South Wales at the same price as they now pay for Pennsylvanian anthracite.

APPLES.

I have just been called in to examine a lot of Canadian apples recently landed here for sale on commission. These consisted of a number of varieties, including King, Greening, Pewaukee, Cranberry Pippin, Hubbardston and others. The receiver stated that the fruit was not in good condition, and he therefore offered facilities for its examination.

BARRELS ARRIVING 'SLACK.'

Not one barrel of the twenty or more which I examined was 'tight,' as all should have been on arrival. It seems hardly possible that these could have been properly packed at the point of shipment; if so, the fruit must have been subjected to high temperature at some stage of the journey, for there was a large proportion of rotting and soft fruit. As the inspector for the Department of Agriculture stated that they were carried in a well ventilated part of the ship (No. 1 'tween-decks'), it is hardly to be supposed that the damage began on board ship, and I am inclined to fear that the fruit was never properly cooled before it went aboard at Montreal. The shipper has been notified, but it is to be hoped that other exporters will take warning. Especially in a season when good fruit is commanding such excellent prices, it is very regrettable that profitable returns should be lost owing to the want of protection from heat between the time of packing and of loading on board ship.

TOO MANY VARIETIES.

It is, of course, impossible for shippers to throw away all the less popular varieties and to confine their shipments to a few of the leaders; so long as the trees live, or until they can be top-grafted, these grades must be marketed, but I think that odd varieties and mixed lots would do better in the larger and more highly organized markets on this side. The Bristol market is just in process of development, and should have special care. The trade here express the opinion that five or six varieties are all that they require, and have recommended some of the following: Spy, Baldwin, Greening, King and Golden Russet. The Snow is very popular in the early part of the season if it can be landed in good condition.

A SUCCESSFUL SHIPMENT.

An Oakville exporter has just sent a very good lot, showing less than ten per cent of 'slacks,' the private sale of which so far as it has gone has yielded excellent prices. This lot included some King, Spy, Greening, Mann and Colvert, and was not on the whole of the highest quality, many of the barrels being marked No. 2 (or XX), but the prices realized are much better than could be got for so called No. 1 grade if improperly packed or out of condition.

WEEKLY SAILINGS.

The Canadian Pacific Railway and the Dominion Line have, I understand, decided to continue for the present their system of fortnightly sailings, taking alternate weeks, the former from St. John and the latter from Portland. This will give a much better service than was offered last winter, being in fact equal to the summer service. Canadian exporters, who appreciate the immense importance of regular sailings, and who desire to see them continued, will it is hoped patronize the service to the full during the coming winter, in order to demonstrate the success of the experiment and ensure its continuance.

W. A. MACKINNON.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kilison.*)

RHODES BUILDING, CAPE TOWN, October 10, 1905.
P.O. Box 1232.

WROUGHT SCRAP IRON.

An inquiry was recently made to this office as to the practicability of purchasing large quantities of scrap iron for shipment to Canada for use in Canadian rolling mills.

QUANTITIES AVAILABLE.

I beg to advise that quantities of this article varying from a 100 to 500 tons can at intervals be purchased at each of the following ports: Cape Town, Port Elizabeth, East London and Durban.

PROBABLE COST.

As a large proportion of the total supply is disposed of by corporations such as the Cape Government Railways, Natal Government Railways, Table Bay Harbour Board, &c., &c., by tender to the highest bidder, it is difficult to give an all round selling price, but present holders of supplies in Cape Town consider that recent continental offers have fixed the export value to be at present 48s. (\$11.68) per 2,240 lbs., f.o.b., Cape Town.

WOOD PULP OR MEAL.

Large quantities of wood pulp or meal are imported into South Africa for use in the manufacture of dynamite, the best quality is made from white pine, which variety possesses especially good absorbing properties.

STYLE OF PACKING.

Present suppliers ship this article compressed in bales of 400 lbs. each, and also in bags of 120 to 130 lbs. each, but the former method is preferred.

SOURCE OF PRESENT IMPORTS.

Heretofore the demand for this article has been supplied by United States and German manufacturers, but there is no reason why Canadians should not capture at least a portion of this trade.

FARMERS AND CO-OPERATION.

The Cape Colony government having decided to financially assist agricultural co-operative societies, has appropriated \$730,000 for this purpose.

The following regulations re loans have received official sanction:—

A co-operative association shall consist of not less than seven members.

Advances will be made against such security as government considers adequate.

Interest will be charged at the rate of 4 per cent per annum on all loans.

Provision will be made for a sinking fund.

MEXICO.

REPORT OF COMMERCIAL AGENT.

(*Mr. A. W. Donly.*)

APARTADO, 2029,
MEXICO CITY, MEX., November 6, 1905.

THE IMMEDIATE OUTLOOK.

Owing to the large shortage in the domestic wheat crop for the present year and the high price of this staple in the north, making it almost impossible to profitably import the foreign grain, the demand for corn has been greatly increased and a consequent considerable advance in the price of this article has been the result. At this writing the price of corn in the local market is more than sixty per cent higher than it was six months ago. This serious rise in the price of the chief staple of the lower and middle classes is also being contributed to by the prospect of a considerable shortage in the crop that will be harvested during the next two months, said shortage being due to a too early cessation of the rainy season.

TARIFF REDUCTION ON WHEAT.

On July 1st the duty on wheat was reduced 70 per cent and this reduction will remain in effect until December 31st unless previous to that date the Executive should decide to extend the term. Should the situation grow worse in the near future, as now seems more than likely, not only may the duty on wheat be raised entirely, but that on corn also.

With the price of these most important cereals at high water mark, it is more than likely that the good times recently prevailing here may receive a serious, if temporary check. The stabilization of the currency has been productive of a considerable revival in railroad building and other industrial enterprises. Now, however, with dear bread, we may certainly expect to see an otherwise increasing import trade seriously curtailed.

SUGAR CROPS.

While the great wheat and corn districts have been so seriously affected, the sugar districts have been more fortunate and the prospects are good for a record crop. A very few years ago Mexico had practically no sugar to offer for export. During the fiscal year ending June 30, 1904, the exports of sugar amounted to 16,300 tons of a value, in gold, at the present rate of exchange, of \$1,180,000. Of this Great Britain purchased 13,880 tons and the United States 2,400 tons, the small balance going principally to India.

Statistics for the last fiscal year are not yet available, but it is a well known fact that the crop is considerably larger from year to year as each year the acreage is being greatly increased. Now that the Canadian refineries are directly connected with this market, by the establishing of the Canadian-Mexico Steamship Line, and as this line will undoubtedly be able and willing to grant very favourable freight rates, it would certainly be to the advantage of the Canadian refiners to purchase their raw product in this market. Any advantage they may enjoy, through the preferential tariff, with West-Indian sugar is more than counteracted by the cheaper labour here, and the lower cost of land.

TOBACCO EXPORTS.

The exportation of both leaf and manufactured tobacco has also reached very considerable proportions during recent years. During the fiscal year above quoted, the exportation of leaf tobacco reached a total of 1,600 tons, valued at \$950,000.

This was exported as follows:—

	Tons.	Value.
Belgium.	781	\$455,000
Germany.	712	437,000
United States.	60	39,000
Peru.	30	4,300
Great Britain.	19	11,000

The small balance going to various countries, in small quantities, but not a pound direct to Canada.

Manufactured tobacco (cigars and cigarettes) was exported to the value of \$170,000, the principal purchasers being :

Great Britain.	\$90,000
United States.	24,000
Germany.	16,000
France.	11,000
Guatemala.	7,000
Colombia.	5,000
Panama.	4,000

As the best Cuban product is controlled by one or two interests, the great majority of manufacturers are compelled to be content with an inferior article, undoubtedly not as good as that obtainable in this market. Amongst a large number of consumers the best Mexican grades are even preferred to the choice Cuban leaf from the Vuelta Abajo district.

TOBACCO PRODUCTION.

As an indication of the immense quantity of tobacco now grown in Mexico, I give the total manufactured product for the fiscal year, of which but a very small amount was exported:—

	Tons.	No. of packages..	
Cigarettes.	7,723	..	467,950,000
Cheroots.	458	" cheroots ..	88,150,000
Cigars.	374	" cigars. . . .	53,545,000
Total	8,555		

To this must be added the 1,600 tons exported leaf tobacco, making a grand total of 10,155 tons.

Compared with previous years, the domestic manufacture was considerably in excess of the next largest, viz., 1902-03, except in the case of cigars, which show a decrease of 65 tons in the amount consumed in their manufacture.

COFFEE.

To-day Mexico is second only to Brazil in the Western Hemisphere as a producer and exporter of coffee, and the Brazilian article, in quality, cannot compare with the Mexican. In the year already cited, the total exportation of Mexican coffee amounted to 18,460 tons, valued at \$4,338,000. The principal purchasers were:

	Tons.
United States.	11,068
Germany.	4,394
Great Britain.	2,124
France.	667

Notwithstanding that Canada is a coffee consuming country and probably, indirectly, receives considerable of the Mexican product, she took directly of this large amount, the bagatelle of 19 tons.

DIFFICULTY IN PURCHASING.

Though in the case of both coffee and tobacco, it is somewhat difficult to purchase here, as the large American and European dealers send their buyers to the country to contract the crops before being harvested, still there are a few independent dealers whose names I shall gladly furnish to those interested.

The same difficulty, though in an aggravated degree, exists in regard to Henequen (Sisal) which is exported from Yucatan. Should Canadian manufacturers wish to procure large quantities of this fibre direct, it will certainly be necessary to send a buyer into the field to contract same, on the same basis as the American and European dealers. There is no way of purchasing, on the spur of the moment, a quantity large enough to make a ship's cargo, and any purchases so made would be at an advanced price.

PROPER REPRESENTATION.

I wish to emphasize what I have already said in previous reports in regard to a proper representative. Those Canadian firms who wish to open up a successful trade in Mexico should be convinced, by the experience of others, that this can only be done by a competent personal representative who thoroughly understands the line he is desirous of introducing. Circulars and other advertising matter are an aid, without doubt, but only as auxiliaries to the personal effort of the agent. Here it is a question, in introducing a new article, of convincing not only the consumer, but also the dealer, of its particular merits. It is not, as a rule, sufficient to appoint some local dealer as a general agent, thinking that any efforts he may make will ensure any modi-

oom of success. On the contrary, agencies placed in this way seldom give any results, the samples, if any are supplied, frequently being stored away out of sight and out of mind. There are a few firms here in a position to do justice to such agencies, but before coming into the field it would be always well for some member of the firm to make a thorough investigation.

A. W. DONLY.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, November 4, 1905.

SCANDINAVIAN IRON ORE.

From a Norwegian trade paper *Farmand*, I quote the following in translation:— Since large deposits of iron ore have been found in Norway, the question has come up how to utilize this in the best way. So far the principal part of the iron ore has been exported, especially in the form of bricks, and it seems as great efforts are being made to place the utilizing of the Norwegian mines in the hands of foreign capitalists in the opinion, that this should create life and work in the country. In Sweden, on the other hand, where the export of iron ore in former years also was embraced with the greatest interest and large sacrifices were made to encourage this export, the people have more and more commenced to see the dangers with this large export of ore, whereby the country is deprived of such an important resource for its development. In Sweden the people have commenced to realize, that with the increasing demand for iron and steel, the mines are not so inexhaustible, as it has been thought before.

The greatest difficulty by creating a larger iron industry in the Scandinavian countries is the want of coal, and to import coal for this purpose does not pay. As, however, in Norway and Sweden there are abundance of waterfalls, from which electricity may be produced, and a great deal of turf-mosses for the production of generator gas, this may in time replace the missing coal. To practically carry this thought through it is proposed to erect experimenting stations, the expenses of which should be covered by a small export duty on the exported ore.

WOOD-PULP.

According to the statistical report of the Norwegian Pulp-makers Association, the unsold quantity for the current year is a very small one. The calculated total production is about 10,000 tons less than last year, and 60,000 tons less than in 1902. This decrease is due to the fact, that several pulp mills have gone over to the production of paper. A further decrease of about 20,000 tons may be anticipated for the year 1906. This being so, the market is very firm.

C. E. SONTUM.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. Ball.)*39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., November 4, 1905.

PEAT MANUFACTURE.

A number of reports have been made and articles written in this country on the subject of the peat industry, and knowing that considerable efforts have been made in Canada to work on the large peat fields, I am sending a resume of several reports that have come before me.

The reclaiming of the land is one matter that seems to be of great interest here, but I do not think that would effect Canadians to quite the same extent. Briquetting of peat is being attempted here, and reports are being made as to the great value the ash makes a base for artificial manures and fertilizers.

THE BESSEY PROCESS.

Within a few weeks there has been a new company established in Ireland for the manufacture of electro-peat coal by the Bessey process. The peat is taken direct from the bog by a huge excavator, then run on tip wagons to the works, where it is subjected to a special electrifying process and pressed and dried into a substance as black and as hard as coal. The application of an alternating electric current is the new feature in the process, and by this means it is claimed that the calorific properties of the peat are preserved intact. From what I can learn, however, Canadian peat beds contain a considerable amount more of moisture than in this country, a system of drainage being used which draws off an immense quantity of the water. It is, however, the other uses to which peat has been put that I think would be valuable to Canada.

BEDDING FOR HORSES AND CATTLE.

A good bedding for horses and cattle is obtained by the conversion of the upper and more fibrous layers into moss-litter, and this has already proved a most remunerative industry, the shares of Richardson's Moss-Litter Company being quoted at 300 per cent premium. During the past year, the British Moss-Litter Company made a trading profit of £32,566, paying a dividend of 10 per cent, and a large amount of money being carried forward.

USED AS MANURE.

After serving its purpose as bedding in the stable or farmyard, moss-litter, being a good absorbent of ammonia, may be profitably employed as manure.

A PERFECT DEODORANT AND GERMICIDE.

In its granulated state peat makes a perfect deodorant, so that in places where the water carriage system of sewerage is not in operation its application to septic refuse would effectually destroy all disagreeable and noxious effluvia, while, at the same time rendering available for fields and gardens in the vicinity a rich manurial compost. Combined with other substances it is a potent germicide, and in its granulated state as peat loam it has proved to be much superior to common soil for growing certain fruits and flowers.

USED FOR RIPENING GREEN TOMATOES, GREEN FRUIT, ETC.

A large nurseryman has been experimenting with the peat dust as a packing for ripening green tomatoes, green fruit, &c. He says that 'packed in boxes three weeks and three days, they turned out in fine condition, thus proving that many tons of green fruit usually wasted in the late autumn can, by being packed in peat, be preserved and turned into money.'

USED FOR GROWING FLOWERS.

Another nurseryman in the same neighbourhood experimented with peat loam in growing quantities of tulips, daffodils and narcissus, and found that they were much superior in quality and colouring to those grown in soil. The foliage was stronger and the plants more erect.

USED FOR PACKING FRUIT AND EGGS.

Peat dust is now largely in demand for packing fruit and eggs, and is shipped to the West Indies, Canary Islands, Spain and other places for this purpose. Eggs packed in peat will retain their freshness for an indefinite time, the packing being non-conducting, absorbent and antiseptic.

MEDICAL USES, ETC.

A large number of disinfecting, antiseptic, toilet and healing preparations, all having peat as their base, have already been placed on the market by the Petol Company. Midges, or mosquitoes, it is said, will not touch a skin that has been washed with petol soap, and if this soap can render the skin immune from the attacks of midge or mosquito, as the inventor claims, it ought to be of great value.

P. B. BALL.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No 14, BUND, ROOM B., YOKOHAMA, October 25, 1905.

IMPORTING DAIRY CATTLE.

A consignment of twenty-five pedigreed cattle arrived from Canada on October 8, for Messrs. Nosawa & Co., Japanese importing and exporting merchants. These cattle were bought of Canadian stock breeders, and are imported for the Government Department of Agriculture for dairy purposes.

The animals arrived in excellent condition. Four calves, dropped on the way, are doing well also. Nineteen of these cattle were Ayrshires, ten of which were from the herd of Robert Ness, of Howick. The remainder were from the herds of Balantyne, of Stratford; Benning, of Glengarry; Johnston, of Claremont, and Fletcher and Harper of Ontario. These cattle would average about \$180 each in value at the point of shipment.

FISH-CANNING INDUSTRY.

Fish canning in this country is one of the industries which have received impetus by the war. Before the outbreak of the war, fish-canning factories were few in num-

ber; but, owing to the greatly increased demand for military supplies, a number of factories were started in various parts of the country. Now that the war has been brought to a close, and the Japanese not large consumers of canned fish in ordinary times, it is thought probable that many of the factories that had been started during the war will be closed. At the same time efforts are being made in other quarters to extend the market of Japanese canned fish abroad. This, especially with respect to the sardine. Some of the finest sardines in the world are caught off Japan, but the greater quantity of these fish have hitherto been used for fertilizing purposes, a comparatively small quantity being tinned in oil, for which there is a demand the world over.

In France, it is pointed out, the industry is carried on extensively; the annual value of tinned sardines exported to America alone is from \$2,000,000 to \$2,500,000. The Japanese Department of Agriculture and Commerce, having in view the example of France, has done a great deal to encourage this industry, experiments being made under departmental direction at several places. Last year a company was formed at Nagoya with a capital of \$250,000, and already during this year 2,000,000 tins of sardines have been turned out by this company, the result of the working having been found very satisfactory.

MANUFACTURE OF PAINTS.

Hitherto paint manufactured in Japan has been generally estimated as inferior to that imported, and the demand for the Japanese made article has been comparatively small. The paint manufactured by the Japan Paint Company of Tokyo, however, has been largely used by the navy and shipbuilding yards and railways, its quality having been found satisfactory. One brand of paint made by the company is said to be of special quality, and there has been increased use of this lately, so that the company's factory in Tokyo has been unable to turn out enough to meet the demand. The construction at Osaka of a new factory by the same company was completed and put into operation last month.

The annual value of the paint produced by the Toyko factory is about \$250,000, and that estimated for the Osaka factory at double that sum. It is therefore possible that, as the result, the import of paint from abroad may be largely checked. The paint manufactured by the company is, it is stated, already being exported to China and Korea. Of course the effect upon importation will largely depend upon the extent of this export to the neighbouring countries. Export to China and Korea will be facilitated by the new regulations now about to be established.

Foreign manufactured paints, having special merits of their own, will doubtless continue to have a strong place in this market. For the present, however, the Conventional Tariff on paints and oils is adverse to Canadian competition by 40 cents on 133 pounds.

PRIME BUTTER.

To the excellence of Canadian butter from the Calgary creameries, a tribute is paid by the fact that a package of samples in tins, for a Tokyo merchant firm, that by some mischance remained at the customs in Yokohama for two months of the hot season, when opened proved to be in first rate condition. As far as I have heard, all the butter brought to Japan from Calgary this summer has given unqualified satisfaction. The miscellaneous sorts of butter that are provided on high class tables in this country go to make up the hardest trial to which a sensitive palate finds itself exposed.

FERTILIZERS.

I notice in the September 1st issue of the 'Canadian Manufacturer' a paragraph to the effect that the cannery men of Steveston, B.C., have asked the provincial government to aid them in the erection of a crematory for fish offal. This is a fishery by-product from which fish manure is made. Surely the cannery men could do better with their fish offal, at a time when fertilizing material is in great and insufficiently

supplied demand in Japan. It is to be hoped that 'crematory' in this case is a misnomer, and that a more useful and profitable purpose is intended. The demand for fish manure as a field fertilizer is permanent here, and is now exceedingly active.

Japan's export trade for September, 1905, amounted to \$14,756,745, showing a decrease of \$787,523 compared with the corresponding month of 1904. Importations totalled \$18,251,073, an increase of \$2,762,259 compared with the same term last year.

IMPORTS.

The principal articles imported figure as follows:—

	Sept., 1905.	Sept., 1904.
Raw cotton.	\$3,717,615	\$2,040,499
Cotton yarn.	99,405	14,878
Wool.	306,305	395,923
Flax, hemp, jute, &c.	108,824	82,326
Iron nails.	69,500	74,509
Rails.	38,643	47,665
Iron, bar and rod	259,729	138,894
Iron, pipes and tubes.	97,224	68,651
Other iron and steel.	936,881	372,049
Paper.	187,635	151,780
Leather, sole and other	535,099	169,671
Machinery and engines	647,698	403,387
Locomotive engines.	191,643	110,360
Mousseline-de-laine.	125,348	69,268
Woollen cloths.	269,539	141,426
Skirtings and cotton prints.	668,202	222,941
Cotton satins and cotton velvets.	204,581	62,745
Beans, peas and pulse	458,820	242,139
Flour, wheat.	107,509	510,505
Oil-cake (fertilizer).	358,634	110,364

THE TEA TRADE.

At the conference of tea growers and merchants held in Kobe, Mr. Otani, president of the Nippon Tea Trader's Guild, in the course of his speech, remarked that the export of tea this year had been unfavourable. This was due to the excessive imports into America last year, when Americans bought very largely in anticipation of a shortage of supply because of the war; while the year before last the export was very active on account of the removal of the tea duty in America.

The cessation of exports to Russia also resulted in increased shipment to America and Canada last year. This active American demand afforded temptation to get rid of teas of inferior quality, which tended to impair the American market later on.

Owing to the discontinuance of subsidy by the government this year, the measures taken for the extension of the foreign market had to be abandoned. The trade must now do its utmost to recover lost ground, without dependence upon the assistance of the government; yet the tea industry, which has to face the most powerful competitors, he (Mr. Otani) thought might be justified in asking government assistance for its development. In principle this had already been approved by the Imperial parliament, and the government should meet the views of parliament without delay.

RECOMMENDATIONS CONCERNING TEA MARKET.

In the course of his address Mr. Otani recommended the following measures for the revival of the tea market abroad.

(1) Steps should be taken to further improve the quality of tea; the tea produced in certain prefectures in the Kwansai district requiring special attention.

(2) The great sympathy shown by the Americans towards Japan during the war should be availed of for the further extension of the tea market in America.

(3) Provisions made in Russia by the tea guilds, for the introduction of Japan tea into that country, should be augmented upon the conclusion of peace.

(4) Endeavours should be made to secure a special discount in freight for block and brick teas sent to Siberia and Russia by the Chinese Eastern Railway, or by steamers to Vladivostok.

(5) The provisions made in America, Canada, and Russia in Europe for the extension of the sale of tea should be continued and extended and new fields opened in South America and Australia.

LUMBER.

The detailed returns of trade for the half year ending with June are not yet available; but from an American source, referring to the lumber trade, comes the following information:—

During the first half of this year Japan bought 5,170,163 feet of lumber on the Pacific coast, of which total Washington mills supplied 2,277,962 feet and mills in British Columbia 2,892,901 feet. China, however, bought 36,936,975 feet of Pacific coast lumber from the United States in the same period, as against 140,079 feet purchased in British Columbia. The most remarkable feature of the trade was the increase in the exports to China from Oregon mills, which shipped a total of 11,038,624 feet in 1905, as compared with a mere 32,670 feet for the same period in 1904.

LIFE INSURANCE.

The disclosures in connection with the life insurance company investigations in New York have had the effect of casting a wet blanket over the life insurance business in Japan. The effects are severely felt by the Canadian companies doing business here, in common with the other foreign companies operating in the same line.

ALEX. MacLEAN.

ANTIGUA, MONTserrat AND DOMINICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. R. Bryson.*)

ST JOHNS, ANTIGUA, B.W.I., Oct. 20, 1905.

TRADE BETWEEN MONTserrat AND CANADA.

I beg to attach herewith a statement showing the business done between the Island of Montserrat and the Dominion for the past three months. The importations have not been as large as was expected, no doubt due to the rapid fall in sugar during that period, and an increase in the local import tax. Canadian flour seems to be giving every satisfaction.

Owing to the small crop, and the unsettled state of the market, shipments of sugar to the Dominion have fallen short this year as compared with last, but during the earlier part of the year the prices realized by shippers were very satisfactory.

The statement annexed only deals with direct importations from Canada. Montserrat draws most of her supplies from St. Kitts and Antigua.

STATEMENT showing imports from the Dominion of Canada into Montserrat, W.I., during the quarter ending 30th September, 1905.

R. BRYSON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA, AND TASMANIA.

(*Mr. D. H. Ross.*)

P. O. Box 140, MELBOURNE, October 21, 1905.

AUSTRALASIAN LUMBER INDUSTRY.

The Australian lumber industry is one of considerable magnitude, especially in the states of Western Australia and New South Wales, though Tasmania possesses large forests of valuable timber. The excellence, durability and quality of the splendid hardwood timbers of Australia are admitted by experts all over the world, and in some special lines of hardwood an effort is now being made to promote an export business to Canada. When desired by Canadian importers of hardwood, I shall be pleased to

place them in communication with the principal lumber mills in Australia. The annual value of the lumber industry of the Commonwealth is £2,251,000, and of New Zealand £972,000, these figures representing the value of the rough lumber as it leaves the mills.

EXPORTS OF AUSTRALIAN LUMBER, 1904.

Australia exported in 1904 over 130,000,000 feet of lumber composed in the main of undressed lumber and logs in the rough to the value of £818,482. Minor articles of wood, such as mouldings, palings, pickets, staves and doors make the total value of the exports £828,000. The principal markets for Australian hardwood are the United Kingdom, India, Africa, New Zealand, Egypt and the Philippine Islands. Both Canada and the United States are credited with comparatively small shipments, in each case in the vicinity of 300,000 superficial feet.

COMMONWEALTH LUMBER STATISTICS.

The following summary of the Australian importations of lumber in 1904 has been compiled from the statistical returns of the Commonwealth Department of Trade and Customs, and it should prove of more than passing interest to Canadian lumbermen:—

Timber.	Value.	Superficial Feet.	Number.	Lineal Feet.
	£			
Dressed timber.....	395,151	54,456,327		
Undressed Oregon (12 in. x 6 in. and over).....	120,919	46,404,142		
Undressed n.e.i. (12 in. x 6 in. and over).....	20,719	3,226,728		
Undressed n.e.i. (less than 12 in. x 6 in.).....	480,608	90,086,055		
Laths.....	23,321		28,222,263	
Pickets.....	9,313		1,743,474	
Shingles.....	846		1,079,715	
Doors, 1½ in. and over.....	1,079		1,865	
" over 1½ in. and under 1¾ in.	2,191		3,922	
" 1½ in. and under.....	9,144		24,089	
Hickory, undressed.....	1,359	70,256		
Logs and spars (rough).....	1,815	522,505		
Staves, not shaped.....	11,781		1,064,033	
New Zealand pine.....	251,059	53,898,550		
Other.....	21,581			
Architraves, &c.....	511			119,192
Totals.....	1,351,397	248,664,563	32,139,361	119,192

In comparison with 1903, Canada showed an increase of about 100,000 feet in dressed lumber, and 5,214,000 feet in undressed lumber imported into Australia, but from the figures given above it can readily be seen that there is ample room for a considerable expansion in the trade done with Australia.

DRESSED TIMBER.

The principal lines of Canadian and United States dressed timber shipped to Australia are clear pine shelving and tongued and grooved boards. Norway and Sweden supply Baltic flooring, lining and weather boards. The Customs duty is 3s. (73 cents) per 100 sup. feet. The Australian imports of dressed timber in 1904 amounted to 54,456,327 sup. feet, valued at £395,000.

The sources from which supplies were obtained are:—

	<i>feet.</i>
Canada.....	104,770
United States.....	3,516,661
Norway and Sweden.....	50,641,000

UNDRESSED 'OREGON.'

The Australian imports in 1904, of undressed Oregon, 12-inch x 6-inch and over, totalled 46,404,142 sup. feet valued at £121,000. The Commonwealth duty on this line is 6d. (12 cents) per 1,000 sup. feet. The small proportion of this business secured by the Canadian lumbermen can readily be seen from the following figures:—

	<i>feet.</i>
Imports from Canada.....	488,554
Imports from United States.....	45,783,617

The freight from British Columbia to Australia, compared with the freight from Puget Sound points, is somewhat higher, and Melbourne importers complain that there is almost invariably some trouble in chartering ships on the Vancouver side, which is detrimental to an increase in the exports of Canadian pine from Pacific coast ports.

UNDRESSED LUMBER.

The Commonwealth imported in 1904 about 3,227,000 sup. feet 12-inch x 16-inch and over, of miscellaneous lumber, valued at £20,719. The customs duty is 1s. (24 cents) per 100 sup. feet.

The returns are given as follows:—

	<i>feet.</i>
From Canada.....	107,870
“ United States.....	3,092,759

The balance came from India.

In 1904 Australia imported undressed lumber—sizes less than 12-inch x 6-inch—90,086,000 sup. feet, valued at £480,608. The duty is 1s. 6d. per 100 sup. feet.

The principal imports were from:—

	<i>feet.</i>
Canada.....	11,481,552
Norway.....	2,320,275
Sweden.....	2,911,423
Russia.....	3,600,067
United States.....	68,524,670

The chief lines enumerated are California redwood, Oregon, and Canadian spruce. The states of Victoria and South Australia consume nearly all the spruce which is shipped to Australia.

LOGS, NOT SAWN AND SPARS IN THE ROUGH.

The importation of logs and spars in the rough represented a modest item in the value of over-sea lumber, which came to Australia in 1904. The figures represent some 522,000 sup. feet—the value being £1,815. There is no customs duty upon logs and spars. The United States is credited with 7,745 feet, New Hebridies, 75,176 feet, and New Zealand 421,808 feet.

LATHS.

Imported laths are generally stowed between the deck beams of sailing vessels, and in odd corners where it is impracticable to stow lumber. Puget Sound ports control the bulk of the Australian business, and quotations and freight must be sufficiently low to compete with the local article. The lengths and sizes required are 4 ft. 6 in. x 1½ in. x ¾ in., and 4 ft. 6 in. x 1 in. x ¾ in., tied up in bundles of 90 laths. The Australian imports in 1904 were 28,222,263 laths to the value of £23,321. The Customs duty is 5s. (\$1.21) per 1,000 laths. Canada supplied nearly 4,000,000 and the United States supplied over 19,000,000 laths to Australia last year.

STAVES.

Staves, undressed or roughly dressed—but not shaped—are duty free in Australia. Besides the requirements for local purposes, there is a constant demand for making casks in which to export tallow, &c. The Commonwealth imported 1,064,033 staves, in 1904, to the value of £11,781. The sources of supply were:—

Canada, 105,680; United States, 937,853, and New Zealand, 15,000 staves. Canadian lumbermen in a position to export oak staves are invited to send full particulars to this commercial agency.

PICKETS.

Undressed pickets are dutiable at 1s. (24 cents) per 100. The Commonwealth imports in 1904 numbered 1,743,474 pickets, valued at £9,313. Canada supplied 100,267, the United States, 1,613,865, and Norway, 29,342 pickets. One of the leading lines is the following size: 4 ft. 6 in. x 3 in. x 1 inch.

SPECIFICATION FOR CARGOES OF SPRUCE.

The states of Victoria and South Australia take nearly all—if not all—the spruce shipped to the Commonwealth. In submitting quotations for cargoes of spruce to Australian importers it is necessary to give the following particulars, otherwise offers will not be considered, viz.:—

1. State the average lengths of spruce deals.
2. What the fall of widths are.
3. Percentage of Nos. 1, 2 and 3 grades.
4. Reduction for ends, 4ths and scantlings.
5. Time when Canadian port of shipment is open.
6. Discount and brokerage rebates.
7. A guarantee that timber is well seasoned prior to shipment.
8. An undertaking to be given that deals are cut full widths and thickness, free of wane, as all have to be re-sawn again.

The usual specification and particulars of sizes and percentage of quantities of spruce deals in sending orders from Melbourne are as follows:—

Sizes. Quantities.

6 x 3 = 10 per cent.

7 x 3 = 15 “

8 x 3 = 10 “

9 x 3 = 30 “

10 x 3 = 20 “

11 x 3 = 10 “

12 x 3 = 5 “

Clear spruce is imported in small lots suitable for scull and oar making.

HINTS FOR BRITISH COLUMBIA LUMBER EXPORTERS.

As a result of my interviews with some of the largest Australian importers of Oregon pine, I have embodied their opinions for the consideration of British Columbia lumber exporters in the following summary:—

1. British Columbia shippers are not making an effort to secure at least a fair proportion of the Australian lumber business. It is absolutely essential that they should keep ‘in touch’ with the leading Australian importers of Oregon pine, and the requirements of this country with the same energy and devotion as San Francisco lumber brokers.

2. The reputation of the grading and sawing of British Columbia lumber has to be re-established, making the marketable condition at least equal to shipments made in Puget Sound.

3. That a representative of the British Columbia lumber mills should visit Australia and ascertain the local conditions and why the trade is not larger. In every way he would accomplish much more than reams of correspondence could possibly do.

4. Melbourne lumber importers are strongly British in sentiment and would, all things being equal, prefer to obtain their supplies from British Columbia rather than from Puget Sound ports. Shippers should remember this and endeavour to increase their Australian business by constantly studying the trade.

ORDINARY SPECIFICATION FOR 'OREGON.'

The following is a copy of a specification recently sent to a firm of lumber brokers in San Francisco, by a Melbourne saw milling concern for Oregon pine. The details of sizes and quantities may be of interest to British Columbia lumbermen:—

<i>Sizes.</i>	<i>Sup. feet.</i>	<i>Lengths.</i>
3 x 2	25,000	10 to 24 feet.
3½ x 2	25,000	
4 x 2	25,000	
9 x 2	10,000	10 to 32 feet.
9 x 3	25,000	
12 x 3	25,000	
12 x 6	500,000	½ (22 to 24 feet).
14 x 6	75,000	⅓ (under 22 feet).
9 x 8	50,000	⅓ (26 to 32 feet).
12 x 8	50,000	¼ (33 to 40 feet).
12 x 12	25,000	23 to 40 feet.
14 x 14	25,000	
16 x 16	25,000	
18 x 18	25,000	
20 x 20	25,000	
9 x 9	25,000	36 to 45 feet.
10 x 10	25,000	40 to 50 "
12 x 12	10,000	41 to 50 "
	10,000	51 to 60 "
	10,000	61 to 70 "
14 x 14	10,000	41 to 50 "
	10,000	51 to 60 "
	10,000	61 to 70 "
16 x 16	10,000	41 to 50 "
	10,000	51 to 60 "
	10,000	61 to 70 "
	10,000	71 to 80 "
18 x 18	10,000	41 to 50 feet.
	10,000	51 to 60 "
	10,000	61 to 70 "
	10,000	71 to 80 "
	10,000	81 to 85 "
20 x 20	20,000	41 to 50 "
	10,000	51 to 60 "
	10,000	71 to 80 "
	10,000	81 to 90 "
Natural spars—6 only—50 to 60 feet—10-inch diameter in middle.		
3 "	—80 to 85 feet—22-inch	"
3 "	—70 to 75 feet—18-inch	"
3 "	—65 to 70 feet—16-inch	"
Laths—1,000,000—4 ft. 6 in. x 1½ x ⅜, tied in bundles of 90.		
	500,000—4 ft. 6 in. x 1 x ¼	" "
Pickets—75,000—4 ft. 6 in. x 3 x 1.		

QUALITY OF BRITISH COLUMBIA 'OREGON.'

The quality of British Columbia lumber is admitted by Melbourne importers to be the best Oregon pine which comes to Australia, but complaints are made that the shippers are not keeping to one standard of quality, and also that the sawing is more or less irregular. One large importer of British Columbia pine stated: 'The wood is splendid, but the grading is not fair, and the sawing cannot be relied upon.'

INFERIOR LUMBER REQUIRED.

The celebrated Broken Hill silver mines (in New South Wales) import large quantities of 'culls,' sizes 10-inch x 10-inch, 10-inch x 4-inch, and 10-inch x 3-inch, shipments being landed at Port Pirie, South Australia. This inferior lumber is purchased at a very low rate and upon a c.i.f. basis, or in other words, ex ship slings at Fort Pirie.

NEW ZEALAND KAURI AND WHITE PINE, UNDRESSED.

Undressed kauri and white pine from New Zealand is free of Australian customs duty. Kauri pine is one of the finest timbers in the world, being easily worked, free from knots and blemishes and is obtainable in long lengths. Kauri is very extensively used in making the cheaper grades of furniture as well as in the better class of building material. New Zealand white pine is an inferior timber, but, being singularly free from odour and any resinous substance, it is principally used for making butter boxes and export cases, for which purposes it answers admirably. The Australian imports of New Zealand kauri and white pine in 1904 totalled 53,898,550 superficial feet, valued at £251,059.

HICKORY UNDRESSED.

Hickory would be largely imported were it possible for Australian lumber dealers to secure the desired qualities at a fair cost. Practically all the hickory brought into the Commonwealth in 1904 was of United States origin, but the figures are small, being only 70,256 superficial feet, valued at £1,359. There is no customs duty on undressed hickory.

WOOD DOORS.

The manufacture of wood doors from imported as well as from local lumber is carried on by all the leading saw mills throughout Australia. While there are large numbers of doors imported from Puget Sound ports, this business offers little or no margin of profit to the shippers. Under the most favourable freight conditions, and when the ship is loaded beside the mill, can shipment be effected without a loss, particularly to Australian ports where the lumber industry is not developed. In 1904 the imports of wood doors were as follows:—

- 1,865 doors, size 1½ in. and over, value £1,079, duty 7/6 (\$1.82) each.
- 3,922 doors, size over 1½ in. and under 1¾ in., value £2,191, duty 5/0 (\$1.21) each.
- 24,089 doors, size 1½ in. and under, value £9,144, duty 3/6 (\$0.85) each.

SHINGLES.

The value of shingles imported by Australia in 1904 amounted to the modest figure of £846. The customs is 3 shillings (73 cents) per 1,000. Canada supplied 51,000 and the United States 1,028,000 shingles which represented the entire importations. The demand for this line is exceedingly limited and scarcely worth the care of exporters, except to 'fill up' in the stowage of lumber cargoes.

ARCHITRAVES, MOULDINGS AND SKIRTINGS.

With a customs duty of 5 shillings (\$1.21) per 100 lineal feet the local makers of architraves, &c., hold almost the entire trade. In 1904 the Commonwealth imported 119,192 lineal feet of skirtings, mouldings, &c., the value being £511. Shipments from the United States practically covered all these lines.

PAYMENT FOR LUMBER SHIPMENTS.

When an order is sent from Australia to Canada for a cargo of lumber, it is the usual custom to support same with 'a letter of credit,' which is drawn against when the ship is loaded, and bills of lading and insurance policy are attached to the draft. This practically means a cash transaction. Freight is payable at Australian port of destination, and shippers, if instructed, can make an advance to the master of the ship, which amount is included in the draft upon the consignees.

SETTLEMENT OF CLAIMS.

Should the lumber not be in accordance with the specification, or if the quality invoiced is inferior to the recognized trade standard, a survey is held upon the discharge of the ship under the local Chamber of Commerce (Board of Trade) rules. If the consignee is justified a claim is made upon the shippers, and a draft sent forward for the amount awarded by the surveyors of the cargo.

CANADIAN EXPORTERS INVITED TO SEND QUOTATIONS.

By this mail, there is being forwarded to the Department of Trade and Commerce, Ottawa, complete specifications of the requirements of one of the largest lumber importing firms in Australia (see Trade Enquiry No. 1157) which I strongly recommend as being worthy of the best and most careful consideration of Canadian exporters of lumber, carriage woodware, builders' hardware and saw mill supplies. The inquiring firm desire to obtain a larger portion of their imports from Canada, and this is an exceptional opportunity for Canadian lumbermen and manufacturers to establish an invaluable business connection in Australia.

LUMBER, ETC., FOR WHICH QUOTATIONS ARE REQUESTED.

Canadian exporters taking notice of the preceding paragraph are invited to communicate with the Department of Trade and Commerce, Ottawa, stating which sheets of the specification are of special interest to them,* viz.:-

- Sheet No. 1.—Spruce, pine shelving and T. & G. lumber.
- Sheet No. 2.—Walnut boards, walnut scantlings—1st and 2nd qualities.
- Sheet No. 3.—Ash—1st and 2nd growth, hickory—2nd growth and poplar.
- Sheet No. 4.—Quartered oak—for furniture, cooper's and coffin oak.
- Sheet No. 5.—Clear pine, veneers, pitch pine (if possible) and staves.
- Sheet No. 6.—Hickory rims and buggy shafts, elm hubs.
- Sheet No. 7.—Hickory spokes, poles, whiffletrees and main-pole bars.
- Sheet No. 8.—Builders' hardware, wove wire, fencing and nail wire.
- Sheet No. 9.—Saw mill supplies, files, chisels, oils, &c., &c.

SAW MILL MACHINERY.

The same firm intend to improve their plant by introducing the latest machinery, such as a fast-planing machine about 30 x 10 capacity, wide surfacing machinery up to 49 inches in width, as well as electric travellers, and dynamos for generating electricity.

D. H. ROSS.

* A copy of any one or all of these specifications will be promptly mailed upon application to the Superintendent of Commercial Agencies, Ottawa.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. MacNamara.)*CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., November 15, 1905.

MANGLE ROLLER BLOCKS.

It is of some importance to the Canadian shipper of mangle roller blocks to know that they are subject to a minute inspection by the consignee before they are accepted. A firm here, who handles them extensively from the United States and the continent, was good enough to promise some particulars regarding them, and from an interview I had with him I am able to give this information. He stated he was anxious to help Canadians from making a loss in shipping roller blocks, and except they have had experience in the trade they may be very likely to burn their fingers. He found it difficult to make the American wood-cutter understand what will and what will not do for a mangle roller. As a matter of fact it requires almost a perfect piece of wood, that is timber that is free from shakes, imbarks, discoloration, knots, sap, dark streaks, &c. In his own experience he knew hundreds of rollers rejected because they have been cut out of too small trees, and therefore it was not possible to cut sufficient of the bark side away, to make the block of required standard measurement, thus leaving the face of the roller filled with hundreds of little brown marks, making it totally unfit for a mangle. Cutters on the other side may be inclined to think that some of the faults he enumerated can be ignored, but they will find to their bitter expense, that what he states is no exaggeration.

It is to the interest of the trade here that wood should be brought into the country at as cheap a rate as possible, but he did not want to be a party to anything that would tend to lead a shipper into difficulties, and that was his reason for speaking plainly in the matter. At the present time the United States supply the greatest share of mangle blocks, but it is gratifying to know that Canadian enterprise is turning in the direction of supplying the British importer and with success. The demand is large and constantly increasing.

COBALT.

Pursuing my investigation regarding the export of crude cobalt to England, I called upon the manager of a large metal company in order to ascertain his views in the matter. He told me he was already in correspondence with Liverpool and London brokers concerning the handling of same. He was prepared to smelt 500 tons per week for the silver it contained, providing he received satisfactory assurances that he would have control as far as they were concerned of the shipments to Great Britain. This he deemed he was entitled to on account of the expense entailed in fitting up proper appliances for extraction and separation of the various constituents contained in it. What seemed to him an almost insuperable obstacle was the payment they wanted to exact for products such as arsenic, nickel and cobalt. Regarding arsenic, in its extraction the fumes arising could not be permitted to vitiate the surrounding atmosphere, as he claimed the occupants of the houses would be poisoned thereby, and in order to obviate this, special appliances would have to be erected. Regarding the nickel, that was already in the control of a corporation who owned or controlled large deposits of same at Sudbury and elsewhere in Ontario, and whose output was now

being reduced, and in fact some of the mines closed, in order to keep the market price up to such a standard as they deemed advisable. Regarding oxide of cobalt, he claimed that there was only a limited demand therefor in the manufacture requiring its use in Great Britain. He was prepared to take the matter up with any Canadian producer provided his views in the matter were met. I am also told that shipments of cobalt, but not in very large quantities, are now being sent here from Germany.

BRITISH TRADE BOOMING.

The Board of Trade returns for October show a gratifying expansion of foreign trade. The imports were: £48,676,418, a decrease of £481,407, and the exports were: £29,367,558, an increase of £3,923,869. There was a diminution of £2,200,000 in the value of raw cotton imported. The increase in exports was derived mainly from cotton manufactures £600,000, iron and steel manufactures £536,445, woollen manufactures £300,000, and chemicals £200,000. Of the total increase of nearly £4,000,000 in the months' exports, £3,327,382 arose from articles wholly or mainly manufactured. The figures for the ten months are:—Imports, £459,063,829—increase, £11,188,382. Exports, £271,763,124—increase, £25,130,649. Cotton manufactures figure for £7,000,000 of the increased exports.

CANADIAN APPLES.

The following information regarding Canadian apples will doubtless be of benefit to Canadian shippers. The firm furnishing the information is one of the largest fruit brokerage firms here, and the managing director is very sanguine that if greater shipments were made to Manchester, better prices would be obtained than have ruled in any port this season. I am indebted to him for the following prices realized at the last sale of Canadian and American apples:—

'The cargo ex *Iberian*, consisting of 1,550 barrels of Canadian apples and 1,853 barrels of Maine apples, was sold here yesterday at the following prices:—

	CANADIAN.	
	XXX.	XX.
Baldwins.. . . .	\$4.74 to \$5.35	\$4.25 to \$4.45
Spies.. . . .	5.10 to 5.60	4.62 to 5.10
Greenings.. . . .	4.86 to 5.10	4.55 to 4.80
Russets.. . . .	4.86 to 5.35	
Ben Davis.. . . .	4.62 to 4.74	

	MAINE.	
		XXX.
No. 1 Baldwin.. . . .		\$4.13 to \$5.10
No. 2 "		3.64 to 4.37
Greenings.. . . .		4.37 to 4.75
Spies.. . . .		4.13 to 5.47

The demand was splendid, as also were the prices obtained. In fact it is a long way the best sale in England this season, and should encourage shippers to give this market much better support. This sale only confirms what has been said again and again, that Manchester is one of the best markets in Great Britain.

The prospects are very bright as the Christmas demand will soon be coming on, and hopes are entertained that shipments to meet this demand will be forwarded.'

P. B. MacNAMARA.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENTS.

*(Mr. C. M. Kittson.)*RHODES BUILDING, CAPE TOWN, November 1, 1905.
P.O. Box 1232.

FAVOURABLE OPPORTUNITY FOR BUTTER EXPORTERS.

At present the prices quoted by the Australian and Argentine butter shippers are unusually high, consequently the time is favourable for Canadian exporters of this article to get in on this market, but as pointed out in report No. 87, South Africa demands a good quality of table butter of a natural colour and containing about two per cent of salt.

If Canadian shippers can lay down an article fulfilling these requirements at a quotation of twenty-three cents per pound c.i.f., Cape Town, a good business would be probable as long as the market retains its present phase.

HAMS AND BACON.

South Africa annually sends abroad over a million dollars for hams and bacon, the chief peculiarity of the market is the demand for the mild cured variety.

Canadians are advised that more attention paid to the South African demand for these two articles would be amply rewarded by remunerative prices being obtained.

SUPPLY OF STEAM COAL.

The Cape government railways annually call for tenders for large quantities of steam coal. At the moment tenders are being advertised for the supply of 94,000 tons of 2,240 lbs., shipment at the rate of 10,500 tons per month, to the port of Cape Town.

GUARANTEE REQUIRED FOR CANADIAN COAL.

Tenders of Canadian coal will have to guarantee it to be 10 per cent superior to the Natal product.

PRESENT QUOTATIONS OF SUPPLIERS.

The present supplies of Welsh coal are supplying same at 26s. 6d. per 2,240 lbs., c.i.f., Cape Town. Natal shippers are quoting 22s.

FORMS OF CONTRACT.

Forms of contract may be obtained from the Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa, or from Chas. Cock, Esq., chief railway storekeeper, Cape Government Railways, Cape Town.

CHAS. M. KITTSON.

GENERAL COMMERCIAL INFORMATION.

IMPORTS OF PRINCIPAL FOODSTUFFS INTO GREAT BRITAIN.

QUANTITIES of Butter, Cheese, Bacon, Hams, Fish and Eggs, Imported into Great Britain during the *months* of October and the *ten months* ended October 31, in the Years 1903, 1904 and 1905. (*From British Returns*).

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Custom-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

GAMBIA.

AN ORDINANCE TO CONSOLIDATE AND AMEND THE LAW RELATING TO THE CUSTOMS TARIFF.

(No. 1, dated January 14, 1905, assented to January 19, 1905).

Whereas it is expedient to consolidate the law relating to the Customs Tariff and to amend the same by granting facilities for the re-exportation of imported dutiable goods:

Be it therefore enacted by the Governor of the Colony of the Gambia with the advice and consent of the legislative council thereof as follows, viz.:

I. There shall be charged on goods imported or brought into the colony and protectorate the various duties set forth in schedule *A* hereto.

II. No duty shall be chargeable on the importation of any of the goods or articles contained in schedule *B* hereto.

III. Goods imported from beyond the seas and warehoused or left or deposited in His Majesty's warehouses or trans-shipped for re-exportation whereon duty shall not yet have been paid may be re-exported free of duty, but subject always to the payment of any warehouse rent or other the like charge due and exigible under any rules of the Governor in Council or other law for the time being in force.

IV. A drawback of ninety-five per cent of the duty paid shall be allowable in respect of all goods entered for home consumption, which shall not be sold within the limits of the colony or protectorate; but which, instead of being so sold, shall be exported to any place beyond those limits; provided—

(1) That the duty payable on the goods shall amount to one pound or upwards;

(2) That no drawback shall be allowed, if the goods are of less value than the amount of drawback claimed;

(3) That security by bond shall have been given for the due exportation of the goods, in the manner prescribed in respect of the exportation of warehoused goods subject to duties by section one hundred and two of the 'Customs Ordinance, 1882,' or such other security as the Governor shall approve;

(4) That the goods shall be shipped for exportation in the same vessels or packages in which they were imported, or, in case such packages or vessels shall have become unserviceable, in such other packages or vessels as the collector of customs may expressly sanction;

(5) That the whole of the contents of the packages or vessels, shall be exported (except spoiled or worthless portions unfit for exportation, which shall be destroyed or sold);

(6) That no drawback shall be allowed except in respect of the portions exported;

(7) That the person entitled to any drawback, or his agent duly authorized by him for that purpose, shall make and subscribe a declaration that the goods mentioned therein have been actually exported; and shall within six months produce a certificate of landing from the proper officer of customs of the port at which the goods have been landed on exportation;

(8) That prior to the exportation notice shall have been given to the collector of customs by the person claiming the drawback of his intention to ship the goods;

(9) That a copy of the bill of entry or permit for the landing of the goods shall have been produced to the examining officer by the exporter, and that such goods have been found to correspond with the description and particulars contained therein;

(10) That the goods shall have been exported within one year from the date of their importation;

(11) That the goods at the time of exportation be examined, weighed, and, in case of wines, brandy and spirits, gauged and tested in such manner as the collector of customs may direct;

(12) In the case of guns, that the same have been imported for the purpose of sale, and that all the provisions of the 'Sale of Firearms Licensing Ordinance, 1892,' have been duly complied with.

V. Any person making or subscribing a false declaration in respect of the matters mentioned in the preceding section shall be guilty of perjury.

VI. If any goods which have been cleared to be exported for any drawback shall not be duly exported, or shall be unshipped or re-landed within the colony or protectorate (except as short-shipped under the care of the proper officer of the customs, or from stress of weather or other unavoidable cause, such re-landing being as soon as possible reported to the collector of customs), the same shall be forfeited, together with any ship, boat or craft used in unshipping or re-landing the same; and the master of the vessel in which the goods were shipped for exportation, and every person concerned in such unshipping or re-landing, shall forfeit a sum equal to treble the value of the goods, or a penalty of one hundred pounds.

VII. No duty shall be payable on goods imported from the colony into the protectorate, nor on any goods returned from the protectorate into the colony, on which import duty has already been paid; nor on any article of native manufacture or produce imported from the protectorate into the colony, in respect of such importation.

VIII. All penalties and forfeitures under this ordinance shall be recoverable summarily before the chief magistrate or two justices of the peace.

IX. Nothing herein contained shall invalidate or impair any of the provisions of the 'Ground Nuts Customs Duties Ordinance, 1899'.

X. The Customs Tariff Ordinance, 1899 and the Customs Tariff (Amendment) Ordinance, 1903, are hereby repealed.

XI. The Governor in Council may from time to time make, and, as he shall think fit, amend, vary or revoke, rules and regulations fixing the charges to be made in respect of goods warehoused, deposited or transhipped on which duty shall not have been paid, and generally for the better carrying out of the provisions of this ordinance.

XII. This ordinance may be cited as 'The Customs Tariff Ordinance, 1905.'

Ad valorem duty of five per cent on all other goods.

SCHEDULE B.

Table of Exemptions.

Animals, all sorts.
 Birds, including poultry.
 Boats, canoes, lighters, steam launches, &c.
 Books, printed, including maps, and all printed matter, except ruled books or forms.
 Bullion.
 Carts and wagons, used for agricultural purposes.
 Coals, coke and patent fuel.
 Coin, current in the colony.
 Drawings, paintings, engravings, lithographs and photographs.
 Fish, fresh.
 Fruit, fresh.
 Hay and straw.
 Ice and all fresh provisions on ice.
 Meat, fresh.
 Machines, sewing, blocking or other machines used for industrial purposes.
 Mills, for grinding, sawing, raising water, or any such as are set in motion by electricity, steam, horse, wind or water-power, and all parts of the said mills.

Manures, all sorts.

Oil-cake, and other prepared food for cattle and animals.

Packages, in which goods are ordinarily imported.

Pipes, for conveying fluids.

Plants, growing and seeds for planting.

Ploughs, harrows, cultivators, clod-crushers and other farming implements.

Pumps, for raising water.

Scientific and surgical instruments and apparatus.

Specimens, illustrative of natural history, mineralogy, botany, &c.

Steam engines, or any part of a steam engine.

Tombstones.

Turtle.

Vegetables, fresh.

Wire fencing, iron fencing, standards for the same, tomb railings.

Passengers' baggage consisting of wearing apparel and personal effects such as jewellery, brushes and combs intended for the personal use of such passenger, but not spirits, wines, liqueurs, tobacco, provisions, scent and other articles included in such baggage. Provided always that duty shall not be charged on any spirits or scent not exceeding one-half pint of either, or on any cigars, cigarettes or tobacco not exceeding in the aggregate one pound in weight included in a passenger's baggage. Deck chairs and bedding used by the passenger during the voyage.

Articles of every description imported for the use of the Colonial Government.

Articles of every description imported by the officer administering the government for his personal use.

War Department and Admiralty—

All non-consumable articles such as furniture, plate, glass, or cutlery, for the sole use of any mess or canteen belonging to officers or sergeants of His Majesty's army, when certified by the officer commanding the corps having such mess or canteen, and such certificate is countersigned by the officer commanding the troops, that the same are imported solely for the use of any such mess or canteen, on an understanding that none of the articles shall be sold in the colony.

Arms, accoutrements, and uniforms the property of officers of His Majesty's army, navy or civil service, imported by such officers for their personal use on duty as required by the regulations of their respective services.

Articles of every description imported for the sole use of any mess or officer or any of the crew of any of the ships of His Majesty's squadron on the coast of Africa, upon proof being made to the satisfaction of the governor that the same are *bona fide* imported for the sole use of any such mess, officer or crew, and on an undertaking that none of the articles shall be sold in the colony.

Telegraph materials—

All *bona fide* telegraph materials landed for the use of the African Direct Telegraph Company.

Educational appliances—

Copy books, ruled books, stationery, school furniture and appliances, when imported by the manager of a school and certified by him as being solely intended for educational purposes.

Consulates—

Official goods imported for the use of consulates.

The following manufactured and unmanufactured articles of African produce, viz.: Aggidi, foofoo, shea butter, palm oil, kernel oil, corn, melon seed, raw ginger, dried pepper, raw cotton, beni seed, gum copal, gum arabic, palm kernels, ivory.

AN ORDINANCE TO AMEND THE CUSTOMS TARIFF ORDINANCE, 1905.

(No. 5 dated and assented to April 25, 1905).

Whereas it is expedient to reduce the standard of proof in respect of which customs duties are payable on spirits imported into the colony and protectorate:

Be it therefore enacted by the Governor of the Colony of the Gambia, with the advice and consent of the legislative council thereof as follows, viz.:

1. From and after the twenty-fifth day of April, 1905, there shall be charged on all spirits imported and brought into the colony and protectorate the following duties:

Upon brandy and whisky of or under the strength of twelve and a half per cent under proof by Sykes' hydrometer, and so in proportion for any greater strength.	per imperial gallon or part thereof	4
Upon other spirits, except perfumes, of the strength of twelve and a half per cent under proof by Sykes' hydrometer, and so in proportion for any greater or lesser strength. .	per imperial gallon or part thereof	4
Upon all kinds of spirits sweetened so that the degree of strength cannot be ascertained by Sykes' hydrometer	per imperial gallon or part thereof	4

2. That portion of schedule A to the Customs Tariff Ordinance, 1905, which sets forth the duties payable in respect of spirits imported into the colony or protectorate is hereby repealed.

3. This Ordinance may be cited for all purposes as the Customs Tariff (Amendment) Ordinance, 1905, and shall be read along with and construed as part of the Customs Tariff Ordinance, 1905.

TARIFF CHANGES.

BRITISH INDIA.

I.—ADDITIONAL DUTIES ON SUGAR FROM THE ARGENTINE REPUBLIC.

(Notification by the Government of India, Department of Commerce and Industry, No. 4787-18-2, dated September 6, 1905.—Customs Circular No. VI. of 1905).

In exercise of the powers conferred by section 8 A of the Indian Tariff Act, 1894 (VIII. of 1894), as amended by Acts XIV. of 1899 ⁽¹⁾ and XII. of 1903, the Governor General in Council is pleased to direct that in the schedule to the notification of the Government of India in the Finance and Commerce Department No. 327 S. R., dated March 20, 1899, as amended by notification No. 3374 S. R., dated June 20, 1901, for the entries in columns 2, 3 and 4 against 'Argentine Republic,' the following shall be substituted:—

Kinds of sugar.	Bounties bestowed,		Additional duties,	
	per cwt.		to be levied,	
	Rs.	A. P.	Rs.	A. P.
All kinds.	10	15 8	10	15 8

II.—SPECIAL DUTY ON SUGAR FROM THE ARGENTINE REPUBLIC.

(Notification by the Government of India, Department of Commerce and Industry, No. 4794-18-3, dated September 6, 1905.—Customs Circular No. VI. of 1905.)

In exercise of the powers conferred by section 8 B, subsection (1) of the Indian Tariff Act, 1894 (VIII. of 1894), as amended by Acts VIII. of 1902, ⁽²⁾ and XI. of 1904, the Governor General in Council is pleased to direct that in the schedule to the notification of the Government of India in the Finance and Commerce Department, No. 2026 S. R., dated March 25, 1904, for the entries in columns 2, 3 and 4 against 'Argentine Republic,' the following shall be substituted:—

Kinds of Sugar.	Amount of excess,		Rate of special duty,	
	per cwt.		per cwt.	
	Rs.	A. P.	Rs.	A. P.
Refined sugar or sugar polarising 96° and more.	12	0 4	6	0 2
Unrefined sugar or sugar polarising less than 96°	9	1 6	4	8 9
Sugar candy.	6	5 6	3	2 9

(¹) In virtue of this Act, an additional duty is levied on any dutiable article imported into British India from any country, dependency or colony paying or bestowing thereon, directly or indirectly, any export bounty or grant.

(²) Under this Act, a special duty is chargeable on sugar directly or indirectly imported into British India from any country, dependency or colony where the rate of duty or other taxation imposed in such country, dependency or colony upon sugar not produced therein, exceeds the rate of duty or other taxation imposed upon sugar produced therein, by more than the equivalent of 6 frs. per 100 kilogrammes in the case of refined sugar, or frs. 5.50 per 100 kilogrammes in the case of other sugar.

CYPRUS.

I.—ORDER OF THE HIGH COMMISSIONER IN COUNCIL NO. 374, DATED OCTOBER 31, 1903,
RELATING TO THE IMPORTATION OF OLD CLOTHES.

(*'The Cyprus Gazette, Extraordinary' No. 774, of November 30, 1903*).

From and after the first day of December next, the importation into this Island of old or used clothes for the purposes of sale or commerce is absolutely prohibited.

II.—ORDER OF THE HIGH COMMISSIONER IN COUNCIL NO. 386, DATED OCTOBER 25, 1904,
GRANTING EXEMPTION OF DUTY IN FAVOUR OF PIPING FOR USE IN PUBLIC WORKS.

(*'The Cyprus Gazette,' No. 808, of November 4, 1904*).

From and after the twenty-sixth day of October, 1904, the duties authorized to be levied on wrought iron piping and cast iron piping by 'The Customs, Excise and Revenue Law, 1899,' shall not be levied on any iron piping which shall be shown to the satisfaction of the High Commissioner to have been imported for the purpose of being used in the construction of any work of public utility by or on behalf of any public, municipal or local body or authority.

III.—ORDER OF THE HIGH COMMISSIONER IN COUNCIL NO. 393, DATED MAY 1, 1905,
AMENDING THE IMPORT DUTY ON CERTAIN VEGETABLE OILS.

(*'The Cyprus Gazette,' No. 825, of May 19, 1905*).

From and after the date of this order, the import duty to be levied on vegetable oils which the customs authorities are satisfied are imported for use in the manufacture of soap shall be 4s. 4cp. per 100 oke instead of £2 as heretofore; provided always that such oils are rendered unfit for alimentary purposes at the expense of the importer and under the supervision of the customs.

NICARAGUA.

I.—DECREE OF MAY 19, 1905, FIXING THE DUTIES APPLICABLE TO CERTAIN GOODS.

(*'Diario Oficial,' No. 2528, of June 6, 1905*).

Art. 1.—On the importation of the under-mentioned goods, there shall be levied customs duties as follows:—

	P.	C.
Barbed fence wire.	kilog.	0 01
Water cisterns and tanks of iron.	"	0 05
Roman and Portland cement.	"	0 02
Iron pipes, including cocks and keys.	"	0 02
Lumber, dovetailed or planed or not.	thousand	2 00

Art. 2.—The existing customs duties on the under-noted articles are increased by the following sums:—

	P.	C.
Cocoanut and 'coyol' oils.	kilog.	0 10
Mineral oils, impure.	"	0 02
Waters, perfumed for toilet.	"	0 20
Common or refined sugar.	"	0 15
Empty casks.	"	0 25
Iron bars, round or octagonal.	"	0 03
Pottery or earthenware or terra cotta.	"	0 04
Cables or rigging of aloes, agave or other vegetable fibres	"	0 06
Cordage of agave or other vegetable fibres.	"	0 10
Hemp, pita or agave.	"	0 03
Beer.	"	0 04
Common hooks of iron.	"	0 03
Common ship and soda biscuits.	"	0 05
Common soap for laundresses.	"	0 01
Timber, unwrought.	"	0 03
Wooden furniture.	"	0 20
Hay and fodder.	"	0 01
Bags of linen or hemp.	"	0 03
Stearic candles.	"	0 05
Generous wines, in bottles, not above 20° in strength..	"	0 15
The same, in other receptacles.	"	0 25
Dry wines, in bottles, not above 20° in strength.	"	0 12
The same in other receptacles.	"	0 20
Cognac in bottles.	per centilitre of alcoholic strength	" 0 01
Whiskey not above 30°	"	" 0 01
Whiskey above 30°..	"	" 0 01
Hats and footwear of all kinds. Existing tariff rates accord-		
ing to kind plus a surtax of 20 per cent.		

Art. 3.—.

Art. 4.—The law dated October 22, 1904, and the decrees of December 29, of the same year, and March 31 last, relative to public education, are hereby repealed.

Art. 5.—The present decree shall enter into force three months after its publication.

II.—LAW OF JUNE 17, 1905, INCREASING THE IMPORT AND EXPORT DUTIES LEVIABLE BY THE

CUSTOMS AT EL BLUFF.

(*'Diario Oficial,' of June 23, 1905.*)

Art. 1.—The duties now leviabie by the customs at El Bluff on imported and exported merchandise, are increased by 5 per cent.

Art. 2.—The present law shall enter into effect on the day of its publication; it repeals the law dated January 29, 1905, regulating the custom house of re-examination at Bluefields.

III.—DECREE OF JUNE 30, 1905, RESPECTING THE IMPORTATION OF MAIZE, BEANS AND RICE.

(*'Diario Oficial,' of July 3, 1905.*)

Sole article.—From the date of publication of the present decree in the *Diario Oficial*, and until the last day of December of the present year, maize, beans and rice shall be allowed to be imported into the republic free of duty. This exemption shall not apply to the Atlantic coast.

IV.—DECREE OF JUNE 30, 1905, RESPECTING THE PAYMENT OF IMPORT DUTIES.

(*'Diario Oficial,' of July 3, 1905*).

Art. 1.—The payment of import duties shall be effected in the following manner:—

For every hundred *pesos* of customs duties due, there shall be collected 240 *pesos* in national bank notes or their equivalent in silver at the rate of 50 per cent, or in gold at the rate of 20 per cent, including the surtax of 100 per cent established by the former law.

Art. 2.—The export duties payable in gold and which are now collected in national bank notes at the rate of 630 per cent shall continue to be levied in notes, or in gold at the rate of one *peso* for five *pesos* in notes, namely at the rate of 20 per cent.

Art. 3.—On the Atlantic coast, the duties shall continue to be payable as hitherto.

Art. 4.—The present decree shall enter into force on the day of its publication.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, November 7, 1905.

PARTIAL FAILURE OF THE RICE CROP.

According to the latest estimate by the Department of Agriculture and Commerce, October 24, the yield of rice this year will amount to 38,234,265 koku (one koku nearly 5 bushels), which shows a decrease of 25·7 per cent as compared with 1904, and 13·9 per cent as against normal years. The rice harvest for the last ten years was as follows:—

	Koku.
1904..	51,430,000
1903..	46,473,000
1902..	36,932,000
1901..	46,914,000
1900..	39,698,000
1899..	47,387,000
1898..	33,039,000
1897..	36,240,000
1896..	39,960,000

The rice crop in the north-eastern part of Japan seems to have suffered most from the abnormal weather experienced this year. Distressing reports are being published regarding the districts where the rice harvest has proved a complete failure. The governors and the members of parliament for the famine-stricken prefectures are now in conference with the Imperial government on measures for the relief of those in want. It was thought that a considerable quantity of rice, now not required for army supply, remained in military stores at Newchwang, and that it could be purchased for relief distribution. The Home Minister applied to the Minister for War, asking for this rice, when it was found that it had been already sold to a firm in Tokyo, and that it will be available only subject to a commercial profit. The authorities are now striving to devise means to supply the pressing wants of the people in the afflicted provinces. Associations are being formed for the purchase of rice and other cereals, with a view to preventing merchants from raising prices.

CHEMICAL FERTILIZERS.

It is reported that the capital of the Osaka Sulphuric Acid and Soda Company, which was originally \$250,000, and was last year increased by \$250,000, is to be further increased by a similar amount. This company experienced a wave of great prosperity during the war in consequence of the active demand for sulphuric acid for military purposes. The capital was increased last year for the erection of another factory in Kyushu, which is now under construction. Now that the war is over presumably the demand for part of its product must decline. There ought, therefore, to be substantial reasons for so large an increase of capital, which will doubtless be found to be based upon the increasing demand for fertilizers. This demand has so much increased that not only the present extensive works, but an additional manufactory, for which the present additional capital is required, is to be established in the Kwanto or eastern districts, the present works being so placed as to serve the westward country.

An importing house writes: 'In our opinion the use of fish, chemical, and animal fertilizers, in Japan, will greatly increase in future, year after year; farmers are now seeing the advantages of using them, instead of their old method of manuring their fields, and get better results.'

PROSPECTIVE COTTON-GROWING IN KOREA.

An association was recently organized in Tokyo under the title of the Cotton Cultivators' Association, the object of which is to experiment, and to encourage the cultivation of cotton in Korea. Mr. Ogiwara, M.P., a director of the association, who recently visited Korea, explained the advantages of cotton-growing to the Korean government, urging them to introduce the industry for the encouragement of the Korean farmers. The Korean authorities, it is stated, have been convinced of the advantages of this industry, and have agreed to give effect to the following measures:—

1. To establish thirty farms in Chulla province to raise cotton seed.
2. For the encouragement of the industry, to appropriate between \$35,000 and \$50,000 from the state treasury annually for three years.
3. The association will give all possible assistance and advice to the Korean authorities in promoting the cultivation of cotton.
4. These seed farms will supply farmers throughout the country.

INTRODUCTION OF FOREIGN CAPITAL.

The Japanese papers report that the Japan Credit Mobilier (Nipon Kogyo Ginko), which has been considering the best means to establish connections with capitalists in Europe and America, with a view to facilitating the introduction of foreign capital, has succeeded in arriving at an arrangement with certain influential capitalists in London, through the medium of Mr. Takahashi, Vice-President of the Bank of Japan, now in the British metropolis. The Credit Mobilier has decided to increase its capital by \$3,250,000; and it has been arranged that the new shares shall be taken up by the London capitalists. By this arrangement, foreign capitalists will have a more direct interest in the bank and the bond issues of railway and other companies than hitherto. The present authorized capital of the Credit Mobilier, Limited, is \$5,000,000 of which \$2,500,000 is now paid up.

MANUFACTURE AMALGAMATION.

The tendency towards combination of manufacturing investments, remarked in a previous report, on the part of the railway companies and the sugar refiners, has affected the match manufacturing interest. Osaka and Kobe are the principal seats of the match industry. In the former there are 51 factories and in the latter 60. The combined annual output of these concerns amounts to about \$2,750,000. A select committee of representatives is considering a scheme of combination.

AGRICULTURAL IMPROVEMENT.

The comparative failure of the rice crop, together with a marked shortage in other grains, and the serious falling off in quantity and demand for tea, are circumstances that serve to stimulate effort towards placing agriculture generally as far as possible on a scientific basis. The Minister of Agriculture, addressing the National Agricultural Association recently at Tokyo, urged upon the delegates the duty of increased energy towards the improvement of agriculture, and gave assurances that it was the policy of the government to press to early enactment necessary legislation.

ATTRACTIVE LABELLING.

A prominent importer gives this office the information that the wrappings and labels upon packages, boxes, &c., coming from Canada are not up-to-date compared

with those from the United States and Europe. Canada, he says, is in this respect years behind. This criticism is not applied to butter packages from the Canadian government creameries, which are a model of attractive design.

ALEX. MacLEAN.

FOREIGN CUSTOMS REGULATIONS AND CERTIFICATES.

Referring to Monthly Report for September, 1905, page 516, the following report upon the same subject was inadvertently omitted.

MEXICO.

REPORT OF COMMERCIAL AGENT.

(*Mr. A. W. Donly.*)

APARTADO, 2029,

MEXICO CITY, MEX., November 6, 1905.

INFORMATION *re* SHIPMENTS.

For all freight shipments the Mexican customs require a Mexican consular invoice. Besides a signed and stamped copy of the bill of lading, covering the goods to be imported, must be presented at the Custom House. This copy is filed at the Custom House, making it necessary for the consignee to also have a signed and stamped copy, in order to obtain delivery of the goods. It is also desirable that a copy of the shipper's invoice and a copy of the packing list should also be sent.

DISPATCH SIMPLIFIED.

All these papers should be forwarded to the customs broker, or clearance agent at the port where the goods are to enter the republic. If this is done their dispatch will be simplified, and delays and fines avoided. The following is quoted from instructions issued by one of the transportation lines entering Mexico, for the benefit of shippers: 'The packing list should show marks, counter-marks and numbers of packages, contents of each and the principal material of which article is made, and, if plated, with what; gross weight of each package, and kind of goods in package, legal weight of each package and class of goods, value of each kind of article, total value of package, country in which the goods were manufactured, name of shipper, date of shipment, name of consignee, destination and the name of the customs broker in whose care the freight is consigned.'

PACKING LISTS AND INVOICES.

Packing lists or pro-forma invoices should show all marks as they appear on the packages, as the law imposes fines for discrepancies between marks on packages and those on Custom House documents. A trade mark, or name of factory, uniformly stamped on all boxes, is not considered as a separate mark. The exact nature of each package, whether barrel, bale or box, should be indicated on the packing list.

DUTIES SPECIFIC.

As duties collected by the Mexican tariff are, in nearly every case, specific, it may be well to say that the tariff recognizes three kinds of weights, viz., gross (bruto) legal and net (neto). The only one of these weights that might cause any confusion to shippers is 'legal,' which means the weight of the goods plus any interior wrapping or packing; in other words the gross weight, less the outside box or protecting case. The Mexican Customs tariff can be had in this city, translated into English, but not the instructions in regard to manner of making shipments. These are in a separate book, are very lengthy and have never, as yet, been translated into English.

A. W. DONLY.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(*Mr. D. H. Ross.*)

P. O. Box 140, MELBOURNE, November 9, 1905.

EXPORTS OF AUSTRALIAN ONIONS.

Owing to the ravages of a pest called the eel worm, the production of onions in the state of Victoria will be very curtailed this year. In the reverse seasons, efforts were made—with some degree of success—in exporting Australian onions to Vancouver, but, from present indications, there will only be small quantities available for over sea shipment.

INFERIOR BRITISH COLUMBIA APPLES.

In October, a portion—some 40 cases—of a shipment of apples ex the *Aorangi* from Vancouver was, upon arrival condemned and destroyed by the New South Wales Department of Agriculture at Sydney, on account of the fruit being diseased with apple scab or black spot. This shipment was packed by a Vancouver firm, and in addition to the disease the apples were said to be of all sizes and shapes, and altogether an inferior rough lot. Small shipments of British Columbia fruit, which arrived in Australia last year were of fine quality and without blemish, so far as disease was concerned, and, therefore, Australian importers were looking forward to obtaining the bulk of their seasonable supplies of apples from Vancouver instead of from San Francisco, as heretofore. All the Australian states are exceedingly particular not to allow diseased fruit to enter this country. The introduction of Canadian apples into Australia has received a very serious set back through the condition of the shipment referred to. Further consignments landed in Sydney this week, but up to the closing of this mail I have not received advices as to the result of the government inspection.

THE VANCOUVER MAIL SERVICE.

The Commonwealth Senate, on November 1, approved of the extension of the Vancouver mail service at an increased subsidy, as from August 1, 1905, for a period of twelve months, with a proviso that if neither of the interested parties gives not less than three months' notice of termination, prior to August 1, 1906, the contract shall continue until July 31, 1907. A strong desire has been expressed in the Commonwealth parliament that the Vancouver mail service should—upon broad national grounds—be improved by faster and more modern steamers.

A TURBINE STEAMER FOR THE VANCOUVER ROUTE.

Early in 1906, during the heavy passenger season, the new turbine steamer *Maheno* will be placed in the Vancouver service, making a distinct advance in the size, accommodation and speed of the steamers at present engaged in the Canadian-Australian trade.

AUSTRALIAN REGULATIONS ON ADVERTISING MATTER SENT BY MAIL.

The Australian Customs Department has recently issued a special circular in regard to the questions which have been constantly arising in connection with the duty on advertising matter, particularly advertising matter received through the mails. The new regulations are as follows:—

1. Advertising matter is dutiable at 3d. per pound under item 122 (A) of the Commonwealth tariff.

2. Duty at this rate is levied on catalogues, price lists, trade circulars, and all similar advertising matter, introduced through the post, even when forwarded in single copies addressed to individuals, provided that the total weight of such single copies forwarded by any consignor by any one mail to any one state of the Commonwealth is not less than (4) four pounds in weight.—Vide paragraph 4.

HOW THE DUTY ON ADVERTISING MATTER MAY BE PAID.

3. The duty on advertising matter may be paid by any of the methods specified hereunder:—

(a) The weight of any one mail may be bulked by the consignor and duty at 3d. per pound remitted in one sum to the Deputy Postmaster General of the state to which the catalogues, &c., are addressed.

(b) Duty may be paid on total weight of any one mail by consignor's agent in the Commonwealth.

(c) If neither of the above methods can be followed, duty is collected upon the packets containing the catalogues, &c., according to the following scale:—

Up to 3 $\frac{1}{2}$ ounces	$\frac{1}{2}$ d. = 1 cent.
" 6 $\frac{1}{4}$ "	1 d. = 2 "
" 9 "	1 $\frac{1}{2}$ d. = 3 "
" 12 "	2 d. = 4 "
" 14 $\frac{1}{2}$ "	2 $\frac{1}{2}$ d. = 5 "
" 16 "	3 d. = 6 "

DUTY ON SMALL QUANTITIES OF ADVERTISING MATTER WAIVED.

4. In cases where the total duty on advertising matter by any one mail addressed by any one consignor to any one state of the Commonwealth does not exceed 1s., the payment of duty is waived.

DUTY ON INSETS IN MAGAZINES, ETC.

5. It may also be mentioned that duty at 3d. per pound is levied on insets introduced in magazines, &c., whether the insets are loose or fastened into the magazines, &c. This does not, of course, apply to the ordinary advertising pages of magazines, &c., and is subject to the rule laid down in paragraph 4.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(*Mr. D. H. Ross.*)

P. O. Box 140, MELBOURNE, November 9, 1905.

AUSTRALIAN WOOL.

Wool is being exported very freely from Adelaide, the high prices ruling, combined with increased supplies, causing great activity in the shipping trade. The exports from Australia—during the four months ended on October 31—were 349,051 bales, against 225,967 during the same period in 1904, showing an expansion of 123,084 bales.

THE WOOL SALES.

This season's wool sales were opened in Melbourne about the middle of October in the presence of the largest attendance of operators ever seen here, all sections of the buying trade being well represented. The sales are being continued weekly in the principal Australian cities. The great manufacturing centres of the world are all personally in evidence, the United Kingdom, France, Germany, Belgium, America and Japan, while no doubt the users of wool in the other parts of the globe were catered for by the regular buying brokers, who make this market their headquarters.

ADVANCE IN PRICES OF WOOL.

The sales of wool which have been held in Melbourne and other centres since the opening of the present season have been marked by a distinct advance in all qualities. Merinos advanced from five to ten per cent and crossbreds from ten to fifteen per cent. The demand, as attractive wools come under the hammer, is most animated and highly satisfactory business is being maintained.

AUSTRALIAN EUCALYPTUS OIL.

The process of manufacture of the oil embraces the distillation of the crude product in the forest or bush with subsequent rectification by one or other of the ordinary methods used for essential oils. For many years the manufacture remained in the hands of the original discoverer, and to his efforts, as well as to its own intrinsic merit, may be traced the popularity of the article in Australasia to-day, as well as its recognition in the British and United States pharmacopœia as a standard article of the *materia medica*. It enjoys an increasing popularity as a household remedy for rheumatic aches and pains, influenza, coughs, colds and general pulmonary troubles. It is also used as an embrocation for muscular complaints, and is generally recognized as a standard household panacea. Eucalyptus oil is obtainable from every chemist and storekeeper in Australia in various forms or qualities, and it is frequently incorporated in the production of other mixtures for medicinal use and application, amongst which are jujubes, throat lozenges, &c.

METHOD OF PACKING EUCALYPTUS OIL FOR EXPORT.

Except for proprietary lines, which are sold in small bottles, the standard method of packing eucalyptus oil for export is as follows: No. 1 case, containing 4 tins each,
5869—8

about 3 gallons=28 pounds net; No. 2 case, containing 1 drum, about 8½ gallons=75 pounds net.

The latter method of packing enables the makers to quote the oil about one cent per pound cheaper than in the former package. In addition to the shipment of oil in the bulk form, large quantities of the leading brands of bottled oil are exported to England and the continent of Europe.

PRINCIPAL MARKETS FOR EUCALYPTUS OIL.

The principal countries to which eucalyptus oil is exported are the United Kingdom, Germany, the United States and New Zealand. The volume of trade is as yet comparatively small, but is increasing, and when its value, as a medicinal agent is more generally known, a vastly increased demand must result. While inferior qualities can be obtained, I believe it would be a profitable line for the wholesale druggists and chemists in Canada to investigate, particularly in the better qualities. I am of opinion that an extensive introduction of eucalyptus oil throughout the Dominion would result in a satisfactory business. I shall be glad to place any Canadian firms interested in this product in direct communication with the leading and principal distillers in Australia.

METAL CEILINGS AND ART STEEL GOODS.

In my report of October 2 (see Monthly Report for October, page 682), I gave some particulars regarding the metal ceilings and art steel goods required in the construction of the new railway station at Melbourne. The contract has been placed with an Australian firm, the amount involved being in the vicinity of \$70,000.

NOVA SCOTIAN CANNED LOBSTERS.

The principal retail grocery concern in Melbourne has recently sent forward a repeat and increased order for a brand of canned lobsters, packed in Halifax, Nova Scotia. The superior quality of the brand has given such satisfaction to the importers that it is probable Australian dealers in high class canned goods will be disposed to place fair orders for Nova Scotian lobsters if the cost is not excessive.

CANADIAN TRADE NOTES.

The first shipment of British Columbia salmon arrived in Australia in splendid condition, and it has given every satisfaction to importers. The second shipment arrived in Sydney this week and the Melbourne proportion is due here to-day. Good orders are going forward for wood pulleys by this mail. The rubber business is unusually quiet for this season of the year, and an improvement in the conditions is anxiously looked for by the representatives of Canadian manufacturers of this line of goods. A line of Montreal shoe polish is meeting with an increased sale, and the quality is giving every satisfaction. Recent shipments of Canadian cheese, in jars, have come forward in good order and condition.

D. H. ROSS.

BRISTOL.

REPORT OF COMMERCIAL AGENT,

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., November 30, 1905.

APPLES.

The following were the market quotations for Canadian and other apples on the 18th instant:—

Bristol.—Canadian apples: Coloured varieties are making from 20s. to 28s. per barrel, with Golden Russets at 24s. to 26s., and Greenings, 18s. to 20s.

Leeds.—Apples: Canadian Greenings, 21s. to 24s. per barrel; American Baldwins, 18s. to 22s. per barrel.

Liverpool.—American and Maine Baldwins made 14s. 3d. to 19s.; Maine Spys, 15s. 9d. to 20s.; Ben Davis, 14s. to 16s. 6d.; and Kings, 17s. 9d. to 21s. Greenings in very strong demand at 18s. 9d. to 21s. 6d.; Starks, 17s. to 18s. 3d.; Nodheads, 16s. 6d. Canadian Baldwins, 3 cross, 18s. 6d. to 20s.; Greenings, 20s. 6d.; Phoenix, 18s. 9d.; Golden Russets, 20s.; Ben Davis, 18s. 3d.; Nova Scotian Blenheims, 3 cross, 17s. 3d. to 20s.; two, 15s. to 16s. 6d.; Kings, 18s. 2d. to 21s.; and California Newtons, boxes, 8s. to 8s. 3d.

Newcastle-on-Tyne.—Apples. Canadian XXX Baldwins, 22s. 6d. to 24s.; Greenings, 23s. to 25s.; various, 18s. to 24s.; American Baldwins, 18s. 6d. to 22s. 6d.; various, 17s. 6d. to 20s.

Nottingham.—Apples: Canadian, 20s. to 24s. per barrel; Maine, 16s. to 18s. per barrel; Nova Scotian, 16s. to 20s. per barrel.

Canadians will derive satisfaction from observing the favourable position of Canadian fruit in competition with that from other sources. It is probably well known to the trade that Nova Scotia fruit is quoted separately from that originating in other provinces. It will be noticed that 'Nova Scotia' quotations are rather lower than 'Canadian.' This is doubtless owing to the smaller size of the Nova Scotia barrel, since there is frequently little to choose in quality between the product of the Annapolis valley and that of Ontario.

QUEBEC COMMERCIAL TRAVELLERS' TAX.

Some inquiries have reached this office regarding the exact conditions and terms in which this tax is imposed, and as to the probability of any important amendments in connection therewith at the next session of the Quebec legislature. The hope has been freely expressed that some action may be taken, either by the provincial or Dominion authorities, tending to the reduction or removal of this obstacle to British-Canadian trade.

TEA INDUSTRY.

Canadian tea importers will be interested in the present situation of this trade in Great Britain. For the year ending June 30, 1905, duty was paid at the rate of 8d. imposed by the budget of 1904, on 221,500,000 pounds, or 30,500,000 pounds less than the average for the three preceding years, which was 252,000,000 pounds. It might be assumed that this reduction was due to decreased consumption, owing to higher prices,

but the figures since July 1 of this year, when the duty was reduced to 6d., tend to show that such was not the case.

For the first four months at the 6d. rate, deliveries were 121,000,000 pounds, against 86,000,000 pounds, the average for the same months in 1902-03-04; the increase of 35,000,000 pounds thus more than making up the previous deficiency. Experts are of opinion that only a small portion of this surplus represents an increase in the tea consumed, the remainder having been required to replenish the traders' reserve, which had been drawn upon after the reduction was announced, in order to avoid taking any further tea out of bond at the 8d. rate.

NORMAL 'INVISIBLE SUPPLIES.'

Hence the conclusion is drawn that the invisible supplies amounted in Great Britain to something less than 35,000,000 pounds, which is equal normally to about six weeks' consumption. A further conclusion seems to be justified, namely, that the use of tea has become so fixed a habit that it has been practically unaffected by the higher prices.

SHIFTING OF DEMAND.

An important change did occur, however, owing to the higher duty: people continued to use tea, but they sought to neutralize the increase in the duty by purchasing a cheaper grade. The result has been an increase in the demand for common teas at the expense of the better qualities.

BETTER GRADES AGAIN POPULAR.

Since July, however, whether owing to the reduced duty, to the hope of further reductions next year, or to the smaller imports of China tea, a reversal has occurred and finer qualities are once more in the ascendant. British consumption, therefore, appears to be established on a firm basis, and this together with the reduction (estimated at nearly 45,000,000 pounds) in the total exports this year from India, China and Japan, will doubtless tend to strengthen the trade demand.

CHINA TEA LOSING GROUND.

One result of the late run on cheaper qualities has been to compel India and Ceylon growers to reduce the cost of production, and this in turn has rendered the competition of China almost impossible; only 5,600,000 pounds have this year been cleared for home consumption, as compared with 9,900,000 pounds in 1904, and 12,700,000 pounds in 1903. If this shortage continues it is probable that Mincing Lane will not be the only market to feel its effects.

W. A. MacKINNON.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., December 15, 1905.

STOCK OF PROVISIONS AT LIVERPOOL.

Estimate of the stock of provisions, &c., in the port of Liverpool, on November 30, 1905, together with the figures at the corresponding date last year, and also of last month:—

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN, November 11, 1905.
P.O. Box 1232.

SOUTH AFRICAN APPLE IMPORTERS.

Having been requested to furnish the names and addresses of some of the more important South African firms who import fruit, I have to mention the following:—

Imperial Cold Storage Co., Ltd., Cape Town.
John Bell & Co., Fruit Market, Cape Town.
Federal Cold Storage Co., Ltd., Long street, Cape Town.
Taylor & Myles, Castle street, Cape Town.
Jessep, P., & Co., P.O. Box 824, Cape Town.
Manasse & Co., P.O. Box 525, Port Elizabeth.

Schmidt, H., & Co., Ltd., Kimberley, Cape Colony.
 Imperial Cold Storage Co., Ltd., Durban, Natal.
 Federal Cold Storage Co., Ltd., Durban, Natal.
 Keene, J. F., Anglo-African House, Durban, Natal.
 May, A., & Co., Smith street, Durban, Natal.
 Buchanan, Forsyth & Co., Smith street, Durban, Natal.
 Cohen Bros., Fordsburg, Johannesburg.
 Associated Fruit Growers, Market Square, Johannesburg.
 Imperial Cold Storage Co., Ltd., Johannesburg, Transvaal.
 Miller, E., & Co., P.O. Box 3216, Johannesburg, Transvaal.
 Federal Cold Storage Co., Ltd., P.O. Box 1962, Johannesburg.
 Alexander & Jacobs, P.O. Box 1953, Johannesburg.
 African and United Colonies Supply and Cold Storage Co., P.O. Box 664, Johannesburg.
 Johannesburg Cold Storage Co., Ltd., P.O. Box 596, Johannesburg.
 Beckett, T. W., & Co., Pretoria, Transvaal.

CHAS. M. KITTSOON.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,
 EAST PARADE, LEEDS, ENG., December 6, 1905.

APPLES.

Canadian apples are being received in very large quantities at both Leeds and Hull. The packing and grading is, with very few exceptions, much better than last year, and is considered by the dealers here as almost perfect. The Baldwins, Greenings and Spies are in splendid condition and nicely coloured.

IMPORTANCE OF BRANDS.

The prices are the highest realized for Canadian apples at this season for many years. The English buyer places a great deal of reliance upon 'brands,' and on account of the great army of middlemen through whose hands our food products have to pass, it is almost a condition precedent to obtaining the best price that all goods should have a representative brand.

The Danish and Swedish butters are well known by their distinctive brand, one 'stave' in each barrel being marked with the brand, and known as the 'brand stave.'

Our best apples would not be sold as 'American' if such a 'universal stave brand' were used by Canadian shippers.

AUSTRALIAN TRADE.

The Australians are competing with Canada throughout the length and breadth of Great Britain, both as to trade and immigration, and are now endeavouring to forestall us all along the east coast, especially in regard to the large district adjacent to Hull, and served by the waterways diverging from that centre. The Australians visited the port of Hull a little over a month ago, and being well pleased with the outlook for

trade, have subsidized a direct line of steamers from Hull to Australia, giving a monthly service during the winter months, and a fortnightly service in the summer.

CHILLED OR FROZEN BEEF.

The average Englishman is averse to buying beef in chilled or frozen form. He admits it is just as good as fresh beef, and in some cases better, but his natural predilections are against it. The Anglo-Argentine Co., which is building up the meat trade of the Argentine to such immense proportions, are fully alive to this peculiarity of the English customer, and they are now shipping the animals to Holland, where they are slaughtered, and the beef is brought into these markets as fresh beef, in fact as English home-grown, the good roast beef of old England.

BUTTER.

Canadian butter has this summer made greater strides in this district for popular support than for many years, and is gaining favour with the masses, and has now an established reputation as a first class article, and is bringing very high prices.

AMERICAN TRADE METHODS.

The following remarks on United States trade methods are taken from a report of the United States consul at Birmingham. The statements of the consul are very apposite to the trade methods of Canadian exporters to this country, and the answers of the English correspondent to the consul are almost identical with the remarks made to me by English firms in the interior cities, who are only too glad to do business with Canadian houses and thereby increase Canadian trade:—

‘The United States consul at Birmingham does not appear to have a very high opinion of the methods adopted by American manufacturers who desire to get a foothold in the British markets. He complains that notwithstanding requests for catalogues which he had sent to the Department of Commerce and Labour, he received no response. This plan having failed, the consul sent to an English correspondent, and this method succeeded. In commenting on the replies the Englishman received from American advertisers, the consul says: “One refers him to a ‘sole export agent’ in an eastern city. These export agencies seem to be peculiarly an American way of delegating to someone in a seaport city the work of obtaining foreign business, and often these export agents attempt to get that business by merely writing letters and circulating catalogues. That is not, in my opinion, the way to get foreign business, and certainly should never be attempted in a competitive manufacturing country. Another firm is now negotiating with some one in London, England. The home business of still another firm is so great that it does not care to touch a foreign business. Some others want to trade sight unseen—that is, to sell goods if they can receive pay for them before the goods are shipped from the factory.” This sort of thing does not lead one to have a very high opinion as to American methods in foreign markets.’

JNO. B. JACKSON.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, December 1, 1905.

SWEDISH AND DANISH EXPORT MARKS.

Sweden as well as Denmark has introduced a separate export mark for butter exported to England. The Danish mark, the so-called 'Lurmarke' (translated: cow-herds-horn mark) has long ago secured for itself a first class reputation on the English market. The Swedish mark, which has only been introduced during this last year, seems to have more difficulties to encounter. In order to give the Swedish butter export to England a good start, the Swedish agricultural counsellor in England, together with the Swedish Agricultural Association, are preparing an exhibition of Swedish butter at Manchester, to be held during the month of March, 1906. Besides there is planned a systematical advertising in the English press and a very extensive work among the English buying public, so the Swedish brand of butter may become known and in demand.

C. E. SONTUM.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14 BUND, ROOM B., YOKAHAMA, November 28, 1905.

CANADIAN FLOUR.

The importation of Canadian flour into Japan this year to the end of September, amounted to \$35,118 in value, which, compared with that of the corresponding period of last year, shows a decrease of \$71,065. This is unsatisfactory for Canadian trade, but it is not the result of Japanese prejudice against Canadian flour, neither of a falling off in demand. The fact is that although the good quality of Canadian flour is well known to the trade here, the difference in price in comparison with that of American flour, has continuously operated against its introduction into this market. The greater consumption of flour brought into this country, is in the manufacture of macaroni and other pastries; while the higher quality is used for the making of bread and the better kinds of paste foods. Canadian flour is used for the latter purposes, for which it is admitted to be well adapted. Canadian flour ('Glenora' brand, for example) is quoted at \$1.65 per 49 pound sack, whereas a fairly good American brand costs \$1.20. There are Canadian quotations between these, but all too high for the market where the fairly good article is quite acceptable. Bread and pastry bakers and others who became interested by the demonstrations in Canadian flour at the Osaka Exhibition, have consequently been dropping the Canadian article for the

cheaper American and Australian brands. To this fact may be attributed the diminution this year of the import of Canadian flour, despite some increase in the quality of the total importation. Canadian flour, which heretofore had to be brought from Winnipeg or its environment, for the past year has been practically out of the market.

There is, however, the prospect of a recovery in favour of Canada, mainly owing to the introduction of the product of some mills in British Columbia. The samples and quotations from those mills have been very favourably received by the trade, and have already resulted in contracts for several trial orders. If Canadian merchants or milling firms follow up the opening thus made, and push the trade with energy, Canadian flour will be able to establish firm footing in this market. It is advisable for this purpose that some of the enterprising Canadian firms should send their representatives to this country to exploit the market.

SEEKING A MARKET IN JAPAN.

A leading member of a western Canadian milling firm is now in Japan, not for present business, but to provide himself with estimates for the future. His firm are preparing for a present increase of their daily output, by a thousand barrels per day. The success this year in growing fall wheat in Alberta, with the assured doubling or trebling of this year's yield next year, and the probable continuance of that rate of progression for years, together with special assurances of satisfactory transportation rates, are circumstances that give him confidence to make all necessary preparations for entering this market and that of China next year. He is making a thorough survey of the Japanese field, and has satisfied himself so far that Alberta flour will be, in the early future and onward, in quality and price acceptable to the Oriental market. He recognizes the strength of the American grip upon the trade here; but holds that production in the United States territory tributary to the Pacific ports and the Orient cannot increase, and that export thence will decrease because of increase in home consumption and progress in mixed farming. The advancing demand out here must be met from Canada; and he feels confident that Canada tributary to the Pacific will be able to meet it. The example of this progressive Canadian should be followed by others, in order that in Japan a Canadian impression may be made.

JAPAN BECOMING MORE DEPENDENT.

As I have remarked in my previous reports, Japan is becoming more and more dependent on foreign countries for food supply. There is now no doubt that in the importation of food stuffs flour will play a greatly increasing part. Moreover, Korea has now been placed under the protection of Japan, and a large region of Manchuria also will no doubt come under Japanese influence. Under these circumstances, it would be safe to assume that the bulk of the trade in these countries will be in the hands of Japanese. With the improvement of the conditions of life in Korea and Manchuria under Japanese administration the demand for various lines of foreign goods, including food stuffs, will increase among the native population.

Canada's participation in the Osaka Exhibition of 1903 has served as a very good advertisement for Canadian produce, especially flour; but even good impressions weaken and they go to waste if not followed up. The impression created at Osaka is still strong enough to greatly assist an early movement in the interest of Canadian flour.

JAPAN'S TRADE FOR OCTOBER.

Japan's export trade for October amounted to \$14,604,265, showing a decrease of \$2,819,540 compared with the corresponding month of 1904. The imports totalled \$29,229,852, a decrease of \$4,901,318 as compared with October last year. The figures for the principal imports are as follows:—

Imports.	October, 1905.	October, 1904.
Raw cotton..	\$1,147,497	\$3,874,360
Cotton yarn..	168,254	11,354
Wool..	303,462	453,977
Flax, hemp, &c..	260,904	122,923
Iron nails..	77,539	111,389
Rails..	67,240	98,226
Iron—bar and rod	366,820	181,429
Iron pipes and tubes	79,152	98,449
Other iron and steel	830,534	417,629
Paper..	289,978	163,421
Leather, sole and other..	449,409	247,824
Machinery and engines	561,461	398,519
Locomotive engines..	133,302	47,119
Steamers..	197,457	244,905
Mousseline-de-laine	168,592	103,432
Woollen cloths..	138,140	132,474
Shirtings and prints	523,045	307,914
Cotton satins and velvets	150,639	44,145
Sugar, white and brown	709,332	747,466

ANOTHER INTERNATIONAL EXHIBITION.

The idea seems to be taking strongly with the Japanese public that the holding of an international exhibition upon a large scale, preferably in Tokyo, would be a most effective way of marking the inauguration of the After-the War era. Should this project be realized, it will afford a fine opportunity for those Canadian manufacturers who wish to push their export trade in this country. It is thought that preparations could be completed for the season of 1908.

THE WAR TARIFF.

The increase of the customs tariff enacted at the late season of the Imperial Diet, and which went into effect on July 1 last, was subject to the understanding that it would be removed upon the conclusion of peace. This event has come sooner than at the time anticipated and provided for. Now, however, at the ninth session of the National Conference of the Farmers' and Mechanics' Bank recently, the Vice-Minister of Finance addressing the meeting stated that 'Japan must actively work in future in the exploitation of Korea and Manchuria, and the expenditure needed in that direction would not be less than that spent by Russia in similar work. Japan might rely upon foreign loans to a certain degree, but at the same time the decrease or abolition of war taxes was practically out of the question.'

JAPANESE WOOLLEN MANUFACTURE.

The active market for woollen goods last year was recognized as being due to military requirements. The quantity produced in one of the principal manufacturing prefectures last year amounted to \$791,440, which represented an increase of 20 per cent over 1903. Of this value about \$340,000 went for home consumption and about \$450,000 for export. It is estimated that the rate of increase will not be affected by the cessation of military operations, but that the Korean and Manchurian field will absorb the continued increase of output. This at any rate is the tenor of a report at the Department of Agriculture and Commerce.

HIDE AND LEATHER TRADE.

The hide and leather trade is reported to be suffering from the effects of the sudden closing of the war. Importing merchants had stocked heavily upon the speculative prospect, and consequently stood to make or lose heavily. The adverse turn of the scale it is feared means more or less of disaster. The trade is now described as being at a standstill, and prices consequently on the decline. A quantity of elephant hides recently sold at auction by a Yokohama firm realized only about half the cost of the lot. Much of the leather, such as this, imported for army use, would be of special kinds, and these will entail the greater loss. The depreciation in leather generally will not be so great, but such as it may be, together with the slow market movement, it will back up heavily somewhere; and so the whole trade is said to be adversely affected. One statement is that a leading leather firm at Nagoya has suspended, and that 'several merchants at Osaka and Kobe are said to be on the verge of bankruptcy.'

ALEX. MacLEAN.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. E. C. Sontum.)

CHRISTIANIA, NORWAY, December 7, 1905.

TRADE INQUIRIES IN SCANDINAVIA.

The number of trade inquiries by Canadian importers shows some decrease for the past year. This is by reason of the uncertain political situation which has prevailed in the Scandinavian countries. The Canadian firms, therefore, have been holding off awaiting a final settlement of Norwegian affairs. As now everything is peacefully arranged, I again look for an increase in the correspondence, although I believe that the Canadian manufacturers are at present so heavily engaged in supplying the home market they do not pay much attention to this market. This is proved by several Canadian exporters who previously did quite an export to Scandinavian countries, having advanced their prices so much that, according to what I learn, the importers here cannot buy from them at present. In my opinion the Canadian exporters are making a mistake in this, for a connection once lost, it is necessary to start from the beginning again.

C. E. SONTUM.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. Ball.)*39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., December 16, 1905.

APPLE SHIPMENTS.

I have watched with much interest the various shipments of apples from Canada into this market, and I think the proportion used by Birmingham this year is considerably greater than last. The great trouble is that the shortage in crop has prevented

the people in my district buying to the extent they otherwise would. Apples, however, have reached very much higher prices this year than last, and are very likely to still increase. Several of the largest buyers in Birmingham made their arrangements early in the season and bought direct from Canada, and these shipments have come out much more even than goods bought at auction in Liverpool and Bristol.

COMPLAINTS OF CARELESS MARKING.

A good many complaints have reached me of careless marking. No one would ever think that people would be so misguided as to ship an apple under another name, because the one marked brought a much higher price than the other. I will give two instances which will be sufficient. One firm wrote me about a month ago stating that he had bought a parcel of Russets XXX, for which he paid a large price, Russets always commanding a higher price in Birmingham than any place in the kingdom, and in the ten barrels purchased, four were Greenings and were not worth within five shillings a barrel of the price of the Russets. On another occasion, in a small lot of XXX Seeks, he found a barrel of Snows and a barrel of small Ben Davis, very inferior fruit. For the information of the department, I inclose the names of these two shippers.

BREACHES OF CONTRACT.

I have received several bitter complaints that Canadian shippers are not carrying out contracts as made. One particular shipper, through his agent here made an offer for apples at from \$2.50 to \$3 a barrel f.o.b. After looking into the matter, he decided that with apples at their present price, he would offer the higher price, namely, \$3, and purchased 1,000 barrels of Golden Russets, 500 Kings and 500 Blenheims at an all round price. These apples were to pass government inspection and the buyer was to pay \$2 a barrel before shipment and \$1 a barrel on their arrival. This was cabled, but the seller cabled replying that the price had advanced so much that he could not fill the contract. Now this is a reputable firm, and I do not doubt there will be considerable trouble for it in the future. It seems such a pity that Canadian shippers should so prejudice their chances of doing future business in Great Britain by transactions of this kind.

BARRELS SHOULD BE MARKED ON THE SIDE.

As I wrote in a former report (and I think it has been followed up by reports from other commercial agents), people think it would be a good plan for Canadians to stencil on the side of the barrel 'Canadian' as well as on the head. Of course, with the wholesale people the head of the barrel is rarely lost, but with the retailer the barrel is opened up and the head very often thrown on one side, and an inferior apple is sold as Canadian. I have seen this done. The Canadian apple as a general thing is very much superior to the American, and I think the Canadian fruit growers would be well advised to prevent incidents like the one mentioned above. Of course, when one is conversant with the trade, all that is necessary is to look at a barrel to know whether it is Canadian or American, but very few are educated up to that point.

P. B. BALL.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN, December 1, 1905.

P.O. Box 1232.

WIRE NETTING.

The trade in wire netting has hitherto been largely in the hands of English manufacturers, but they having recently considerably advanced prices the time is opportune for Canadian manufacturers to make a bid for the business.

SHOVELS AND SCOOPS.

In reply to an inquiry lately made to this office with regard to shovels and scoops, the following information has been obtained:—

Imports of shovels are principally of English origin of both the round and square nose varieties, and the main demand is for the black or unpolished article. Present suppliers are quoting 12s. to 21s. per dozen f.o.b., English ports with the better grades in favour.

Scoops are better known on this market under the name of drag scrapers, the U.S.A. practically monopolizes the demand, supplying a satisfactory article in three qualities at quotations varying from: No. 1, \$3.25 to \$4.50; No. 2, \$3 to \$4.25, and No. 3, \$2.80 to \$4 per machine of a capacity of 7, 5 and 3 cubic feet, respectively f.o.b., New York, less 2 per cent for cash.

CANADA SHIPPING INFERIOR FRUIT.

A local fruit importer recently placed an order for Canadian apples with a Belleville, Ont., shipper. When the fruit arrived at Cape Town the barrels were found to be marked XXX, but the contents were of such a poor quality that the importer considered himself lucky to be able to clear the cost of transportation of the shipment. This is in contrast to the action of a Halifax, N.S., exporter who shipped first quality fruit which realized £2 10s. per barrel. As this office has already advised, South Africa offers no satisfactory opening for a poor quality of apples; on the other hand it pays the highest price in the world for what it wants, viz., the best.

INQUIRY FOR CHAIRS.

An inquiry has been made to this office for a quotation on 100 dozen cheap quality folding chairs, but Canadian manufacturers of this article not having supplied this office with catalogues, the order went to a Vermont, U.S.A., firm.

BORING MACHINERY.

In reply to a late inquiry I would advise that boring for water is very largely on the increase throughout South Africa, owing partly to government financial assistance to farmers for this purpose, and partly to the absolute necessity of most farmers having a reliable supply of water in times of drought, consequently this market for machinery for this purpose will be an expanding one for some time to come.

REFRIGERATOR PLANT.

In reply to an inquiry as to the possibilities of this market in regard to refrigerators, I would advise that there is a good demand which is capable of being greatly enlarged, especially as regards hotels, restaurants and bars.

C. M. KITTSOON.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., December 15, 1905.

MANCHESTER AND CANADIAN TRADE.

With the arrival at Manchester on December 9 of the ss. *Manchester City*, the direct steam communication between Montreal and Quebec and Manchester closed for the season.

The 'Manchester Liners, Limited,' is purely a local company, and one of its principal objects was to establish direct sailings between Canadian ports and Manchester, through a fleet of well equipped vessels with cattle accommodation and refrigerated chambers. That the object of this company has been achieved in respect of the Canadian trade, is proved from the fact that a regular service has been maintained since the inauguration of the line in 1898, and the steamers are securing full cargoes, the nature of which is indicated by the following items appearing in the manifest of the ss. *Manchester City*, from Montreal, now discharging here:—

Cattle	Head.	347
Wheat	Bush.	89,099
Barley	Bush.	13,197
Pickets	Bdls.	16,809
Bacon and hams	Boxes	138
Cheese	Boxes	1,339
Eggs	Cases	100
Canned meat	Cases	280
Lard	Pails, tubs and boxes	11,324
Maple lumber	Pieces	590
Elm lumber	Pieces	1,134
Lumber	Pieces	778
Boards	Pieces	10,473
Boards	Bdls.	209
Deals	Pieces	19,130
Deal ends	Pieces	5,134
Carbide	Crates	250
Wood pulp	Bdls.	397
Flooring	Bdls.	1,354
Grape nuts	Cases	1,850
Rags	Bls.	90
Rubbers	Cases	370
Leather	Pkgs.	227
Match splints	Cases	218
Hay	Bales	187
Machinery	Pkgs	236
Pulp boards	Bales	100
Paper	Rolls	931
Apples	Barrels and boxes	4,088

During the winter season the Manchester Liners, Limited, will resume their regular fortnightly service between Manchester and Halifax, N.S., and St. John, N.B.

IMPORTS OF CANADIAN LUMBER.

Enormous supplies of lumber are imported to Manchester, of which a good proportion comes from Canada. Manchester is the fifth timber port in the United Kingdom, the total quantity landed here during the year 1904 being 353,280 loads. This total will be surpassed this year, and it is worthy of note, that whilst the import this season to the principal British ports has decreased, Manchester has been favoured by an increase of 9,000 loads.

FRUIT PRICES.

Owing to the reduced cost of transit from Manchester to the consumers in adjacent towns, better prices are realized for fruit than at some other ports, and I am informed by the principal fruit brokers, that the Manchester sales are attended by a large and increasing number of buyers, as apart from the saving in cost of transit the buyers prefer Manchester, because a certain deterioration of the fruit is avoided owing to the excellent railway connection with the docks to the interior points, thus giving a minimum of handling and quicker dispatch.

IMPORTS OF CHEESE FROM CANADA.

The imports of cheese from Montreal to Manchester have been well maintained this season, and the *s. Manchester Importer*, which recently arrived, brought what was probably a record shipment to this port, viz., 10,533 boxes.

BOOM IN BRITISH TRADE.

From the Board of Trade returns for the month of November, recently issued, the following figures were obtained:—

‘The total imports for the month of November amounted to £53,146,934, as compared with £50,670,846 for the corresponding month of 1904, being an increase of £2,476,088.

‘The total exports for last month amounted to £29,608,149, against £26,113,288 for the month of November, 1904. The exports thus show an increase of £3,494,861.

‘The total imports for the eleven months of this year amount to £512,173,646, against £498,523,697 for the corresponding period of last year, an increase of £13,649,949.

‘The value of the exports for the eleven months was £301,371,273, compared with £272,745,763 for the corresponding months of 1904, an increase of £28,625,510.’

SHOULD STUDY THE ENGLISH MARKET.

It is a matter of the greatest importance to the Canadian manufacturer who expects to do an export trade with this country, that he should study the requirements of the wholesale market. I fear it is too often taken for granted that goods made for the Canadian market will satisfy the English buyer, but this it not borne out by facts. It has been impressed on me by travellers representing Canadian firms, that the trade here requires the very cheapest grade of goods, in order to compete successfully with continental and United States makers in the same line. Whilst larger profits are looked for by both wholesale and retail dealers here, the former is only prepared to buy goods at a price to enable him to sell at a considerable profit.

The building trade well represents a section that absorbs large quantities of manufactured goods, and houses at rentals of from £27 to £35 per annum are erected in rows occupying whole squares of land, so quickly and cheaply, that only the very cheapest materials are used. In the matter of trade discounts, where the Canadian article was offered at 7½ per cent, a traveller was told that 20 per cent was given by United States makers of the same line, and this could only be done by giving cheaper grades.

It is therefore a difficult matter for a Canadian traveller to meet with the success he expects in effecting sales in this country. Unless the manufacturer he represents will take advantage of his experience of the trade requirements, and conform to them, his success will be seriously hampered.

P. B. MacNAMARA.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, December 9, 1905.

OCTOBER FLOUR.

Some measure of activity in the flour market became noticeable upon the advent of the autumn months. The official returns for October present the following result:—

	Lbs.	Value.
Imports, Canada	395,130	\$ 12,036
“ Australia	2,583,462	58,026
“ United States	15,787,838	332,230

This is the value for customs, and therefore may be taken for the invoiced value; and, figured out, gives the competitive value upon which the three principal flour exporting countries enter this market:—

Canada	Per lb.	3·04 cents.
Australia	“	2·24 “
United States	“	2·10 “

With ·80 in favour of Australia, and ·94 in favour of the United States, per pound of flour, it is perhaps a tribute to the high quality of Canadian flour that any at all comes in. But this is the state of things at the fag-end of last season. The advent of Alberta fall wheat with better transportation rates for the coming and succeeding seasons, with assurances from the British Columbia milling trade that they see the beginning of a great future, affords a welcome relief from the monotony of a familiar phrase—‘Canadian flour away above the market.’

IMPROVED CATTLE-BREEDING.

The Department of Agriculture and Commerce proposes to establish two new cattle breeding farms during the next fiscal year, and for this purpose provision for an outlay of \$49,500 has been made in the coming budget. At present there is only one government cattle-breeding farm, that at Hiroshima; but as this is inadequate to meet the increasing demand for improved cattle, two more farms are to be established.

EXCELLENT CANADIAN CATTLE.

The Japanese importing house that recently imported Canadian cattle to the order of the government, express their satisfaction at the continued excellent condition of the cattle. They say that they have been hitherto purchasing cattle from the United States chiefly, this being their first importation from Canada, and if the trial proves satisfactory their future purchases will largely be made in Canada.

Among their experiences thus far with regard to Canada, however, they remark the high price of Canadian cattle that come up to their standard. They require thoroughbreds of well attested pedigree. Their agent, under whose direction the buying in Canada was done, says that it did not appear that Canada had any thoroughbred cattle but those imported. The Canadian breeders imported in order to breed down, which was what the Japanese were doing; and it was a question whether the latter had better go direct to England and Scotland than to buy imported Canadian stock for importation to Japan. He said there was any quantity of excellent cattle to be had in Canada, but the expense of importing grade cattle was as great, while the value was much less than in the case of pure bred. The demand in Japan for pure bred cattle would be increasing, and he thought the Canadian stock-breeders should cater to it. They had beef and dairy cattle of the very best in Canada, and the time would soon come, according to present indications, when the Japan market for beef cattle would be an object to the Canadian stock-grower. But for present purposes only thoroughbreds were wanted.

ALEX. MacLEAN.

MEXICO.

REPORT OF COMMERCIAL AGENT.

(*Mr. A. W. Donly.*)

APARTADO, 2029,

MEXICO CITY, MEX., December 21, 1905.

SERIOUS CHARGE AGAINST APPLE SHIPPERS.

In my earlier reports, I was very explicit as to what not to do if there were to be any permanent market opened here for Canadian apples. I called attention to the care that should be exercised in selecting perfect fruit, paying attention especially to variety, looks, firmness and size. Special mention was also made as to the care that should be exercised in packing. Now the sequel: A shipment of some hundred barrels has recently been received here. Barrels were used instead of boxes, which are always preferred by Mexican importers. The shipment contained about a dozen different varieties. Some of these were apples which it is entirely useless to attempt to send such a distance into such a climate.

It is folly to send any but the best-keeping winter varieties such as the Russet, the Spy, the Spitzenberg, the Baldwin and the Greening. In regard to quality, there was absolutely no selection either as regards size or firmness. Half, at least, of the whole shipment was spoiled by the time it arrived. At the top and bottom of each barrel there was a few apples of fair size. The centre of the barrels were filled up with culls. One barrel, that came under my personal notice, was marked pippins and contained a small red apple that at home would be sent to the cider mill as unfit for any other use. California and Oregon apples received here run from two to three to the pound, Colorado fruit about four, whereas it took eight from this particular barrel to make a pound. From the appearance of the whole shipment, I very much doubt if the fruit were even hand-picked. Canadian dealers may think this fair dealing and a good way to accredit Canadian products in this market, but it is not so considered here, and one or two similar instances will put a permanent quietus on the Canadian apple in this market. The importer was forced to make apple preserve out of a large portion of the shipment, as this was the only use to which it could be put.

BEST VARIETIES OF POTATOES REQUIRED.

A considerable shipment of potatoes was received at the same time by the same importer. While not subject to criticism such as the apples, I would suggest that more care should be taken in preserving a uniformity in size. None but the largest and best should be packed for shipment here. Besides having to compete with the native potato, which is still somewhat plentiful and selling somewhat cheaper than the imported, it finds itself this year in competition with the imported Burbank from California. The quality of the Canadian potato is undoubtedly as good, or possibly a little better, than the Burbank, but many consumers are prone to let looks and size count, and the Burbank averages more than double the Canadian potato in size, and is a very handsome, thin-skinned tuber, with very small eyes and consequently little waste in peeling. Care should be taken, too, to see that all barrels are securely closed before being shipped. Several barrels arrived with the heads fallen out.

EXCELLENCE OF CANADIAN CANNED GOODS.

I wish to call attention to a very satisfactory shipment of Canadian corn lately received by one of the large houses here. The quality is all that could be desired, and a noted improvement upon that received in previous years. There is but a limited business to be done in Mexico in canned fruits, and vegetables, as it is always possible to procure fresh fruits and vegetables of some kind in the markets. However, many mining and construction camps depend to a great extent on the imported canned article, and it will always be worth while to compete for this trade.

ATTRACTIVE LABELS REQUIRED.

In connection with the canned goods trade, I wish once more to refer to the question of labels. Canadian canners could very materially increase their trade in this market if they would follow more freely the example set them by their American neighbours in the matter of an attractive package. This applies with equal force to fruits, vegetables, fish and meats. Very few people know anything about the merits of this or that particular brand, and an attractive package will always receive the preference when there are the two to choose from.

PRESERVED BUTTER.

The only kind of Canadian butter that can be used here is the preserved. There is a very limited demand for it, as it is only used in those districts where butter is not made or where there is no express connection for receiving refrigerated butter from the United States. Preserved butter retails at \$1.25, Mexican money, per pound, while the American article, received by express, at present retails for 90 cents. Some very good preserved butter has been received here, both in tins and jars, from the province of Quebec, and so long as an article of this quality can be supplied the orders will be repeated.

CANADIAN CHEESE IN GOOD CONDITION.

The last shipment of Canadian cheese received came through in prime condition, the quality is good and it is in demand.

SALT FISH FROM CANADA TAKES HIGH PLACE.

Some very fine herring and salmon from the lower provinces is now on the market. In quality it is superior to anything yet offered. I believe, though, that the consumption of same could be many times multiplied were it put in smaller packages. The salmon came only in barrels and half barrels, the former weighing, gross, about four hundred pounds. There are not more than two or three concerns in all Mexico whose trade would warrant them in taking a full barrel.

QUARTER BARRELS FOR SALT FISH.

The importer says that were the same article put up in quarter barrels or kits, he would be able to place a very large quantity of it. The same is true of the herring.

CANADIAN DRIED FISH IN DEMAND.

The finest article in the way of dried fish that has yet been offered here is the Canadian codfish. Although comparatively a short time since it has been on the market, it is fast gaining in popularity, and we may soon see it crowding out other brands entirely.

CANNED SALMON.

There is a very large quantity of a cheap grade of salmon consumed here. The label of the brand in greatest demand, on account of its price, says it is packed in Alaska. It is shipped from San Francisco here. The price there is 65 cents per dozen, and a four-dozen case lays down in Mexico for \$12, silver. It retails at 38 cents per can. If Canadian packers can put up a cheap article, to compete with this in price, there is an immense business to be done in it. Of course, there is a considerable business to be done in better grades for those who want a good article, but the prime considerations here, amongst the masses, are cheapness and looks.

A. W. DONLY.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(*Mr. D. H. Ross.*)

P. O. Box 140, MELBOURNE, December 2, 1905.

NEW ZEALAND INTERNATIONAL EXHIBITION, 1906-07.

During the absence in Canada of my confrere, Mr. J. S. Larke, I have, for some time, been in correspondence with the Executive Commissioner of the New Zealand International Exhibition, which is to be opened at Christchurch in November, 1906. As many lines of Canadian goods receive a tariff preference in New Zealand, the desirability of Canada being strongly represented at the exhibition must be obvious to manufacturers throughout the Dominion. The only previous International Exhibition held in New Zealand took place at Dunedin some fifteen years ago.

REPRESENTATIVES IN CANADA.

The government of New Zealand has appointed the secretary of the Canadian Manufacturers' Association, Toronto, as their special representative in Canada to approach Canadian manufacturers and place before them the advantages of exhibiting at the New Zealand International Exhibition to be opened at Christchurch in 1906. Outside this special representation the Government of New Zealand is in communication with the Dominion Government, and it is proposed to appoint an official commissioner to assist the developments of the project in Canada generally. The steps being taken to advertise and make known the benefits likely to accrue to Canadian manu-

facturers in making a representative display at Christchurch will, it is to be hoped, bring about the desired results.

AUSTRALIAN IMPORTATIONS OF CANADIAN FARMING MACHINERY.

Since September last I have been closely following the Australian seasonable importations of Canadian farming machinery, and the result runs into very large figures. The State of Victoria alone has imported, during the last three months, quite 3,000 tons (measurement) of Canadian agricultural implements, and adding the other states, the total importations exceed 6,000 tons; besides which there are further large shipments to arrive. These magnificent results are, in the main, attributable to the superiority and reliability of Canadian productions in this line, in addition to exceedingly capable representation and the perfect selling organization of the principal importers.

CANADIAN CULTIVATORS.

Small initial shipments of Canadian cultivators new to Australia have recently been received in Melbourne and Adelaide. Some delay took place in having necessary alterations, from the Canadian model, made in conformity with the desires of Australian implement dealers. Had these goods arrived earlier in the season, business would have promptly resulted, but a great many indents for next season's requirements have already been placed. As this line has excellent representation, it will be exploited thoroughly throughout the Commonwealth.

CANADIAN PLOUGHS.

Two of the largest plough manufacturers in Canada have recently completed arrangements for their representation by appointing Melbourne agents to represent them throughout Australia. In both cases the goods are entirely new so far as this country is concerned, and the respective agencies having been placed in the hands of experienced and capable firms, accustomed to the Australian implement business, good results should follow.

CANADIAN HARDWARE.

It gave me pleasure to recently inspect a comprehensive range of samples of several leading lines of Canadian hardware which were displayed to advantage in the Melbourne show rooms of the Imperial Export Company of Toronto. These goods had not hitherto been shown in Australia, and their advent marks another distinctive advance in the efforts made by Canadian manufacturers to give practical proof of the excellence of their productions to buyers throughout the Commonwealth.

CANADIAN SEWING MACHINES.

The first sample shipment of Canadian sewing machines, which has come under my notice, was recently landed at Melbourne to the order of an energetic firm of manufacturers' agents. These machines are beautifully cased in oak, and opened up without a scratch. While this line is well looked after by branches of United States and German manufacturers, there is every prospect of Canada securing a portion of the trade, particularly if the makers will loyally support their agents in endeavouring to secure a foothold in this rather conservative market.

CANADIAN SAW MILL MACHINERY.

In my report of January 7, 1904 (Monthly Report, January, 1904, page 908), written at Hobart, I referred to some Canadian machinery which, at that time, was being erected in a Tasmanian saw mill. The machinery was made by the Waterous

Engine Works Company of Brantford, for breaking down and cutting the hard woods for which the island state is famous. In addition to minor machines, in the mill were installed an electric crane capable of lifting logs weighing 20 tons, a large log carriage, a machine for turning logs of any size on the carriage, a large band mill capable of taking saws 54 inches long, a smaller band mill, &c. I recently wrote to the mill manager asking for his opinion as to how the machinery was adapted for the work, and if it had proved satisfactory for all requirements. Briefly, the manager reports that the plant is the most modern in Australia at the present time, being in every way highly creditable to the makers, and further that it has given entire satisfaction despite that for some months it was operated by unskilled men. I am sending copies of this splendid testimonial to several saw milling concerns in this state, which have in contemplation the improvement of their plants.

CREAM SEPARATORS.

In the Monthly Report of June, 1905, page 1839, I dwelt at some length upon the importance of the dairying industry in Victoria, which continues to expand to a degree little short of marvellous when the limited area of this state is considered. As a possible result of the report referred to, it is pleasing to record that a sample shipment of Canadian cream separators has just been opened up in Melbourne. British, Swedish and United States makes of cream separators have hitherto held the Australian trade. but if the comparative trials of the Canadian machines prove satisfactory to dealers in dairying requisites—and the prices can meet competition—there is a vast market to exploit not only in Victoria, but throughout the Commonwealth and New Zealand.

CANADIAN ORGANS.

Quite recently the first Melbourne order for a line of Canadian organs new to this market went forward to the manufacturers. These instruments have for some time been imported by dealers in Adelaide with satisfactory results. For some time past two other makes of Canadian organs have been imported by Melbourne dealers, but the competition of United States makers has been and is so keen that only the persistence of the local agents is responsible for introducing the new line which was placed with a very aggressive firm who are likely to indent largely if the initial order is satisfactorily filled.

CARRIAGE WOODSTOCK.

It is to be regretted that Canadian manufacturers of carriage woodstock have not, to any extent, yet succeeded in securing a portion of the large Australian trade in carriage builders' materials. Independent of furniture and handles, the Commonwealth imported in 1904 manufactures of wood to the value of over £7,000, of which the United States supplied over £33,000 and Canada only £506. Samples of Canadian carriage woodstock shown in Melbourne do not as yet meet the requirements of the local trade or the competition of United States makers as regards values. This trade is an important one, and well worth the serious attention of Canadian manufacturers and exporters.

WHY AUSTRALIA MUST IMPORT CARRIAGE WOODSTOCK, ETC.

While the Commonwealth tariff imposes a duty of 25 per cent (really 27½ per cent on the net f.o.b. values) upon finished carriages, the principal lines of carriage woodstock and minor articles of hardware required by Australian vehicle builders are admitted free of duty. That the importation of these lines is of considerable magnitude is readily seen by the large stocks held in Melbourne and other centres, and the number of firms engaged in this business alone. To a very great extent Australian carriage builders, so far as the better class of light rigs are concerned, assemble the

imported sundries and complete a rig almost entirely of oversea parts. The labour in assembling the parts, painting and turning out a vehicle suitable for local conditions constitutes, in the main, the work of the Australian mechanic. This will always be the case as Australia has no wood suitable for making light road rigs.

CARRIAGE SPRINGS.

Some Canadian manufacturers of carriage springs are exporting considerable quantities of their goods to Australia, chiefly through New York commission houses, and in Melbourne, and doubtless in other importing centres, they are in good demand, owing to their excellence of workmanship and suitability for local vehicle builders. This trade, from inquiries which I have made, is capable of further expansion, and my services in this connection are freely at the command of Canadian carriage spring makers desirous of cultivating an export business to this country.

PRINCIPAL LINES REQUIRED BY AUSTRALIAN CARRIAGE BUILDERS.

The principal materials required by Australian carriage builders are as follows: Sarven wheels, hickory rims, spokes, singletrees, doubletrees, poles, shafts, hickory for gearing under rigs, elm hubs (a leading line), wagon bows, &c. These materials are imported in a considerably varied assortment, and for the most part in the better grades only. Supplies are obtainable from the United States, orders being placed through New York export houses, from which source buggy tops, carriage hardware and furnishings are also procured. By this mail a special inquiry is going forward to the Department of Trade and Commerce, Ottawa (see Trade Inquiry No. 18), on behalf of the principal importers of carriage builders' supplies in Melbourne. This firm is desirous that Canadian manufacturers of their requirements should send complete price lists, for wholesale quantities, upon a f.o.b. New York basis.

HARDWOOD WAGON HUBS AND SPOKES.

Several visiting Canadian business men, who have favoured this commercial agency with a call during the last few months, have expressed an opinion that Australian hardwood hubs, spokes, &c., should find a good market in Canada. It is said that there is a scarcity in the Dominion of hardwoods, such as are used in the construction of heavy wagons, and I should appreciate Canadian manufacturers supplying me with the facts of the case. This week, I inspected a Melbourne stock of exceedingly heavy hubs, spokes, &c., made from Australian ironbark, which is one of the hardest and most durable woods in existence. This woodstock was chiefly from Tasmania and New South Wales, and can be obtained in the rough or dressed for immediate use. In the way of assisting the extension of reciprocal trade between Australia and Canada, I shall be pleased to receive the desired particulars from any Canadian firms interested.

CANADIAN CANOES.

A small shipment of Canadian canoes arrived in Melbourne this week, some of which will be placed on the river this afternoon. An effort is being made to start a canoe club, and thus arouse some local interest in a favourite Canadian pastime. The reason that these pleasure crafts are not popular in Australia is, undoubtedly owing to the want of knowledge in navigating them. If, through any cause, the sport-loving Australian people take kindly to canoes, as one method of attaining aquatic pleasures, a large demand would certainly be the result.

SECOND SHIPMENT OF BRITISH COLUMBIA APPLES.

The second shipment of British Columbia apples, which arrived at Sydney, ex *Miowera*, early in November, landed in splendid condition, and the grading of the fruit

gave every satisfaction. Had more care been exercised in the first shipment, which came forward in October, the results would also have been gratifying to the importers for the fruit arrived to a bare market, besides which the repute of Canadian apples would have been upheld. Shipments of apples and pears received at Melbourne and Sydney from Seattle, by the Vancouver steamers, have been unfavourably reported upon as regards condition, varieties and quality.

MARKET FOR BRITISH COLUMBIA PEARS.

The shipment of pears received in Melbourne early last month from Seattle landed, owing to want of care in packing, in bad condition. It is utterly wrong to pack delicate fruit like pears in a bushel case for export, because, ripening as it does even in cold storage, every bump the case receives damages each individual fruit. The few cases of pears that arrived in good condition were very delicious and brought eighteen shillings (say \$4.38) per case. Should British Columbia fruit growers decide next season to export pears to Australia, they should pack them exactly as they would pack eggs, and the results will more than justify the extra expense, for there is no kind of exotic fruit more highly appreciated in Australia, or which commands a better price.

IMPROVED CASE FOR EXPORTING FRUIT.

A Melbourne firm has patented in Australia an improved safety fruit case for carrying every description of large and small fruit on long journeys without injury. Special cases for cherries, plums, apricots, nectarines, passion fruit, grapes, pears and apples are supplied as required. The principle upon which the cases are made is upon that of the egg compartment cases known throughout Canada for over twenty-five years. The Australian patent fruit cases are of the uniform measurement of one cubic foot so that freight can be accurately calculated. They are ingeniously constructed to carry any size of fruit which they automatically grade. These cases are sold here at £6 5s. (say \$30.41) per hundred, but in Canada should be produced for much less, as the lumber used locally in their construction is imported. Last Australian season, soft and delicate fruit exported in these cases landed in the English and other distant markets in such splendid condition that cherries realized 24 cents, plums 14 cents, peaches 22 cents, and pears 18 cents per lb. respectively.

AUSTRALIAN TRADE CONDITIONS.

Trade throughout November was active in all departments, the distributing business being particularly good. Merchants are satisfied with the turnover in imported goods in the majority of cases, while the exporting branches are busy, excluding grain, which will not commence to move with freedom until January. As regards the future, the good prices ruling for the leading staples of the country in conjunction with a full volume of production afford justification for hopeful views for 1906.

D. H. ROSS.

INQUIRIES RELATING TO CANADIAN TRADE.

Since the publication of the last monthly report there have been received the following inquiries relating to Canadian trade. The names of the firms making these inquiries, with their addresses, can be obtained upon application to : 'SUPT. OF COMMERCIAL AGENCIES, THE DEPARTMENT OF TRADE AND COMMERCE, OTTAWA.'

Please Quote the Reference Number when Requesting Addresses.

1159. An English firm of provision brokers who can find an outlet for large quantities of **butter, cheese and eggs** have asked to be placed in communication with reliable Canadian shippers of these products.

1160. Inquiry has been made for the names of firms in Canada who can supply quantities of **Douglas fir seeds**.

1161. A London firm in the oil trade has requested to be placed in touch with reliable firms connected with **oil wells and refineries** in Canada.

1162. A Bradford firm wishes to develop trade in Canada in **woollen** and other **yarns** and also in **tops**, and is prepared to appoint suitable Canadian resident agent to handle their goods.

1163. A Midlands manufacturer of **varnishes, paints, colours, dryers and greases** is prepared to appoint resident Canadian agent.

1164. The manufacturer of a new patented **post card album** wishes to arrange with a Canadian firm to undertake the sale of this article.

1165. A gentleman is desirous of acting as agent for any Canadian firms exporting to Great Britain.

1166. A Bristolian wants agencies for Canadian firms producing **butter, fruit, maple sugar and syrup, &c.**

1167. A London firm of **fruit brokers** wish to appoint thoroughly reliable agents in some districts of the province of Nova Scotia.

1168. A Bristol firm of produce brokers and commission agents desires to act as agents for Canadian firms exporting **butter, cheese or fruit**.

1169. A British firm is desirous of having quotations for **165,000 cubic feet of Canadian birch**, specifications of which may be had on application. Quotations are desired c.i.f. Avonmouth, and delivery to extend during the season.

1170. A Japanese firm wishes to be put in communication with Canadian merchants with a view of importing **Japanese wall paper** into Canada.

1171. A Manchester dealer desires to represent Canadian **fruit growers or packers** in his market.

1172. A London firm of merchants are desirous of obtaining representatives in the more important Canadian business centres for the sale of **tea, coffee, spice, rice, &c.**

1173. A commission agent in Leicester is seeking the representation in England of Canadian firms exporting **hog products, flour, &c.**

1174. A London firm is open to represent Canadian shippers of **wheat, flour, hay, glucose products and grocery and confectionery lines**, on commission or salary.

1175. A Lancashire firm of **felt hat** manufacturers wishes to get into touch with Canadian importers of these goods.

1176. A London firm desires the addresses of Canadian manufacturers of **rice starch**.

1177. A Midlands manufacturer asks to be placed in correspondence with Canadian manufacturers of **packing cases** as used for packing glass goods.

1178. A London firm is prepared to represent Canadian manufacturers of office furniture, cabinets, files and also of wall papers suitable for the United Kingdom trade.

1179. A British firm manufacturing all kinds of disinfectants and germicides, 'Eukotas,' 'Elswick,' disinfecting fluids, sanitary compounds, liquid and powder soap for washing tram cars, &c., desire to get into communication with corporations, firms, and individuals interested in these products.

1180. A Birmingham firm wishes to buy sheet and pig lead.

1181. A Birmingham firm wishes to get in touch with Canadian firms open to sell pick handles.

1182. A Cradley firm wishes to buy clothes pins and broom handles.

1183. A Midlands firm wishes to buy butchers' skewers and dowel sticks.

1184. A Birmingham firm wishes to find a market in Canada for collar studs and sleeve links.

1185. A Birmingham firm wishes to appoint an agent in Canada for the sale of electroplated wares.

1186. A large firm in Birmingham wishes to appoint an agent in Canada for the sale of their trowels, augers and bits.

1187. A large Birmingham firm wishes to find a market in Canada for oak spirit cabinets, waiters, salads, &c.

1188. A Birmingham firm wishes to appoint an agent in Canada for the sale of their brass fenders, fireirons, &c.

1189. A Birmingham firm wishes to find an opening in Canada for the sale of incandescent gas mantles.

1190. A large Walsall firm wishes to find a market in Canada for all kinds of saddlery goods.

1191. A Canadian resident in Japan desires to communicate with Canadian manufacturers who wish to introduce their goods into that country.

1192. A Manchester manufacturer wishes to obtain prices of birch and maple planks 2 inches to 3 inches thick, from Canadian shippers of same.

1193. A Manchester importer desires to correspond with Canadian exporters of baled hay.

1194. Manchester firms will be glad to correspond with Canadian exporters of salted hides.

1195. Lancashire manufacturers of mangles now obtaining the bulk of their supplies from the United States, would welcome correspondence from Canadian producers of mangle roller blocks in sizes 22 inches, 26 inches and 32 inches x 5 $\frac{3}{4}$ inches and 6 $\frac{1}{2}$ inches.

1196. A Manchester furniture manufacturer desires prices and description of oak and whitewood lumber from Canadian exporters of same.

1197. A Manchester importer wishes to do business with Canadian manufacturers of cornice poles with ends turned.

1198. A Manchester firm of oil importers wishes to obtain prices of resin from Canadian shippers of same.

1199. A Lancashire manufacturer wishes to extend his Canadian trade, and will furnish prices of soft soap in drums, olein and soluble oils to Canadian importers of same.

1200. A Lancashire manufacturer desires prices of white and bone tallow from Canadian shippers of same.

1201. A Scotch firm desires the address of Canadian wholesale woollen merchants who might buy tweeds for womens' and mens' wear.

1202. A Manchester firm asks to be placed in communication with Canadian producers of tallows and fats who seek an export outlet.

1203. A Midlands company, manufacturing harness and general saddlery, is prepared to appoint a suitable Canadian resident firm to act as its agents.

1204. A London firm possessing a large connection among **builders, builders' merchants, ironmongers and engineers**, is prepared to represent Canadian manufacturers of goods handled by the trades indicated.

1205. An Antwerp commission merchant, who is well situated for the importation of **fruit**, desires to receive consignments from Canadian shippers.

1206. An Antwerp exporter of **iron, steel, materials for railway contractors, plate glass, cement, &c.**, would like to get into communication with some of the leading Canadian importers of these articles.

1207. A large Cape Town importer of **wall-paper** desires to correspond with a Canadian manufacturer of this article.

1208. A South African firm desires to communicate with a Canadian manufacturer of **moulded rubber goods**.

1209. A large Cape Town importer of **wire fence netting** is open to receive quotations f.o.b., Montreal or St. John, N.B.

1210. A London firm desires to get into communication with Canadian exporters of **dried cod and green apples**.

1211. Inquiry has been made by a London firm for the names of Canadian importers of **salt**.

1212. The names of Canadian exporters of **fur cuttings** have been asked for by a London house.

1213. The manufacturers of a well-known **bicycle** would like to get into communication with Canadian importing firm prepared to introduce their cycles.

1214. A London firm possessing a wholesale connection could handle a Canadian brand of **condensed milk**, and would also like to get into touch with Canadian producers of **canned goods and dried fruits and vegetables**.

1215. A Cardiff firm possessing a connection among ships store merchants in South Wales ports is prepared to represent, on commission, Canadian producers of **canned goods, soups, &c.**, and other goods suitable for ships stores.

1. Inquiry is made for the names of Canadian firms requiring an agent in England by a North of England resident offering good references..

2. A Turkish firm at Constantinople has requested to be placed in touch with Canadian buyers of **olives and oil**.

3. The names of some Canadian shippers of **apples** are asked for by a London importer desiring to do business in this line.

4. The manufacturers of **silkin**, used for hand and machine sewing and embroidery, &c., are prepared to appoint suitable Canadian resident agent.

5. A London company wishes to hear from Canadian shippers of **silver lead ores and desilverized lead**.

6. A London firm handling **gum**, as used by varnish manufacturers, wishes to get into touch with Canadian importers.

7. A large Johannesburg firm importing **timber** desires correspondence with Canadian exporters of this article.

8. A prominent Japanese importing firm wishes to be put in communication with Canadian merchants interested in the exportation of **rock phosphate**.

9. A Japanese firm wishes to be put in communication with some Canadians who are prepared to undertake the export into Japan of **cattle bones and hoofs**, that is, **leg, round shank, and buttock bones, &c.**, for the manufacturing trade.

10. A Belgian **glass** manufacturer would be glad to obtain the address of any Canadian importer interested in this commodity.

11. A London firm desires to get into touch with Canadian importers of **steel tubes, rails, &c.**, also **gas lighting plant**.

12. A Scotch firm is seeking a suitable agent in Montreal for the sale of their **coal tar product** in Canada. Some one acquainted with this branch of trade would be preferred.

13. A Glasgow house is desirous of obtaining the representation of a good firm of Canadian manufacturers or exporters in any **hardware lines** that would command a sale in Scotland.

14. Inquiry has been made by a Yorkshire **timber** agent for names of Canadian manufacturers of **dimension ash**.

15. A Lancashire firm of brokers and commission agents who occasionally have fairly large parcels of **wrought scrap iron** to dispose of, have asked to be placed in touch with Canadian buyers.

16. A London timber agent with a large connection desires an agency for Canadian **hardwoods** for building purposes. Is prepared to invest \$2,500 if required in substantial agency.

17. A South American firm of contractors with bank reference desire to get into communication with **suppliers of plant for grain elevators** of a capacity of 1,000 to 5,000 tons, also cleaning and drying machinery.

18. A Melbourne firm dealing only in **carriage builders' requirements**, desires price lists and full particulars of high grade Canadian carriage woodstock suitable for light and heavy vehicles. Quotations for wholesale quantities upon a f.o.b. steamer, New York basis.

EMIGRATION FROM GREAT BRITAIN TO BRITISH NORTH AMERICA.

REGULATIONS FOR IMPORTATION OF SWINE.

The following memorandum has been issued by the Department of Customs under date of December 20, to collectors of customs :—

Regulations for importation of swine to be slaughtered in bond, *repealed from January 1, 1906.*

Referring to memo. 1274 B. (and also to memo. 1343 B.), you are advised that sections 45 to 52, inclusive, Animals' Quarantine Regulations, are rescinded, and the following regulations are substituted therefor, *in effect January, 1906, viz :—*

Section 45.—All swine must be accompanied by a certificate, signed by a veterinarian of the United States Bureau of Animal Industry, stating that neither swine plague nor hog cholera has existed within a radius of five miles of the premises in which they have been kept, for a period of six months immediately preceding the date of shipment, but such swine shall nevertheless be inspected, and shall be subjected to a quarantine of thirty days before being allowed to come in contact with Canadian animals.

Section 46.—Swine found to be suffering from contagious disease will be subject to slaughter without compensation.

(Signed) JOHN McDOUGALD,
Commissioner of Customs.

WHEAT INSPECTION.

COMPARATIVE STATEMENT showing number of cars of wheat inspected in the Western Grain Inspection Division, for the first three months of the crop year, from September 1, to November 30, with percentage of crop inspected for the five years following :—

Year.	Number of Cars.	Percentage of each Crop inspected for 1st three months.
1901.....	22,153	41%
1902.....	22,367	43%
1903.....	18,494	48%
1904.....	20,120	53%
1905.....	30,525	43%

WHEAT CROP.

STATEMENT showing situation of wheat crop of 1905, on November 30, 1905, for the Provinces of Manitoba, Saskatchewan and Alberta.

Estimated yield.....		88,418,000
Inspected to date, 30,525 cars.....	30,525,000	
In store country ele. C.P.R. 13,229,052		
“ “ C.N.R. 2,165,890		
	15,394,942	
In transit, C.P.R. 2,129,038		
“ C.N.R. 577,000		
	2,706,038	
Milled west of Winnipeg, to date.....	3,159,000	
In farmers' hands.....	36,633,020	
		88,418,000
Less required for country mills 5,591,000		
Less required for seed 8,500,000		
	14,091,000	
Balance to market	22,542,020	
Add amount in store and in transit....	18,100,980	
Balance available to move by railroad..	40,643,000

ERRATA, NOVEMBER REPORT 1905. PAGE 856.

Exports from Canada for 1903, \$231,301,556, 1904, \$195,190,842 and in 1905, \$220,367,759, read 1903, \$105,388,513, 1904, \$94,099,147 and in 1905, \$111,791,082.

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Custom-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental annual report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto and changes therein, so far as the department has authentic advice.

LAGOS.

AN ORDINANCE TO AMEND THE CUSTOMS TARIFF ORDINANCE, 1899.

(No. XVI., dated and assented to August 23, 1904).

Be it enacted by the Governor of the colony of Lagos with the advice and consent of the legislative council thereof as follows:—

1. This Ordinance may be cited as ‘The Customs Tariff Ordinance, 1904,’ and shall extend to the colony and protectorate of Lagos.

2. On and after September 23, 1904, there shall be raised, levied, collected, and paid unto His Majesty, his heirs and successors for the use of the government of the colony of Lagos upon goods imported into any part of the colony or protectorate of Lagos or taken out of bond for consumption in the colony or protectorate the several duties of customs, as the same are respectively inserted, described and set forth in the first schedule to this ordinance.

3. The goods enumerated and described in the second schedule shall and may be imported or taken out of bond free of duty.

4. The importation and bonding of the goods enumerated and described in the third schedule are prohibited save as thereby excepted, and if any goods so enumerated and described shall be imported contrary to the prohibitions and restrictions contained therein, such goods shall be forfeited and shall be disposed of as the Governor may direct.

5. Upon all goods on which duty has been paid and which are re-exported to any place outside the colony or protectorate before being sold within the colony or protectorate, there shall be allowed a drawback of 95 per cent of the duty paid thereon subject to the rules regulating drawback claims.

Provided that all goods exported as aforesaid shall be deemed to be goods exported for drawback.

Provided also that this section shall not apply to goods re-exported by inland navigation or overhead carriage to Northern or Southern Nigeria.

6. Upon all dutiable goods imported on which no duty has been paid and which are transhipped or re-exported (including goods in transit and goods exported from bond) to any place outside the colony or protectorate duty shall not be levied, but it shall be lawful to charge such fees not exceeding 5 per cent of the duty payable on such goods

as may be ordered by the Governor in Council to cover any expense incurred by the Customs department in connection with such goods.

Provided that this section shall not apply to goods re-exported by inland navigation or overland carriage to Northern or Southern Nigeria.

7. The Governor in Council shall have power to make rules regulating the fees to be charged under section 6 of this ordinance.

8. In the case of goods which have been imported into the colony or protectorate, and upon which the duties of customs herein set forth have been paid and which have been exported for repairs or alterations and upon which no drawback has been paid, and which are re-imported within six months from the time of exporting, duty on re-importation shall be payable only on the cost of such repairs or alterations and of the transport of such goods from the colony to the country where the repairs or alterations shall have been made subject to proof being given to the satisfaction of the Collector of Customs that such goods are the same as were previously imported and upon which the full duty was then paid.

9. The Customs Tariff Ordinance, 1899; Amendment Ordinance, 1900; Amendment Ordinance, 1901, Amendment Ordinances Nos. 1 and 8, 1904, are hereby repealed.

10. This ordinance shall commence and come into operation on September 23, in the year of our Lord 1904.

THE FIRST SCHEDULE.

DUTIES OF CUSTOMS.

	£	s.	d.
1. On brandy, gin, rum, liqueurs, perfumed, medicated and miscellaneous spirits or strong waters, not being sweetened or mixed with any article so that the degree of strength cannot be ascertained by Sykes' hydrometer, for every imperial gallon not exceeding the strength of proof by such hydrometer.	0	3	0
And so in proportion for any greater strength than the strength of proof.			
2. On brandy, gin, rum, liqueurs, perfumed, medicated and miscellaneous spirits or strong waters, and on any compound containing spirits, being sweetened or mixed with any article so that the degree of strength cannot be ascertained as aforesaid	0	3	0
Imperial gallon	0	3	0
3. On manufactured tobacco, or snuff.	0	0	8
4. On unmanufactured tobacco	0	0	4
5. On aerated waters.for every dozen bottles	0	0	2
6. On ale, beer, cider or porter—			
(a) in barrelsgallon	0	0	4½
(b) in bottles.dozen reputed or Imperial pints	0	0	4½
(c) in bottlesdozen reputed or Imperial quarts	0	0	9
7. On cartridges (filled).100	0	2	0
8. On cigars.50	0	0	6
9. On cigarettes.100	0	0	3
10. On gunpowder.pound	0	0	6
11. On firearms of any descriptioneach	0	2	6
12. On kerosene and all other lamp oil.Imperial gallon	0	0	2
13. On kola nuts.for every 100 pounds	0	2	0
14. On lead in any form.pound	0	0	1
15. On saltcwt.	0	1	0
16. On sugar.do	0	1	0

17. On tea	pound	0	0	1
18. Wine: claret	gallon	0	1	0
All other, except sparkling wine	do	0	2	0
Sparkling	do	0	3	0
19. On all other goods of every description, not specially exempted in the second schedule an <i>ad valorem</i> duty of ten pounds per centum on the value of the goods at the port from which the same shall have been imported.				

THE SECOND SCHEDULE.

EXEMPTIONS FROM DUTIES OF CUSTOMS.

1. All goods imported by inland navigation or overland carriage from Northern or Southern Nigeria.
2. All goods imported by the Governor for his private use.
3. All goods imported with the sanction of the Governor for the use of His Majesty's troops or navy.
4. All goods imported with the sanction of the Governor for the service of any public department of the colony.
5. All goods imported with the sanction of the Governor by the Inspector General of the West African frontier force and his staff officers for their private use when on tours of inspection.
6. All goods imported with the sanction of the Governor by boundary and other special commissioners and their assistants for their private use while executing their duties.
7. Animals (living) including poultry and game.
8. Arms, accoutrements, equipment and uniforms, the property of officers of His Majesty's army, navy or civil service imported by such officers for their personal use on duty as required by the regulations of the service.
9. Bags and sacks (other than dressing bags, hand bags and travelling bags).
10. Books, newspapers and printed matter.
11. Building and roofing materials and stores, including stone, bricks, timber, planks, doors, shutters, metal plates, and piles, slates, tiles, white lime, cement, cinders, house paint, paint and whitewash brushes, door locks, keys, hinges, nails, screws, bolts, bars, window frames, glass and fastenings, artisan's tools, linseed oil, turpentine coloured ochre and all such other building or roofing material and stores as the Governor by writing given under his hand and published in the *Gazette* shall have declared to be building or roofing materials or stores for the purposes of this ordinance.
12. Coal.
13. Coins, British and other coin legally current in the colony.
14. Corn, grown in West Africa.
15. Cooper's stores, including casks, cask-heads, shooks, hoops, rivets, rushes, tenter-hooks, and all materials used in the construction of casks.
16. Educational apparatus: Books, stationery and school apparatus generally for the use of educational establishments when certified by the head of the establishment to be solely intended for educational purposes.
17. Fish, fresh.
18. Fruit, fresh.
19. Ice.
20. Instruments—
 - (a) Mathematical.
 - (b) Scientific.
 - (c) Surgical.
21. Machinery, and implements, mining, agricultural and industrial.
22. Measures (Imperial standard).

23. Meat, fresh.
24. Packages, in which goods are ordinarily imported.
25. Passengers' baggage including wearing apparel and personal effects such as jewelry, brushes and combs intended for the personal use of such passengers, but not spirits, wines, liqueurs, tobacco, provisions, scent or other articles. Provided always that duty shall not be charged on any spirits or scent not exceeding one bottle of each or any cigars or cigarettes not exceeding 100 of each, or any tobacco not exceeding one pound in weight included in a passenger's baggage.
26. Patterns, samples and show cards.
27. Printing and bookbinding materials and stores.
28. Produce: Products natural and mineral of Northern and Southern Nigeria.
29. Seeds, shrubs and trees for planting.
30. Ships' launches, stern wheelers, boats, lighters, canoes, and all other vessels used in navigation whether propelled by sails, steam, electricity or otherwise, together with their requisite tackle.
31. Telegraph materials.
32. Tombstones, memorial tablets, railings for graves and their accessories.
33. Vegetables, fresh.

THE THIRD SCHEDULE.

GOODS PROHIBITED TO BE IMPORTED.

1. Coin, viz.: False money or counterfeit sterling; coin of the realm, or any money purporting to be such not being of the established standard weight or fineness.
All coins known as Maria Theresa dollars of whatever weight or fineness.
2. Cowries (except by land from Northern and Southern Nigeria).
3. Indecent or obscene prints, paintings, books, cards lithographic or other engravings, or any other indecent or obscene articles.
4. Infected cattle, sheep, or other animals and hides, skins, horns, hoofs or any other part of cattle or other animals which the Governor may by order in council prohibit in order to prevent the introduction of any contagious distemper.
5. Provisions, meat and vegetables unfit for human food. These, if imported shall be destroyed or otherwise disposed of as the Governor may direct.
6. Arms of precision, fire-arms, guns, ammunition, cartridges filled or unfilled, percussion caps and powder except in conformity with the 'Firearms, Ammunition and Gunpowder Ordinance, 1892.'
7. Explosives, except such as may be imported with the sanction of the Governor for blasting or other like purposes.
8. Brass rods and manillas.
9. Folded woven goods, unless folded and marked in compliance with 'The Folded Woven Goods Ordinance, 1893.'

AN ORDINANCE TO AMEND THE CUSTOMS TARIFF ORDINANCE, 1904.

(No. 1, dated and assented to February 28, 1905).

Whereas it is expedient to make further provision with reference to the duties of Customs and to amend the Customs Tariff Ordinance, 1904.

Be it therefore enacted by the Governor of the colony of Lagos with the advice and consent of the legislative council thereof as follows:—

1. This Ordinance may be cited as 'The Customs Tariff Ordinance, 1905,' and shall be read and construed as one with the Customs Tariff Ordinance, 1904, which is hereinafter referred to as the principal ordinance.

2. Section 5 of the principal ordinance is hereby amended by omitting the words 'by inland navigation or overland carriage' from the last paragraph thereof.

3. The first schedule to the principal ordinance is hereby amended as follows:—

(1) Item 1 is repealed and the following substituted therefor:

£ s. d.

- | | | | |
|--|---|---|----|
| 1. On brandy, gin, rum, liqueurs, perfumed, medicated and miscellaneous spirits or strong waters, not being sweetened or mixed with any article so that the degree of strength cannot be ascertained by Sykes' hydrometer, for every imperial gallon not exceeding the strength of twelve and one half degrees under proof by such hydrometer. | 0 | 3 | 6 |
| 2. And for every degree or part of a degree in excess of twelve and one half degrees under proof by such hydrometer an additional duty per imperial gallon of one half penny | 0 | 0 | 0½ |

Provided that it shall be lawful for the Governor by order in council to provide that from and after a date being not less than three months from the date of the said order the strength of the said spirits shall be ascertained by Tralles' hydrometer in place of Sykes' hydrometer as aforesaid—a strength of fifty per centum by the said Tralles' hydrometer being considered as equivalent to a strength of twelve and one half degrees under proof by the said Sykes' hydrometer, and other strengths in proportion—and to give all directions necessary and consequential thereto

(2) Item 2 is amended by substituting a duty of four shillings for the duty of three shillings as therein provided.

4. The second schedule to the principal ordinance is hereby amended as follows:—

(1) Item 1 is amended by omitting the words 'by inland navigation or overland carriage' therefrom.

(2) Item 16 is amended by omitting therefrom all the words following the word 'establishments.'

(3) Item 26 is repealed and the following substituted therefor:

Patterns, samples, showcards and advertisements passed as such by the Collector of customs and subject to any regulations in that behalf made by the Governor in Council.

(4) Item 28 is repealed and the following substituted therefor:—

Produce—being natural or mineral products of West Africa, not otherwise dutiable.

(5) The following item is inserted after item 23:—

23a. Oil of any kind imported bona fide for use as a motor power for engines or machinery of any kind and not for lighting purposes, and subject to any regulations in that behalf made by the Governor in Council.

5. From and after the date of this ordinance it shall be lawful for the Governor by order made with the consent, signified by resolution, of the legislative council to make any addition to and to vary or revoke the whole or any part of any of the schedules to the principal ordinance, as amended by this ordinance.

Any such order shall be published in the *Gazette* and shall thereupon or from a date mentioned in the said order have the same force and effect as though it were enacted by ordinance subject to disallowance by His Majesty.

6. This ordinance shall come into force on March 1, 1905.

TARIFF CHANGES.

PERAK.

ORDER NO. 1291 OF 1904, AMENDING THE EXPORT DUTY ON TIN AND TIN ORE.

(The Perak Government Gazette Extraordinary, No. 40, Vol. XVII., of October 18, 1904.

Under the powers vested in him by section 3 of the 'Customs Duties Enactment, 1898,' the Resident, with the approval of the Resident-General, hereby orders that on and after November 1, 1904, the export duty imposed on tin, tin ore and manufactured tin by Notification No. 943, published in the *Gazette* on November 6, 1903, as amended by Notification No. 665, published in the *Gazette* on June 3, 1904, shall be cancelled and the following export duty shall be imposed in the stead thereof:—

Tin*	As in schedule B.
Tin ore*	As in schedule C.
Manufactured tin	The same as tin.

SCHEDULE B.—ALLUVIAL TIN.

					Rate per bhara.
When the price of tin exceeds \$31 per pikul up to \$32.....					\$10 00
"	"	32	"	33.....	10 25
"	"	33	"	34.....	10 50
"	"	34	"	35.....	10 75
"	"	35	"	36.....	11 00
"	"	36	"	37.....	11 25
"	"	37	"	38.....	11 50
"	"	38	"	39.....	12 00
"	"	39	"	40.....	12 50
"	"	40	"	41.....	13 00
"	"	41	"	42.....	13 50
"	"	42	"	43.....	14 00
"	"	43	"	44.....	14 50
For every additional \$1 per pikul in the price of tin					0 50

The duty will be reckoned on the price telegraphed daily from Penang.

Tin raised for export from such mines within the district of Batang Padang as may from time to time be certified in writing by the Warden of Mines to be gold producing mines, an additional duty of 50 cents per pikul. Tin exported from Upper Perak and New Territory, two-thirds of the current rate.

LODE TIN.

Lode tin will pay duty at one-half the above rate, subject to a minimum of 5 per cent *ad valorem*.

* For weighing tin and tin ore a fee of 2 cents per pikul is charged.

SCHEDULE C.—TIN ORE.

Tin ore exported under such guarantees as the Resident may require that it will be smelted in the colony of the Straits Settlements or in the United Kingdom, 70 per cent of the duty on tin.

Tin ore exported without such guarantees, 70 per cent of the duty on tin, plus an additional duty of \$30 per pikul.

SEYCHELLES ISLANDS.

AN ORDINANCE TO AMEND THE LAW RELATING TO CUSTOMS
(IMPORT) DUTIES ON CERTAIN ARTICLES.

(No. 1, assented to February 27, 1905).

1. This ordinance may be cited as 'The Customs Tariff Amendment Ordinance, 1905.'

2. Notwithstanding anything contained in 'The Customs Tariff Revision Ordinance, 1903,' there shall henceforth be levied on sugar other than sugar refined and sugar candy an import duty of two rupees per hundred kilos or part thereof.

3. Notwithstanding anything contained in the said ordinance, talc when imported for the purpose of being used in the manufacture of soap shall be admitted duty free.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., December 30, 1905.

PLANS FOR THE PALACE OF PEACE.

I have been advised by the board of directors of the Carnegie Foundation that the term of seven months allowed in article 2 of the programme of the Palace of Peace Competition has been prolonged to eight months. According to this the competitive plans must be in the possession of the board before April 15, 1906.

UNIFORMITY IN BUTTER.

A Bristol importer, speaking of colonial butter, stated that he had advised some of his shippers (not in Canada) that it would be more satisfactory if they sent him slightly inferior butter which would always be the same, instead of shipping butter which on the whole was of superior quality, but with occasional lots not equal to the rest.

WELL-DEFINED TRADE CLASSIFICATIONS.

It is characteristic of trade in Great Britain that it is divided into sharply marked classes; in the provision trade, for example, certain dealers have only high class custom to cater for, others handle medium grades of goods, while others again supply only the cheapest lines. The importer referred to put his case in this way:—

‘If a high class grocer sends out some inferior butter to one of his regular customers, the man of the house sniffs at it, his wife sniffs at it, and even the servant will not touch it. The result is that the grocer is informed in most emphatic language that whatever he supplies, he is to “send us no more of that”.’

This is no fancy picture, but a true description of what often happens in trading with the better class, who are able to pay for what they want, and insist upon having it of the best. The grocer does not fail to pass on the rebuke to the importer or commission house, and a few such incidents are enough to seriously damage a trade which has been built up with care and labour. I therefore call the attention once more of the Canadian butter exporters to the importance of uniformity first, last, and always.

PARQUETRY FLOORING.

Some architects have inquired whether Canadian firms are in a position to supply some of the very large demand which exists for parquetry flooring in various designs. This material is used in quarter-inch or one-inch thicknesses. The cutting must, of course, be mathematically exact in order that the pieces may fit accurately together. I shall be glad to put any Canadian exporters of this material in touch with those making the inquiry.

WELSH COAL.

The following is a typical letter received from a Welsh coal exporter:—

‘There is no doubt in the mind of the Welsh anthracite coal shipper that our anthracite coal is far and away superior to that of our competitors in Canada. From the samples exhibited at the Swansea Exchange, it would appear that the Canadian

people require a handy size coal, which we term on this market as cobbles, but there would be great difficulty in making a shipment of 3,000 or 4,000 tons of cobbles, and our suggestion would be that your friends should buy large coal, and break it up to suit their convenience at its destination. With reference to your remark about the wear and tear of Welsh anthracite coal, personally, we think our coals here will stand transshipment, &c., quite as well as American anthracite, and certainly far superior in quality in every respect.'

BREAKAGE OF COAL IN TRANSIT.

Another correspondent writes: 'In whatever form Welsh anthracite is shipped the method of shipping will break a proportion of it into smaller pieces, and it has to be screened on arrival and divided into various sizes, and when these different sizes are made on the other side the coal will travel any journey by railway and cart without further breakage of any importance, just the same as it does in this country.

SOME EXPERIMENTS NECESSARY.

'We want to get hold of a good firm of importers who are prepared to handle the matter as it should be handled.

'The question as to whether it is better to take large coal and break it down into the sizes required, or to take a size of broken coal approximating to that which is required by the consumers, is one that can only be decided by experiments. Take, for instance, the Rouen market—at one time nothing but nuts was shipped there, then the importers decided that it would pay them to take large coal and break themselves. This, however, does not mean that the importation of nuts had been stopped there, but that the import has been increased by the quantity of large that is shipped.'

POSSIBILITIES IN 1906.

Canadian importers should at least keep carefully in mind the possibility of another strike in the Pennsylvanian coal mines. News items from that region have already been published in Great Britain suggesting, in unmistakable language, that there is grave danger of further trouble. Now, Canadians have already had some experience of what the results are when forced orders are cabled to this country by municipalities or others. Forced orders call for no gratitude, and in some cases have been treated in a most off-hand manner, much to the detriment of the reputation of Welsh coal in Canada and the United States.

Canadian firms, therefore, who may later on be in need of supplies from this country, should establish their connections now before a pressing necessity arises, and they may then, as permanent customers, look for the best possible treatment.

COAL AND PIT PROPS.

The following extract from a letter, in which the representatives of a steamship line offer to do everything possible to facilitate the importation of Welsh coal to Canada, will be read with interest by exporters of pitwood:—

'With reference to return cargoes of pitwood, it appears to us that this matter ought to receive the very close attention of your government, and if sufficient quantities were offering for deck-load we believe the question of freight could be arranged so as to make the business mutually profitable.'

W. A. MACKINNON.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN, December 20, 1905.
P.O. Box 1232.

DISEASED APPLES.

A recent shipment of Canadian apples consigned to Cape Town was upon arrival found to be seriously infested by *Fusicladium* (scab), and also marked by Codling Moth, some barrels to the extent of sixty per cent in the case of the former, and forty per cent by the latter.

Canadian shippers were warned in Monthly Report for July, 1905, page 132, that fruit affected as above was liable to confiscation on arrival at destination, by the government, without compensation to shippers or consignees, and it has lately been stated authoritatively that unless Canadian shippers refrain from shipping diseased fruit to South Africa the importation of fruit from Canada will be entirely prohibited by the government of the Cape of Good Hope.

WATER BORING MACHINERY.

As advised in a previous report, interest in water boring has been aroused and is greatly on the increase throughout the Cape of Good Hope and South Africa generally, hundreds of water boring drills are being sold annually of the 'Star,' 'Columbia,' 'Keystone,' and 'Clipper' types which are built on one wagon made to run on four wheels and easily transported by the ordinary span of oxen (12 to 14).

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. E. C. Sontum.)

CHRISTIANIA, NORWAY, January 4, 1906.

DANISH CREAMERIES AND CHEESE FACTORIES.

In connection with my previous report on this subject (see Monthly Report, April, 1905, page 1545), and as your department at the time expressed a desire to get all the information possible in regard to this topic, I quote the following from a report of a commissioner sent out by the Norwegian Department of Agriculture to study in Denmark the most modern improvement in the butter and cheese manufacturing. No doubt it will be of interest to Canadian creamerymen, the Danish butter and cheese being known as a superior article.

A MODEL DAIRY.

The commissioner visited, among other creameries, the Wedellsborg Creamery, on the Island of Fyen, which is one of the newest and most modern creameries in Denmark, calculated on handling daily 11,000 pounds of milk. The buildings of this creamery are of brick, white plastered inside and outside, and only in one story, like most of the Danish creameries.

The receiving room, centrifuge room, creamery and washing room are all in one row, which is considered of advantage, as it is then much easier for the creamery master to have an overlook of the work of both the working-hands and machines. In the centrifuge room there is no ceiling, but the room goes clear up to the roof of the building, with air-holes in the ridge of the house. Hereby a perfect ventilation is obtained. The boiler and engine are placed in separate rooms, whereby the dust from the boiler-room is excluded from laying itself on the drive belts, &c., and follow these into the working rooms. The working of the butter and souring of the cream is done in one room. From this room a door leads out to the ice room, where the filled butter tubs are stored until shipment, and here also the acid (syre) is placed for cooling, when it is even sour.

STORAGE ROOMS FOR CHEESE.

The storage rooms for the cheese are very practical. The floors are sunk about 40 inches below the surface of the ground, and the shelves are so constructed that the light from the windows, when the shutters are taken off, falls in between each row of shelves, so it is always easy to inspect the cheese. In the fermentation room, where the fresh cheese lies the first month, there is under each row of shelves built a cemented basin for the salting of the cheese. This arrangement is very practical, for when the cheese is taken up from the brine, it is first placed on the lower shelves above the salting basin, so that the brine which possibly will run off from the cheese goes direct into the basin.

BUTTER-MAKING.

The butter-making is carried on as follows: The pasteurized cream is cooled by being led from the pasteurizer direct into a cooler, which again is placed so high that from the cooler the cream runs direct into the souring barrel. About 7 per cent acid

(syre) is added. The cream is then left untouched until in the evening, when it is inspected by the creamery master himself, stirred and judged by smell and taste. The sourish taste is then as a rule already prominent, and before the churning the next morning about 5 o'clock, the cream has become thick, with a full, fresh taste. The outchurning of the butter is done with much care, and plenty of water is used to get separated, even and homogeneous butter. As soon as taken up, the butter is washed in water to remove part of the buttermilk. Thereafter it is kneaded until all the churn-milk is removed, after which the salt outweighed for this churning is added. When the butter has lain in water for an hour, it is given another kneading, and after a short time still another, whereafter it is ready to pack. It is remarkable what an even and homogeneous butter there is produced by this treatment.

NORWEGIAN PAPER INDUSTRY IN 1905.

The Norwegian paper mills have been well occupied during this year, at about same prices as in the preceding year.

During the first months of the year there was, however, an extraordinary water scarcity in most rivers, which greatly interfered with the working of the majority of the paper mills. Operations had to be restricted or stopped altogether, and several mills, which under ordinary circumstances produce their own wood-pulp, were obliged to buy pulp at very high prices. Several mills have also had to pay considerable more for sulphite in 1905 than in the preceding years. During 1905, three new large machines for 'news' have been started, and one for cellulose paper. The consumption of paper is steadily increasing, but it may be feared that the increase of production will prove greater than the increase of consumption.

NORWEGIAN SALTPETRE INDUSTRY.

In my report of July 5, 1904, I mentioned the experiments of the Norwegian professor, Lrs. Kr. Birkeland, to manufacture a fertilizer from the atmosphere by an electrical process. After an experimental factory on a somewhat larger scale has been in operation since the beginning of 1905, a limited company was formed in December last under the style of 'Norsk hydro-elektrisk Kralstofaktieselskale,' with a capital of 4,000,000 kroner=\$1,066,000, preference shares, and 3,000,000 kroner=\$80,000, ordinary shares. A large mill is to be erected at Tralzfos, Norway, where 29,000 electric horse-powers will be available. The object of the company is to utilize the Birkeland-Eyde patents for extracting nitrogen from the atmosphere by their hydro-electrical process, and to manufacture nitrate of calcium, for which there is an almost unlimited demand.

TRADE OF ICELAND.

According to the statistics for 1903, recently published by the ministry of Iceland, the total imports for that year amounted to 11,938,294 kroner=\$3,183,545. This is divided on the following countries:—

Denmark	Kr. 7,302,187=\$1,947,250
Great Britain	" 3,264,392=\$ 870,480
Norway and Sweden	" 1,147,867=\$ 306,098
Other countries	" 223,848=\$ 60,367

In the same year the export amounted to 8,985,507 kroner=\$2,395,842.

NORWEGIAN-JAPANESE WHALING COMPANY.

A Norwegian-Japanese whaling company has been formed in Christiania with the object of carrying on whaling operations in the Japanese seas. Japan capital is also interested in the venture. The company will commence with one boat, but more will be added if it proves profitable.

C. E. SONTUM.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., January 9, 1906.

The trade statistics for the year 1905 are published to-day. The total imports amount to £565,279,402, an increase of £14,240,774, and the total exports £330,023,437, an increase of £29,312,427.

WOOLLENS.

Exports to United States	1,704,400 yards.
Exports to Canada	7,692,900 "

WORSTEDS.

Exports to United States	34,001,000 yards.
Exports to Canada	11,614,600 "

COTTON.

There is an increase in the export of cotton goods of the enormous amount of 607,000,000 yards, the total export of these goods amounting to 6,000,000,000 yards.

In woollen goods the most notable feature is the growth in the exports of heavy all wool tissues, which advanced from 12,000,000 to 19,000,000 yards. Another striking feature is the marvellous export of worsted goods to the United States, an increase over 1904 of almost 9,000,000 yards, and this in the face of an adverse tariff of from 50 to 120 per cent.

This bears out the truth of the statement of Mr. Shaw, secretary of the Textile Society of the Leeds University, which he made in his report to this society a short time ago, after a visit to the United States and Canada, in reference to the outlook for the woollen and worsted industry in this district. He said: 'We have nothing to learn as woollen and worsted manufacturers from the United States, and with even the high tariff walls to get over we can still do a large and remunerative trade with the United States in these lines.'

JNO. B. JACKSON.

JAMAICA.

REPORT OF COMMERCIAL AGENT.

(Mr. G. Eustace Burke.)

KINGSTON, JAMAICA, December 30, 1905.

THE TARIFF—6% SURTAX.

At a meeting of the Legislative Council on the 13th inst., the Colonial Secretary in the course of the debate on the Quarantine Bill asking for a grant of £6,000 to carry out the necessary provisions contained therein, intimated, that a surplus was expected at the end of the approaching financial year to March 31, 1906, and the government did not therefore contemplate a continuance of the 6 per cent surtax which was introduced the early part of this year on all customs duties.

TARIFF REVISION.

The present tariff will expire on March 31 next. A general election takes place in January for members of the Legislative Council. Among the more important business expected to come up for transaction will be the consideration of a new tariff measure based, it is expected, on more scientific lines than its predecessors, viz., the absolute necessities of life will no doubt be somewhat relieved at the cost of imported luxuries. While also, nothing like protection can be looked for, it is fully talked of that rates will be so manipulated as to afford local enterprise, and the tradesman and mechanic, what is termed 'fair play with no favour.'

THE NEW QUARANTINE LAW.

In view of the fact that on the 1st of January prox., all the other British West Indian Islands and Demerara, will be under one system of quarantine conditions, it is necessary to state that regulations guiding this colony will remain as have been in force for many years.

APPLES, VEGETABLES, ETC.

Almost record shipments have arrived this season from New York, no doubt caused from the increased transportation facilities. I regret to say that of these importations no shipments of Canadian origin have been received.

BUTTER.

A local butter factory is now in evidence in the parish of Manchester. This will however hardly have any effect on imports. It is gratifying to be able to report that the Canadian article still grows in favour, although recent high prices tended somewhat to check imports.

CHEESE.

While small quantities of this product of Canadian manufacture are still received, yet, it cannot be stated that much headway is being made. This is entirely attributable to the lack of uniformity of quality, and the indifference of factors to meet the requirements of importers as to size and methods of pack.

DRESSED POULTRY AND EGGS.

With the present available ample cold storage accommodation between this and New York, and with accommodating reasonable through railway rates, I am decidedly of opinion that a remunerative trade ought to accrue, and there should certainly be no difficulty in Montreal and Toronto handlers supplying large quantities to advantage. Especially so should this be the case during the tourist seasons when it is impossible for the local supply to meet satisfactorily the hotel demand for the respective commodities under consideration.

HAMS AND BACON.

Imports of these products increase, but I regret to say Canada is hardly sharing in this increase. I am however satisfied that if a serious effort be made to capture a portion of the trade, encouraging results will accrue. I am strengthened in this conviction from the fact that it is within my knowledge that considerable quantities of 'English' hams arriving here from Bristol, Liverpool, &c., are of Canadian origin, the same merely being recanvassed and re-labeled with the English trader's trade mark.

HANGING OR WALL PAPERING.

A good and attractive collection of Canadian patterns have been received on the island through a local agency, and both price and quality compare favourably with English, Continental, and United States grades. A decided drawback, however, is the matter of length. While the Canadian single rolls is of 7 yards and double rolls 14 yards, the standard length this market calls for is 12 yards. This difference may seem of little moment and so it would be if the Canadian prices were such as to allow the 14 yards 'double' roll to compete at the same rate with the local standard length referred to. This is however perhaps too much to expect, and probably the Canadian manufacturers may see their way to comply with the market's requirements regarding the drawback, to which attention has been directed, in which case, there is little doubt that a fair share of the demand will be secured them.

ORANGE, WRAPPING AND PRINTING PAPER.

The remarks I have made from time to time under above heading appear to be bearing good fruit. I am now pleased to be able to report that respective shipments of Canadian output have been imported and evidently afford satisfaction both as regards quality and price.

COTTON.

It cannot but interest Canadians engaged in cotton manufacture to learn that the output of the raw material is going apace in this island, and for that much, the West Indies generally.

RUBBER CULTIVATION.

It will, I am sure, also interest those occupied with the many uses of rubber that very serious attention is being paid to its extensive cultivation in the colony. Many acres are already planted out, and a lively discussion is now in evidence as to best localities and most advisable methods to be pursued in cultivation to obtain most satisfactory results. The Botanical Department is taking a good deal of thoughtful interest in the subject.

THE SUGAR INDUSTRY.

Not within the last fifteen years have such quantities of sugar machinery been imported in the island, and that, too, of the latest and most advanced patents tending to produce the most beneficial economic results.

The present low aspect of foreign markets has by no means lulled the enthusiasm as to the future prospects of the industry. Those interested feel that bottom prices have been touched, and that every indication and surrounding circumstance point unmistakably to encouraging paying rates.

SUGAR FROM DEMERARA.

It is learnt that the ss. *Argyle* recently sailed from Demerara with 5,000 tons of sugar for Vancouver destined making the voyage round Cape Horn. As is generally admitted, the refineries in British Columbia are assuming growing importance, and seeing that all previous supplies were drawn from Java and the Pacific islands, this experimental shipment is being keenly watched by those interested in the West Indian industry. It is also stated that the shipment is on an outright purchase basis, and at a figure which has given the vendors a better margin than if shipped to the maritime Atlantic ports.

TRADE WITH PANAMA.

If I might be permitted I should direct the interested attention of Canadian manufacturers, producers and merchants to the above market. It hardly seems to be generally known that the United States output enjoys no better facility of entry to the open market than that of other countries. There is no direct steamship communication between Panama and Canadian ports, but it may be pointed out that an initial trade may be done via Jamaica which is within 36 hours steam run of Colon.

G. E. BURKE.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE EXCHANGE, SYDNEY, AUSTRALIA, December 23, 1905.

WHEAT HARVEST.

The wheat harvest is now being reaped. The estimate is a yield of about four million bushels above those of last year, which was nearly thirty millions below that of the previous year, but a good average return. If these figures should be realized, Australia will have an export of thirty million bushels. All the states do not show an increase, as Queensland has suffered severely from dry weather, and it is doubtful if its harvest will be more than one-half of that of last year. However, relatively, it is but a very small portion of the total products of that state.

NEW ZEALAND.

The trade of New Zealand also shows a healthy condition of affairs. The exports of wool from this colony in the year ended 30th September last were 146,889,767 lbs., valued at £5,542,182. These figures showed an increase of 5,858,068 lbs. and of £1,210,711 in value. The wool, therefore, averaged 9.05d. per lb., an increase of nearly 23 per cent on that of the previous year, while it was 50 per cent higher than in 1902-03. The total exports from New Zealand for the first nine months of the year showed an increase of about a million pounds sterling—the imports showed a decrease of nearly half a million pounds. This is what was anticipated owing to the decrease in the

exports of last year. The increase in exports are due almost wholly to wool, though there was an increase in the value of butter, some pastoral products and timber. Grain showed a considerable decrease.

INFERIOR APPLES AND PEARS.

The *Mona* brought a very considerable shipment of apples from British Columbia for Australia and New Zealand ports. That steamer having no coal storage for that merchandise, the fruit was carried on deck. A portion of it arrived in very good condition. Others, and also some pears, were absolutely rotten on arrival, and so much decayed that it was impossible to know the kind of apple which thus proved unfit for shipment. The fruit was also condemned by the inspector on account of being infected with Codlin Moth and Black Spot. It was allowed to be taken to the government fumigator, and those 'treated' were sorted and placed upon the market, where the good fruit brought excellent prices. I was informed in Vancouver that nearly all these apples came from the United States, and not from British Columbia.

The previous steamer brought in cold storage a quantity of British Columbian fruit. It arrived in excellent condition, and was passed by the government inspector as being one of the best shipments that ever was landed at this port, being free from disease, and excellent in quality. This goes to show that it is unsafe to ship apples except in cool compartments, and that there is a market here for the right fruit landed in good condition.

AUSTRALIAN COMMERCE BILL.

The Australian parliament has passed a Bill entitled 'The Commerce Act of 1905,' with some amendments. It deals with the exports and imports, but the import section is the one of interest to Canadian exporters. It provides for the prohibition and infliction of a penalty of £100 for the importation of goods which, by label or otherwise bears a false trade description. It defines a false trade description as a label on a article or cover of any description which misrepresents the goods in the following way:—

- (a) as to the nature, number, quantity, quality, purity, class, grade, measure, gauge, size, or weight of the goods; or
- (b) as to the country or place in or at which the goods were made or produced; or
- (c) as to the manufacturer or producer of the goods, or the person by whom they were selected, packed, or in any way prepared for the market; or
- (d) as to the mode of manufacturing, producing, selecting, packing or otherwise preparing the goods; or
- (e) as to the material or ingredients of which the goods are composed or from which they are derived; or
- (f) as to the goods being the subject of an existing patent, privilege or copyright.

It applies only to the following:—

- (a) Articles used for food or drink by man, or used in the manufacture or preparation of articles used for food or drink by man; or
- (b) medicines or medicinal preparations for internal or external use; or
- (c) manures; or
- (d) apparel (including boots and shoes) and the material from which such apparel is manufactured; or
- (da) jewelry; or
- (e) seeds and plants.

As yet no goods of the character included in the Bill have been proclaimed, but exporters should take note of the conditions and see that it is not in any way violated.

AUSTRALIAN HOUSES.

I purpose in this and future reports giving the names of leading importers in Australia and New Zealand, with their addresses and their London purchasing agencies. It is possible that business can be done through these London agencies, as Canadian goods are becoming somewhat known in this market. As a rule, the London buying houses are not very ready to purchase goods unknown to the market, and it will be only in limited quantities that sales can be made for Australia in this way. Still, something can be done. Caution should be exercised by those who have already arranged for agencies in Australia, as it is most undesirable to have a conflict in this market, as there is likely to be if the goods are indiscriminately offered in London, irrespective of the conditions that may have been entered into in Australia. It will be possible for your department to give information in this way to Canadian inquirers for large Australian houses, but again, it should be noted that it is not very probable that business is likely to accrue through either letters or circulars to these firms. I have pointed out more than once, that it seems to be necessary to do business through an agent. It is an extraordinary thing for anything to succeed without their employment in this market.

FURNITURE IMPORTERS.

The following is a list of the principal importers of furniture, with their London agencies, if they have them:—

Name of Firm.	Sydney Address.	London Address.
W. W. Campbell & Co.....	249 Clarence St., Sydney.....	None.
Beard, Watson, Ltd.....	461 George St., Sydney.....	None.
Feldheim, Gotthelf & Co.....	4 Barrack St., Sydney.....	8 New Basinghall St.
Hoffnung & Co., Ltd.....	169 Pitt St., Sydney.....	102 Sore St., E.C.
Laycock, Son & Nettleton....	537 Kent St., Sydney.....	Bradford, England.
David Jones & Co.....	349 George St., Sydney.....	122-4 Basinghall St.
Farmer & Co.....	Pitt St, Sydney.....	48 Aldermanbury, London, E.C.
F. A. Lasseter & Co., Ltd.....	George St., Sydney.....	F. A. Edleston & Co., 9 New Broad.
Anthony Horder.....	Haymarket.....	9 Golden Range.

TRADE INQUIRIES.

I have received quite as many inquiries respecting the possibility of finding a market here as I anticipated. There has not been time to say as to the possibilities of business being secured. I am sorry to say that a good many of the inquirers failed to give the information necessary to know whether it can be done. Their price lists are for goods at the factory, with no indication of the cost f.o.b. in New York or via Vancouver by the way of Sydney, which are necessary in order that the landed cost can be arrived at. It is further necessary now, under new regulations, to give the factory prices and the freight paid to the Canadian ports of shipment, so that the duty to be paid can be ascertained.

U.S. MANUFACTURERS AND THE NEW ZEALAND PREFERENTIAL TARIFF.

I am informed that in order to meet the preferential tariff granted to British goods in New Zealand, United States manufacturers are reducing the price of their goods. Thus nails, on which the duties are 3s. on United States and 2s. for Canadian, the prices have been reduced from 12 to 20 cents per hundred, to prevent the Canadian article from getting into the market. As the Canadian has to pay a higher freight from Montreal to New York than has the manufacturer in the United States, this is likely to stop a trade which had some promise in it.

PREPAYING POSTAGE TO AUSTRALIA.

I have inquiries here as to how Canadian exporters can send catalogues or advertising matter to the trade in Australia, and prepay the postage on the same. This

information has been given before, but as the new year is likely to bring forth other inquiries, I beg to repeat the regulations governing the same here, as taken from the Postal Guide:—

‘Exporters may, if they so desire, weigh the catalogues, &c., in bulk prior to posting, assess the duty at 3d. per lb., and remit the amount by money order to the Deputy Postmaster-General of the state to which the consignment is despatched, the remittances being made as follows: To Sydney for New South Wales, Melbourne for Victoria, Adelaide for South Australia, Brisbane for Queensland, Perth for Western Australia, and Hobart for Tasmania. Remittances should come to hand not later than by the same mail as the consignments they are intended to cover. In cases where this is done, no surcharge on delivery will be necessary, but if the duty be not prepaid as above, the duty payable is made a surcharge on the packet by means of ‘postage due’ stamps, and is collected by the post office officials from the addressee before delivery.’

FREIGHT RATES.

Owing to a German freight war, rates from England to Australia at the present time are very low. It may, therefore, be advisable for Canadians, where time is not an important element, to ascertain whether they cannot reach this market via England below the cost of via New York.

BOOTS AND SHOES.

The manufacturers of boots and shoes in Melbourne have agreed to advance the price of boots and shoes from five to fifteen per cent, owing to the dearness of leather. It is expected that manufacturers throughout the Commonwealth will follow this course. The increases go into effect on January 1.

J. S. LARKE.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., January 15, 1905.

BUTTER.

A much better market than ever before for Canadian creamery butter has existed this year. The quality has been generally satisfactory, and at no time during the season has there been as much butter stored as in former years. Some of the Canadian creameries produce an article that compares most favourably with the production of any other country, but I regret to say that there are still some factories shipping a grade below what it ought to be. The exports from Montreal for the season just closed amounted to 573,449 packages, being an increase of 83,449 packages over 1904, and 235,172 over 1903. Good prices were realized right through the season, the average advance over 1904 being about 12s. to 14s. per cwt. Direct shipment to Manchester suffered a serious decline, as compared with the season of 1904, viz, 40,667 packages in 1904 and 9,153 packages in 1905, but this does not mean that less Canadian butter is handled by Manchester importers, but simply that many of the leading houses have been compelled through lack of an adequate service of suitable steamers to the canal, to have their consignments sent to Liverpool for distribution to their customers. This

is a serious matter not only for the butter trade, but for other Manchester interests as well, and no doubt efforts will be made before the opening of another season, to provide such accommodation as the importance of the trade warrants.

RUMORS OF BUTTER SCARCITY.

Rumors of a butter famine were rife during the past few weeks and retail prices were advanced, but the market has eased and promises to remain so. It is said there must be a large quantity of butter in Russia awaiting export as soon as the disturbances there have ceased. Russian export for 1905 to Great Britain showed a considerable increase, being 461,140 cwts., value £2,246,583 against 404,714 cwts., value £1,817,736 in 1904. Denmark sent a smaller quantity, 1,639,363 cwts., value £8,919,768 in 1905, as against 1,708,619 cwts. value £9,003,089 in 1904. Australia and New Zealand also showed a decline, but value increased, and Canada continued to improve steadily. The total imports of butter in 1905 reached the vast total of 4,147,864 cwts., value £21,585,622, as against 4,241,005 cwts., value £21,117,162 in 1904.

CALCIUM CARBIDE.

The chief European countries exporting calcium carbide to Great Britain are Italy, Germany, Norway and Sweden, but the bulk of the imports come from the two countries last named. The Italian is not looked on with as much favour as the others. A shipment of 1,282 cwts. from Civita Vecchia reached Manchester last week via the ship canal. This lot was packed in tin canisters containing from 15 to 20 lb. each, and then enclosed in wooden cases to contain about one cwt. A shipment of 47½ tons contained in 692 cylindrical wooden drums reached here this week from Sweden. I visited the steamship discharging this lot and find that it was shipped in cylindrical tin canisters hermetically sealed, enclosed in tight wooden barrels of similar shape securely and strongly made. There were two sizes of drums containing one and two cwt. each in this shipment, and it seemed to me a method that should commend itself to the Canadian exporter. In transit it is stored on deck, not being permitted in hold, and on arrival is at once put over the side into canal barges, to be carried to the warehouse of the consignee for distribution. This warehouse is licensed and subject to supervision, the licensee to conform to the requirements of the Board of Underwriters. The Board of Trade returns do not give the quantity of carbide imported, as it is classed and totalled with chemicals in their returns, but I am told that it will total thousands of tons. Its use has become more diversified and its consumption is increasing. The United Alkali Co. has a carbide plant at Widnes, said to be the only one in Great Britain, but its output is small, and it is not looked upon as a competing factor in the trade. It is somewhat difficult to obtain the ruling price, but from the best information I can get it is said to bring from £11 to £13 per ton of 2,240 lbs. c.i.f., Manchester, and that it is not subject to much fluctuation.

GERMANY GIVEN LARGE RAILWAY ORDER.

Considerable surprise and disappointment was expressed by iron and steel representatives at a meeting recently held, at the announcement that an order for 440 railway carriages for the Metropolitan Railway Co. has been placed with a German syndicate, who had undersold British builders. The order will aggregate a very large sum in wages alone, whilst it would necessitate a large expenditure in iron and steel and other material which will be lost to the British producer.

BRITISH TRADE.

The Board of Trade returns just issued show that the splendid record of the year was maintained to the close. The imports for December amounted to £53,120,486, against £52,845,366 for the corresponding month in the previous year, showing an increase of £275,120. The exports for the month were £28,652,194, compared with £28,-

072,134—an increase of £580,080. The imports for 1905 amounted to £565,279,402, compared with £551,038,628 for the previous year, showing an increase of £14,240,774. The exports for the year reached £330,023,467, against £300,711,040, showing an increase of £29,312,427. The re-exports for the year are £77,798,521—an increase on December of £652,833, and on the year of £7,494,240.

The total of the trade (exclusive of re-exports) is therefore £895,302,869—an amount never before approached, and exceeding the record figures of 1904 by no less than forty-three and a half millions sterling. With re-exports the total was £973,101,390—a total increase of fifty-one millions.

P. B. MACNAMARA.

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(*Mr. Edgar Tripp.*)

PORT OF SPAIN, TRINIDAD, January 18, 1906.

TRINIDAD EXPORTS.

The following returns of the principal exports of the colony for year ending December 31 last, as compared with those for 1904, are unrevised, but may be taken as approximately correct:—

	1905.	1904.
Sugar, bags.	280,335	397,894
Molasses, puncheons	3,300	3,050
Rum, puncheons	349	1,021
Cocoa, lbs.	42,539,525	41,790,080
Asphalt, raw, tons.	85,531	120,685
Asphalt, epuré, tons	14,637	10,898
Manjak, tons.	800	3,367
Cocoonuts.	11,292,767	9,356,012
Copra, bags.	11,190	16,056
Bitters, cases	21,776	20,653
Balata, bales	17,437	7,819
Coffee, lbs.	12,510	64,555
Coffee, Venezuelan, bags.	1,397	6,333
Cocoa, Venezuelan, bags.	36,479	48,302

The falling off in sugar was due to extreme shortness of crop, owing to drought. Shipments of asphalt were smallest for some years, owing probably to competition of the Bermudez lake, which was seized and is now being worked by the Venezuelan government. The exports of Trinidad cocoa for 1905 form a record. An export duty of 5s. a ton has hampered the manjak industry, causing the depression indicated above.

INSURANCE COMPANIES INVESTING IN TRINIDAD.

In view of the decreasing rate of interest paid on first class securities in the United Kingdom, one of the large British insurance companies doing business here realized some years ago the advantage offered for investment in this colony. The prevailing rates were then eight per cent on good freehold properties. The company

offered money at 5 per cent, on the condition that the mortgagee insured his life with them, for a proportion of the sum lent, as collateral security. Very large amounts have since been invested by the same company on these terms to the advantage of all concerned. Local capitalists being unwilling in any case to accept less than 6 per cent, a large amount of money has been released, which would otherwise have been locked up, and has become available for industrial or other enterprises.

Up to quite recently the company referred to was alone in this business, but a second insurance company came into the field last year, and I am now pleased to see that a progressive Canadian company is seeking the same safe and remunerative outlet for its capital, the first loan being \$24,000 on the security of real estate. This is a step in the right direction, and one which, if prudently followed up, as doubtless it will be, should attract a good deal of excellent insurance business to Canadian companies.

EDGAR TRIPP.

SOUTH AFRICA

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, January 10, 1906.

VALUABLE MARKET FOR MACHINERY.

South Africa in proportion to its population offers one of the most valuable markets in the world to the foreign manufacturer of machinery, for during the year 1904 the value of her imports aggregated over ten million dollars, classified as follows: Agricultural, £131,068; electrical, mining and sawing, £893,295; printing and sewing, £118,747; typewriting, £11,764; unclassified, £898,369; total, £2,053,243—Great Britain supplying the largest share, with the exception of agricultural machinery, in which the United States share predominated.

MARKET FOR SEEDS.

* As every succeeding year sees an increased area brought under cultivation, owing to the greater attention given to irrigation, the demand for imported seeds will probably be an ever-increasing one in the future. The following figures show the comparative value of imports during the year 1903-1904:—

	1903.	1904.
Bird seed	£ 8,784	£ 11,617
Food seed	1,922	732
Garden and vegetable	28,788	25,208
Potato seed (estimated)	44,286	28,384
Plants and bulbs	10,973	14,203
Cereals (estimated)	95,000	85,000
Total	£189,753	£165,144

TRADE REQUIREMENTS.

The chief desiderata in catering for this trade is that seeds should not be forced, and that they should be well but economically packed in bulk, not in packets.

IMPORTS OF AUSTRALIAN FLOUR AND WHEAT.

During the twelve months ending June 30 last, South Africa imported from Victoria, Australia, 562,433 bags of flour, and 743,295 sacks of wheat.

SELLING PRICES OF AUSTRALIAN FLOUR.

During the twelve months ending June 30 last the price of Australian flour varied between 8s. 3d. and 9s. 9d. per 100 pounds, c.i.f., South African ports, and this flour has almost entirely taken the place of the United States (Pacific coast) article. Both of these flours are always packed in single extra heavy cotton bags.

IMPORTS OF FISH.

Having been requested to look into the possibility of working up a trade in South Africa in Canadian fish, I have to advise that this country imports annually, as per details hereunder, over ten million pounds weight of dried, cured, frozen and preserved fish, of a total value of \$1,192,207. Statistics give Great Britain credit for the major portion of this amount, but there is no doubt but that considerable of the canned salmon imported was of Canadian origin.

DETAILS OF IMPORTS.

During the year 1904, South Africa imported fish to the following extent:—

	Lb.	Value.
Dried or cured—Cape Colony	1,015,010	£15,526
Dried or cured—Natal	1,681,052	23,071
Fresh or frozen—Cape Colony	66,353	1,536
Fresh or frozen—Natal	42,383	891
Preserved or canned—Cape Colony	5,297,611	144,654
Preserved or canned—Natal	2,119,451	59,632
Total imports	10,221,860	£245,310

VARIETIES IN DEMAND.

Of the smoked varieties imported, kippers and haddocks are the most in demand, and canned salmon has a very large sale.

IMPORTERS OF FISH.

The following are the principal South African importers of dried and cured fish:—

African and United Colonies Cold Supply and Storage Co., Ltd., Woodstock, C.C., and Johannesburg, Transvaal.

Arctic Cold Storage Co., Durban, Natal.

Cape Cold Storage and Supply Co., Chiapinni street, Cape Town.

Colonial Co-operative C.C. Co., Ltd., Petermaritzburg, Natal.

Durban Cold Storage Co., Smith street, Durban, Natal.

East London Cold Storage and Supply Co., East London, C.C.

Federal Supply and Cold Storage of S.A., Ltd., Cape Town (and branches).

Imperial Cold Storage Co., Ltd., Cape Town (and branches).

Rhodesia Cold Storage Co., Ltd., Salisbury, Rhodesia.

Transvaal Cold Storage Co., Ltd., Durban, Natal.

Sparks & Young, Durban, Natal.

Manasse & Co., Port Elizabeth, C.C.

CHARLES M. KITTSON.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

*(Mr. J. B. Jackson.)*NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., Jan. 25, 1906.

CANADIAN PRODUCE IN FAVOUR.

There is still a further and very marked appreciation of Canadian produce in this district. The work which has been done in the past by the High Commissioner, the Canadian commercial agents and the Canadian emigration agents, is now commencing to be felt far and wide, not only in emigration matters, but also in the trade and commerce between the two countries.

A further reason for such sudden development at the present, in the inquiry for Canadian products is to my mind a resultant from the present election campaign, as the question of the importance of the colonies, and especially Canada to Great Britain has been gone into, very largely by both parties, and I also might say the three parties, as the labour candidates have been placing the matter very fairly before their own people.

DEMAND FOR INFORMATION RESPECTING CANADA.

I have also found on inquiry at the large free lending libraries in the various cities of this district, that a remarkable number of inquiries have been made for books and maps with regard to the development of Canada, its resources, products, &c. The number of inquiries and consultations that I have had with large firms in this district with regard to the Canadian products has been exceptional, and the interest has been exceptional and surprising.

Every dealer of note in food products in this district is anxious to trade in Canadian products, and especially anxious to get them direct.

PACKING OF APPLES.

Very many inquiries are being made to me about Canadian apples. This has been brought about partly by what I have above mentioned, but more especially by the excellence of the fruit, and in the evenness of the grading and packing, &c., this is true with very few exceptions, but there are a few dealers who apparently desire to place their fruit on the market here, irrespective of the packing regulations and irrespective of the detriment which their conduct occasions to Canadian prospects. I am looking into two or three cases at the present time and will send full particulars to your department at an early date, and I hope that such fraudulent packing will be stamped out.

I saw a shipment of 1,000 barrels of apples delivered at Hull a few days ago which arrived in very fair condition, and on an average were fairly well graded and packed, and I understand that although XXX apples are generally exceedingly well graded that the same care is not taken with XX apples.

SECOND GRADES SHOULD BE WELL PACKED.

It is just as necessary that the XX apples should be as well graded and packed as the XXX is, in fact three barrels of XX apples can be sold here at a fairly remunerative price if well packed for every barrel of XXX, and it is from these apples that the farmers of Canada would make their largest profit because if they are not shipped they are an absolute loss.

Several of the large firms in this district are now fully alive to the fact that the only way to secure the best apples is to deal direct with Canadian exporters themselves, in preference to buying through the Liverpool Fruit Brokers Association, as has been the custom for years, and several will send out special representatives next year in time for the apple crop.

In Hull there has been a special demand for XXX apples and especially for those in boxes, and also Russets, Spies. and Baldwins in barrels for re-export to the continent. I saw barrels of Baldwins the other day which were sold for export to the continent and which were transhipped at Hull the price paid was 34s., or \$7.25 per barrel.

TIMBER.

I am of the opinion that the Canadian exporters overlook the possibility of the north country trade, especially is this the case with regard to timber. Hull is one of the largest timber ports in Great Britain, and there are upwards of 70 firms doing business, either directly or indirectly in connection with the importation of timber, pit props, mining timber, lumber, telephone poles, &c., and it has an excellent market for Canadian woods.

A large amount of Canadian goods find their way to Hull and the East Coast by New York and the Wilson line, but Canada is very greatly hampered in this direction by not having a direct line, and this lack of direct communication will be more intensified in the future owing to Australia having entered the field as a direct shipper.

PIT WOOD WANTED.

I had the pleasure of a conference the other day with the managing director of two of the largest collieries in South Yorkshire, with regard to pit props and pit timber, he said 'we need hardly say that we should hail with delight the advent of a colonial competitor into our pit wood market.' These two collieries pay for pit props alone on an average about £6,000 per year, and in addition to this about one half as much in mining timber.

On talking this subject over with this gentleman I learnt that one of their mines is exceedingly damp, and in addition to this is under great pressure, and that they had great difficulty in the main roads in getting pit props that would stand the dampness, and at the same time be strong enough to counteract the downward pressure. I raised the question as to whether Canadian cedar would not suit their requirements better than any other wood. The sizes that would be required for the main roads would be at least 8 inches in diameter at the small end and averaging from 6 feet to 8 feet in length.

PIT PROP PRICES.

The prices that these companies are paying for pit props delivered at their collieries are as follows:—

The prices per 72 lineal feet :—

	s.	d.
4-inch pit props.	4	3
5-inch pit props.	5	4
5-inch pit props.	7	0
6-inch pit props.	8	3
6-inch pit props.	9	6

The lengths vary from 4 feet to 8 feet as follows:—

4 feet to 5 feet long—4-inch tops.

5 feet to 6 feet long—5-inch tops.

6 feet to 8 feet long—6-inch tops.

SAMPLES OF PIT PROPS WANTED.

These companies would be pleased to receive samples of pit props including cedar for main road props. If cedar will stand the strain it will be invaluable in wet pits, as the pit props in these main roads are never removed except defective, whilst in the lateral parts of the mine pit props are withdrawn as the coal is taken out, and the pressure from above fills up the opening, so that these later named props can be used again, or cut down to suit the smaller seams. These people would be delighted to get into communication with any parties who might be interested in this class of wood. The amount of pit props required per year in England may always be taken as one lineal foot of pit props for each ton of coal mined.

CANADIAN BACON IN GREAT BRITAIN.

Canadian bacon is still on its upward way, and is gaining in popularity every day as against American bacon. A large Sheffield produce merchant said to me the other day 'we are more than satisfied with the Canadian bacon, it is making wonderful advances, and our customers, especially the better class, invariably prefer Canadian to American, and although we are generally able to judge from appearances as to whether the sample produced is American or Canadian, still we should like to have a skin brand on the Canadian, so that we can always be sure we get the genuine article. Whenever a certain line of bacon is in demand, inferior kinds are often foisted on the English buyer, instead of the original, but a skin brand would solve the whole difficulty.'

This gentleman informed me that it would be better for the Canadian bacon trade, if at any time it were absolutely necessary for packers in Canada to import American hogs, that the bacon from these imported hogs should be branded 'Canadian cured from American hogs.' The English consumer would still prefer that Canadian bacon should be harder cured and more after the style of the salt cure used in England.

In order to keep Canadian produce up to its highest standard of quality, there should be no misrepresentation and no attempt to palm off bacon made from American hogs, as the real genuine Canadian article, as a misrepresentation of this kind made by one individual firm might be answerable for the estimation in which all Canadian produce is held in a certain locality.

BUTTER.

Some few weeks ago there was a very decided flurry in the butter market, and the best Danish here touched 136s. per cwt. This advance in price was caused by the small shipment from Russia to Great Britain, and by the Germans securing a large amount of the Danish butter then in sight. Britain's import of Canadian cheese has about reached its maximum. There seems to be greater chances for the butter men of Canada to increase here their sales of Canadian butter rather than to increase to any very large extent the shipment of cheese to Great Britain. More money would be made by increasing the export of butter for all parties concerned.

SALTPETRE IN BUTTER.

I am informed by several large houses here that too much saltpetre is used in Canadian butter. In one case it had to be washed out of a large shipment of best Canadian dairy butter before it could be sold.

THROUGH RAILWAY RATES TO INLAND POINTS.

It is now possible to obtain through bills of lading, on any Canadian products to the inland cities and towns. I do not think that this fact is as widely known as it should be in Canada, as it was only adopted last summer. Hitherto, the goods had to be billed to the port and then forwarded separately from the port to the interior destination. This change should assist Canadian trade in supplying the requirements of buyers in the inland cities who are exceedingly anxious to buy direct and can furnish as good references as those in the ports.

TOMATOES.

There is a very large and increasing demand for Canadian tinned tomatoes. These should be packed in 2, 2½ and 3 lb. English tomatoes, either home grown under glass or imported from Spain or the Canary islands, are not at all the equal of the Canadian tomato, either in size, colour or flavour. It has also a greater quantity of seeds, and although whilst fresh and uncooked, it is not such a poor imitation of the Canadian one, but when canned it is not at all to be compared with the Canadian goods either in flavour or colour, and as a general rule appears to contain nothing but seeds.

The dealers in this district are very much pleased with the Canadian article, and are very much surprised at the little enthusiasm that is displayed by Canadian packers in this class of goods. Generally, tinned tomatoes here are American or continental. Canadian exporters should try the idea of circularizing the leading produce houses in this district, stating qualities packed, weight, &c.; and there is little doubt but that it would be of advantage to them.

This office would be pleased to furnish lists for the various cities to Canadian exporters desiring same. From present appearances the English taste for tinned tomatoes is on the increase, and with the advantages Canada possesses of being able to grow them in the open as a field crop, a good trade should be easily worked up in this class of goods.

JNO. B. JACKSON.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14 BUND, ROOM B., YOKOHAMA, January 17, 1906.

JAPANESE ORANGES AND CANADIAN APPLES.

The Japanese orange is a small but delightful table fruit. Improving cultivation is producing them in great quantities. There seems to be more hope for the orange than for the apple in this country; the latter is liable to pestiferous attack of one kind or another; the peel is subject to blemish; often a solid outer appearance covers a decaying inside; and the apple flavour, usually weak, is early lost. The apple lover may be sure of disappointment should he expect to gratify his taste in Japan. When British Columbia will have apples for export, which time we have long been assured is coming, an interesting and profitable trade may spring up by way of interchange of oranges from Japan for apples from Canada. Japan needs the apples, and Canada the oranges; and of both it is to be said they are a healthful and delicious fruit.

About the consumption of oranges, by the Japanese at the New Year holiday season, a native newspaper going into statistics says: 'Whatever may be the conditions

in other lines of business, the orange trade prospered during the few days active New Year demand. The oranges sold by 374 grocers of Tokyo during the first seven days of the New Year numbered 46,000,020, the receipts therefrom aggregating Y223,652, or about four for a cent, Canadian money. These oranges are now being sold in the fruit stores at about four for three cents.

PORCELAIN INDUSTRY.

The export of porcelain is now in a prosperous condition. More than half of the total production is exported, the value sent abroad in 1903 being \$1,580,000 and in 1904, \$1,950,000. The principal destinations of porcelain exported in 1904, and its value, were as follows :—

Asia.....	\$694,484
Europe.....	158,499
North and South America.....	1,094,599

The United States is the largest purchaser of Japanese porcelain, the value of export in 1904 amounting to \$965,000; China comes next with \$470,000; then Korea with \$129,000. Canada was a customer to the extent of \$60,000, and Great Britain, France and Germany each exceeded \$25,000. The value of porcelain produced in Japan during the five years ended 1903, was as follows:—

1899.....	\$2,933,916
1900.....	3,436,846
1901.....	3,467,588
1902.....	3,455,650
1903.....	3,487,770

The trade for 1905 is expected to show an increase; but the returns in detail are not yet available.

BOYCOTT OF AMERICAN GOODS.

Reports as to the boycott of United States trade in China amount in the aggregate to assurance that it is being held up to the maximum of tention, and that as the prospect of the Washington authorities modifying the terms of the treaty becomes less hopeful, there are preparations going on for the more stringent application of boycott measures. The situation seems to have quickened noticeably the aspirations of Canadian traders, and the same may be said of those of Australia and Europe. The Japan Steamship Co. (Nippon Yusen Kaisha) in resuming their Australian and European services, are said to be hastening their movements because of the prospective maintenance of the boycott.

TIMBER INDUSTRY IN MANCHURIA.

In the treaty recently concluded between Japan and China, as a sequel to the Peace Treaty, there is the stipulation that a company for the purpose of timber-felling on the right bank of the Yalu shall be incorporated conjointly by Japanese and Chinese. It is now reported that the proposed company, which will be of a semi-official character, will be established with a capital of \$5,000,000, shares to be subscribed for equally by Japanese and Chinese. So far, no particulars of the proposed enterprise are published, but are expected to be made public shortly, with probably some particulars as to the description and quality and commercial value of the timber.

MATCH COMBINE.

Preparations for the general incorporation of the match factories in Japan are being pushed. The prospectus of the new concern has been prepared, and submitted to

the government for approval. The capital is placed at \$3,000,000; out of which it is estimated \$550,000 will be required for a factory site; \$850,000 for buildings; \$250,000 for plant; \$500,000 for the purchase of the several amalgamated interests, with trade-marks; \$10,000 for promotion expenses; and \$790,000 for working capital. In Japan there are 184 manufacturers and 83 dealers in matches; of which trade Kobe and Osaka are the centres, and either of which will have the site of the combination.

JAPANESE TRADE FOR 1905.

From the official returns of foreign trade for 1905 just published it appears that in respect to imports there was a considerable increase due to the heavy importation of war material and large quantities of railway plant, and goods ordered to arrive before the war tariff came into force on July 1. The importation of ordinary classes of goods also largely increased.

Exports also showed a good increase, sales of the principal goods continuing active. The success of the Japanese arms on land and sea is finding wider markets for Japanese goods in China, and the export of cotton fabrics and yarn signally increased. The advance notice of the duty on imported rice, and the increase of the consumption-tax on sugar induced importations of these articles in excess of the current needs; and the increased activity in the cotton yarn market brought up the importation of raw cotton to an astonishing amount. In the case of exports, the shipments of cotton fabrics and yarn, porcelain, and other lines generally, showed more or less increase. The sales of raw silk and habutae which form the most important articles of export, fell off heavily, the decrease of raw silk representing about 10 million dollars and of habutae of about 5 million dollars. The value of exports and imports for 1905, is as follows:—

	1905.	Increase on 1904.
Exports.	\$160,797,000	\$ 1,324,000
Imports.	244,132,500	58,624,000
Total.	\$404,929,500	\$59,948,000

COMPARISON OF IMPORTS INTO JAPAN.

The amount of the principal articles of import, together with a comparison with the preceding year, is given below:—

	1905.	1904.
Raw cotton.	\$55,311,592	\$36,710,193
Cotton yarn.	850,933	171,645
Wool.	4,173,869	4,875,527
Flax, hemp, &c.	1,679,125	1,131,129
Iron nails.	1,304,369	980,027
Iron bar and rod.	3,598,882	2,150,753
Iron pipes and tubes.	1,068,449	655,878
Other iron and steel.	9,385,849	4,602,638
Paper.	3,168,702	1,512,666
Leather.	7,026,206	2,182,484
Machinery.	10,461,627	4,941,375
Locomotive engines.	2,188,453	1,602,709
Mousseline-de-laine.	1,533,184	909,275
Woollen cloths.	5,439,654	877,127
Shirtings and cotton prints.	4,815,823	1,776,966
Cotton satins and cotton velvets	1,432,006	475,062
Rice.	23,982,158	29,895,955
Flour, wheat.	4,975,684	4,812,699
Oil-cake (manure).	5,680,232	2,334,275

ALEX. MACLEAN.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., January 31, 1906.

CHEESE-CLOTHS.

Upon the complaint of a prominent retail merchant that there is considerable difficulty in 'stripping' Canadian cheese, I visited his premises in order to observe the operation. The merchant himself, a man of forty or fifty years experience in the trade, stripped the cheese in my presence, and I have no doubt whatever that a less experienced operator would have had still more difficulty than he had.

WASTE OF TIME AND LABOUR.

Even in such skilful hands it was very apparent that the process was an economic failure, being both tedious and wasteful. This was due to the fact that the cloth, instead of coming off in one piece, adhered to the cheese in many spots, the result being that in spite of the most careful manipulation, the cloth was torn, leaving strips here and shreds there, which had afterwards to be carefully picked out or scraped off.

CLOTH OVERLAID WITH CHEESE.

Where there was a slight undulation, pocket, or other unevenness in the surface of the cheese, the cloth was partly buried in or overlaid by the cheese; this would itself have created some difficulty, but the trouble was intensified by reason of the exudations from the cheese, during the period of storage. The result was that at such points the cloth in nearly every case gave way, and left fragments to be picked off.

CHEESE UNFIT FOR DISPLAY.

As the retailer pointed out to me, a cheese which gave much trouble in stripping, was nearly certain to be disfigured so much that it could not be put into the window; it was nearly always necessary to use the "iron" to scrape away adhering cloth, or in some cases to dig it out, thus breaking into the surface of the cheese itself. Of course if very great care was exercised, this last difficulty might be avoided, but the use of such elaborate care should not be necessary, and we return to the original and really serious part of the complaint that the operation of stripping is needlessly tedious and therefore highly wasteful.

THE REMEDY PROPOSED.

The dealer in question recommends returning to the use of heavier cheese cloths, such as would be strong enough to stand the strain of being moved expeditiously, if the operation was performed with ordinary care. He states that heavier cloths were the rule in the trade years ago, when it was a common practice to keep and wash the cloth, which was substantial enough to make a very useful duster. It would now be quite impossible to strip off the cloth whole, especially in the case of cheese which had been stored for some time.

WEIGHT OF CHEESE CLOTH.

The average weight of the cloth used is of course known to the trade in Canada ; the one which came off the cheese I saw stripped was afterwards, at my suggestion, washed and dried, and was then found to weigh just two ounces.

FURTHER INQUIRIES ON FOOT.

I am making inquiries amongst the trade of this district, both importers and retailers, and shall embody the opinions received in a report later on. Meanwhile the subject may be considered by the Canadian trade.

DATING DAIRY PRODUCE.

In recent correspondence and interviews with importers of dairy produce, the wish of the trade has been once more clearly indicated, to the effect that Canadian cheese and butter should always be stamped so as to show the date of manufacture. Much has been said in favour of this practice, which is already adopted by some of Canada's competitors, but the reasons for this procedure are so well-known that it is surely unnecessary to do more than call attention once more to the request of the trade here.

ROLLED OATS.

Some Canadian shippers of this product have incurred needless damage by using bags of too light material. It has been found at the docks that many of the bags are torn, with a resulting loss of part of the contents. Would it not be well that some other package should be adopted, or that the rolled oats should be shipped in stronger bags, similar to those used for flour ?

THE APPLE SUPERSEDED.

The trade at the close of 1905 shows that the banana has now become the most popular fruit handled in the British markets. At one time it was the orange, the apple or the tomato. To-day the banana heads the list easily. Over 5,500,000 cwts. of this fruit were imported last year, against 4,350,000 cwts. of oranges, 3,250,000 cwts. of apples, and 1,100,000 cwts. of tomatoes. If only from this fact alone, 1905, as far as the import fruit trade is concerned, may well be termed a remarkable year. The banana business is still only in its infancy. We paid over £2,000,000 for our banana supply last season.

W. A. MacKINNON.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN, January 15, 1906.
P.O. Box 668.

RECORD GOLD OUTPUT.

The output of the Rand gold mines during the year 1905, amounted to 4,897,221 ounces of a value of £20,855,627 which constitutes a record, being 601,213 ounces ahead of the best previous record of 1898. Since the discovery of gold on the Rand in 1887, the Transvaal has produced a total of 1,525 tons of the precious metal.

YEARLY OUTPUT.

The output of the Rand gold fields, year by year, since its discovery is as follows :—

	Ounces.
1887..	23,125
1888..	208,121
1889..	369,557
1890..	494,817
1891..	729,283
1892..	1,210,868
1893..	1,478,477
1894..	2,024,163
1895..	2,277,640
1896..	2,280,892
1897..	3,034,678
1898..	4,295,608
1899..	4,233,296
1900..	428,761
1901..	238,994
1902..	1,645,010
1903..	2,964,255
1904..	3,771,415
1905..	4,897,221

TENDERS FOR OREGON PINE.

The Central South African railways will shortly call for tenders for the supply of Oregon pine (Douglas fir), copies of tenders will be forwarded to the Superintendent of Commercial Agencies, Ottawa, as soon as published, to whom Canadian shippers interested are requested to communicate.

FLOUR DAMAGED IN TRANSIT.

A recent shipment of Manitoba flour per ss. *Wyandotte* arrived at this port damaged to the extent of twenty per cent, and it has been noticed that Canadian flour which has been shipped during the winter months always shows a larger percentage of damage than when shipped during the summer months, for this reason it has been suggested that possibly the cause is that the transfer of flour cargo at West St. John from cars to steamers hold takes place during wet weather causing the flour to absorb an abnormal amount of moisture in which condition it is especially liable to sweat whilst in transit through the tropics.

CHS. M. KITTSON.

GENERAL COMMERCIAL INFORMATION.

IMPORTS OF PRINCIPAL FOODSTUFFS INTO GREAT BRITAIN.

AUSTRALIAN CUSTOMS DECISION.

IMPORTANT RULING BY THE DEPARTMENT OF TRADE AND CUSTOMS OF THE COMMONWEALTH
WITH REFERENCE TO DUTY ON CANADIAN GOODS SHIPPED VIA
CANADIAN AND UNITED STATES PORTS.

Referring to report of Mr. D. H. Ross, Canadian commercial agent to Victoria, South Australia, Western Australia and Tasmania, in Monthly Report for August, 1905, page 300, full information is given therein respecting a certain Australian customs decision which came into effect on August 1, 1905.

Since the enforcement of this regulation, strong representations have been made to the Australian Commonwealth both by the Department of Trade and Commerce, through the Colonial Office, and the Canadian commercial agents in Australia, to amend this regulation, in view of the fact that it discriminated against Canadian railway and steamship companies.

These representations have been in part successful, and under date of January 30, the following cables were received from Messrs. Larke and Ross:—

‘MELBOURNE, AUSTRALIA.

‘Australian government has agreed that free on board values of Canadian goods to be shipped via Vancouver will be equivalent to value if to be shipped via New York. Duty will be paid on freight charges equal to cost to the American border. This takes effect immediately. Proportion freight charges must be specified in the invoice.’

(Signed) ‘D. H. ROSS.’

‘SYDNEY, AUSTRALIA.

‘Australian government has agreed at my request that Canadian goods via Vancouver shall pay the same duty on account of freight as if it should be shipped New York.’

(Signed) ‘J. S. LARKE.’

In future, therefore, Canadian exporters who desire to ship via Vancouver should obtain the exact cost of freight upon their goods from the point of shipment to the Canadian border as if they were going to ship via New York, and state same upon the invoice of goods consigned to Australia.

CANADIAN PREFERENTIAL TARIFF.

The following is a complete list to date of the countries mentioned in the Tariff Act of 1898, and subsequent Orders in Council, as being entitled to the benefits of Canada's preferential tariff:—

The United Kingdom;
The British colony of Bermuda;
The British colonies commonly called the British West Indies, including the following:—

The Bahamas;
Jamaica;
